

NEMO Calendar Tool control Status dashboard Requests **3** Safety Administration ▾ Welcome, Captain ⚙

Alerts & outages

Cleanroom closed this weekend
The cleanroom will be closed this weekend for maintenance

Current Facility usage

You are using the PECVD for the project named Project 2 since Thursday, June 21st, 2018 @ 4:36 PM.

You are logged in to the **Cleanroom** (logout). Usage time is being billed to the project named **Project 2**.

v 5.5.0 - Developed by CNST, NIST

NEMO Feature Manual

VERSION: 5.5.0

GitHub: <https://github.com/usnistgov/NEMO>

Date: 2024-04-18

Contents

Foreword	18
1 Introduction	20
1.1 Terms Of Use	21
1.2 Disclaimer	21
2 How NEMO works	22
2.1 NEMO Infrastructure	23
2.2 User model	25
2.3 User roles	26
2.4 Tool model	29
2.5 Area model (optional)	31
2.6 Supply model (optional)	32
2.7 Billing model	33
2.8 Controlling NEMO	33
3 NEMO user authentication	35
3.1 Web address	35

Foreword

The National Institute of Standards and Technology (NIST), Center for Nanoscale Science and Technology (CNST) NanoFab provides researchers with rapid access to state-of-the-art, commercial nanoscale measurement and fabrication tools and methods, along with associated technical expertise, at economical hourly rates. It is well equipped to process and characterize a wide range of nanoscale materials, structures, and devices.

In November 2013, CNST replaced its original lab management software with an in-house designed and developed web application. The NEMO web application is laboratory logistics software that strives to be intuitive and easy to use, making life easier in the lab. NEMO manages tool reservations, controls access to areas and tools, and streamlines logistics and communication. The program is being actively developed with new features, improvement, and bug releases approximately once a month.

NEMO is an open-source code released under the [NIST Software License](#). NEMO is free to use and modify, so that other labs can benefit from its development. The NEMO code is hosted at <https://github.com/usnistgov/NEMO>. The web application is written in the Python programming language and uses

Foreword

the Django web framework. NEMO is system independent (can run on Linux, Windows, or Mac) and does not require special hardware to operate.

NEMO is a customizable laboratory logistics software that allows users to reserve tools, view the operating status of instruments, and seek assistance from laboratory staff. NEMO can be customized to meet the specific needs of any business or laboratory. The software package has hundreds of customizable features, including the ability to:

- create custom user roles and permissions
- define the types of areas and instruments that can be reserved
- set up alerts for when instruments are in need of maintenance
- integrate with other laboratory sensors and systems

NEMO is a web-based application, so it can be accessed from any device with an internet connection. This makes it easy for users to reserve tools, view the status of instruments, and get help from laboratory staff, regardless of their location.

The CNST is looking to create a community of developers to collaborate on new features and improvements to NEMO. The community will allow for more rapid development, create a more vibrant and engaged community around NEMO, and help to ensure that NEMO meets the needs of a wider range of users, from researchers and educators to industry professionals.

Source code contributions are welcome via GitHub pull requests. We will review and evaluate these suggestions, and make changes to NEMO as needed. We will give priority to contributions that are well-written, well-tested, and consistent with the NEMO coding style.

The CNST believes that a developer community is essential for the continued development of NEMO. By working together, developers can improve NEMO and make it a more diverse, powerful and useful software platform for the community. Furthermore, the CNST thanks all developers who contribute to NEMO. Your contributions make NEMO a better tool for everyone.

CHAPTER 1

Introduction

This manual provides an overview of NEMO and detailed information on each webpage and describes how to configure NEMO to add or remove content to suit the end user's needs. The manual is organized to progress through NEMO's web pages in the order presented to a user accessing the website through the navigation bar and landing page.

The manual starts with a description of how NEMO works, then progresses through logging into the website, the site navigation bar and landing page, then details each user accessible page, then each staff accessible page, and finally each site administrator page. Most of the pages are accessible through the navigation bar however, to keep NEMO highly customizable, some pages must be added through the landing page if desired.

Every page description provides details of the page's direct access web address, how the page is used, how to configure optional features, any differences between the desktop view and mobile device view, and any customizations. To minimize the need for direct code changes, many of NEMO's features automati-

Chapter 1 Introduction

cally hide if they have not been configured.

1.1 Terms Of Use

This software was developed at the National Institute of Standards and Technology (NIST) by employees of the Federal Government in the course of their official duties. Pursuant to title 17 Section 105 of the United States Code this software is not subject to copyright protection and is in the public domain. NEMO is an experimental system. NIST assumes no responsibility whatsoever for its use by other parties, and makes no guarantees, expressed or implied, about its quality, reliability, or any other characteristic. We would appreciate acknowledgment if the software is used. This software can be redistributed and/or modified freely provided that any derivative works bear some notice that they are derived from it, and any modified versions bear some notice that they have been modified.

1.2 Disclaimer

This manual identifies certain commercial equipment, instruments, and materials to specify the experimental procedure. Such identification does not imply recommendation or endorsement by the National Institute of Standards and Technology, nor does it imply that the equipment, instruments, and materials identified are necessarily the best available for the purpose.

CHAPTER 2

How NEMO works

To better understand the features presented in this manual, an overview of NEMO and the key relationships and terms used throughout the manual will be provided.

Chapter 2 How NEMO works

2.1 NEMO Infrastructure

NEMO is a scalable web application whose features can be run as a distributed application across multiple servers and devices or condensed to run on a single server without additional features. The NEMO components shown below detail the required and optional network connected parts of NEMO (Figure 2.1). A basic implementation of NEMO can be run with a web server, database, and user authentication as a single standalone server.

Figure 2.1: *NEMO topographical map*

- Production web server – (required) runs NEMO code.
- Database – (required) stores NEMO data.

Chapter 2 How NEMO works

- Authentication server – (required) authenticates users allowed to access NEMO.
- Development web server – (optional) write and test custom code changes without impacting the production environment.
- NEMO entrance tablets – (optional) use NEMO to control access to labs in conjunction with door interlocks.
- NEMO kiosks – (optional) allow users quick access to NEMO via badge reader to enable/disable tools and make reservations.
- Tool interlocks – (optional) physically disable tools to prevent unauthorized access. This is typically disabling a keyboard and mouse, monitor, or tool interlock via relay control.
- Door interlocks – (optional) use NEMO to trigger door strikes on access-controlled doors via relay control.

Chapter 2 How NEMO works

2.2 User model

The user model begins with an account. Accounts are the highest level grouping and can be thought of in terms of who the bill is sent to. An account could be a business using the lab, a school in a university, or some other operational unit. Accounts are discussed in the accounts and projects chapter [22](#).

Each account will have one or more projects. Projects allow the account to distinguish what department, group, or project leader is using the account. All activity in NEMO is charged to a project. Projects are discussed in the accounts and projects chapter [22](#).

Each project will have one or more users. Users can be associated with multiple projects and even projects from different accounts (Figure [2.2](#)). Users are discussed in the users chapter [38](#).

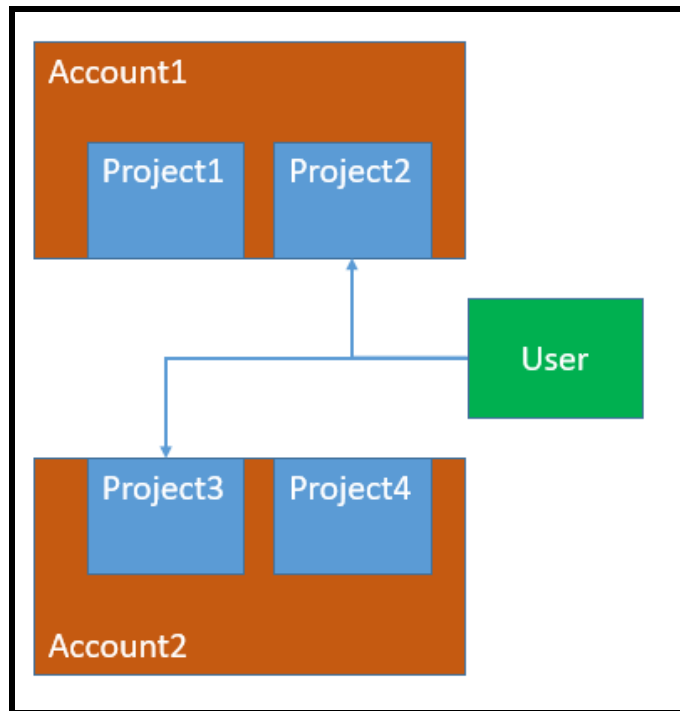

Figure 2.2: *User model*

Chapter 2 How NEMO works

2.3 User roles

NEMO has six types of distinct users to limit access to only the pages needed by the user. User roles can be set in the users table of the database, discussed in the Detailed administration → Users section [42.68](#).

- The first role is “user” which has basic access to a predefined set of features and functions that allow a user to do work in the facility. This is your regular facility user.
- The second role is “staff” which has all of the basic access of a “user” but can override certain rules that restrict a user as well as an additional set of features specific to staff working in the facility, including using a tool on behalf of a user, access to the maintenance and configuration agenda pages, withdraw consumables etc. . This is for facility/technical staff.
- The third role is “user office” which has all of the basic access of a “user” but can also manage user’s information, accounts, projects, and see billing, withdraw consumables etc. This is for staff managing user accounts and projects.
- The fourth role is “accounting officer” which has all of the basic access of a “user” but can also manage accounts, projects, and billing information.
- The fifth role is “facility manager” which has all of the basic access of a “user” but can also check abuse, manage staff status and absences in the status dashboard, users, and billing information. They also receive and approve/deny access and adjustment requests.
- The sixth level is “administrator” which has all of the access of every other role (with the exception of approving/denying requests), along with admin access to configuration and database administration. NEMO must have at least one user with “administrator” role that can setup customizations and configure the website.

Chapter 2 How NEMO works

The following is a (non-exhaustive) list of features and permissions for each user role (Table 2.1).

Feature\Role	User	Staff	User Office	Accounting	Manager	Admin
Make reservations	✓	✓	✓	✓	✓	✓
Control qualified tools	✓	✓	✓	✓	✓	✓
Request temporary access	✓	✓	✓	✓	✓	✓
Create buddy request	✓	✓	✓	✓	✓	✓
Check status dashboard	✓	✓	✓	✓	✓	✓
Check sensor data	✓	✓	✓	✓	✓	✓
Detailed admin (with specific model permission)	✓	✓	✓	✓	✓	✓
Email broadcast		✓	✓	✓	✓	✓
User information (view)		✓	✓	✓	✓	✓
Publish news		✓	✓	✓	✓	✓
Create alerts		✓	✓			✓
Manage area access		✓	✓			✓
Supplies		✓	✓			✓
Record training		✓				✓
Configuration agenda		✓				✓
Check/update maintenance		✓				✓
Qualifications		✓				✓
Start staff charges		✓				✓
Manage resources		✓				✓
Check user/project billing			✓	✓	✓	✓
Create accounts			✓	✓	✓	✓
Create projects			✓	✓	✓	✓
User information (edit)			✓		✓	✓
Recurring charges			✓		✓	✓
Abuse					✓	✓

Chapter 2 How NEMO works

Manage staff absences					✓	
Approve temporary access					✓	
Receive all task updates					✓	
Access API						✓
Access customization						✓
Impersonate other users						✓

Table 2.1: *User roles*

Chapter 2 How NEMO works

2.4 Tool model

Tools are the things a user will use, and that the lab is interested in keeping track of. There are many features associated with tools and most are optional (Figure 2.3). Tools are defined in the tool table of the database discussed in the Detailed administration → Tools section 42.61.

Figure 2.3: *Tool model*

- Training – users must be qualified to use a tool. Training and tool qualification is discussed in the training chapter 37.
- Reservations – qualified users can make reservations for tools with cus-

Chapter 2 How NEMO works

tomizable rules to limit reservation abuse. Reservations are discussed in the Calendar → Reservations section 5.4. Reservation rules are defined for each tool in the tool table of the database discussed in the Detailed administration → Tools section 42.61.

- Tasks – allow users to report problems with tools and documents repairs. Tasks are discussed in the tool control chapter 6.
- Resources – (optional) allows a tool to depend on common facilities which allows shutting down multiple tools by disabling a resource. Resources are discussed in the resource chapter 34.
- Configuration – (optional) allows users to select the required configuration of a tool at reservation time and communicates the configuration request to staff. Configurations are discussed in the Configuration Agenda chapter 26.
- Consumable – (optional) allows lab to charge users for consumables used during a process through questions after usage. Consumables are discussed in the supplies chapter 36.
- Area – (optional) allows limiting tool use unless user is currently logged into a specific area. Areas are configured in the areas table of the database discussed in the Detailed administration → Areas section 42.8.
- Interlock – (optional) allows physical disabling of tool when not logged into by a qualified user. Interlocks are configured in the interlocks table of the database discussed in the Detailed administration → Interlocks section 42.27.

Chapter 2 How NEMO works

2.5 Area model (optional)

Areas can optionally be defined in NEMO to group tools in common places. An area can optionally have doors associated with it and permission for the door can be given to users as physical access levels to control when they can access an area (Figure 2.4). Areas can optionally be configured to restrict access to doors and tools unless the user has a current area reservation. Areas are configured in the areas table of the database discussed in the Detailed administration → Areas section 42.8.

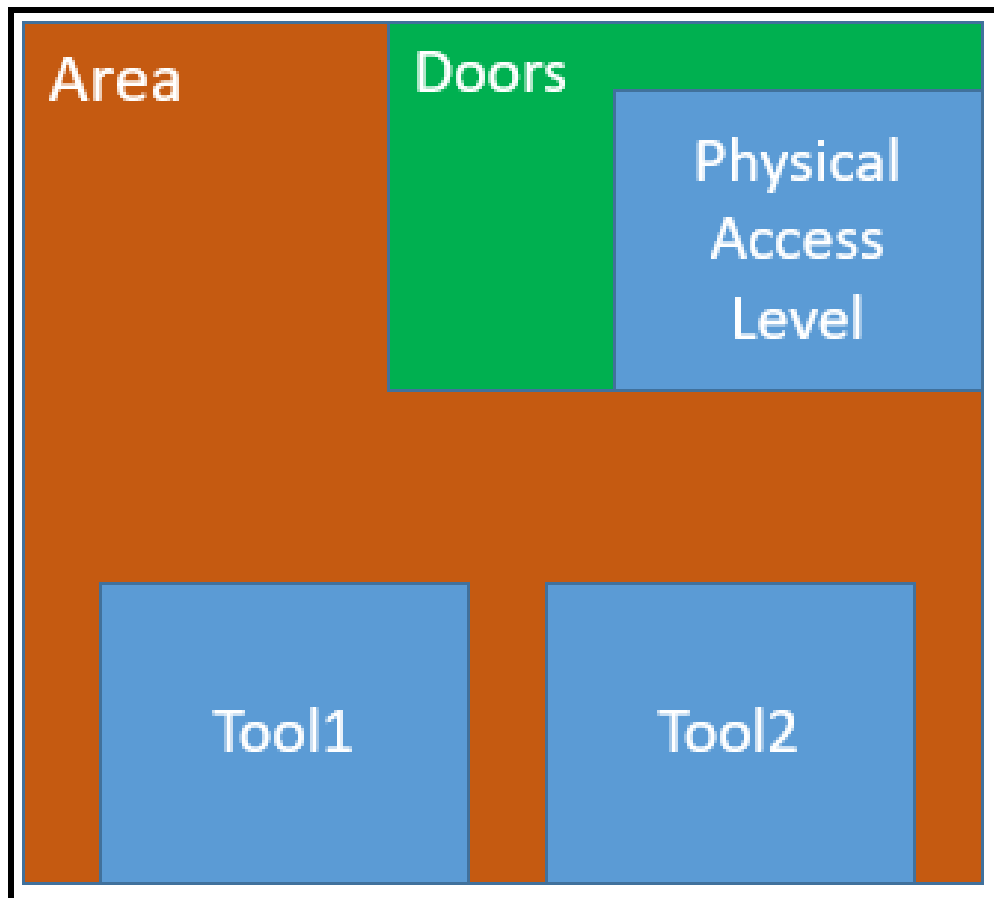

Figure 2.4: Area model

Chapter 2 How NEMO works

2.6 Supply model (optional)

NEMO has the ability to track supplies and their distribution to users. In addition, the supply model is used to track consumables used during tool runs (Figure 2.5). Consumables and supplies are discussed in the supplies chapter 36.

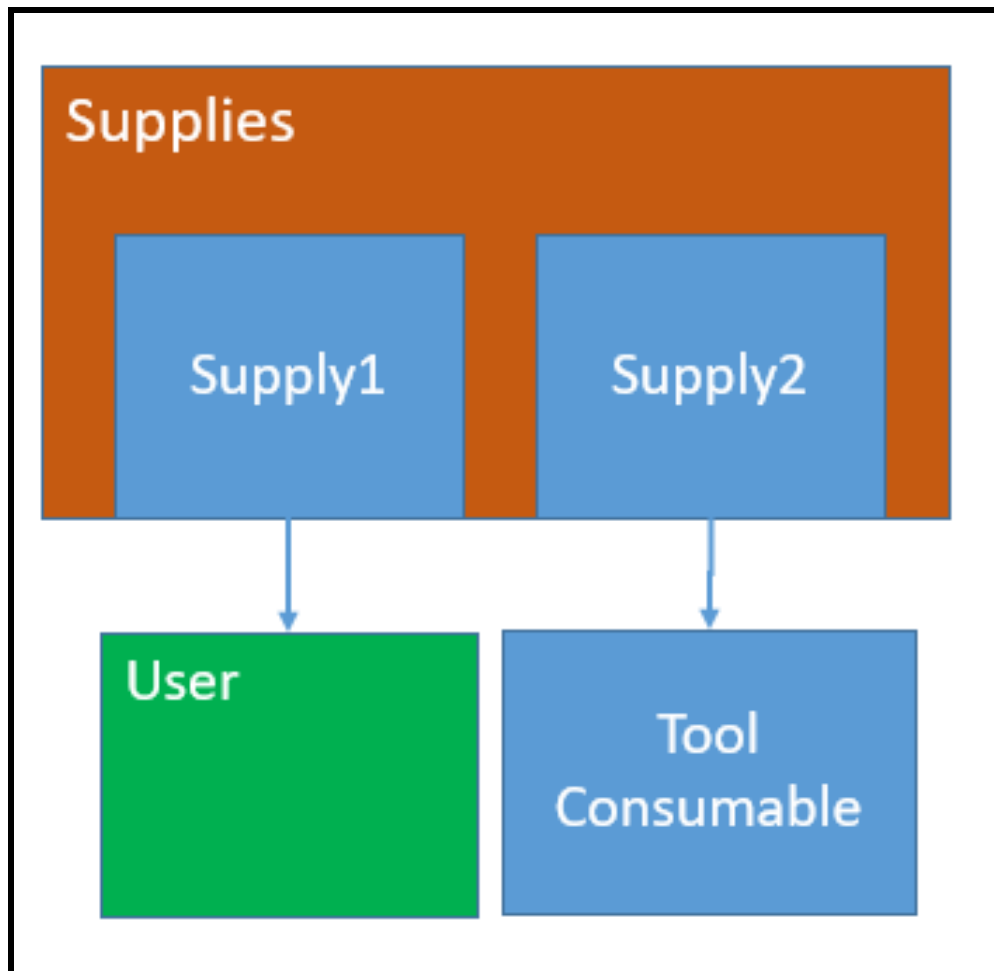

Figure 2.5: Supply model

Chapter 2 How NEMO works

2.7 Billing model

NEMO tracks 6 types of billing by default. The data is accessible directly from the database tables or through the API interface. The database tables are discussed in the Detailed administration chapter [42](#). The API is discussed in the API access chapter [45](#).

- Tool usage – Tool usage is tracked in the usage events table of the database.
- Area access – Area access is tracked in the area access records table of the database.
- Consumables – Consumables, both supplies sold to users and supplies consumed during tool runs are tracked in the consumable withdraws table of the database.
- Staff charges – Staff charges, where a staff member performs work on behalf of a user, are tracked in the staff charges table of the database.
- Missed reservations – Missed reservation, where a user fails to show up for a reservation before a grace period expires, are tracked in the reservations table of the database.
- Training sessions – Training sessions are tracked in the training sessions table of the database.

2.8 Controlling NEMO

NEMO is a web application is written in the Python programming language and uses the Django web framework. All NEMO functionality is available using any common web browser by logging into the website to perform any needed actions. In addition, NEMO provides two dedicated interfaces to access NEMO

Chapter 2 How NEMO works

controlled doors (Entrance tablet) and to provide a quick interface to access and reserve tools (Kiosk). The entrance tablet feature is discussed in the entrance tablet chapter [47](#). The kiosk features are discussed in the kiosk chapter [46](#).

CHAPTER 3

NEMO user authentication

The first step to accessing the NEMO website is the authentication log in. A successful log in requires authentication against the institutions' account system and an active user name in NEMO. NEMO user creation and user status is discussed in the Users chapter [38](#).

3.1 Web address

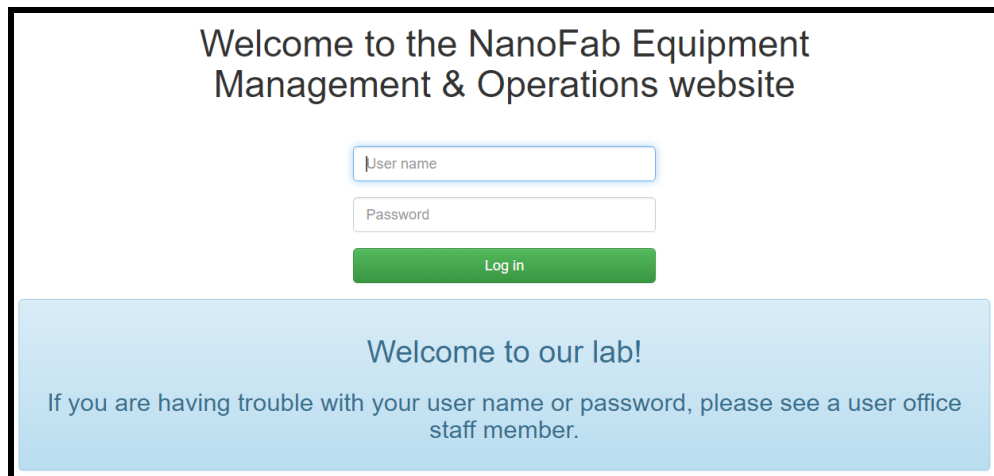

The login page is accessible at `site-address/login`. The logout page is accessible at `site-address/logout`.

Chapter 3 NEMO user authentication

3.2 Usage

3.2.1 LDAP authentication

If LDAP is used for authentication, the log in page (Figure 3.1) is displayed. Enter a valid user name and password, then click 'Log in'.

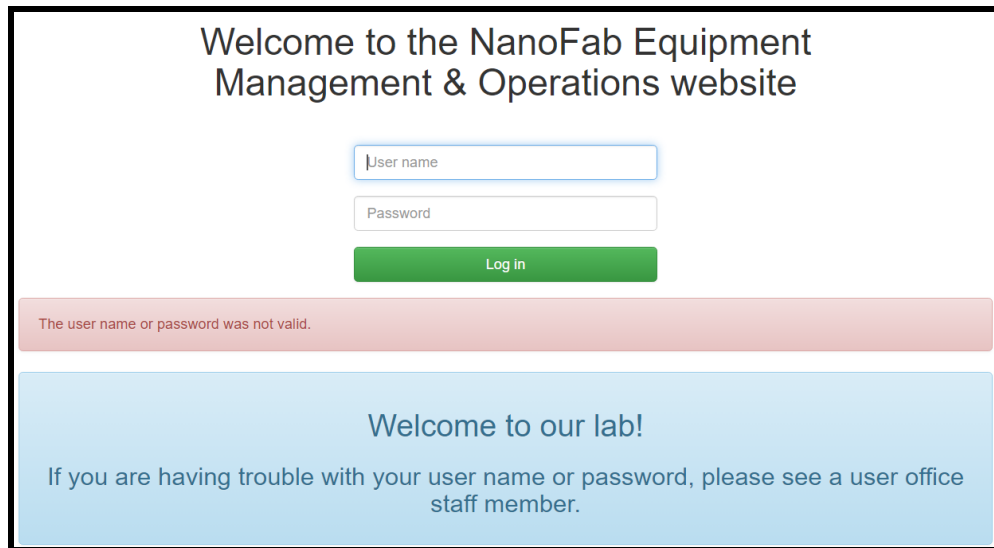

The screenshot shows a web page titled "Welcome to the NanoFab Equipment Management & Operations website". It features a login form with two input fields: "User name" and "Password". Below the fields is a green "Log in" button. At the bottom of the page, there is a light blue banner with the text "Welcome to our lab!" and a message: "If you are having trouble with your user name or password, please see a user office staff member."

Figure 3.1: *NEMO LDAP Login Page*

Upon successful log in, the user will be redirected to the landing page in section 4.5.

Chapter 3 NEMO user authentication

If invalid user credentials are entered, the user will be prompted in red with, “The user name or password was not valid” (Figure 3.2). In this case, enter a valid user name and password to continue.

The screenshot displays the login interface for the NanoFab Equipment Management & Operations website. At the top, the title reads "Welcome to the NanoFab Equipment Management & Operations website". Below the title are two input fields: "User name" and "Password", followed by a green "Log in" button. A red error message banner at the bottom of the login area states "The user name or password was not valid." Below this banner is a blue informational box with the text "Welcome to our lab!" and "If you are having trouble with your user name or password, please see a user office staff member."

Figure 3.2: *NEMO LDAP Authentication Failed*

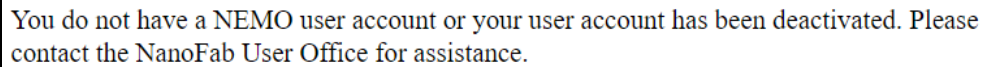

Chapter 3 NEMO user authentication

3.2.2 Remote user authentication

If a remote user authentication such as Kerberos is used, authentication is handled behind the scenes and users will not be prompted for a username and password.

Upon successful log in, the user will be redirected to the landing page in section 4.5.

If the user does not have an active NEMO account, they will be denied access to NEMO (Figure 3.3). This message is customizable and is described in the Customization → NanoFab failed login section 40.5.3.

You do not have a NEMO user account or your user account has been deactivated. Please contact the NanoFab User Office for assistance.

Figure 3.3: *Remote User Authentication Failure Message*

3.3 Mobile device authentication

There are no special user authentication views for mobile devices. The authentication procedures above should be followed.

3.4 Authentication customizations

3.4.1 Authentication

Authentication is configured to set LDAP or Remote User log in via the settings.py file described in the Configuring NEMO settings → Authentication Backends section 48.1.1.

Chapter 3 NEMO user authentication

3.4.2 Customizable Login Banner

The log in page has a customizable html banner as shown above in blue. If a banner file has not been loaded, nothing will be shown. Customization of the login banner is described in the Customization → Login banner subsection [40.5.2](#).

3.4.3 Remote User Authorization Failure Message

If NEMO uses remote user authentication and a user is denied access to NEMO because they do not have an active user name, a failure message is displayed. This message is customizable and is described in the Customization → NanoFab failed login subsection [40.5.3](#).

CHAPTER 4

Navigation Bar

The navigation bar is available at the top of every NEMO user page. Users that are designated as staff have visibility to more features than non-staff users. The distinction between staff and non-staff is set in the Detailed administration → Users dialog section [42.27](#).

4.1 User Navigation Bar

The default navigation bar (Figure 4.1) provides users with useful information and quick links to the most common NEMO features.

Figure 4.1: *Navigation bar with default features*

NEMO – Link to NEMO landing page section [4.5](#).

Chapter 4 Navigation Bar

Calendar – Link to calendar page chapter 5.

Tool Control – Link to tool control page chapter 6.

Status dashboard – Link to status dashboard page 7.

Requests – This link is optional and is only visible if configured. Link to requests page chapter 8.

Safety – Link to safety page chapter 10.

Welcome – Identifies the user currently logged into NEMO. This can help reduce confusion in labs where users share computers to access NEMO.

Preferences  – Link to user preference page chapter 19.

Logout – Clicking this link will log the current user out of NEMO and return to the login page. The logout link will only be displayed if LDAP authentication is used, and the button is enabled (see customizations below).

4.2 Staff Navigation Bar

The navigation bar for staff (Figure 4.2) includes the same information for users and adds the Administration menu and an indicator if a staff member is charging time to a user.

Figure 4.2: *Navigation bar with additional staff features*

Chapter 4 Navigation Bar

Administration – Drop down link list to the NEMO administration features that require staff or super user rights to access (Figure 4.3).

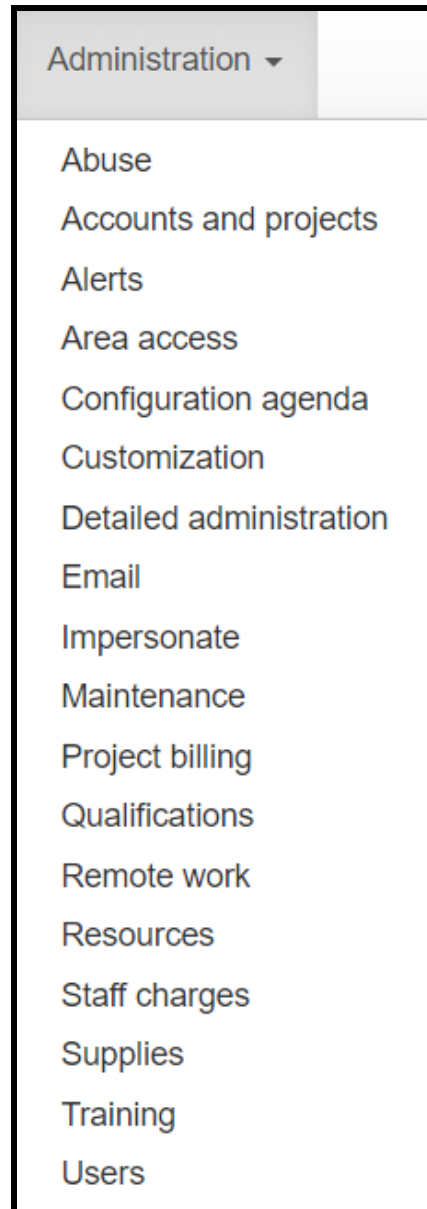

Figure 4.3: *Navigation bar administration menu*

Chapter 4 Navigation Bar

Charging Staff Time – If a staff member is charging staff time to a user, it is noted in red on the navigation bar, so the staff member remains aware of accumulating charges. Hovering over ‘Charging staff time’ will show details of the staff charge including who, what project, and when the charges started (Figure 4.4). Clicking ‘Charging staff time’ will take you to the Staff charges page section 35.

Figure 4.4: Charging staff time details

4.3 Mobile device navigation bar

The navigation bar will automatically change to a mobile-type menu icon drop down (Figure 4.5) if the window width is too small to display all information. The links provided for users and staff are maintained. However, there is no indication of charging staff time and the user name is not indicated. In addition, the preferences icon will change to a menu item.

Figure 4.5: Navigation bar for small windows with menu icon

Chapter 4 Navigation Bar

Clicking on the menu icon will drop down the menu (Figure 4.6).

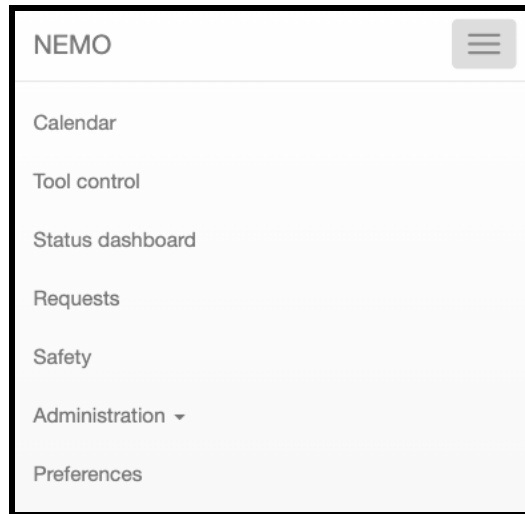

Figure 4.6: *Mobile device drop down menu*

4.4 Navigation bar customizations

4.4.1 Logout button

The logout button is configured to display or hide via the settings.py file described in the Configuring NEMO settings → Templates subsection [48.1.2](#).

Chapter 4 Navigation Bar

4.5 Landing Page

The landing page (Figure 4.7) is the home page for NEMO. It provides users and staff with important information as well as quick links that are fully configurable by your organization. In addition, first time lab users are prompted to complete a lab rules tutorial to reinforce important policies.

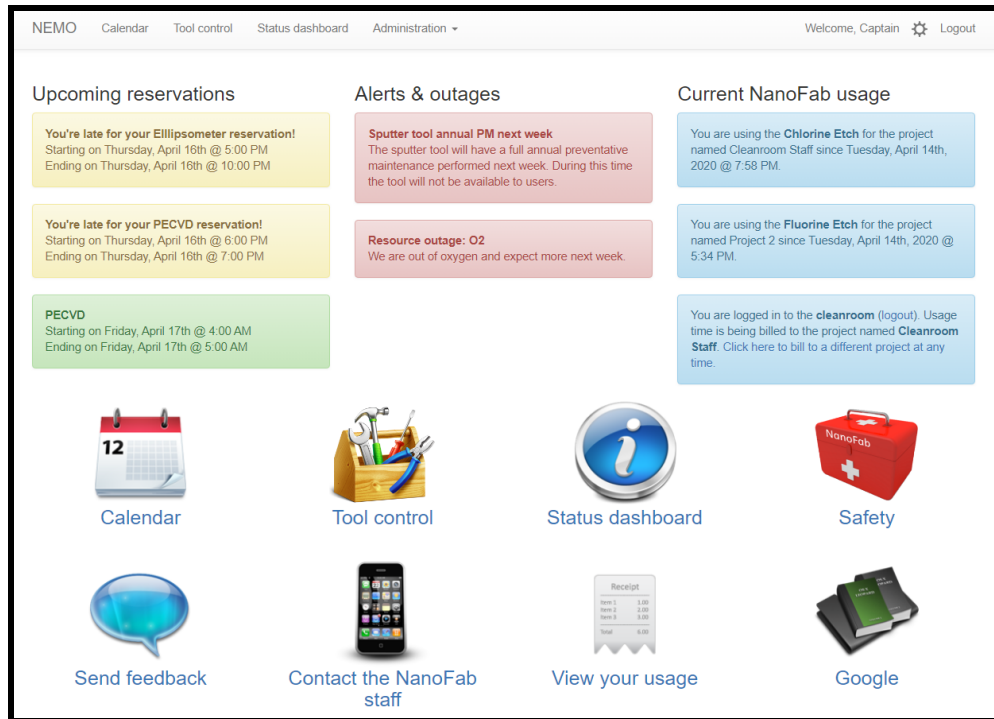

Figure 4.7: NEMO landing page

4.6 Web address

The landing page is accessible as the home page of NEMO. For example, www.nemo.com. The page can also be accessed from the navigation bar menu item "NEMO".

Chapter 4 Navigation Bar

4.7 Upcoming reservations

The landing page will list the next three reservations in two background colors, yellow or green. Each reservation box details the tool, start date/time, and end date/time. Details about reservations and how to make them can be found in the Calendar page → Reservations section [5.4](#).

Clicking on an upcoming reservation will take you to the Tool control page section [6](#) for the reserved tool.

Yellow – indicates that you are late for your reservation (Figure [4.8](#)). Once you log into a late reservation, it will no longer show up on the list. If you log out before your reserved end time, it may reappear.

Figure 4.8: *Late reservation dialog box*

Green – indicates a future reservation that has not started yet (Figure [4.9](#)).

Figure 4.9: *Future reservation dialog box*

Chapter 4 Navigation Bar

4.8 Alerts and outages

On occasion, the lab staff need to communicate important information to users. Alerts and outages (Figure 4.10) are shown in red to indicate their importance. Alerts and outages are configured through the Alerts page chapter 23.

Figure 4.10: *Alert notification dialog box*

Lab resource outages are also indicated in red (Figure 4.11). Resources are fully definable by the organization and associated with tools. Details of the resource feature and how it is used can be found on the Resources page chapter 34.

Figure 4.11: *Resource outage notification dialog box*

Chapter 4 Navigation Bar

4.9 Current NanoFab usage

The landing page will list all current tool usage and lab area access in blue background boxes.

4.9.1 Tool Usage

Each tool usage dialog box (Figure 4.12) details the tool and start date/time. Clicking on a tool in use dialog box will take you to the Tool control page of the tool, see chapter 6.

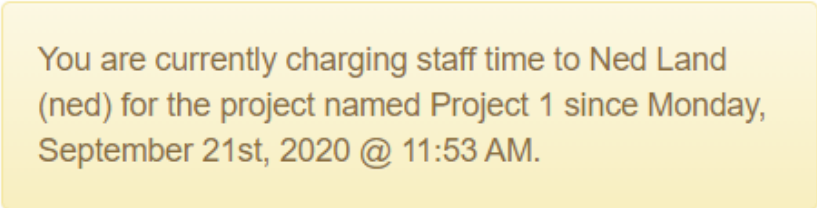

You are using the **Chlorine Etch** for the project named Cleanroom Staff since Tuesday, April 14th, 2020 @ 7:58 PM.

Figure 4.12: *Tool usage dialog box*

4.9.2 Staff Charges

If a staff member is actively charging staff time to a user the details are displayed including the user, project, and start time. Clicking on the staff time dialog box will take you to the Staff charges page, see chapter 35.

You are currently charging staff time to Ned Land (ned) for the project named Project 1 since Monday, September 21st, 2020 @ 11:53 AM.

Figure 4.13: *Staff charge dialog box*

Chapter 4 Navigation Bar

4.9.3 Lab area access

The lab area access dialog details which lab you are in and which project your lab time is billed to. Area access history is maintained in the database. Lab areas are configured through the Detailed administration → Areas page in section 42.8.

4.9.3.1 Manual area log in

NEMO can be configured to accommodate manual area log in through the landing page. If manual login is enabled, a green box under Current NanoFab usage provides the interface to log in to an area (Figure 4.14).

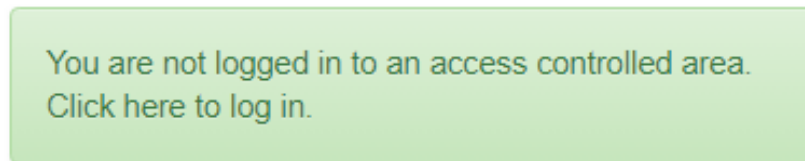

Figure 4.14: *Manual area login dialog box*

Chapter 4 Navigation Bar

Clicking anywhere on the box will take you to the self-log-in dialog (Figure 4.15).

- If you have multiple projects, a radio button list will appear, select a project.
- If you only have one project, your active project will be selected automatically.
- If there are multiple areas, a radio button list will appear, select an area.
- Click Log in to log into the area.

The screenshot shows a dialog box titled "Log in to an access controlled area". It contains two sections of radio button options. The first section is titled "Charge area access to which project?" and lists three options: "Cleanroom Eng", "Cleanroom Maint", and "Cleanroom Training". The second section is titled "Log in to which area?" and lists two options: "Cleanroom" and "CMP lab". At the bottom left of the dialog is a green "Log in" button.

Figure 4.15: *Self log in dialog*

Upon success, the user will be logged in to the selected area using the selected project. There are several reasons a user may be denied log in including expired user accounts, no active projects, area closures, resource outages, and more. Additional details about log in errors can be found in the Entrance tablet → Log in errors chapter 47.

Chapter 4 Navigation Bar

4.9.3.2 Changing projects

If you have multiple projects, there will be a link to bill your area access time to a different project (Figure 4.16) than the one you initially selected when logging in.

Figure 4.16: Area usage dialog box

Clicking the link 'Click here to bill to a different project at any time' will take you to the change project page (Figure 4.17). Click the project name button to change the project. Projects are configured on the Accounts and projects chapter 22.

Figure 4.17: Bill area access to a different project

4.9.3.3 Manual area log out

NEMO can be configured to accommodate manual area log out through the landing page. If manual area log out is enabled, a logout link will appear next to the area name (Figure 4.18). Click the link to log out of the area (Figure 4.18).

Chapter 4 Navigation Bar

You are logged in to the **cleanroom** (logout). Usage time is being billed to the project named **Project 2**.

Figure 4.18: Area manual log out dialog box

4.10 Configurable Quick Links

The NEMO landing page can be configured with custom icon links (Figure 4.19) that point to commonly used features of NEMO, organizational internal web pages, and external internet pages. Links can be configured with a custom icon, description, how to open, staff only, and desktop or mobile device rendering. Landing page quick links can be configured with a custom icon, description, how to open, staff only, and desktop or mobile device rendering. Setup details can be found under Detailed administration → Landing page choices section 4.28.

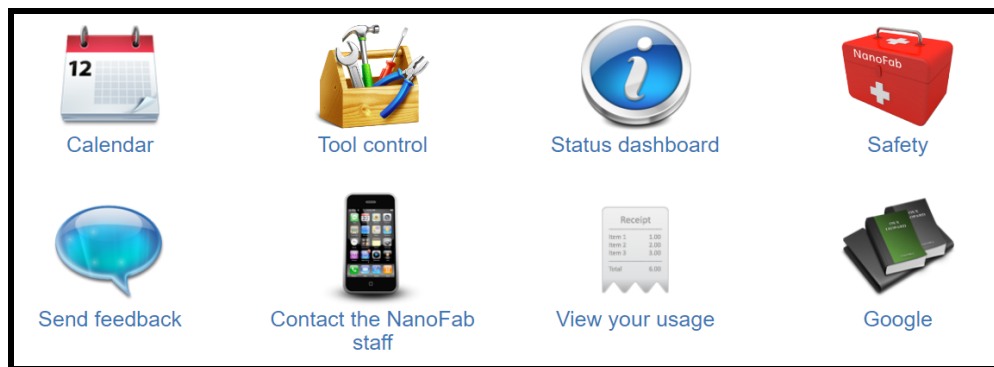

Figure 4.19: Landing page quick links

Chapter 4 Navigation Bar

4.11 Facility Tutorial

The facility rules tutorial is an opportunity to provide new users with a tutorial about your lab operating procedures and rules. However, it is an optional and fully configurable tutorial that can be triggered in a user's profile. In addition, it is setup to be self-completing so after a user successfully completes it, the trigger will be unchecked. If triggered, it will not allow any reservations or tool log ins until complete. The trigger is set in the user's profile and by default is set upon user creation. NEMO user profiles are discussed in the Users chapter 19. Details for creating the tutorial, tutorial completion email template, and email address can be found in the customization chapter 40.

Each time a user with the tutorial trigger set logs into NEMO, they will receive a prompt to begin the tutorial (Figure 4.20). Clicking anywhere in the dialog box will start the tutorial. The tutorial page can also be reached at any time regardless of the training required setting. The tutorial page is accessible at `site-address/facility_rules_tutorial/`. For example,

http://www.nemo.com/facility_rules_tutorial/.

Figure 4.20: *NanoFab rules tutorial dialog box*

If the tutorial has not been configured but a user has been checked, an error message will be returned stating, “The NanoFab rules tutorial has not been customized for your organization yet.”

Upon completion of the tutorial, the training required checkbox in the user profile will be cleared and an email will be sent if the abuse email address has

Chapter 4 Navigation Bar

been configured and the tutorial summary email template has been configured. The user will be prompted with a completion dialog (Figure 4.21). Click the continue button to return to the landing page.

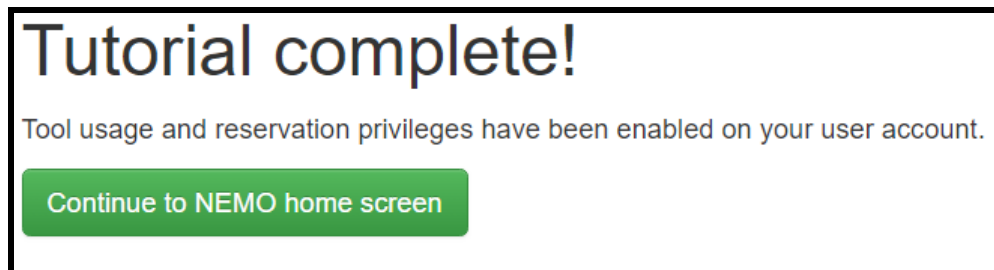

Figure 4.21: *Landing page tutorial complete dialog*

Chapter 4 Navigation Bar

4.12 Mobile device landing page

The landing page will automatically change to a mobile display by stacking information into a single scrollable column (Figure 4.22). Information is prioritized in the order of upcoming reservations, alerts & outages, current NanoFab usage, then quick links. Functionality remains the same. The landing page quick links can be configured to only display on mobile devices or only on desktop computers.

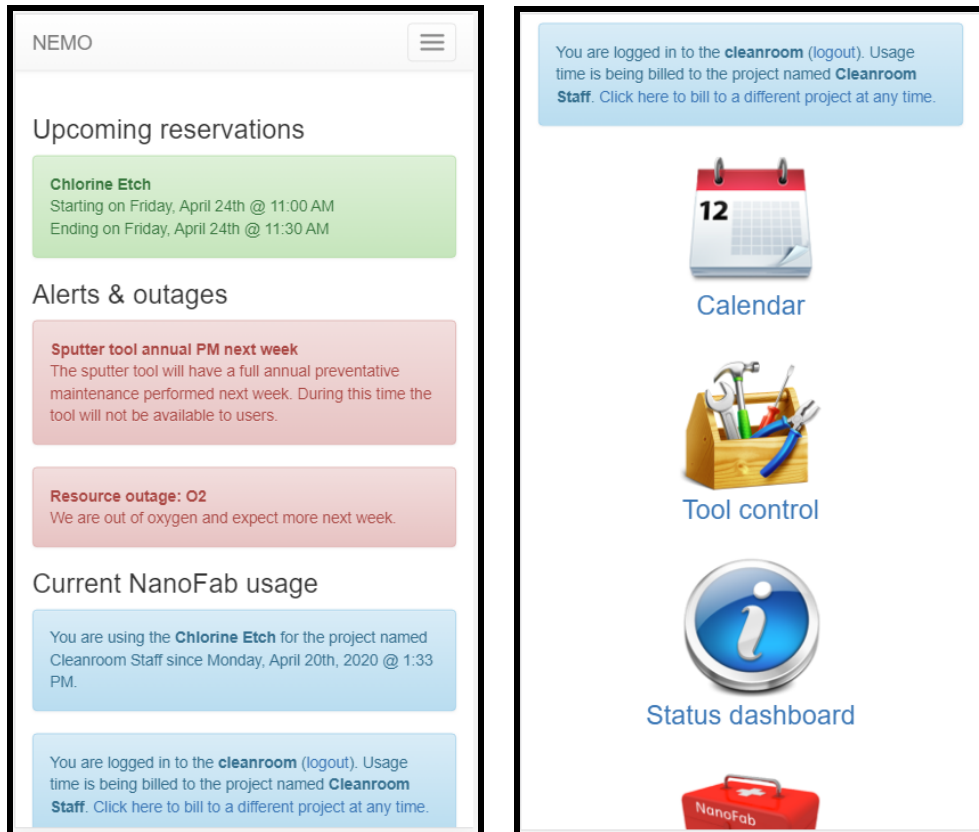

Figure 4.22: Mobile device view of landing page

Chapter 4 Navigation Bar

4.13 Landing page customizations

4.13.1 Area manual log in and log out

The landing page can be configured to allow manual area log in and/or manual area log out. Setup details can be found under Customization → Application settings section [40.1](#).

4.13.2 Configurable quick links

Landing page quick links can be configured with a custom icon, description, how to open, staff only, and desktop or mobile device rendering. Setup details can be found under Detailed administration → Landing page choices section [42.28](#).

4.13.3 Lab tutorial setup

The lab tutorial is a custom JavaScript enabled html page. Details of how to setup and load the tutorial can be found under Customization → NanoFab rules tutorial section [40.5.5](#).

CHAPTER 5

Calendar

The calendar page is the main interface for making area and tool reservations, viewing reservation schedules, and reviewing usage. The page features a side bar to quickly navigate between areas and tools and shows each tool's status as well as links to review your reservation schedule and actual usage; and the calendar which can be set for day, week, or month resolution to graphically show your reservation and usage information. Several reservation policies are implemented to limit abuse and ensure fair access to all users. The calendar page will automatically refresh every 30 seconds updating the current calendar view and all tool status icons.

5.1 Web address

The calendar page is accessible at [site-address/calendar/](#). The page can also be accessed from the navigation bar menu item "Calendar".

Chapter 5 Calendar

5.2 Calendar Side bar

The side bar allows the calendar mode and an area or tool to be selected and the personal schedule to be selected (Figure 5.1). If calendar overview options are enabled in the Customization → Calendar settings (see section 40.2), those links will be displayed in the sidebar as well.

Area Notes:

- The area section of the side bar is only visible if an area is configured to require a reservation for access.
- Area categories are optional.
- Area creation and configuration are discussed in the Detailed administration → Areas section 42.8.

Tool Notes:

- The tool section of the side bar is only visible if tool have been configured.
- Tool categories are required.
- Tool creation and configuration are discussed in the Detailed administration → Tools section 42.61.

Chapter 5 Calendar

The image shows a vertical sidebar for a calendar application. At the top is a button labeled "Reservations" with a downward arrow. Below it is a button with a double-headed arrow icon. A search bar contains the text "Search for a tool or an area". Underneath are two links: "Personal schedule" and "All tools". A "Clear Selection" button is positioned below these links. The sidebar is divided into two main sections by dashed lines. The first section is titled "Areas" and includes "Campus - 2 / 10" with a person icon, a checked checkbox for "Cleanroom - 2 / 5" with a person icon, and an unchecked checkbox for "CPM Lab". The second section is titled "Tools" and includes "Chemical Vapor Deposition" with an unchecked checkbox for "Atomic Layer Deposition", a checked checkbox for "PECVD" with a person icon, and "Dry Etch" with a checked checkbox for "790 RIE Middle" and an unchecked checkbox for "790 RIE Nitride Left".

Figure 5.1: *Calendar side bar*

5.2.1 Calendar Mode

The top button on the side bar controls what information the calendar displays, and which calendar functions are available (Figure 5.2). Each mode is detailed in the following sections.

Chapter 5 Calendar

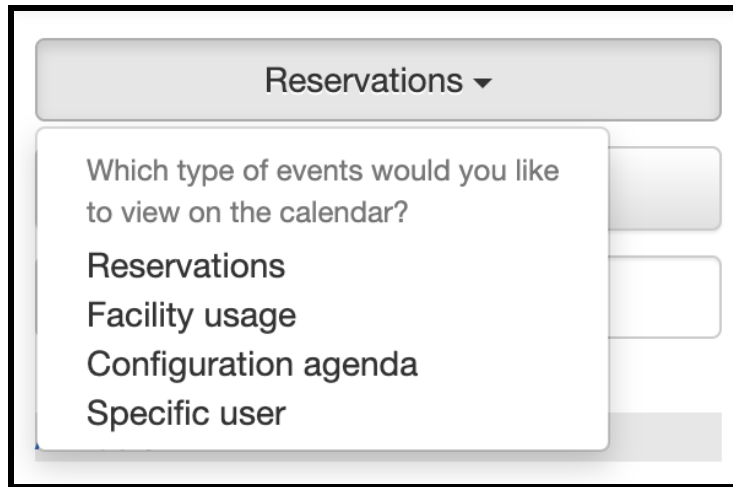

Figure 5.2: *Calendar mode selection*

5.2.2 Find the area or tool of interest

The expand and contract toggle button (Figure 5.3) provide a shortcut to open or close the area and tool list.

Figure 5.3: *Expand and contract toggle button*

Clicking the expand/contract button will fully expand the area and tool list so all categories, sub-categories, areas, and tools are listed (Figure 5.1).

Chapter 5 Calendar

Clicking contract will close the area and tool list so only top categories are listed (Figure 5.4).

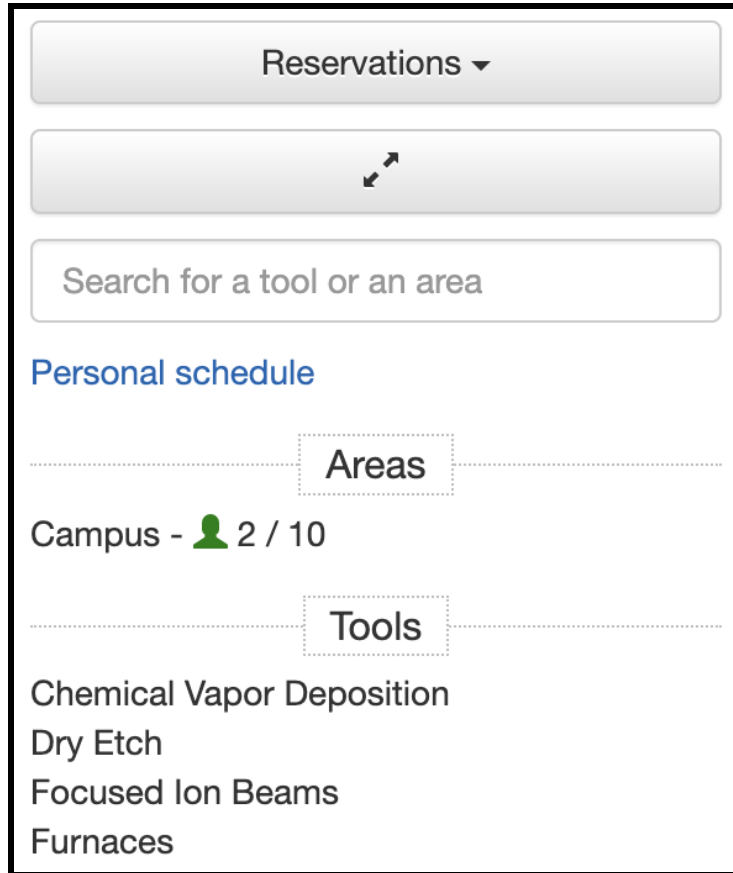

Figure 5.4: *Tool list contracted*

Chapter 5 Calendar

To find an area or tool directly, enter the name in the search dialog (Figure 5.5) then select the name of the list returned. The return list updates automatically as typed, and a tool can be clicked from the list at any time (Figure 5.6). Once clicked, the list is expanded to show the area or tool clicked and that area or tool is selected.

Figure 5.5: *Tool search dialog*

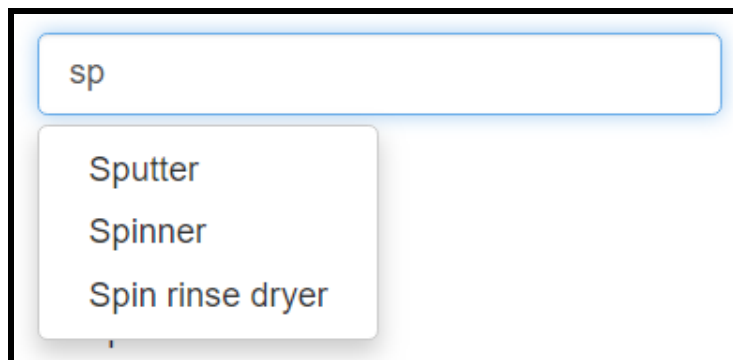

Figure 5.6: *Tool search return list*

5.2.3 Personal schedule

The personal schedule link appears as the first item in the tool list and provides a way to show reservations or usage across all tools for the current user. Note that since a specific tool is not selected while viewing a personal schedule, reservations cannot be made in this mode.

Chapter 5 Calendar

5.2.4 Overview options

Overview options can be enabled in the Customization → Calendar settings section 40.2. Once enabled, you will have the options to see “All tools”, “All areas” and “All tools and areas” and non staff users can have a “Only show qualified tools” extra button depending on the settings you decide to enable. As their name indicates, those options will allow the user to see all tools, areas or both in the calendar. Those links will also work with both the “Reservations” and “Facility usage” event feeds (Figure 5.7).

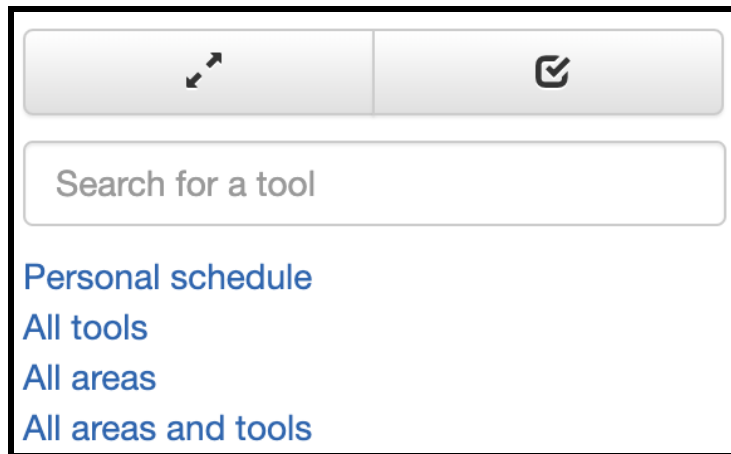

Figure 5.7: Tool overview options

5.2.5 Hierarchy of the area and tool list

The area and tool list are displayed in alphabetical order by top level category, then by second level category, etc. If both areas/tools and sub-categories exist at any level, areas/tools are listed first in alphabetical order, then sub-categories are listed in alphabetical order (Figure 5.8). All tools must have at least one top level category. Area categories are optional and set in the area table discussed in the Detailed administration → Areas section 42.8. Tool categories are set in the tool table and are discussed in the Detailed administration → Tools

Chapter 5 Calendar

section [42.61](#).

Figure 5.8: Example of category and tool mixed listing

5.2.6 Area list icons

Each area lists information to determine the status of the area. A person icon indicates the occupancy status according to color. A fraction follows indicating the number of occupants versus the total number allowed (Figure 5.9).

Cleanroom -  3 / 5

Figure 5.9: Example Area with icons

 The occupancy of this area is low and additional users will be allowed into the area. Hovering over the icon shows a list of current users.

 The occupancy is close to the limit. Hovering over the icon shows a list of current users.

 The occupancy is at or above the limit and users will not be allowed to enter. Hovering over the icon shows a list of current users.

The list of current users is color coded by role. Users in white, staff in green, and service personnel in orange (Figure 5.10).

Chapter 5 Calendar

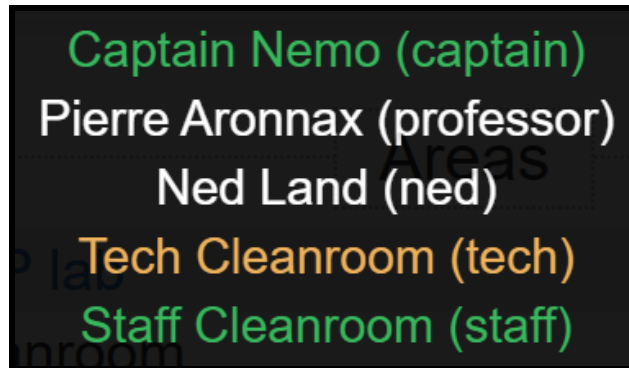

Figure 5.10: *Hover over occupant listing*

3 / 5 Fraction indicating the number of users currently logged in to the area versus the total number of users allowed. Hovering over will display the number of users, staff, and service personnel.

Note: The occupancy limits can be configured to include or exclude staff and service personnel in the total occupant count. In that case, they will be listed separately from the occupant count. The occupancy limit and counting staff and service personnel are set in the area table discussed in the Detailed administration → Areas section [42.8](#).

Chapter 5 Calendar

5.2.7 Tool list icons

Each tool can list icons to give a quick reference to visually note the operating status. Hovering over an icon will give a description of its purpose in case the icons meaning isn't known.

The tool requires an area reservation. Before a user can make a reservation on the tool, they must first make an area reservation that will encompass the start time of the tool reservation.

A user is currently logged into the tool. Hovering over the icon will show the logged in user's name.

A delayed logoff is in effect. The tool is not available for users.

A scheduled outage is in effect for this tool. The tool is not available to users.

A scheduled outage of an option resource is in effect for this tool. The tool is available but may not be fully functional.

A required resource is unavailable. The tool is not available to users.

An optional resource is unavailable. The tool is available to users, but the tool may not be fully functional. The optional resource unavailable icon is only displayed if the required resource unavailable icon is not displayed.

The tool is shut down because of a serious problem. The tool is not available to users.

The tool has a problem that may impact usage or results. The tool is available to users, but the tool may not be fully functional. The tool problem icon is only displayed if the tool shut down icon is not displayed.

Chapter 5 Calendar

5.2.8 Area and tool qualification

By default, users can not see the areas they are not qualified to access. However, that is configurable in the Customization → Calendar settings section [40.2](#). If enabled, areas that users are not qualified to access will be greyed out in the same manner as tools.

Tools that users are qualified to access will appear dark on the list while tools that a user is not qualified to access will appear greyed out (Figure [5.11](#)). User tool qualifications are detailed in Qualifications chapter [31](#). Regular users (non-staff) can also be given the option to hide tools they are not qualified on, see Customization → Calendar settings section [40.2](#).

Chapter 5 Calendar

Figure 5.11: *Tool list showing user qualifications*

5.3 Calendar header bar

The default calendar header bar is displayed above the calendar and provides users an interface to navigate dates and switch views (Figure 5.12). By default, the calendar displays a one-week view which can be changed to a one-day view or one-month view. The default view is customizable and detailed in the Customization → Calendar settings page.

Chapter 5 Calendar

Figure 5.12: *Default calendar header*

5.3.1 Arrow buttons

Clicking the left or right arrows will increment or decrement the current view. For example, in the week view, the left arrow will move to the previous week and the right arrow will move to the following week.

5.3.2 Today button

Clicking the “Today” button will change the display to include the current day in the selected view. In any view, when the current day is in the view, the background is highlighted in beige (Figure 5.13).

Figure 5.13: *Background for current day (left) and other day (right)*

5.3.3 Login to the area button

Clicking the login to the area button will log the user into the area selected if they have a current reservation. The login to the area button is only visible if area reservations are required, an area is selected, and the allow area login/logout in the calendar view option is set in the Customization → Application settings section 40.1.

Chapter 5 Calendar

The log in process follows the same steps outlined in the landing page section [42.28](#).

There are several reasons a user may be denied log in including expired user accounts, no active projects, area closures, resource outages, and more. Additional details about log in errors can be found in the Entrance tablet → Log in errors section [47.3](#).

5.3.4 Current day/time indicator

The current day is highlighted in each calendar view. On calendar views with the time displayed (day and week views), the current time can optionally be displayed with a red pointer (Figure [5.14](#)). This option is set in the Customization → Calendar settings section [40.2](#).

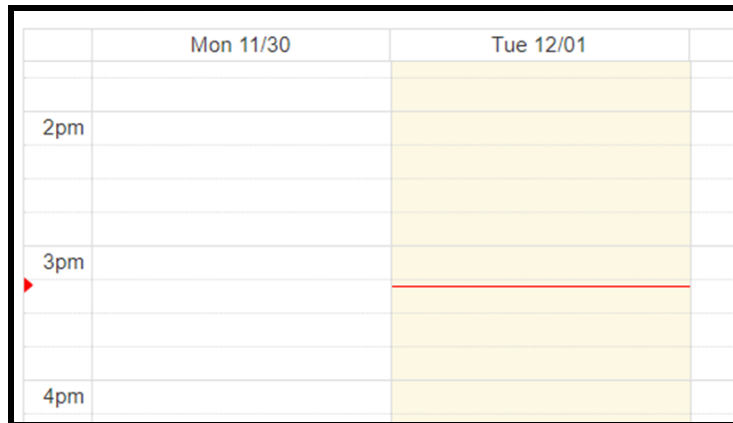

Figure 5.14: *Calendar day and time highlights*

Chapter 5 Calendar

5.3.5 Day view button

Clicking “Day” will show a single day view calendar. The top of the calendar will show the date in the form of ‘day of week mm/dd/yyyy’ (e.g. Monday 04/20/2020) (Figure 5.15). The default date format is customizable and detailed in the Customization → Calendar settings section 40.2.

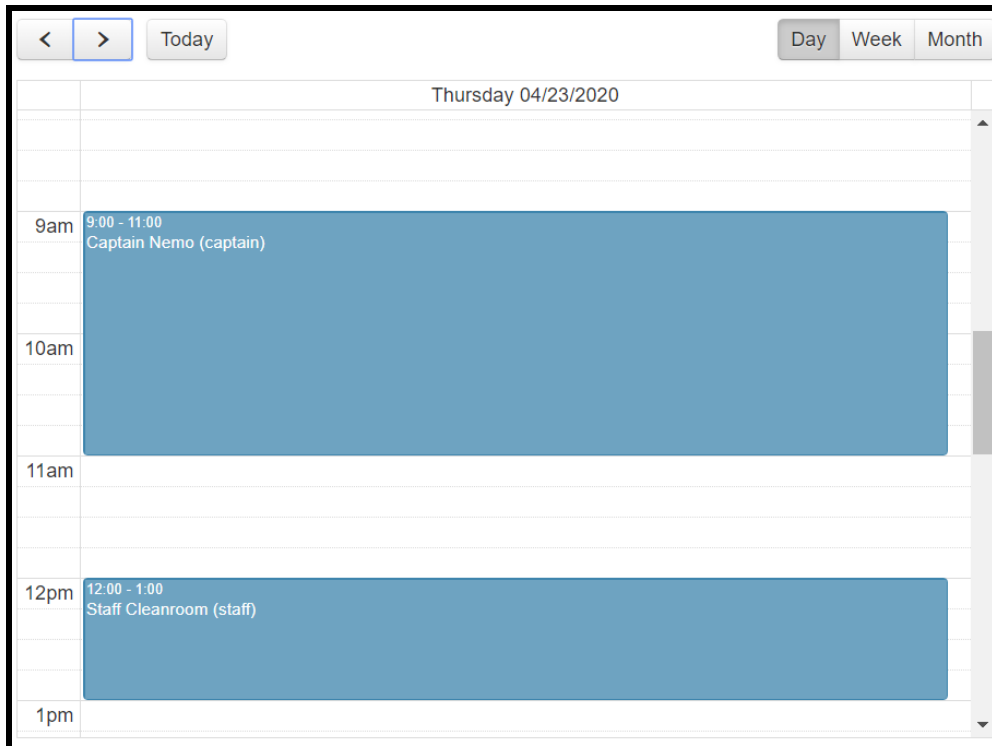

Figure 5.15: *Calendar day view*

Chapter 5 Calendar

5.3.6 Week view button

Clicking “Week” will show a single week view calendar. The date for each day will be displayed at the top of the calendar in the form of ‘day of week mm/dd’ (e.g. Mon 4/20) (Figure 5.16). The default date format is customizable and detailed in the Customization → Calendar settings section 40.2.

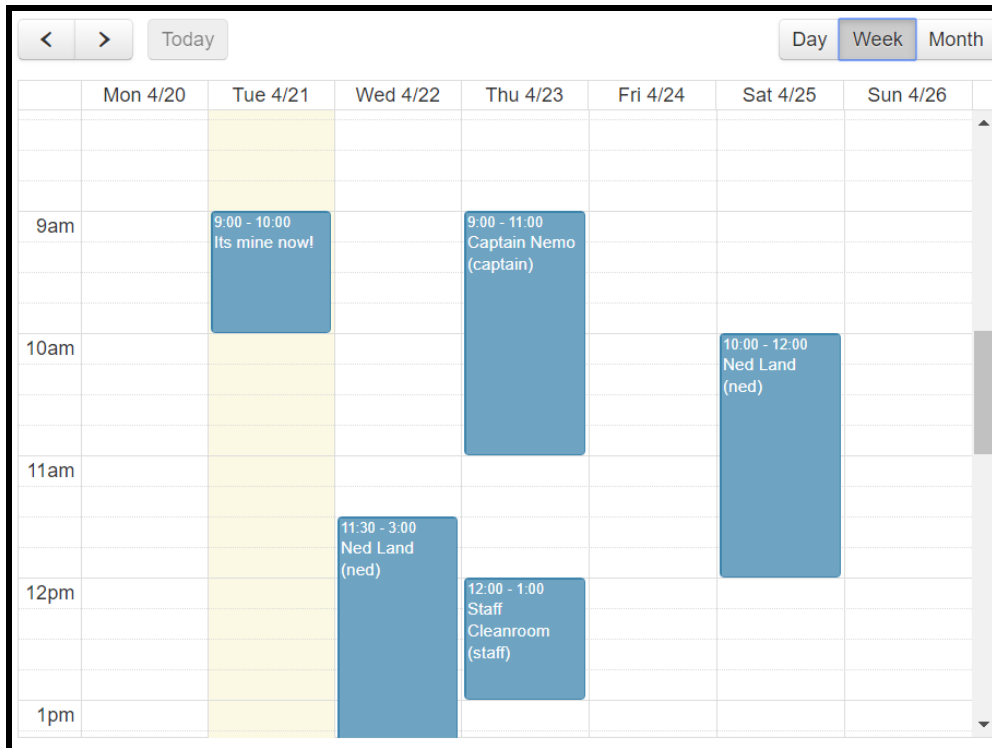

Figure 5.16: Calendar week view

Chapter 5 Calendar

5.3.7 Month view button

Clicking “Month” will show a single month view calendar with leading and trailing day from prior and future months. The calendar header will show the month and year, the top of the calendar will show the days of the week, and each day will show the day of the month (Figure 5.17). The default date format is customizable and detailed in the Customization → Calendar settings section 40.2.

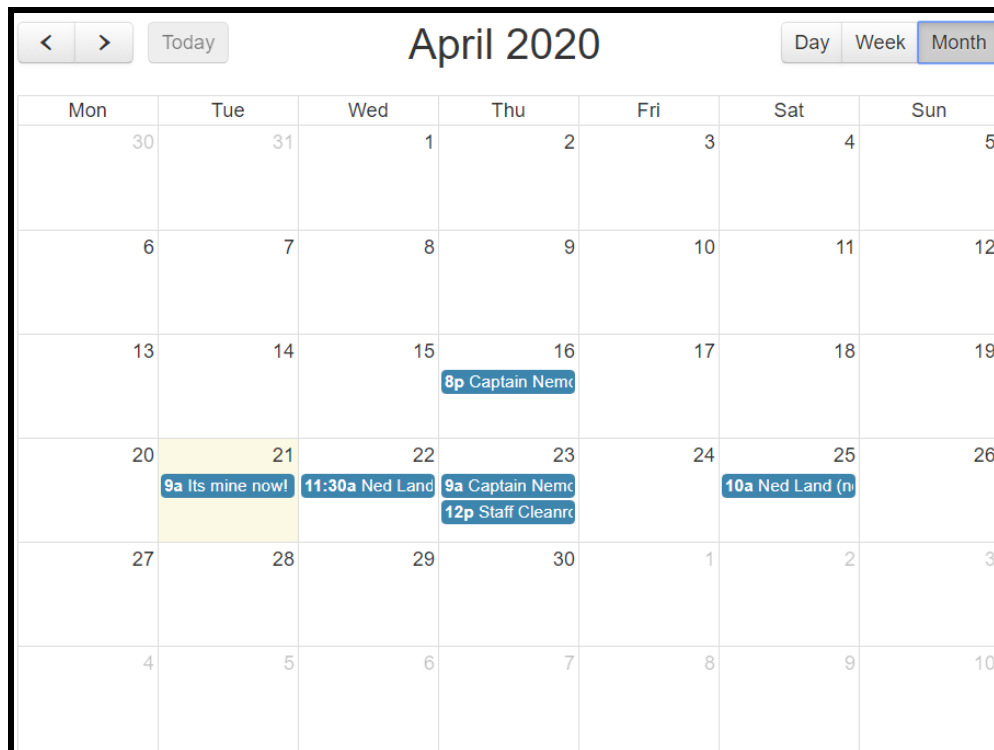

Figure 5.17: Calendar month view

Chapter 5 Calendar

5.4 Reservations

Selecting “Reservations” mode from the calendar sidebar will allow placement of area specific and tool specific reservations onto the calendar (Figure 5.18). All reservations are audited through system reservation policies as well as area specific and tool specific reservation policies. The calendar view is used to create a reservation, change a reservation, or view a personal schedule. All tools, all areas or all tools and areas can also be displayed if enabled in in the Customization → Calendar settings section 40.2. A reservation history is maintained in the database including active, canceled, missed, moved, and resized reservations. Reservation records are discussed in the Detailed Administration → Reservations section 42.38.

Figure 5.18: Calendar side bar in Reservations mode

5.4.1 Staff calendar header bar

In “Reservations” mode, the calendar header bar expands for staff (Figure 5.19) and adds reserving on behalf of someone else and scheduling an outage. The distinction between staff and non-staff is set in the Detailed administration → Users dialog (see section 42.68).

Figure 5.19: Staff calendar header bar in reservations mode

Chapter 5 Calendar

5.4.1.1 Reserve for someone else button

The 'Reserve for someone else' button starts a staff reservation on behalf of another user.

5.4.1.2 Schedule an outage button

The 'Schedule an outage' button starts the scheduling of a one time or recurring shutdown of an area or tool.

Chapter 5 Calendar

5.4.2 Calendar view

Reservations for all users and scheduled outages are viewable for the selected tool in the time window displayed (Figure 5.20). Reservations display in blue and show the start time, end time, and user that reserved the tool. Scheduled outages display in red and show the start time, end time, and outage title. NEMO automatically updates the reservations upon any navigation change for tool selection or time window. A scroll bar will appear on the right side of the calendar view to allow scrolling the time window. Clicking any reservation or scheduled outage will show additional details (Figure 5.21, Figure 5.22).

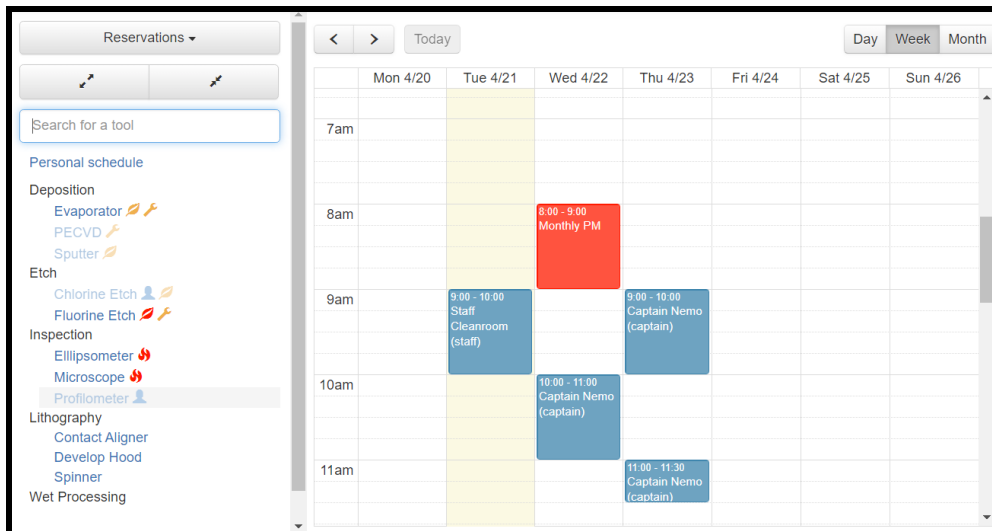

Figure 5.20: *Tool specific calendar view*

Chapter 5 Calendar

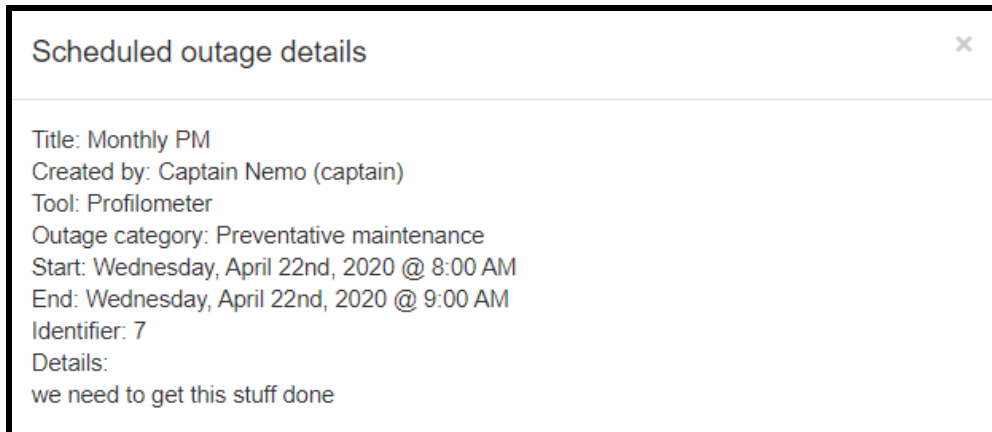

Figure 5.21: *Scheduled outage details dialog*

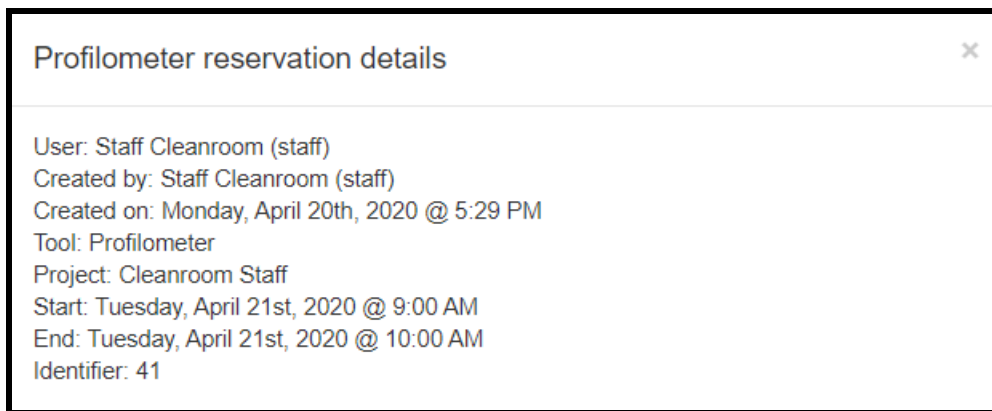

Figure 5.22: *Reservation details dialog*

Chapter 5 Calendar

5.4.3 Personal schedule view

The personal schedule view will display all reserved areas and tools for the user in the current time window. Personal schedule reservations display in green and show start time, end time, and the area or tool name (Figure 5.23). Reservations may be moved or deleted in this view. Clicking any reservation will show additional details (Figure 5.24).

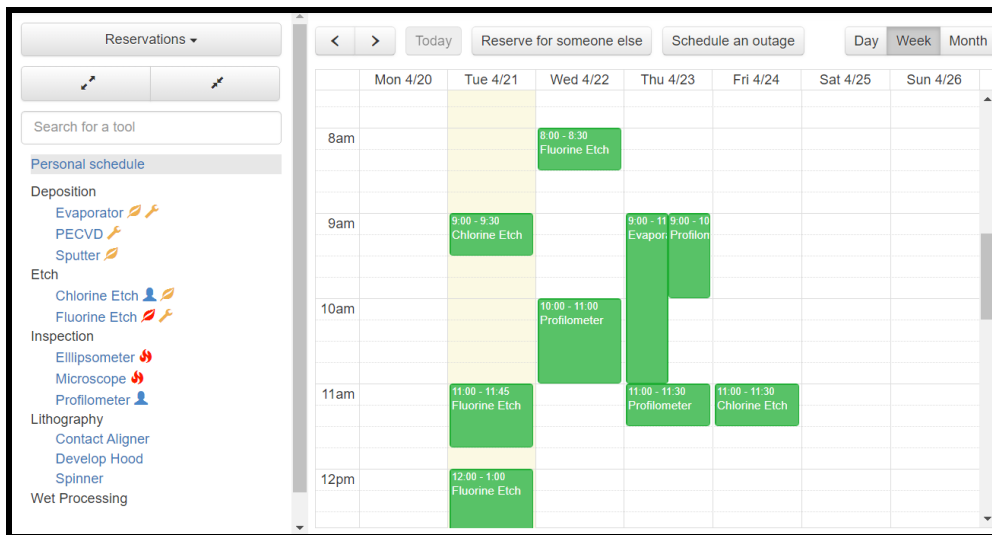

Figure 5.23: Personal schedule calendar view

Chapter 5 Calendar

5.4.5 Reservation policy

Reservation policies fall into two categories. There are system reservation policies and area/tool specific reservation policies. The policies are intended to safeguard NEMO, ensure the integrity of the database, and provide a customizable profile to maximize tool availability to users. Staff are able to override many of the policies on behalf of a user to provide scheduling flexibility and promote staff awareness of special tool needs such as excessively long runs that might otherwise go undetected.

5.4.5.1 System reservation policies

The following system reservation policies must be met to allow a reservation to be created or modified. Staff **may not override** any of these policies.

- Reservations may not have a start time that is earlier than the end time.
- The user may not create, move, or resize a reservation to coincide with another reservation.
- The user may not create, move, or resize a reservation to coincide with a scheduled outage.
- Reservations that have been cancelled may not be changed.
- The user must belong to at least one active project to make a reservation. User project associations are discussed in Users section.
- The user must associate their reservation with a project they belong to. If a user has only one project, this is automatic.

Chapter 5 Calendar

The following system reservation policies must be met to allow a reservation to be created or modified. Staff **may override** any of these policies on behalf of a user. If a staff member is making the reservation for themselves, these policies will not be checked.

- The user must complete NEMO training to create reservations.
- The user may not create or move a reservation to have a start time that is earlier than the current time.
- The user may not move or resize a reservation to have an end time that is earlier than the current time.
- The user must be qualified on the tool in question in order to create, move, or resize a reservation.
- If an area requires a reservation a tool reservation in that area may not be made without a corresponding area reservation where the tool start time is within the area reservation.
- An area reservation may not be moved or resized out of range of any tool reservations it originally contained.

5.4.5.2 Area and tool specific reservation policies

Area specific reservation policy setup is discussed in the Detailed administration → Areas section [42.8](#).

Tool specific reservation policy setup is discussed in the Detailed administration → Tools section [42.61](#).

Area and tool specific reservation policies can be configured to automatically override for all users based on the time of day and for weekends. This can help promote off hour and weekend usage for high demand tools that have restrictive policies to limit regular weekday hours monopoly of tools.

Chapter 5 Calendar

The following area and tool specific reservation policies must be met to allow a reservation to be created or modified. Staff **may override** any of these policies on behalf of a user. If a staff member is making the reservation for themselves, these policies will not be checked.

- The reservation may not be made more than the area or tool's reservation horizon number of days in advance.
- The reservation must be at least as long as the minimum block time for the area or tool.
- The reservation may not exceed the maximum block time for the area or tool.
- The user may not exceed the maximum number of reservations per user per day for the area or tool.
- The user may not make reservations without the minimum amount of time between reservations for the same user and same area or tool.
- The user may not make reservations exceeding the maximum amount of time they may reserve in the future for the area or tool.

5.4.6 Create a reservation

To create a reservation in NEMO:

- Navigate to the Calendar page.
- Select the area or tool of interest from the tool list on the sidebar.
 - Note: when an area requires a reservation for access, tool reservations can only be made inside of an area reservation window, so make area reservations first.
- Navigate the calendar view to show the start day and time.

Chapter 5 Calendar

- Click the left mouse button and hold at the start day and time.
- While holding the left mouse button, drag to the end day and time.
- Release the left mouse button.
- If the confirmation dialog is enabled in Reservation Confirmation Customization (section [40.2.3](#)) or in the user's preferences (subsection [19.1.2](#)) the user will be presented with a popup to confirm his choice before proceeding (Figure [5.26](#)).

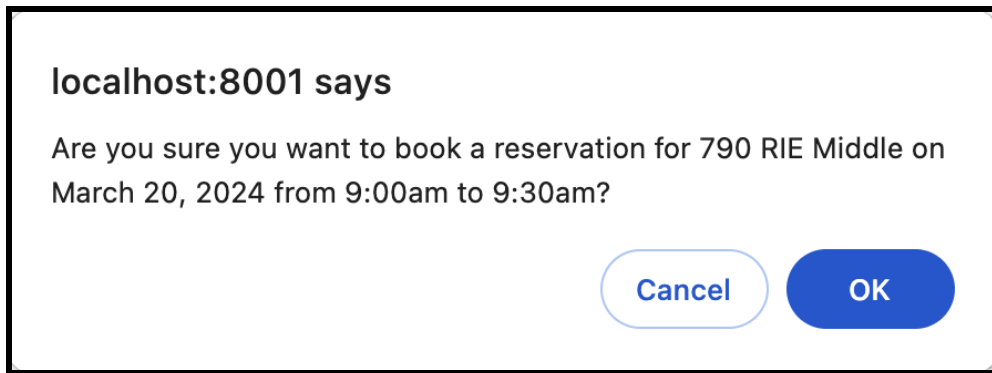

Figure 5.26: *Reservation confirmation dialog*

Chapter 5 Calendar

- The requested reservation will be tested against the reservations policies. If there is a policy conflict, the user will be prompted with a list of conflicts and the reservation will not be made (Figure 5.27). Click 'Continue' to close the dialog. Reservation policies are discussed in subsection 5.4.5.

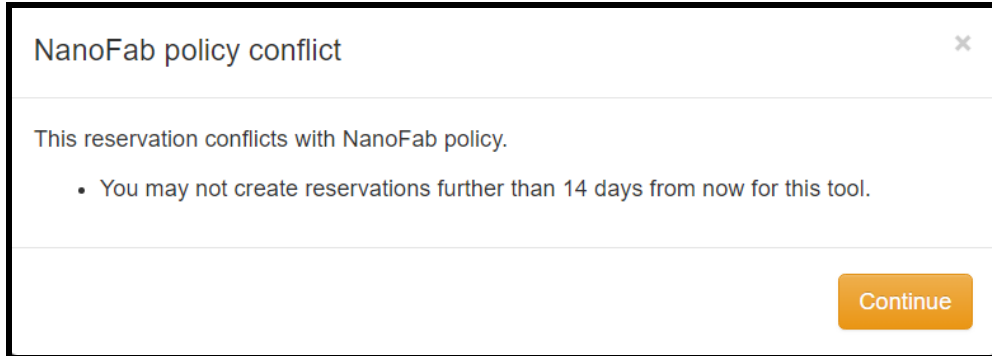

Figure 5.27: Reservation policy conflict dialog

- If a user has only one project, it will automatically be selected.
- If a user has multiple projects, they will be prompted to select a project from their list of projects (Figure 5.28). Details about projects can be found on the Accounts and projects chapter 22.

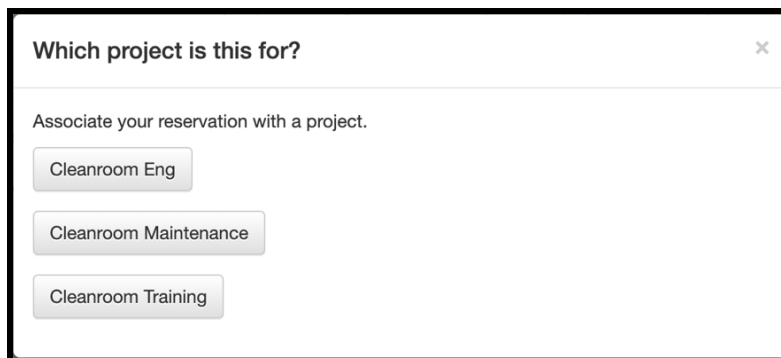

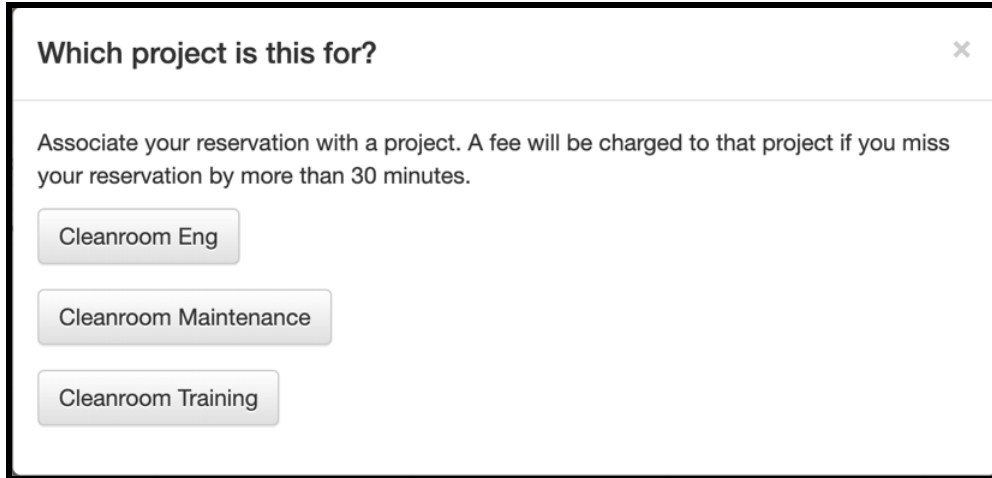

Figure 5.28: Reservation project selection

Chapter 5 Calendar

- If a tool/area has a “missed_reservation_threshold” set, a message will appear warning the user that a fee might be charged for missing the reservation (Figure 5.29):

Which project is this for? ×

Associate your reservation with a project. A fee will be charged to that project if you miss your reservation by more than 30 minutes.

Cleanroom Eng

Cleanroom Maintenance

Cleanroom Training

Figure 5.29: Reservation project selection with missed reservation message

- Project information is needed to implement missed reservation and tool configuration accounting. Staff are exempt and therefore will not be asked for a project when making reservations.
- If there are reservation questions, a form will appear asking the user to answer the questions. Reservation questions are discussed in the Reservation Questions section [42.37](#).
- If the tool is configurable, a configuration dialog will appear. Tool configurations collect information about how a tool will be run by the user and can be collected for informational purposes or to prompt staff to configure a tool for a user. Configuration history is saved in the database. Each tool configuration has a minimum advanced notice. If the reservation request is within the advance notice window, the user will be prompted in red at

Chapter 5 Calendar

the top of the window that the staff may not be able to accommodate the request. Select the appropriate options and provide details as necessary (Figure 5.30). Configurations are discussed in the Configuration Agenda chapter 26.

Choose tool configuration ✕

Warning: 1 hours of advance notice is required when reserving this tool in order to configure it properly. You may still create a reservation right now, but there is no guarantee the tool will be properly configured when you arrive to use it.

Please select the target you will need. If you will provide the target, provide the details in the comments.

Target:

Select a target from the list. ▾

Do you have anything else to add? (Optional)

Please provide any additional information regarding tool configuration for your reservation (using less than 3000 characters).

Create this reservation

Figure 5.30: Reservation tool configuration

Chapter 5 Calendar

- For tool reservations, if the area has a reservation warning person limit configured, the user will be prompted with a message to inform them of the number of people expected in the area and to consider social distancing when making reservations (Figure 5.31). In addition, if multiple people are expected in the same location within an area that information is provided as well. Areas are defined in the area table of the database and discussed in the Detailed administration → Areas section 42.8. Locations are defined in the tool table of the data base and discussed in the Detailed administration → Tools section 42.61.

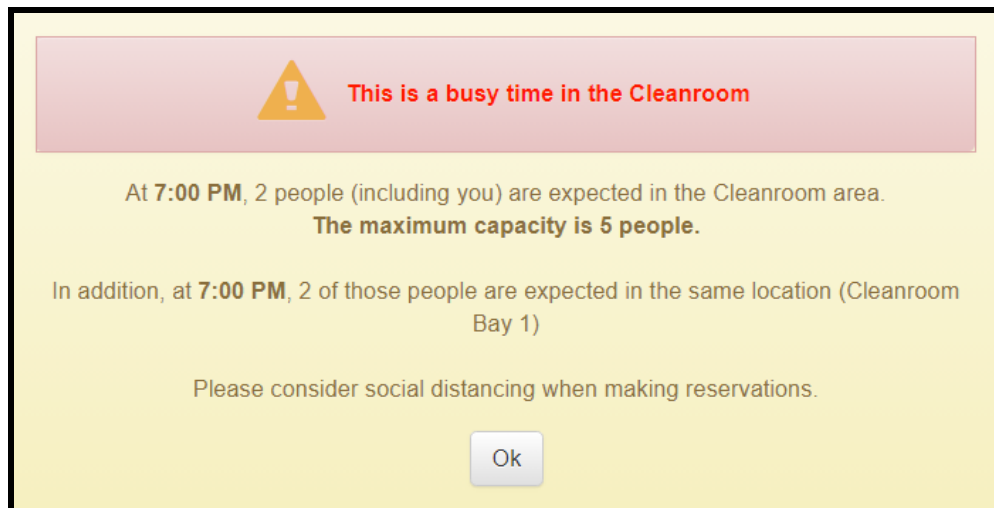

Figure 5.31: *Reservation occupancy warning*

- The reservation will be written to the Reservations table in the database which is discussed in the Detailed administration → Reservations section 42.38.
- The reservation will appear on the calendar.

Chapter 5 Calendar

5.4.7 Move a reservation

- Move the mouse pointer into the middle of the reservation to be moved. If you have permission to move the reservation, the mouse pointer will change from the arrow to a hand.
- Click the left mouse button and hold.
- While holding the left mouse button, drag the reservation to the new day and time.
- Release the left mouse button.
- If the confirmation dialog is enabled in Reservation Confirmation Customization (section [40.2.3](#)) or in the user's preferences (subsection [19.1.2](#)) the user will be presented with a popup to confirm his choice before proceeding (Figure [5.32](#)).

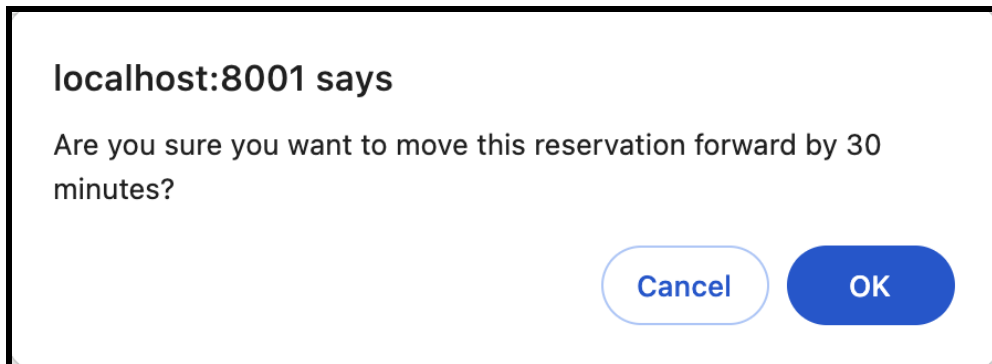

Figure 5.32: *Reservation confirmation dialog*

- The requested move will be tested against the reservations policies. If there is a policy conflict, the user will be prompted with a list of conflicts and the reservation move will not be made (Figure [5.33](#)). Click 'x' to close the dialog. Reservation policies are discussed in the reservation policies subsection [5.4.5](#).

Chapter 5 Calendar

- NOTE: An area reservation may not be moved out of range of any tool reservations it originally contained.
- Any time a reservation is moved, the old reservation is cancelled and a new reservation with updated information takes its place. The descendant field links the old reservation to the new one, so the history of reservation moves, and changes can be easily tracked.

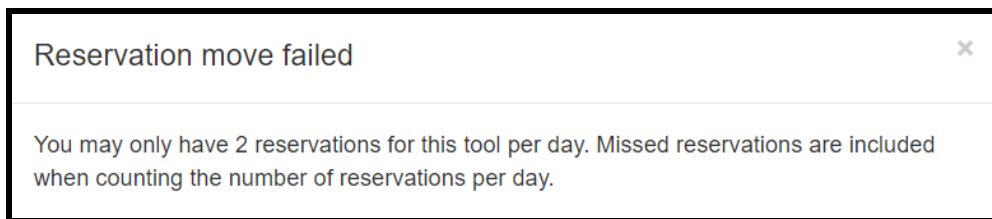

Figure 5.33: *Reservation move failed dialog*

5.4.8 Resize a reservation

- Reservations may only be resized to change the end time. If the reservation needs to start at an earlier time, move the reservation to the new start time, then resize it.
- Move the mouse pointer over the bottom of the reservation to be resized. If you have permission to resize the reservation, the mouse pointer will change from the arrow to a double arrow and two stacked lines will appear at the bottom middle of the reservation (Figure 5.35).
- Click the left mouse button and hold.
- While holding the left mouse button, drag the reservation end time to the new day and time.
- Release the left mouse button.

Chapter 5 Calendar

- If the confirmation dialog is enabled in Reservation Confirmation Customization (section 40.2.3) or in the user's preferences (subsection 19.1.2) the user will be presented with a popup to confirm his choice before proceeding (Figure 5.34).

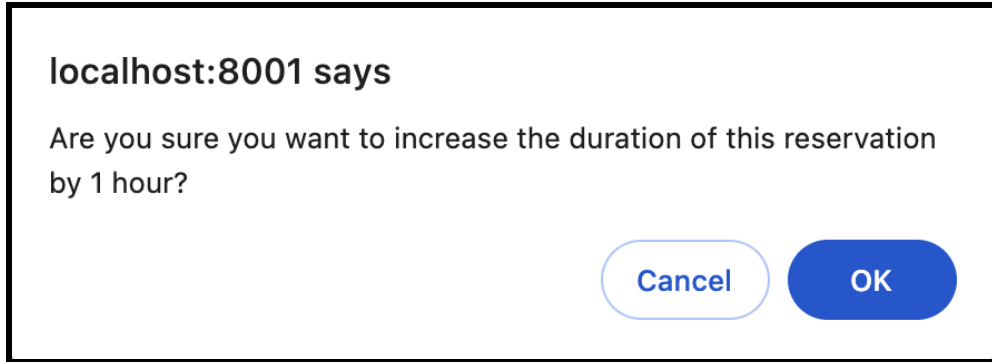

Figure 5.34: *Reservation confirmation dialog*

- The requested resize will be tested against the reservations policies. If there is a policy conflict, the user will be prompted with a list of conflicts and the reservation resize will not be made (Figure 5.36, Figure 5.27). Click 'x' to close the dialog.
- NOTE: An area reservation may not be resized out of range of any tool reservations it originally contained.
- Any time a reservation is resized, the old reservation is cancelled and a new reservation with updated information takes its place. The descendant field links the old reservation to the new one, so the history of reservation changes can be easily tracked.

Chapter 5 Calendar

Figure 5.35: Reservation resizing bottom change

Figure 5.36: Reservation resize failed dialog

5.4.9 View details or delete a reservation

- Single click the center of the reservation.
- A reservation detail dialog will be displayed that provides additional information (Figure 5.37)

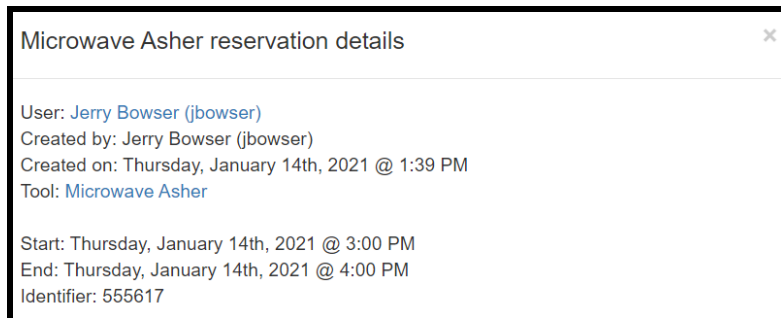

Figure 5.37: User reservation details dialog

Chapter 5 Calendar

- Who created the reservation, this is a link that once clicked will provide an email dialog through NEMO to contact the user.
- When the reservation was created.
- The area or tool reserved, for tool reservations, the name is a link to the tool page.
- The project.
 - * If the user has multiple projects the selected project can be changed.
 - * Click the edit icon  on the right.
 - * The project will change to the update dialog (Figure 5.38).

Figure 5.38: Reservation project change dialog

- * Select the new project from the dropdown list (Figure 5.39).

Figure 5.39: Reservation project change dropdown

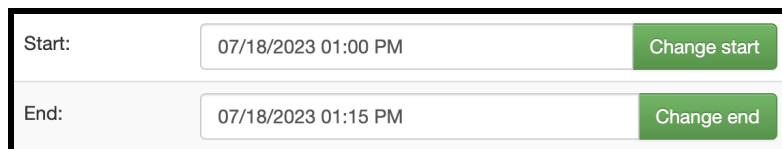

- * Click the change project button to complete (Figure 5.40).

Figure 5.40: Reservation project change button

Chapter 5 Calendar

- The start time and end time.
 - * If the user looking at the details is a staff member or is the user whose reservation it is, the start and end times can be edited.
 - * Click the edit icon  on the right.
 - * Change the date and click the change button to complete (Figure 5.41).

The screenshot shows a user interface for editing reservation times. It consists of two rows. The first row is labeled 'Start:' and contains a text input field with the value '07/18/2023 01:00 PM' and a green button labeled 'Change start'. The second row is labeled 'End:' and contains a text input field with the value '07/18/2023 01:15 PM' and a green button labeled 'Change end'.

Figure 5.41: *Reservation dates change*

- Staff Only – two additional fields are provided for staff (Figure 5.42).
 - * A title for the reservation can be set to users see a more descriptive reason for a staff reservation. This can be useful to indicate process qualifications or baselines. Type a title into the dialog box then click 'Set title'.
 - * A cancelation reason box will appear next to the cancel if a staff member clicks on another user's reservation including another staff member. Staff can delete any reservation however they must give a reason that will be emailed to the impacted user. Type a reason for canceling the reservation into the dialog box then click 'Cancel this reservation'.

Chapter 5 Calendar

Evaporator reservation details

Title: Staff Cleanroom (staff) Set title

User: Staff Cleanroom (staff)
Created by: Staff Cleanroom (staff)
Created on: Tuesday, April 21st, 2020 @ 5:23 PM
Tool: Evaporator
Project: Cleanroom Training
Start: Thursday, April 23rd, 2020 @ 12:00 PM
End: Thursday, April 23rd, 2020 @ 1:00 PM
Identifier: 72

Cancel this reservation

Figure 5.42: Staff reservation details dialog

- Click the 'x' to close the details without deleting the reservation.
- Click the 'Cancel this reservation' button to cancel the reservation.
- Note: users may only cancel their own reservations that have not have not passed the end time.
- Any time a reservation is canceled, the canceled field in the reservation table is set.

5.4.10 Reservation email notifications

NEMO can send email notifications to staff and users

- There are user settable preferences to send reservation and cancelation emails with calendar invites. User preferences are discussed in the User preferences chapter [19](#).

Chapter 5 Calendar

- If staff cancels a user reservation, the user will receive an email notification regardless of user preference settings as described in the Customization → Cancellation email subsection [40.5.9](#).
- Users are sent a reminder email approximately two hours prior to the start of a reservation. The email serves to not only remind user of upcoming reservations but also to alert them to any potential problems with the reserved tool as described in Customization → Reservation reminder email and Customization → Reservation warning email sections [40.5.20](#) and [40.5.21](#), respectively.

5.4.11 Missed reservations

Each area and tool can be configured to automatically cancel a user's reservation if they are late logging in by more than the missed reservation threshold number of minutes. A missed reservation event requires three items to be setup.

1. A missed reservation threshold must be entered for any areas or tools that will trigger a missed reservation as discussed in the Detailed administration → Areas section [42.8](#) and in the Detailed administration → Tools section [42.61](#).
2. A missed reservation email can optionally be configured to notify the user and lab staff that a reservation was missed as described in the Customization → Missed reservation email subsection [40.5.14](#).
3. A timed service app must be properly configured and running which is described in the NEMO timed services section [48.3](#).

If configured, once the missed reservation threshold is exceeded, the reservation will be canceled, marked as missed in the reservation table, and email notifications sent.

If an area or tool is shutdown, a missed reservation will not be triggered.

All staff reservations are exempt from this rule.

Chapter 5 Calendar

5.4.12 Reserve for someone else (staff only)

The reserve for someone else feature gives staff the ability to override reservation policies on behalf of a user. For example, reserving a tool for a user before they complete qualification on a tool or reserving further in advance due to special travel. The button is only visible if the user logged in is designated as staff.

Clicking the 'Reserve for someone else' button will display the selection dialog (Figure 5.43). Type the user's name in the search box. The return list updates automatically as typed, and a tool can be clicked from the list at any time (Figure 5.44). Once clicked, the button dialog changes to "Reserving as [user]". Proceed to make reservations.

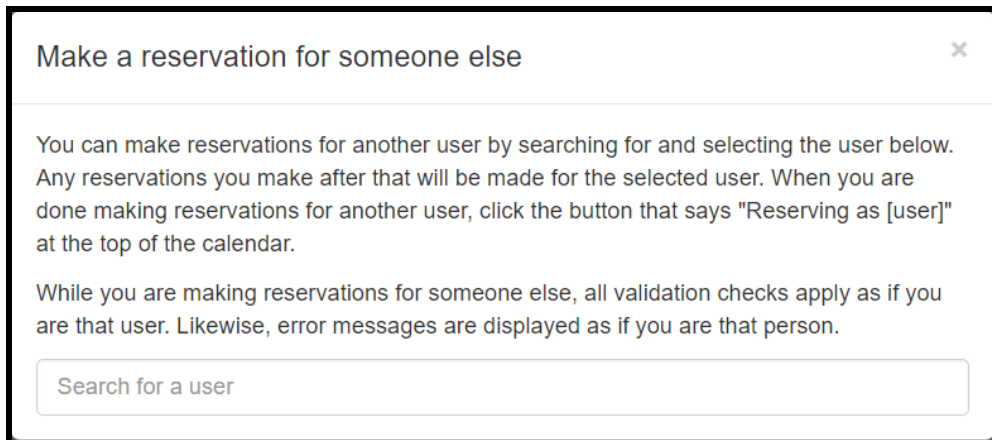

Figure 5.43: *Make a reservation for someone else dialog*

Chapter 5 Calendar

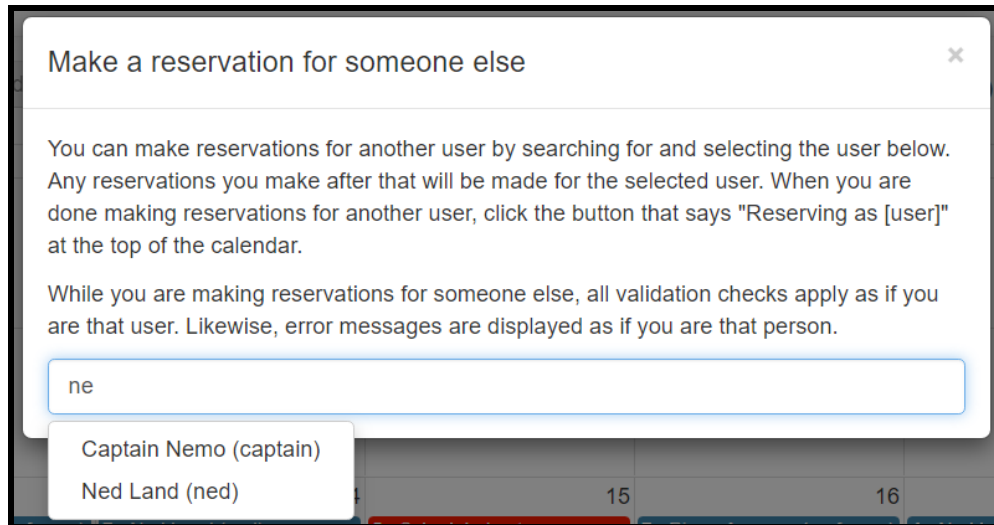

Figure 5.44: User search return list

If a reservation made on behalf of another user violates the user reservation policy a dialog will be shown to prompt the staff member with a list of policy conflicts and buttons to override the policy or not create the reservation (Figure 5.45). Clicking override will make the reservation for the user and override any policy violations. Reservation policies are discussed below.

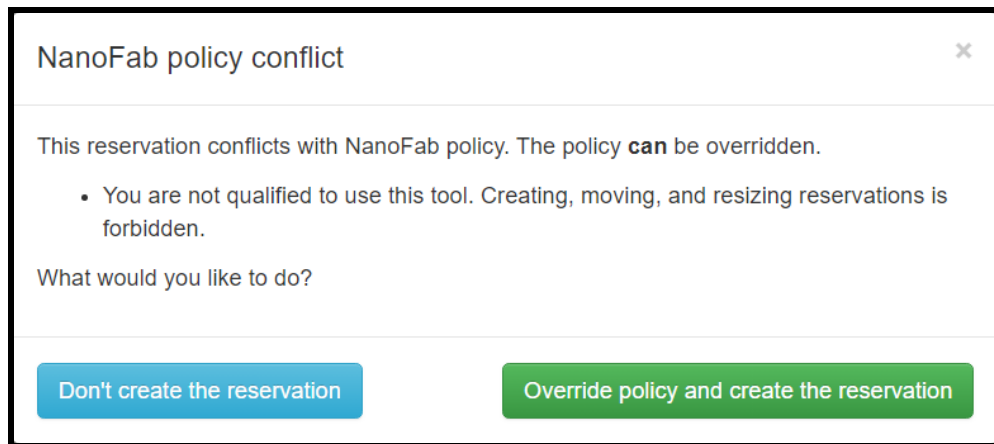

Figure 5.45: Reservation policy conflict

Chapter 5 Calendar

To end making reservations on behalf of the user, click the “Reserving as [user]” button on the calendar header. The button text will return to “Reserve for someone else”.

5.4.13 Schedule an outage (staff only)

The scheduled outage feature allows staff to make either single or recurring reservations that will automatically change an area or tools status to shut down. This prevents user login at automatic intervals which can be helpful for maintenance tasks such as changing tool configurations or executing pre-maintenance ‘behind the scenes’ tasks that could be impacted by users inadvertently operating a tool.

Clicking the ‘Schedule an outage’ button will remove the ‘Reserve for someone else’ button and change the ‘Schedule an outage’ button text to ‘I’ve finished creating scheduled outages’. After defining the start and end time, a dialog will appear (Figure 5.46).

Chapter 5 Calendar

Schedule an outage

Title

You must provide a title to create a scheduled outage

Category - is there a category for this outage? This is useful for data and trend analysis

Details

Please provide any additional details for the scheduled outage. Be descriptive so that users understand why there is a scheduled outage.

Create more than one occurrence of this outage

Schedule this outage

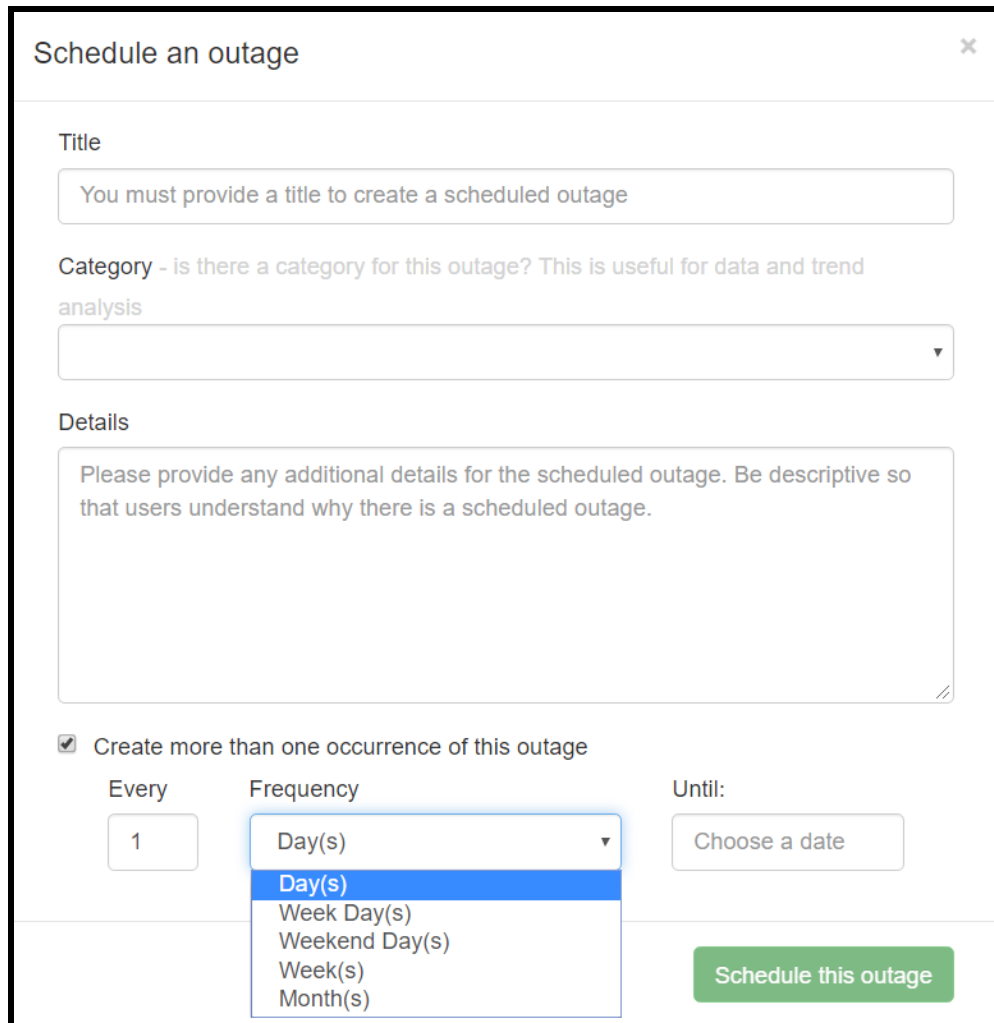

Figure 5.46: *Scheduled outage dialog*

A title is required and should provide a brief description of the why the area or tool is scheduled for an outage. An optional category will appear if any scheduled outage categories are defined. Categories can be useful for data analysis. An optional details box can be used to provide more in-depth information.

To create recurring outages, click the check box labeled 'Create more than one occurrence of this outage'. A new dialog will appear (Figure 5.47) under the check box to enter the frequency and end time. Recurring outages can only be scheduled up to 90 days in advance. It is important to note that recurring

Chapter 5 Calendar

outages become standalone reservations once they are created and cannot be modified as a group. However, individual occurrences can be deleted in the calendar or bulk deleted in Detailed Administration.

The screenshot shows a web form titled "Schedule an outage" with a close button (X) in the top right corner. The form is divided into several sections:

- Title:** A text input field with a placeholder message: "You must provide a title to create a scheduled outage".
- Category:** A dropdown menu with a placeholder text: "Category - is there a category for this outage? This is useful for data and trend analysis".
- Details:** A large text area with a placeholder: "Please provide any additional details for the scheduled outage. Be descriptive so that users understand why there is a scheduled outage." and a small double-slash icon in the bottom right corner.
- Recurrence:** A section with a checked checkbox labeled "Create more than one occurrence of this outage". It includes:
 - An "Every" input field containing the number "1".
 - A "Frequency" dropdown menu with a blue highlight on "Day(s)". The menu options are: "Day(s)", "Week Day(s)", "Weekend Day(s)", "Week(s)", and "Month(s)".
 - An "Until:" label followed by a "Choose a date" input field.
 - A green button labeled "Schedule this outage".

Figure 5.47: Scheduled outage recurrence

Chapter 5 Calendar

To complete the reservation, click the 'Schedule this outage' button. The scheduled outage will appear on the calendar in red listing the start and end time as well as the title provided. The example in (Figure 5.48) shows a scheduled shutdown that had a title of 'Monthly PM'. The details can be seen by clicking the reservation on the calendar.

Figure 5.48: *Example scheduled outage*

Chapter 5 Calendar

5.5 Showing Configuration agenda

Selecting “Configuration agenda” mode from the calendar sidebar will display tool reservations containing configuration settings the user picked when making his reservation (Figure 5.49).

The color palette can be customized for each individual configuration setting in Detailed administration → Configuration section 42.16.

Figure 5.49: *Calendar side bar in Configuration agenda usage mode*

5.5.1 Calendar view

Reservations containing configuration settings are viewable for the selected tool in the time window displayed (Figure 5.50). Configuration displays in blue by default (but can be customized with a different color for each configuration setting) and shows the start time, end time, the reservation user and each of the configuration settings. NEMO automatically updates the view upon any navigation change for tool selection or time window. A scroll bar will appear on the right side of the calendar view to allow scrolling the time window. Clicking on any event box will show additional details (Figure 5.51).

Chapter 5 Calendar

5.6.3 All tools, All areas and All tools and areas views

Similar to the personal schedule, selecting “All tools” will allow the user to see all tool usages (Figure 5.61). The same goes for “All areas” and “All areas and tools”.

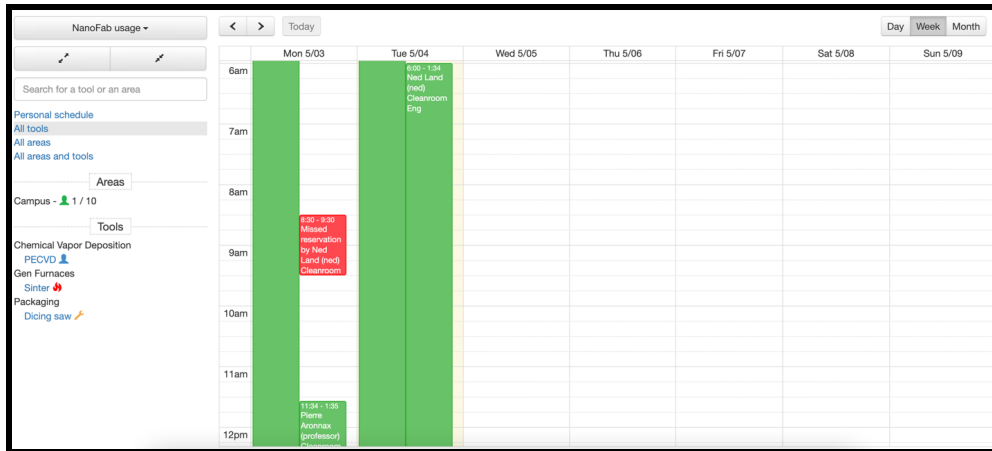

Figure 5.61: All tools usage view

5.7 Show specific user activity (staff only)

Selecting “Specific User” mode from the calendar sidebar will display activity and reservation history of the selected user on the calendar (Figure 5.62).

Figure 5.62: Calendar side bar in Specific user mode

Chapter 5 Calendar

To find a user, enter any character sequence of the username, first name, or last name in the search dialog on the side bar (Figure 5.63) then select the name of the list returned.

Figure 5.63: *Specific user activity search dialog*

The return list updates automatically as typed, and a user can be clicked from the list at any time (Figure 5.64).

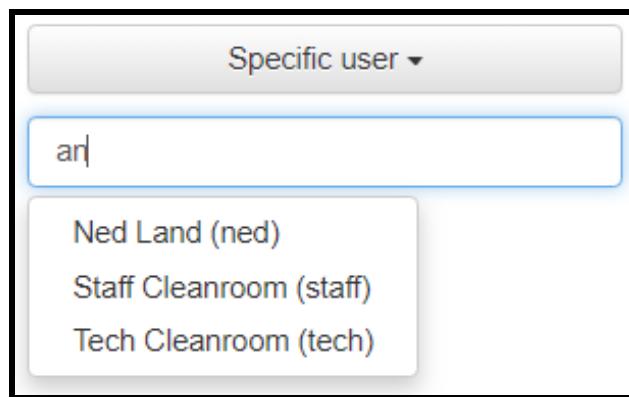

Figure 5.64: *User search return list*

Chapter 5 Calendar

Once clicked, the search box changes to a button with the selected users name (Figure 5.65) and the users information is displayed in the calendar view (Figure 5.66). To switch to another user, click the button showing the current users name and the dialog will switch back to the search box.

Figure 5.65: Search dialog now shows user

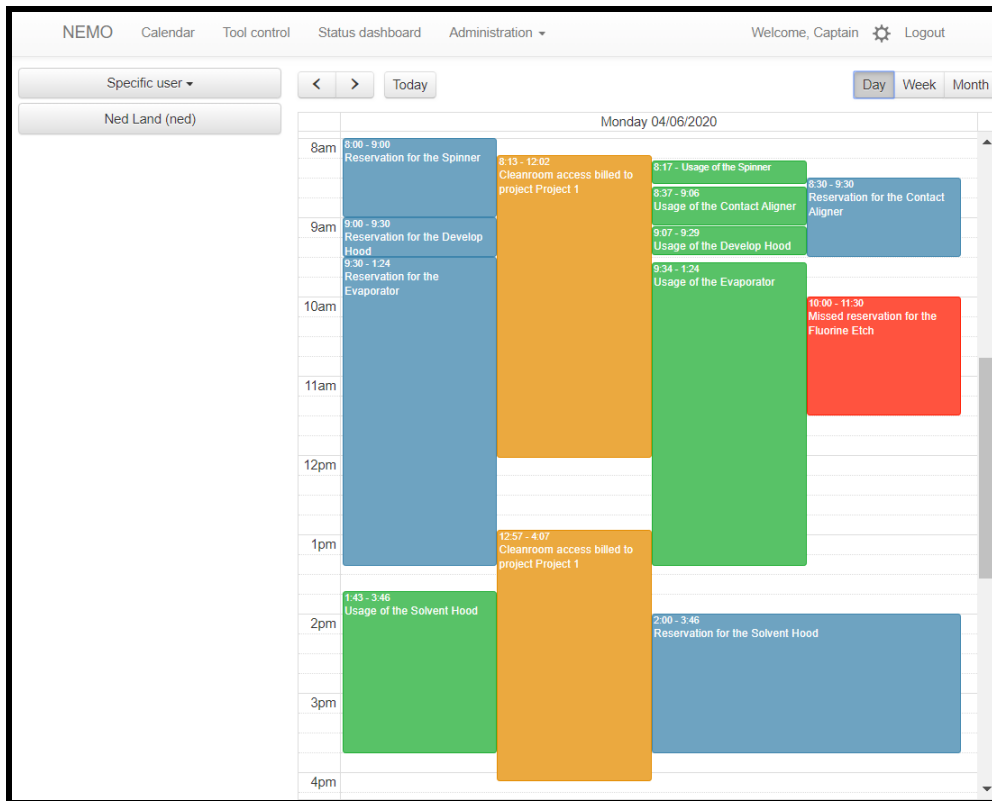

Figure 5.66: Specific user activity and reservation view

Chapter 5 Calendar

Tool usage displays in green and shows the start time, end time, and tool name. Missed reservations display in red and show start time, end time, and tool name. Area access displays in gold and shows start time, end time, and area name. Reservations displays in blue and shows start time, end time, and tool name. Clicking on any activity box will show additional details (Figure 5.67, Figure 5.68, Figure 5.69, Figure 5.70).

Cleanroom access details

Customer: Ned Land (ned)
Project: Project 1
Start: Monday, April 6th, 2020 @ 8:13 AM
End: Monday, April 6th, 2020 @ 12:02 PM
Identifier: 30

This dialog box displays the details for a cleanroom access reservation. It includes fields for Customer, Project, Start time, End time, and Identifier.

Figure 5.69: Area access details dialog

Evaporator reservation details

Title Ned Land (ned) Set title

User: Ned Land (ned)
Created by: Ned Land (ned)
Created on: Wednesday, April 22nd, 2020 @ 2:18 PM
Tool: Evaporator
Project: Project 1
Start: Monday, April 6th, 2020 @ 9:30 AM
End: Monday, April 6th, 2020 @ 1:24 PM
Identifier: 82

Reason for cancellation (required) Cancel this reservation

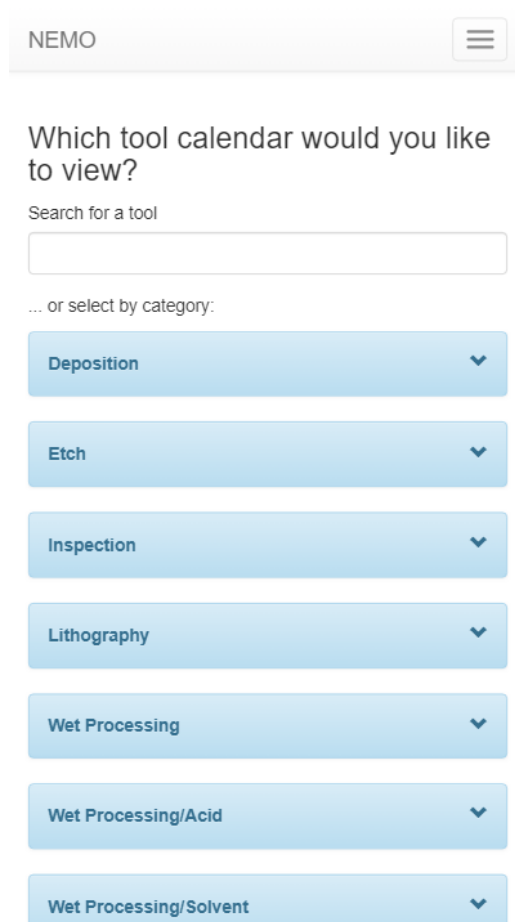

This dialog box displays the details for an evaporator reservation. It includes a title field with a 'Set title' button, and fields for User, Created by, Created on, Tool, Project, Start time, End time, and Identifier. At the bottom, there is a text input field for 'Reason for cancellation (required)' and a red 'Cancel this reservation' button.

Figure 5.70: Reservation details dialog

Chapter 5 Calendar

5.8 Mobile device calendar

The calendar page will automatically change to a mobile display by stacking information into a single scrollable column (Figure 5.71). A subset of features is available while in mobile view. To start, directly enter the name of the area or tool in the search dialog or select a tool by category. All categories and sub-categories are listed.

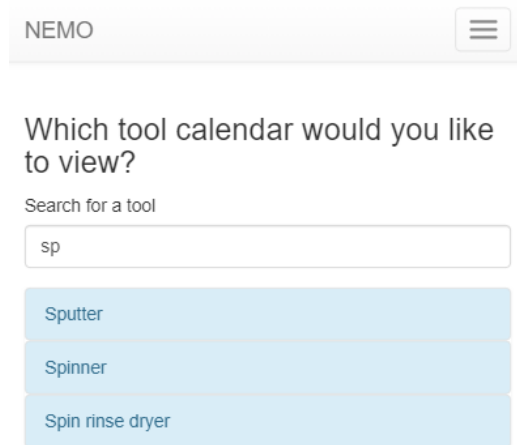

The screenshot shows a mobile interface for the NEMO application. At the top, there is a header with the text "NEMO" and a hamburger menu icon. Below the header, the main content area asks "Which tool calendar would you like to view?". Underneath this question is a search bar labeled "Search for a tool". Below the search bar, it says "... or select by category:". There is a list of seven categories, each in a blue button with a downward arrow: "Deposition", "Etch", "Inspection", "Lithography", "Wet Processing", "Wet Processing/Acid", and "Wet Processing/Solvent".

Figure 5.71: *Mobile calendar page*

Chapter 5 Calendar

5.8.1 Search for an area or tool

To search for an area or tool, start typing in the search dialog box. A button list will appear below the search dialog as characters are entered but at least two characters must be entered (Figure 5.72). Once the area or tool of interest appears, click the button of interest to go to the mobile reservation page.

NEMO

Spin rinse dryer

Figure 5.72: *Mobile calendar search box and results*

Chapter 5 Calendar

5.8.2 Select a tool by category

To select a tool by category, click the category button then click the tool link in the drop down. If the tool of interest is not on the list, click another category button (Figure 5.73). Note: it is possible to have more than one category at a time expanded. However, the page resets each time it is opened. Once the tool of interest appears, click the button of the tool of interest to go to the mobile tool reservation.

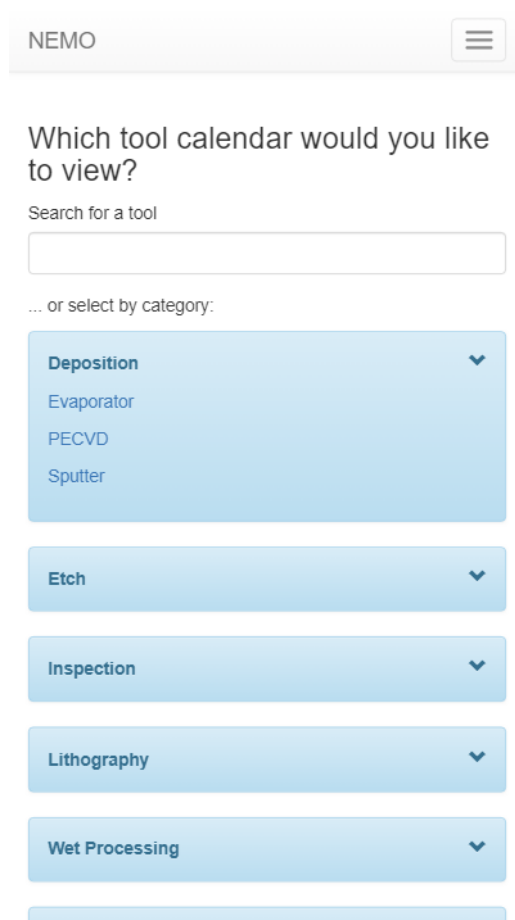

Figure 5.73: Mobile calendar category drop down

Chapter 5 Calendar

5.8.3 Mobile reservation page

The mobile reservation will show the current day reservations (Figure 5.74). Only a one-day view is available in mobile view. Left  and right  arrows at the top of the page increment or decrement the day. Any reservations for the currently listed day are shown. An add reservation icon  is on the bottom right.

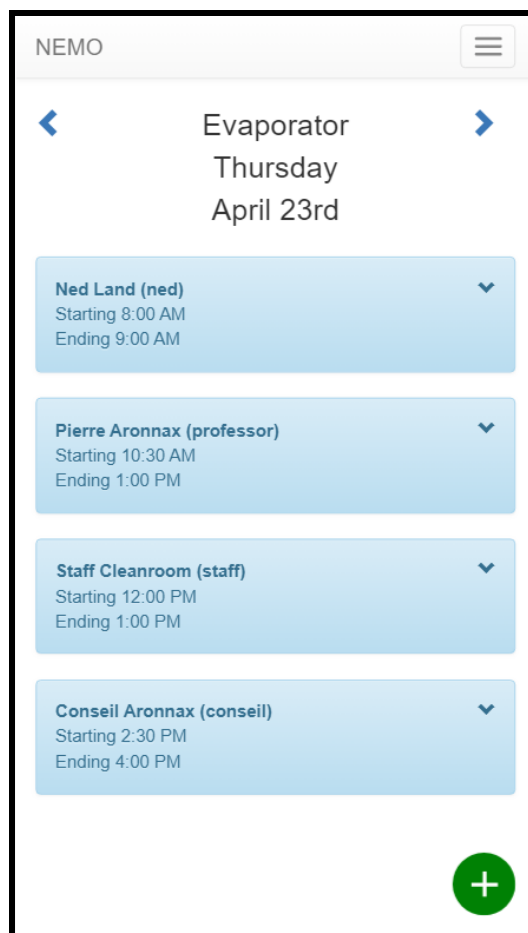

Figure 5.74: Mobile tool reservation page

Chapter 5 Calendar

5.8.4 View details or delete a reservation

Clicking the down arrow on a reservation shows details (Figure 5.75). A user may cancel their own reservation (Figure 5.76). Staff may cancel any reservation but must enter a reason for canceling another users reservation (Figure 5.77).

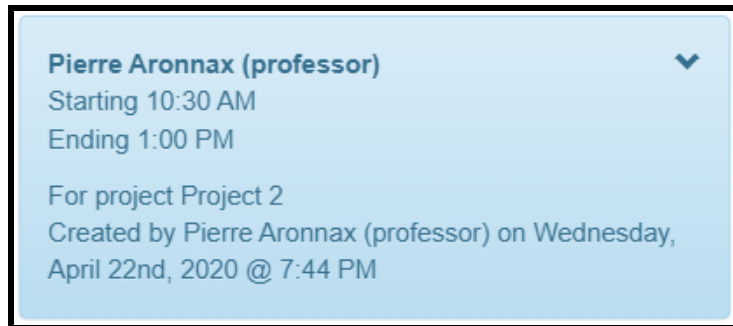

Figure 5.75: Mobile view another user's reservation

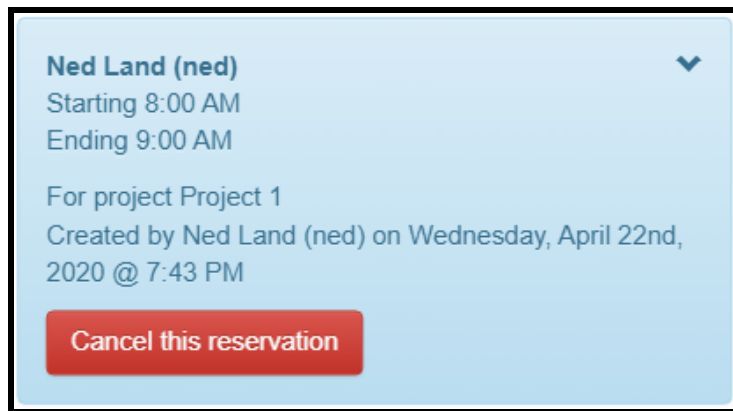

Figure 5.76: Mobile view a reservation you own

Chapter 5 Calendar

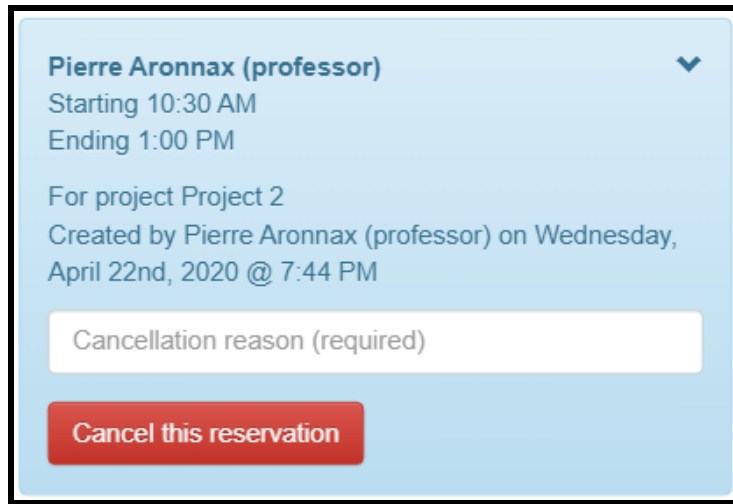

Figure 5.77: Mobile view another user's reservation (staff)

5.8.5 Creating a reservation

To create a reservation in NEMO through the mobile view:

- Navigate to the tool reservation page.
- Click the add reservation icon  on the bottom right of the screen to navigate to the top of the create a new reservation page (Figure 5.78).

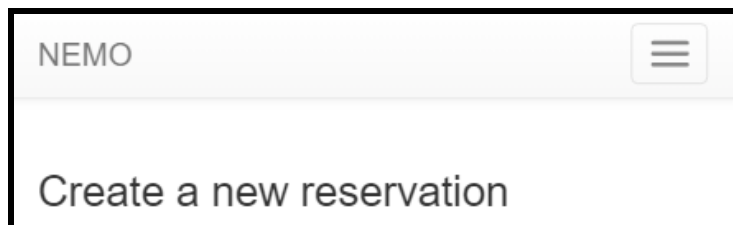

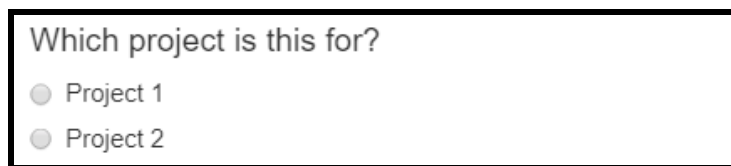

Figure 5.78: Mobile create new reservation dialog

Chapter 5 Calendar

- If the user has multiple projects, a project dialog will appear just below the title (Figure 5.79). However, if a staff member has multiple projects, they will not be prompted for a project because they are exempt from missed reservation and tool configuration accounting. Select the project to use for the reservation. Details about projects can be found in the Accounts and projects chapter 22.

Which project is this for?

Project 1

Project 2

Figure 5.79: *Mobile reservation multiple project dialog*

Chapter 5 Calendar

- If the tool selected has a configuration that can be selected by the user, a configuration dialog will appear next. Each tool configuration has a minimum advanced notice. If the reservation request is within the advance notice window, the user will be prompted in red at the top of the window and the staff may not be able to accommodate the request. Select the appropriate options and provide details as necessary (Figure 5.80).

Choose tool configuration settings

Please note: 1 hours of advance notice is required when reserving this tool in order to configure it properly. A tool is not guaranteed to be configured properly if a reservation is created or modified on short notice.

Please select the target you will need. If you will provide the target, provide the details in the comments.

Target:

Select a target from the list. ▼

Do you have anything else to add? (Optional)

Please provide any additional information regarding tool configuration for your reservation (using less than 3000 characters).

Figure 5.80: Mobile reservation tool configuration dialog

Chapter 5 Calendar

- Next, select the date and time for the reservation (Figure 5.81).

When would you like to reserve the PECVD?

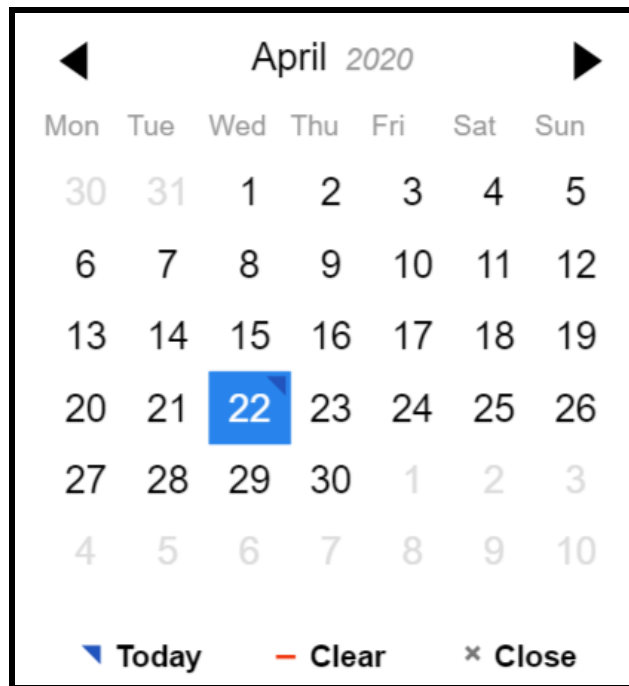

Wednesday, April 22

Choose a start time

Choose an end time

Figure 5.81: Mobile reservation date and time dialog

- If the date needs to be changed, click inside of the date box and a calendar will pop up (Figure 5.82). Select the date of interest. Clicking on the date on the calendar will close the pop up and fill in the new date.

◀ April 2020 ▶

Mon	Tue	Wed	Thu	Fri	Sat	Sun
30	31	1	2	3	4	5
6	7	8	9	10	11	12
13	14	15	16	17	18	19

Figure 5.82: Mobile reservation date dialog

Chapter 5 Calendar

- Click the choose a start time box and a time wheel will pop up (Figure 5.83). Any times already reserved will be greyed out and noted with 'already reserved'. Click on the available start time of your choice. The pop up will automatically close and fill in the start time. Repeat for the end time.

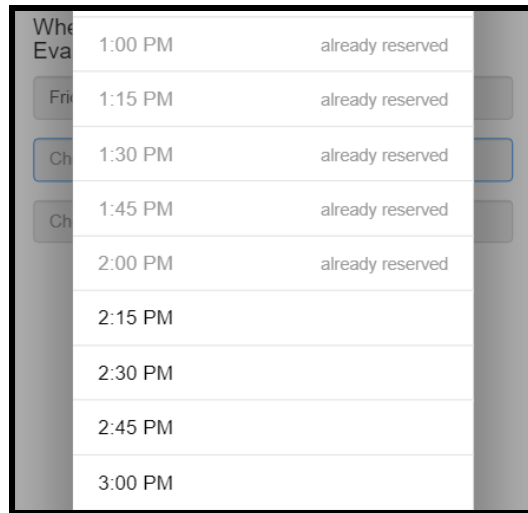

Figure 5.83: Mobile reservation start time and end time dialog

- Once all required information is entered, click the create this reservation button (Figure 5.84).

Figure 5.84: Mobile reservation create button

Chapter 5 Calendar

- The requested reservation will be tested against the reservations policies. If there is a policy conflict, the user will be prompted with a list of conflicts and the reservation will not be made (Figure 5.85). If an error is encountered click the back to previous page link or return to homepage link to continue.

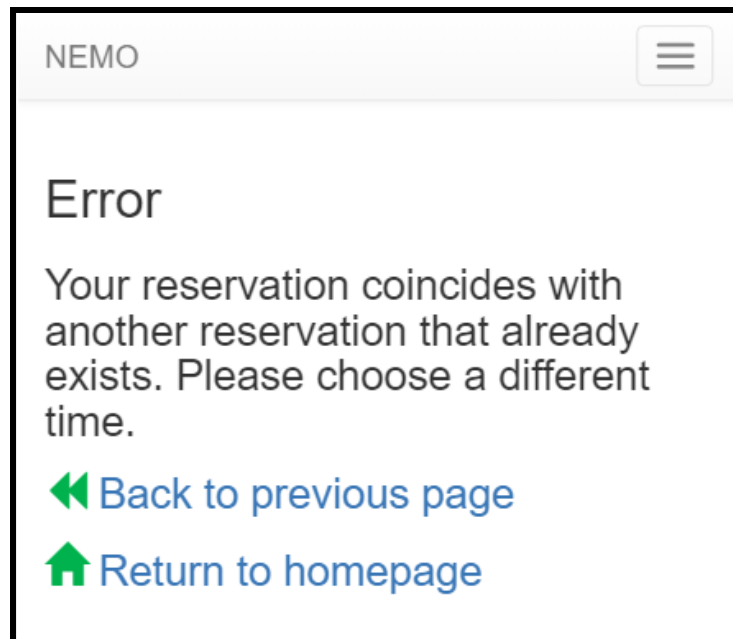

Figure 5.85: *Mobile reservation policy conflict dialog*

Chapter 5 Calendar

- Upon successful creation of the reservation, a confirmation dialog will appear (Figure 5.86). Click the return to homepage link or view the tool calendar link to continue.

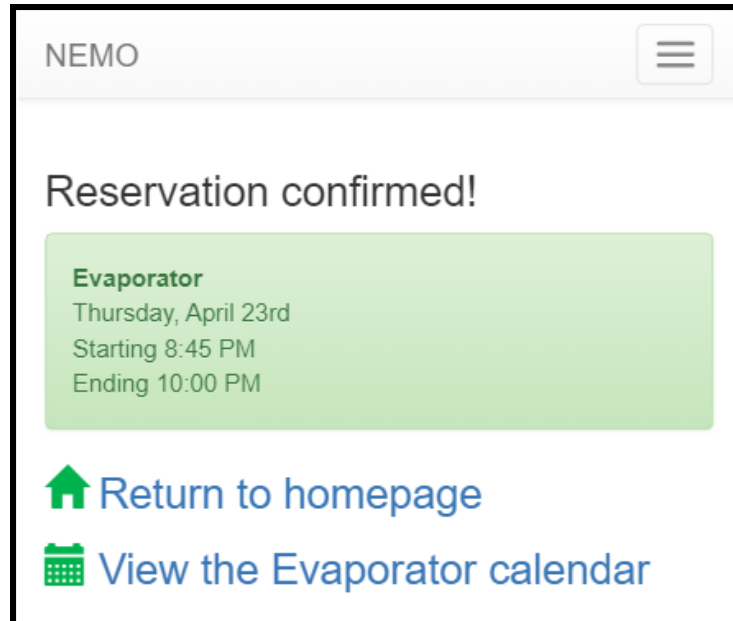

Figure 5.86: *Mobile reservation confirmation dialog*

- The reservation will appear on the calendar.

5.9 Calendar customizations

5.9.1 Notification emails

Several email notifications are possible associated with a reservation and must be configured to be functional.

- Missed reservations email template.

Chapter 5 Calendar

- Reservation reminder email template.
- Reservation warning email template.
- Reservation cancelation email template.
- User reservation creation email template.
- User reservation cancel email template.

All email templates are configured in the Customization page, described in chapter [40](#).

5.9.2 Calendar view settings

The date format, default view, first day of week, calendar view start time, recurring outages days in advance and overview options can be configured in the Customization → Calendar settings section [40.2](#).

5.9.3 Calendar view time grid resolution

The time grid resolution is 15 minutes. To change the value, edit the file `calendar.html` and change the constant in the `slotDuration` setting.

5.9.4 Reservation policies

The reservation policies are checked in the `policy.py` file. It is beyond the scope of this manual to discuss how to create a new policy however the `policy.py` file can be edited to turn off existing policies or change which policies can be bypassed by staff.

Chapter 5 Calendar

5.9.5 Calendar page refresh rate

The calendar page automatically refreshes every 30 seconds which updates the calendar and sidebar. To change the update interval, edit the calendar.html and change the setInterval constant (in milliseconds) in the on_load function.

CHAPTER 6

Tool control

The tool control page is the main interface for finding information about a tool, using a tool, and commenting on or reporting problems with tools. The page features a side bar to quickly navigate between tools and visually determine each tool's status; a summary tab to provide tool information, status, and login interface; a details tab to provide information about a tool such as the tool owner, its location, required resources, and task history; and tabs to report problems and post comments.

6.1 Web address

The tool control page is accessible at `site-address/tool_control/`. For example, `www.nemo.com/tool_control/`. The page can also be accessed from the navigation bar menu item "Tool control".

Chapter 6 Tool control

6.2 Side bar

The side bar has a variety of features to help users visually identify tool and training status, as well as convenient navigation (Figure 6.1).

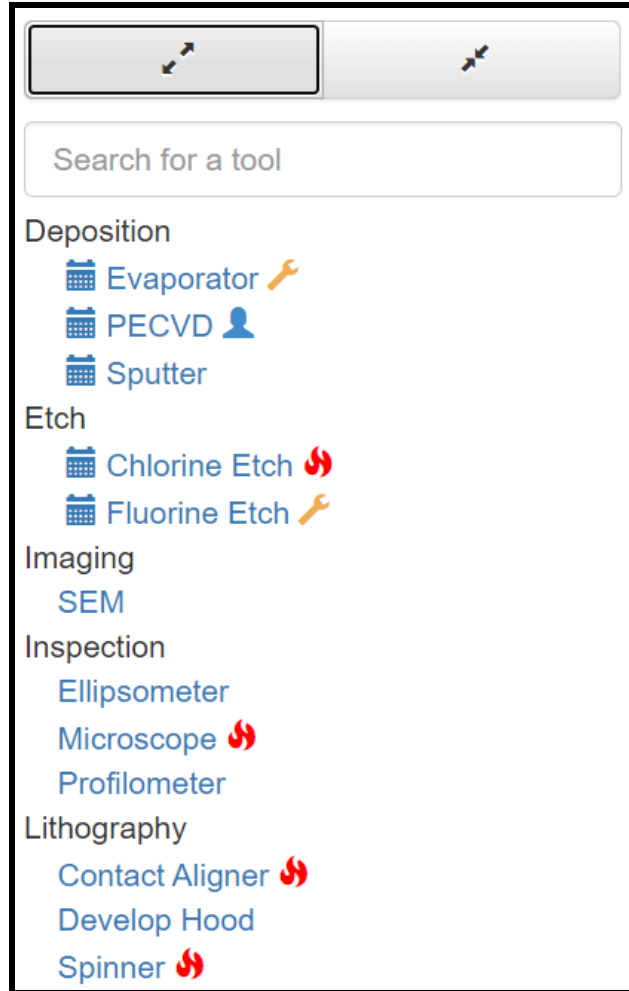

Figure 6.1: Tool control page side bar

Chapter 6 Tool control

6.2.1 Find the tool of interest

The expand/contract toggle button (Figure 6.2) provides a shortcut to open or close the tool list.

Figure 6.2: *Expand/contract toggle button*

Clicking the button will fully expand the tool list so all categories, sub-categories, and tools are listed (Figure 6.1).

Clicking the button again will close the tool list so only top categories are listed (Figure 6.3).

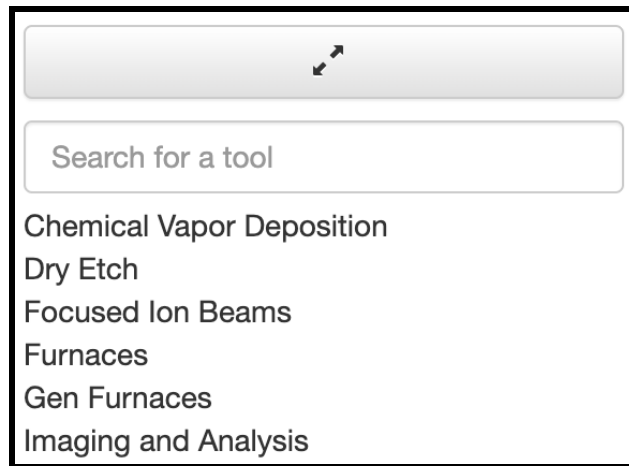

Figure 6.3: *Tool list contracted*

Chapter 6 Tool control

To find a tool directly, enter the name in the search dialog (Figure 6.4) then select the name of the list returned. The return list updates automatically as typed, and a tool can be clicked from the list at any time (Figure 6.5). Once clicked, the tool list is expanded to show the tool clicked and that tool is selected.

Figure 6.4: *Tool search dialog*

Figure 6.5: *Tool search return list*

Chapter 6 Tool control

6.2.2 Hierarchy of the tool list

The tool list is displayed in alphabetical order by top level category, then by second level category, etc. If both tools and sub-categories exist at any level, tools are listed first in alphabetical order, then sub-categories are listed in alphabetical order (Figure 6.6). All tools must have at least one top level category. Categories are set at the tool level and are discussed in the Detailed administration → Tools section 42.61.

Figure 6.6: Example of category and tool mixed listing

6.2.3 Tool list icons

Each tool can list icons to give a quick reference to visually note the operating status. Hovering over an icon will give a description of its purpose in case the icons meaning isn't known.

 The tool requires an area reservation. Before a user can make a reservation on the tool, they must first make an area reservation that will encompass the start time of the tool reservation. Area reservations are optional and configured in the area table discussed in the Detailed administration → Areas section 42.8.

Chapter 6 Tool control

A user is currently logged into the tool. Hovering over the icon will show the logged in user's name.

A delayed logoff is in effect. The tool is not available for users.

A scheduled outage is in effect for this tool. The tool is not available to users.

A scheduled outage of an option resource is in effect for this tool. The tool is available but may not be fully functional.

A required resource is unavailable. The tool is not available to users.

An optional resource is unavailable. The tool is available to users, but the tool may not be fully functional. The optional resource unavailable icon is only displayed if the required resource unavailable icon is not displayed.

The tool is shut down because of a serious problem. The tool is not available to users.

The tool has a problem that may impact usage or results. The tool is available to users, but the tool may not be fully functional. The tool problem icon is only displayed if the tool shut down icon is not displayed.

6.2.4 Tool qualification

Tools that users are trained and qualified on will appear dark on the list while tools that a user is not qualified on will appear greyed out (Figure 6.7). If the “Show qualified tools button” setting is enabled from Calendar settings (section 40.2), the user can decide to filter out tools he is not qualified for. User tool qualifications are detailed in the Qualifications chapter 31.

Chapter 6 Tool control

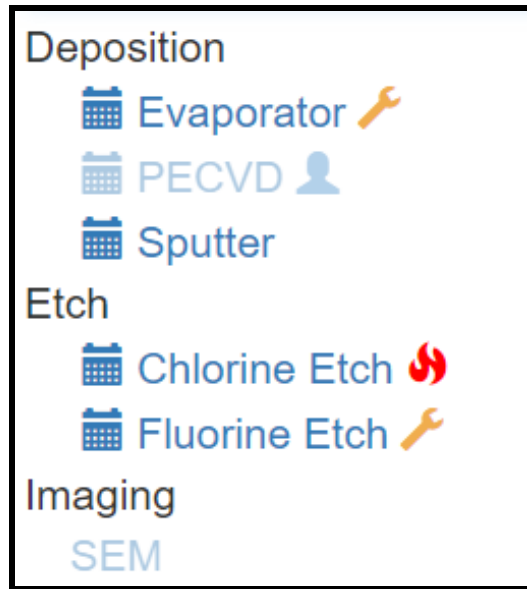

Figure 6.7: Tool list showing user qualifications

6.3 Tool page header bar

The tool page header bar shows the currently selected tool selectable tabs used to navigate the tool pages (Figure 6.8). The summary tab is selected by default each time the tool control page is loaded. The Config History tab is only visible on tools that are configurable.

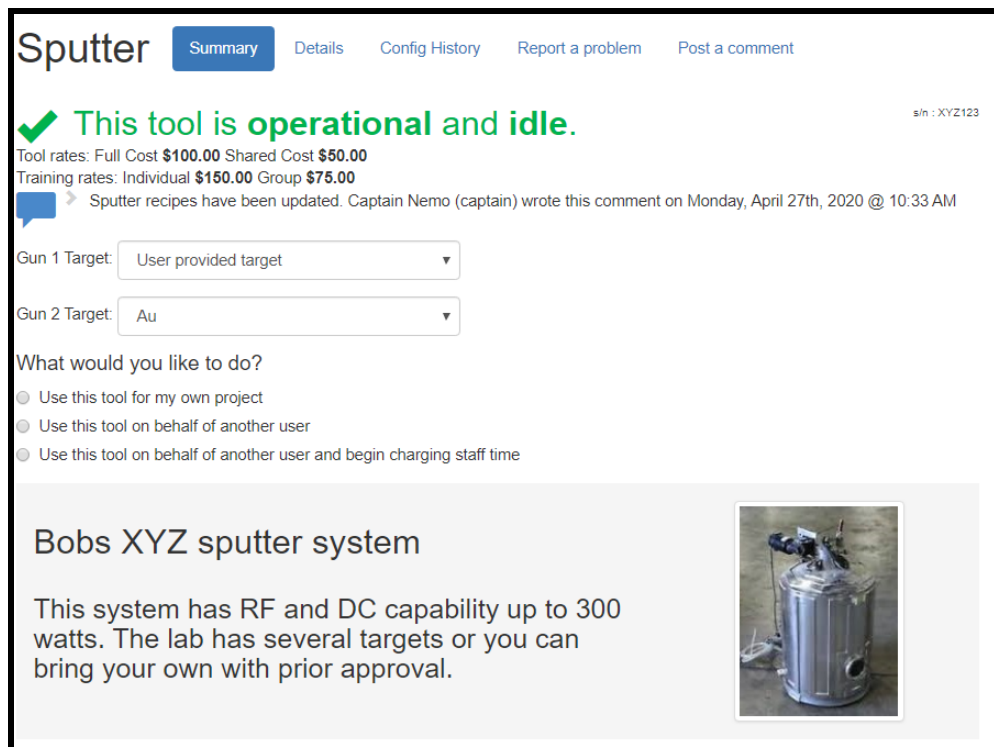

Figure 6.8: Tool page header bar

Chapter 6 Tool control

6.4 Summary Tab

The summary tab provides users and staff with operational information such as tool serial number, tool status, rates, tool status details, comments, configuration details, log in options for idle tools, log out options for in use tools, tool description, and tool image (Figure 6.9, Figure 6.10).

The screenshot shows the 'Sputter' tool control interface. At the top, there are navigation tabs: 'Summary' (selected), 'Details', 'Config History', 'Report a problem', and 'Post a comment'. A green checkmark icon is followed by the text 'This tool is operational and idle.' in green. To the right of this text is the serial number 's/n : XYZ123'. Below this, the tool rates are listed: 'Full Cost \$100.00 Shared Cost \$50.00' and 'Training rates: Individual \$150.00 Group \$75.00'. A comment bubble icon is followed by the text 'Sputter recipes have been updated. Captain Nemo (captain) wrote this comment on Monday, April 27th, 2020 @ 10:33 AM'. Below the comment, there are two dropdown menus: 'Gun 1 Target: User provided target' and 'Gun 2 Target: Au'. Underneath these is the question 'What would you like to do?' followed by three radio button options: 'Use this tool for my own project', 'Use this tool on behalf of another user', and 'Use this tool on behalf of another user and begin charging staff time'. At the bottom, there is a section titled 'Bobs XYZ sputter system' with a description: 'This system has RF and DC capability up to 300 watts. The lab has several targets or you can bring your own with prior approval.' To the right of the text is a photograph of the sputter system, which is a cylindrical metal chamber with various ports and a top-mounted assembly.

Figure 6.9: Tool control summary page of idle tool

Stop using the Sputter

Bobs XYZ sputter system

This system has RF and DC capability up to 300 watts. The lab has several targets or you can bring your own with prior approval.

Figure 6.10: Tool control summary page of tool in use

Chapter 6 Tool control

6.4.1 Tool serial number

The tool serial number is optional and will only be displayed if a value exists in the tool table. It is displayed in the top right corner of the summary tab (Figure 6.11). Tool serial number configuration is discussed in the Detailed administration → Tools section 42.61.

Figure 6.11: *Tool serial number*

6.4.2 Tool status

The tool status is displayed at the top of the summary tab and informs users and staff of the current condition of the tool. There are several possible statuses, and they are displayed with precedence in the order listed below.

6.4.2.1 Tool in use

The highest priority status is that a tool is in use. The tool in use message will identify the user, project, and the time they started using the tool (Figure 6.12). The user name is a link that can be clicked to contact the user by email through NEMO.

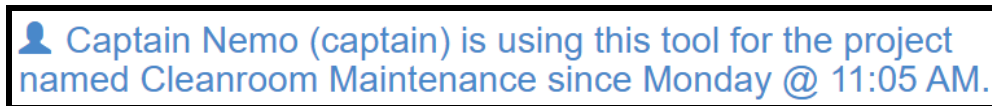

Figure 6.12: *Tool status in use by user message*

Chapter 6 Tool control

If the current user is also the user logged into the tool, the message will be more personalized (Figure 6.13).

 You are using this tool for the project named Cleanroom Maintenance since Monday @ 11:05 AM.

Figure 6.13: *Tool status in use by current user message*

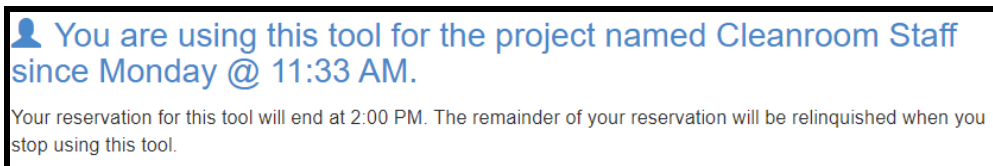

If a staff member is using a tool on behalf of another user, both the staff member and user will be listed (Figure 6.14).

 Captain Nemo (captain) is using this tool on behalf of Ned Land (ned) for the project named Project 1 since Monday @ 12:39 PM.

Figure 6.14: *Tool status in use by staff on behalf of a user*

In addition, if the current user is using the tool with a reservation, the reservation end time will also be displayed (Figure 6.15).

 You are using this tool for the project named Cleanroom Staff since Monday @ 11:33 AM.
Your reservation for this tool will end at 2:00 PM. The remainder of your reservation will be relinquished when you stop using this tool.

Figure 6.15: *Tool status in use by current user with reservation message*

Chapter 6 Tool control

6.4.2.2 Delayed logoff

The delayed logoff status indicates that the previous user initiated a delayed logoff to prevent usage for some amount of time (Figure 6.16). Users are not able to log in during this time however staff may override and log in. The feature is useful for tools that require post-process runs such as plasma cleans. It allows a user to run the post-process and leave without waiting for the completion. Tool usage time is accumulated during delayed logoff. Delayed logoff configuration is discussed in the Detailed administration → Tools section 42.61.

A screenshot of a system message box with a black border. The text inside is blue and reads: "Captain Nemo (captain) has finished using the Chlorine Etch but delayed logoff is in effect. The tool will be available at 11:51 AM."

Figure 6.16: *Tool status scheduled tool outage*

6.4.2.3 Scheduled outage

There are two types of scheduled outage: a scheduled tool outage and a scheduled resource outage. If there are multiple scheduled outages, all outages will be displayed sequentially. Both outage types display the reason for the shutdown, details, who initiated the shutdown, the start day and time, and the end day and time. Scheduled outages are planned shutdowns that take a predictable amount of time.

A scheduled tool outage allows staff to automatically shut down a tool on a set date and time which can be useful for scheduling tool configurations or preventative maintenance (Figure 6.17). Users are not able to log in during a scheduled tool outage however staff are. Details about scheduled tool outages can be found in the Calendar page → Reservations → Schedule an outage subsection 5.4.13.

Chapter 6 Tool control

Figure 6.17: *Tool status scheduled tool outage*

A scheduled resource outage allows staff to automatically shut down a resource on a set date and time which can be useful for scheduling gas bottle changes or other facility related maintenance (Figure 6.18). Resource outages will automatically update tool status for each tool that relies on the resource. Users are not able to log in during a scheduled resource outage when the resource is required by the tool however staff are.

Figure 6.18: *Tool status scheduled required resource outage*

If a scheduled resource is optional on a tool, the scheduled outage will be indicated in yellow, and the tool will still be available to users (Figure 6.19).

Figure 6.19: *Tool status scheduled optional resource outage*

Details about scheduled resource outages can be found in the Resources chapter 34.

Chapter 6 Tool control

6.4.2.4 Shutdown

The tool shutdown status is displayed if the tool has a problem that requires shut down or a required resource is not available (Figure 6.20). Users are not able to log in during this time however staff are. Details about tool shut downs can be found in the Tool control page → Report a problem tab section 6.8. Details about resources can be found in the Resources chapter 34.

Figure 6.20: *Tool status shut down*

6.4.2.5 Optional resource not available

The optional resource outage status is displayed if there are resources unavailable that a tool partially depends on (Figure 6.21). Users and staff are able to log in. For example, a fluorine reactive ion etch system with multiple types of fluorine gases, and one is not available. Details about resources can be found in the Resources chapter 34. Dependent and optional resource configuration is discussed in the Detailed administration → Tools section 42.61.

Figure 6.21: *Tool status optional resource outage*

Chapter 6 Tool control

6.4.2.6 Operational and idle

The operational and idle status is displayed if there are no issues preventing usage of the tool (Figure 6.22). However, there may be a problem listed in the tool status details below. Users and staff are able to log in.

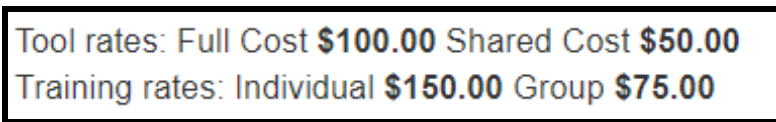

✓ This tool is **operational and idle.**

Figure 6.22: *Tool status operational and idle*

6.4.3 Tool rates

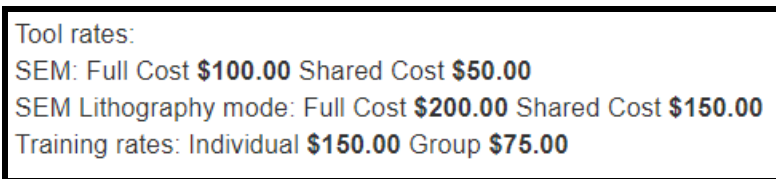

The tool rates are optional and will only be displayed if they have been defined (Figure 6.23). Tool rates are discussed in the Customizations → Tool rates section 40.9.

Tool rates: Full Cost **\$100.00** Shared Cost **\$50.00**
Training rates: Individual **\$150.00** Group **\$75.00**

Figure 6.23: *Tool rates*

If a tool has child tools defined to allow multiple modes of operation with different charges, the parent and all child rates will be displayed (Figure 6.24). Parent and child tools are discussed in the Detailed administration → Tools section 42.61.

Tool rates:
SEM: Full Cost **\$100.00** Shared Cost **\$50.00**
SEM Lithography mode: Full Cost **\$200.00** Shared Cost **\$150.00**
Training rates: Individual **\$150.00** Group **\$75.00**

Figure 6.24: *Tool rates with parent and child tools*

Chapter 6 Tool control

6.4.4 Tool usage counters

Tool usage counters, if configured, are displayed below the rates (Figure 6.25). Tool usage counters are linked to numeric or float pre/post usage questions and accumulate value with each tool logout based on the answer to the question. This feature is useful for displaying how much a tool has been used, to track material usage, or to trigger preventative maintenance. Detailed information on how to setup tool usage counters is provided in the Detailed administration → Tool usage counters sections: DetailedAdministrationNemoToolUsageCounters.

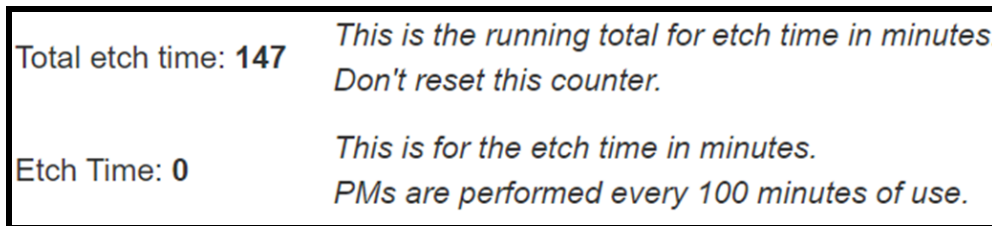

Figure 6.25: Tool usage counter, user view

Staff are able to reset the counter and will see a reset button next to the current value (Figure 6.26).

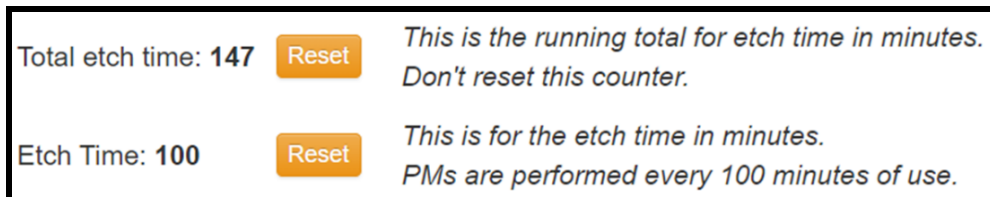

Figure 6.26: Tool usage counter, staff view

Chapter 6 Tool control

Clicking reset will open a confirmation dialog box, click ok to reset the counter or cancel to abort (Figure 6.27).

Figure 6.27: *Tool usage counter reset confirmation dialog*

Each time a counter is reset, a comment is posted for the tool that expires after seven days (Figure 6.28). In addition, if the Lab Manager role has been defined in settings.py, an email is sent. The comment and email will list the counter, its last value, who reset it, and when.

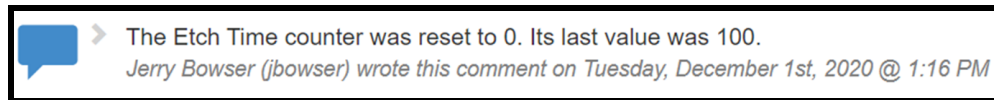

Figure 6.28: *Tool usage counter reset comment*

Chapter 6 Tool control

6.4.5 Tool status details

Tool status details provide additional information about a tool that may impact availability or results. If the information available for a particular dialog is lengthy, only the first two lines are displayed with an expansion icon . Click the icon to see more information.

6.4.5.1 Unavailable required resources

When a required resource is not available, the status details will show a red leaf and identify which required resource is not available along with the description that was entered when the resource was shut down (Figure 6.29).

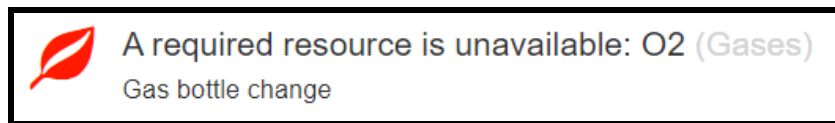

Figure 6.29: *Unavailable required resource*

6.4.5.2 Unavailable optional resources

When an optional resource is not available, the status details will show a yellow leaf and identify which required resource is not available along with the description that was entered when the resource was shut down (Figure 6.30).

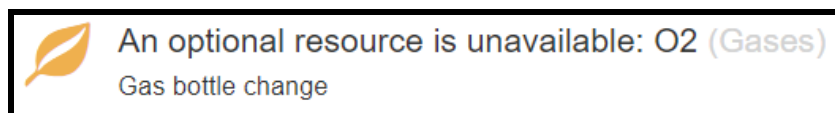

Figure 6.30: *Unavailable optional resource*

Chapter 6 Tool control

6.4.5.3 Shutdown and problem tasks

Shutdowns and problems are reported in the Tool control → Report a problem tab described. The status details functionality are identical for both except for the displayed icon. Shutdowns are displayed with a red fire icon (Figure 6.31) and problems are displayed with a yellow wrench icon (Figure 6.32). When a shutdown or problem is reported, the user can select a category that will be displayed as the heading (Figure 6.31). If no category is selected, the description is displayed as the heading (Figure 6.32).

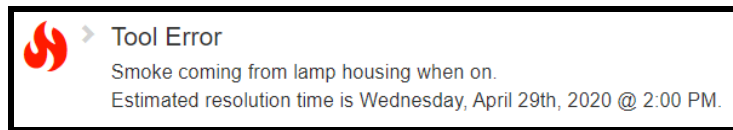

Figure 6.31: *Tool shutdown*

Clicking the ▼ will collapse the shutdown or problem dialog.

Chapter 6 Tool control

6.4.5.4 Comments

Comments are created in the Tool control → Post a comment tab section 6.9. They are used to convey important information about a tool to users and can have an automatic expiration or display indefinitely (Figure 6.38).

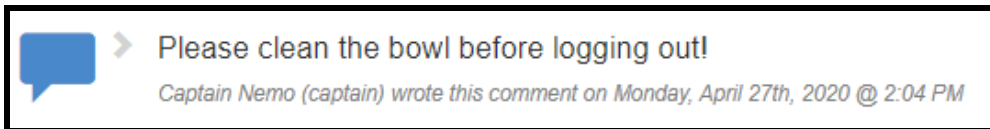

Figure 6.38: *Tool status comment*

Clicking the → will expand the comment dialog (Figure 6.39).

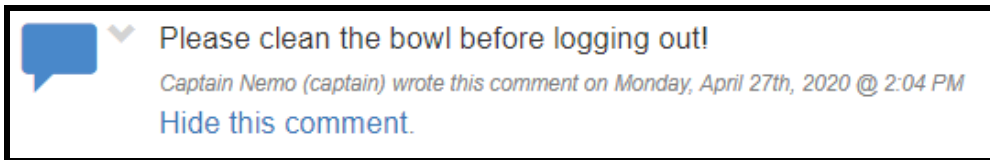

Figure 6.39: *Tool status comment dialog expanded*

Staff or the user that created the comment may hide comments by clicking the hide this comment link (Figure 6.40).

Figure 6.40: *Tool status hide comment link*

Clicking the ▼ will collapse the comment dialog.

Chapter 6 Tool control

6.4.5.5 Update task (staff only)

Staff may update a task by clicking the update link on a problem or shutdown listed in the tool status details. Clicking the link will open the task update dialog (Figure 6.41). Many of the fields associated with the original task report are available to be edited. In addition, a summary of activity to date is listed on the right side of the page. However, if the page is too narrow or in mobile view, all information is listed in a single column. All fields are optional for updates. Only fields with changes are updated.

PECVD task

Created by Captain Nemo (captain) on Friday, April 17th, 2020 @ 12:30 PM (1 week, 3 days ago).
Last updated by Captain Nemo (captain) on Monday, April 27th, 2020 @ 2:13 PM (an hour ago).

Update the task

Would you like to change the urgency of this task? This will help staff prioritize tasks in the NanoFab.

Normal

Would you like to change this task's initial classification to more accurately reflect the nature of the problem? Proper classification helps the NanoFab staff analyze long-term maintenance trends.

Wafer handling problem

What is the status of the task?

Triage

When do you think the problem will be resolved? Leave this field blank if it's difficult to predict.

04/29/2020 12:00 PM

This task requires the PECVD to be shutdown
 This task is considered a potential safety hazard to the NanoFab

Please describe any actions being taken to resolve this task. This information will be visible to all users in order to keep everyone apprised of the tool's status.

Choose Files No file chosen

Update

Problem description

Wafers floating on platen.

Progress

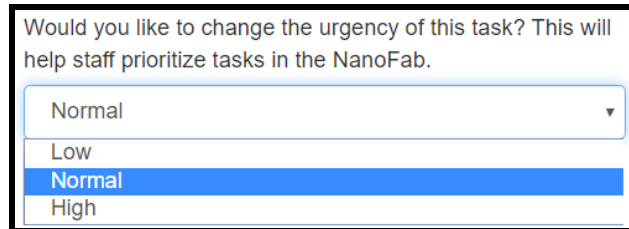

On Monday, April 20th, 2020 @ 8:53 PM Captain Nemo (captain) updated this task: Tested pump down curve. Need new soft pump valve, on order will arrive 5/6/2020.

On Monday, April 27th, 2020 @ 2:13 PM, Captain Nemo (captain) set the status of this task to "Triage".

Figure 6.41: Tool control task update dialog

Chapter 6 Tool control

- The urgency of the task can be changed by selecting a new urgency from the drop down (Figure 6.42). The urgency is displayed on the maintenance screen detailed in the Maintenance chapter 30.

Would you like to change the urgency of this task? This will help staff prioritize tasks in the NanoFab.

Normal

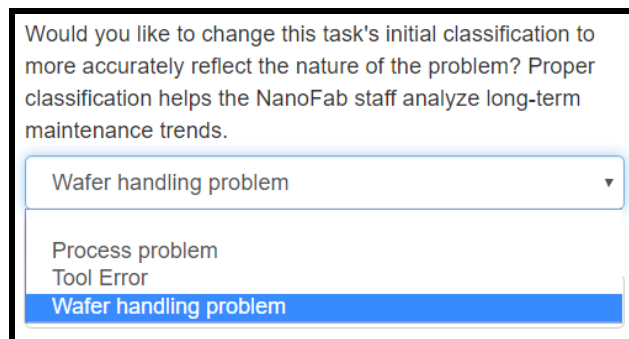

Low

Normal

High

Figure 6.42: *Tool control task update urgency*

- If task categories have been defined, a dropdown and instruction will appear. Click the dropdown and select the problem category that best describes the problem (Figure 6.43). If no category describes the problem, leave this blank. Task categories can be used to bin problems making future problem analysis easier. Categories are configured in the Detailed administration → Task categories section 42.54.

Would you like to change this task's initial classification to more accurately reflect the nature of the problem? Proper classification helps the NanoFab staff analyze long-term maintenance trends.

Wafer handling problem

Process problem

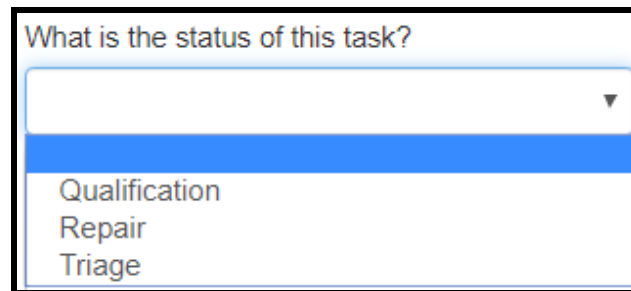

Tool Error

Wafer handling problem

Figure 6.43: *Tool control task update category*

Chapter 6 Tool control

- If task statuses have been defined, a dropdown and instruction will appear (Figure 6.44). If the status is not known, the field can be left blank. Click the dropdown and select the new status for the problem. Task statuses are used to update various staff as a problem progresses to resolution. For example, once the maintenance team has finished a repair, they can change the status to qualification which notifies the process engineer that the tool is ready to requalify. Statuses are configured in the Detailed administration → Task statuses page section [42.55](#).

The image shows a web form element with a dropdown menu. The text above the dropdown reads "What is the status of this task?". The dropdown menu is currently open, showing three options: "Qualification", "Repair", and "Triage". The "Qualification" option is highlighted with a blue background.

Figure 6.44: *Tool control task update status*

Chapter 6 Tool control

- Provide an estimate of when the problem will be resolved if known or leave blank. Clicking in the dialog will open a date and time dialog (Figure 6.45).

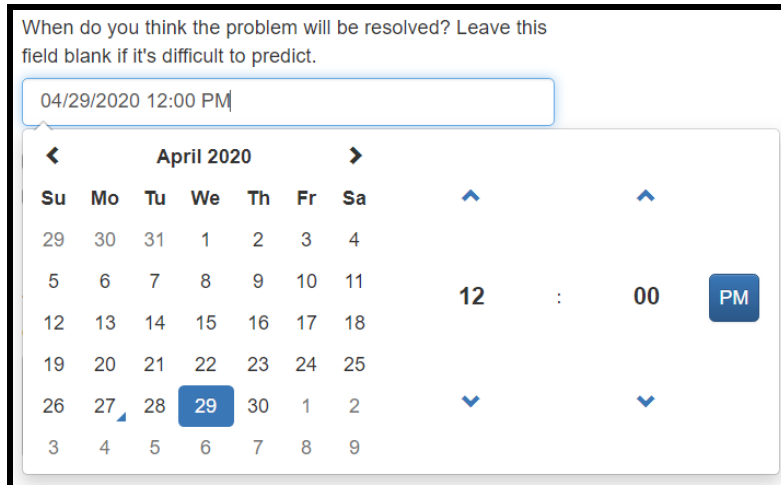

Figure 6.45: Tool control task update completion date

- Check if the shutdown check box if the tool is not able to be used by others and could potentially ruin samples (Figure 6.46).

Figure 6.46: Tool control task update safety hazard

- Check the safety hazard check box if the problem is a safety hazard to people or equipment (Figure 6.47).

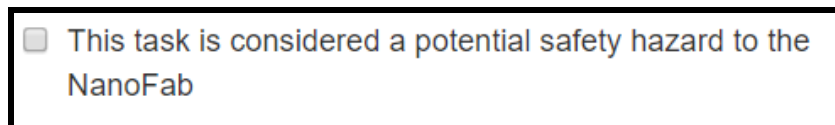

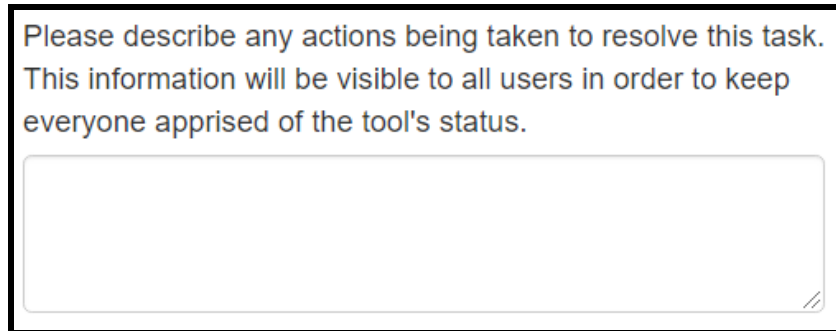

Figure 6.47: Tool control task update shut down

Chapter 6 Tool control

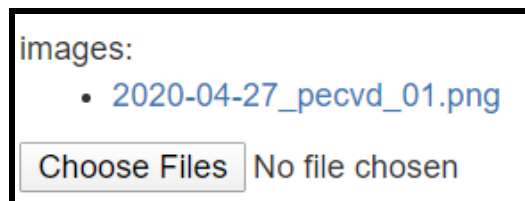

- Provide a detailed update in the dialog box (Figure 6.48).

Please describe any actions being taken to resolve this task. This information will be visible to all users in order to keep everyone apprised of the tool's status.

Figure 6.48: *Tool control task update detailed description*

- The choose files dialog may be used to upload any relevant pictures to show details that support the description (Figure 6.49). Clicking the button activates a standard file selection dialog. Multiple files can be uploaded. Note: it is good practice to make note of the files in the description to link the file to the text.

images:

Choose Files No file chosen

Figure 6.49: *Tool control task update upload files*

Chapter 6 Tool control

- Click the update button to finish (Figure 6.50). To cancel an update, navigate to another page prior to clicking the update button.

Figure 6.50: Tool control task update button

6.4.5.6 Resolve task (staff only)

Staff may resolve a task by clicking the resolve link on a problem or shutdown listed in the tool status details. Clicking the link will open the task resolution dialog (Figure 6.51). A resolution description and resolution category can be entered. In addition, a summary of activity to date is listed on the right side of the page. However, if the page is too narrow or in mobile view, all information is listed in a single column. All fields are optional.

PECVD task

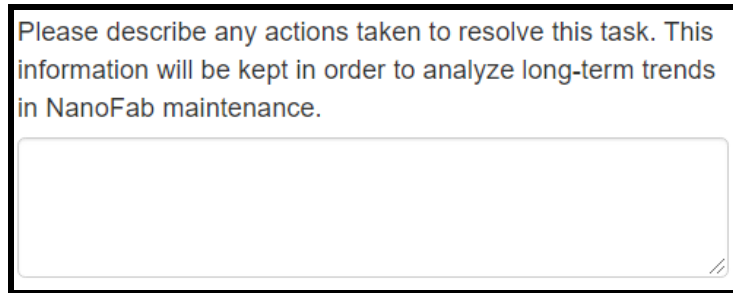

Created by Captain Nemo (captain) on Friday, April 17th, 2020 @ 12:30 PM (1 week, 3 days ago).
Last updated by Captain Nemo (captain) on Monday, April 27th, 2020 @ 3:46 PM (22 minutes ago).

Resolve the task Please describe any actions taken to resolve this task. This information will be kept in order to analyze long-term trends in NanoFab maintenance. <input type="text"/> Please select a classification that best describes how this problem was fixed. If no classification is appropriate then leave this field blank. <input type="text"/>	Problem description Wafers floating on platen. Chapter 6 Tool control

- Provide a detailed resolution description in the dialog box (Figure 6.52).

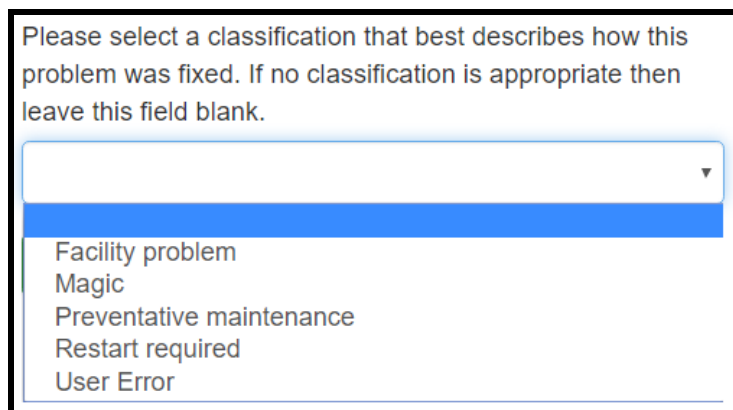

Please describe any actions taken to resolve this task. This information will be kept in order to analyze long-term trends in NanoFab maintenance.

A large, empty text input field with a small cursor icon in the bottom right corner.

Figure 6.52: *Tool control task resolution description*

- If task categories have been defined, a dropdown and instruction will appear. Click the dropdown and select the problem category that best describes the problem (Figure 6.53). If no category describes the problem, leave this blank. Task categories can be used to bin problems making future problem analysis easier. Categories are configured in the Detailed administration → Task categories section 42.54.

Please select a classification that best describes how this problem was fixed. If no classification is appropriate then leave this field blank.

A dropdown menu with a blue highlight on the selected item. The list of categories is:

- Facility problem
- Magic
- Preventative maintenance
- Restart required
- User Error

Figure 6.53: *Tool control task resolution category*

Chapter 6 Tool control

- Click the resolve button to finish (Figure 6.54). To cancel an update, navigate to another page prior to clicking the update button.

Figure 6.54: *Tool control task resolution button*

6.4.5.7 Cancel task

The user who created a problem or shutdown may cancel the task by clicking the cancel link in the tool status details (Figure 6.55).

You may [cancel this task](#) if it was mistakenly created.

Figure 6.55: *Tool control task cancel task link*

There are no additional prompts, clicking the link immediately cancels the task and returns the user to the tool control summary page.

6.4.5.8 Hide comments

Staff or the user who created a comment may hide the comment by clicking the 'hide this comment' link in the comment details (Figure 6.56).

[Hide this comment.](#)

Figure 6.56: *Tool control task hide comment link*

There are no additional prompts, clicking the link immediately hides the comment and returns the user to the tool control summary page.

Chapter 6 Tool control

6.4.6 Tool configuration

Tool configurations are created in the Configurations table of the database detailed in the Detailed administration → Configurations section. If a tool is configurable, its current configuration will be shown (Figure 6.57).

Figure 6.57: Tool control tool configuration

If the tool is not in use and the current user is a staff member or has permission to change a tool configuration, a drop down with all possible configurations will be shown (Figure 6.58). Select the desired configuration from the drop down.

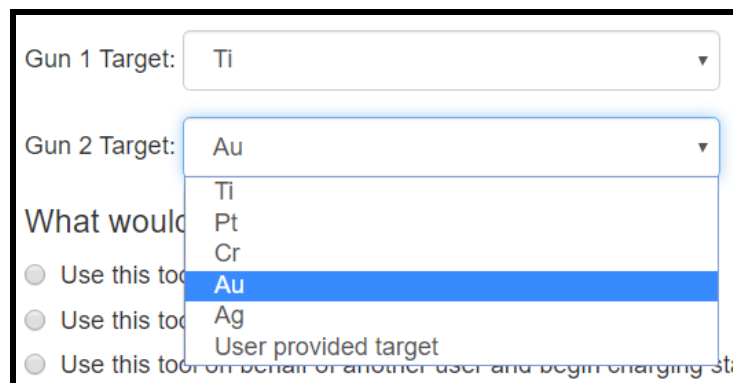

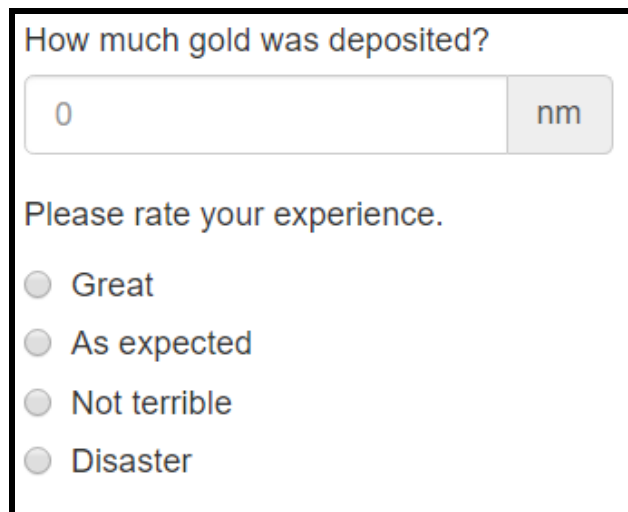

Figure 6.58: Tool control tool configuration dialog

Configuration history is saved in the database and is discussed in Detailed administration → Configuration histories section 42.15. Configurations are discussed in the Configuration Agenda chapter 26.

Chapter 6 Tool control

6.4.7 Pre/Post usage questions

If pre/post usage questions are configured and set as required, they must be answered before tool log in/out will be allowed (Figure 6.59). Questions can be multiple choice, text, or numeric input. They can be used to collect information about a run, create charges for consumables used, and record important tool parameters. Pre/Post usage questions can be configured so responses are either required or optional. In addition, questions can be grouped and repeated a configurable number of times to capture multiple processes in a single tool usage. Pre/Post usage questions are discussed in the Detailed administration → Tools section 42.61.

How much gold was deposited?

0 nm

Please rate your experience.

- Great
- As expected
- Not terrible
- Disaster

Figure 6.59: *Tool control pre/post usage questions*

All pre/post usage question responses are saved in the database usage events table described in the Detailed administration → Usage events section 42.63. Pre/Post usage question responses can also be reviewed on the usage data history tab of the tool control page. The ability to review the pre/post usage question responses provides an electronic logbook that can be viewed by users and staff.

Chapter 6 Tool control

6.4.8 Tool log in

The tool log in dialogs will vary depending on the user type (staff or not), the operation mode of the tool (regular/waitlist/hybrid) and number of projects the user has.

6.4.8.1 Tool operation mode

The tool operation mode can be set in the tool configuration page in the Detailed administration → Tools section [42.61](#).

Waitlist timeout and hybrid buffer time can be changed in Customization → Tool section [40.15.5](#).

There are 3 modes available: Regular, Waitlist and Hybrid:

- Regular: This is the default and normal mode of operation where users can make reservations, and separately engage tools when no one else is using them.
- Waitlist: In this mode, users cannot make reservations, but they can still engage a tool as long as no one else is using it. If someone else is using it, they can add their name to the waitlist and they will be notified when the tool is free to use when it's their turn (Figure [6.60](#)).

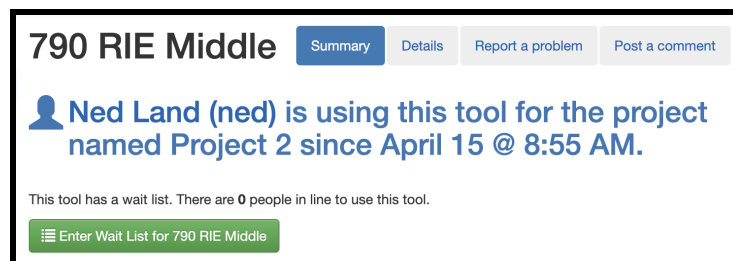

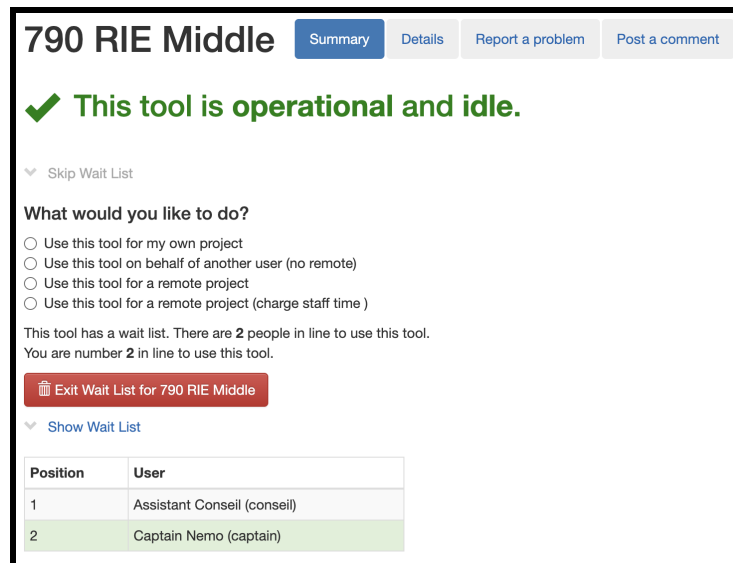

Figure 6.60: *Tool control login enter waitlist*

Chapter 6 Tool control

If it's a user's turn and they do not engage the tool within a certain (configurable) time, they lose their spot and it goes to the next person in the list. Just like in regular mode, users can at any point skip the waitlist to engage the tool if no one else is using it, even if it's not their turn (Figure 6.61).

790 RIE Middle [Summary](#) [Details](#) [Report a problem](#) [Post a comment](#)

✓ This tool is operational and idle.

▼ Skip Wait List

What would you like to do?

Use this tool for my own project

Use this tool on behalf of another user (no remote)

Use this tool for a remote project

Use this tool for a remote project (charge staff time)

This tool has a wait list. There are 2 people in line to use this tool.
You are number 2 in line to use this tool.

[Exit Wait List for 790 RIE Middle](#)

▼ Show Wait List

Position	User
1	Assistant Conseil (conseil)
2	Captain Nemo (captain)

Figure 6.61: Tool control login skip waitlist

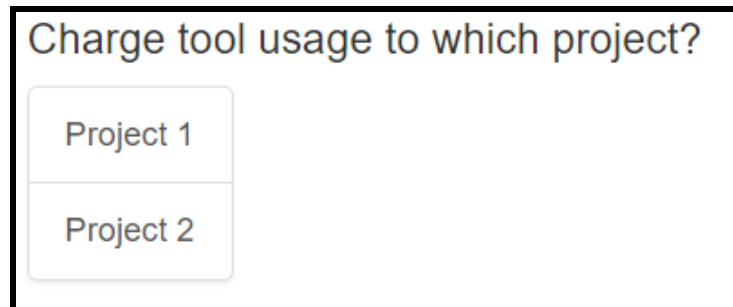

- Hybrid: This mode is similar to the waitlist mode, except that users can make reservations which will take precedence over the waitlist. Once the user is done using the tool, the waitlist process resumes. When a user is done using a tool, there is a (configurable) buffer time that if a reservation is upcoming during that time, then the next waitlist user will not be notified.

6.4.8.2 User tool login

Users must be explicitly qualified to use tools. In addition, the tool must be in a usable tool status. Users with multiple projects will be prompted to select a

Chapter 6 Tool control

project from their list of active projects (Figure 6.62). User qualifications are detailed in the Qualifications chapter 31.

The image shows a dialog box with a black border. At the top, the text "Charge tool usage to which project?" is displayed. Below this text, there are two vertically stacked buttons. The top button is labeled "Project 1" and the bottom button is labeled "Project 2". Both buttons have a light gray background and a thin border.

Figure 6.62: *Tool control login project selection*

Chapter 6 Tool control

Clicking the project will enable the start button (Figure 6.63).

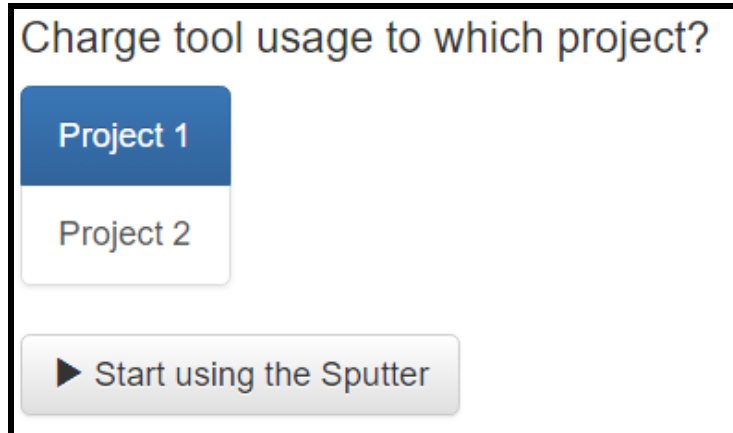

Figure 6.63: *Tool control login multiple project start button*

If a user only has one project, a message with the name of their project will appear and the start button will be displayed (Figure 6.64).

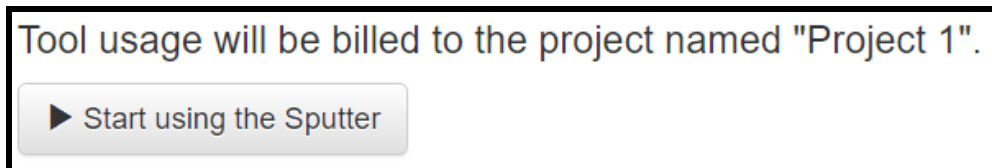

Figure 6.64: *Tool control login single project start button*

Click the 'Start using the tool' button to begin usage. NEMO will check user permissions before enabling the tool. If interlocks have been configured, NEMO will enable the interlock. Tool interlocks are discussed in the Detailed administration → Tools section 42.61. A start record will be recorded in the usage events table listing the users, project, tool, and start time. Usage events are found in the Detailed administration → Usage events section 42.63.

Chapter 6 Tool control

If a tool requires a user to be logged into an area and they are not, an error message will appear (Figure 6.65). Lab areas are configured through the Detailed administration → Areas page section 42.8. Tools can be configured to require a user to be logged into an area and are discussed in the Detailed administration → Tools section 42.61. If a tool requires a user to be logged into an area to use a tool and they attempt to enable the tool without being logged into the area, an unauthorized tool access email will be sent to the abuse email if configured. Both are configured in the Customization chapter 40.

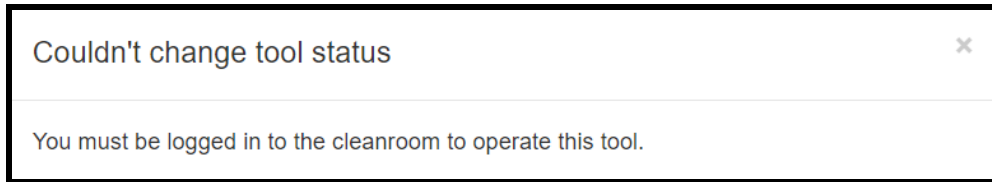

Figure 6.65: *Tool control log in area error message*

If the user isn't qualified to use the tool, an error message will appear (Figure 6.66).

Figure 6.66: *Tool control log in qualification error message*

Chapter 6 Tool control

If interlocks are enabled and the interlock command fails, an error message will appear (Figure 6.67). You can choose to Enable the tool anyway (if that option is checked), try again or cancel.

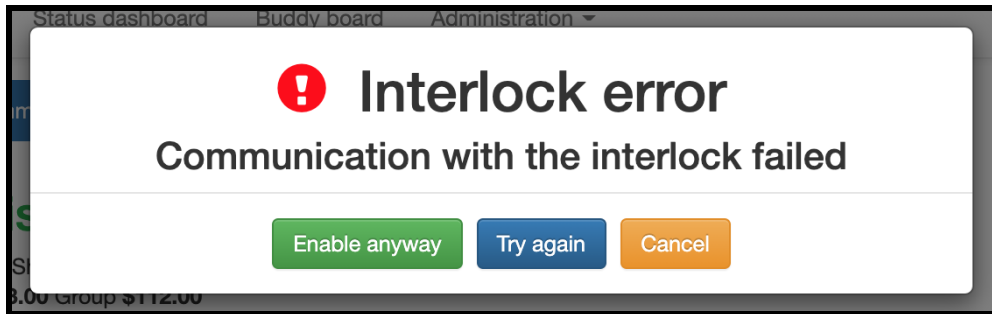

Figure 6.67: *Tool control interlock error*

6.4.8.3 Multiple use tool login

If a tool has been configured for multiple uses as a parent tool with child tools then multiple start buttons will be displayed (Figure 6.68). The parent/child tool configuration is useful in cases where a single tool can be used multiple ways and either the usage of each way needs to be tracked or needs to be charged different rates.

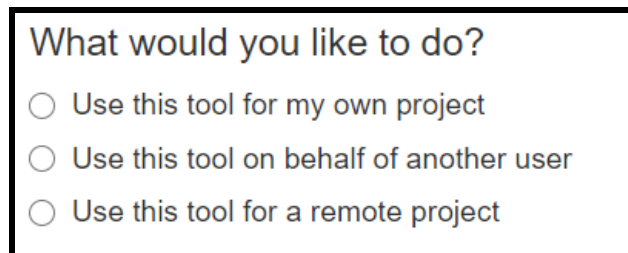

Figure 6.68: *Tool control multiple use tool log in buttons*

Parent and child tools are discussed in the Detailed administration → Tools section 42.61.

Chapter 6 Tool control

6.4.8.4 Staff tool login

Staff have the option to use tools for their own projects or to perform work for other users (Figure 6.69). Select the appropriate usage type to continue.

What would you like to do?

- Use this tool for my own project
- Use this tool on behalf of another user
- Use this tool for a remote project

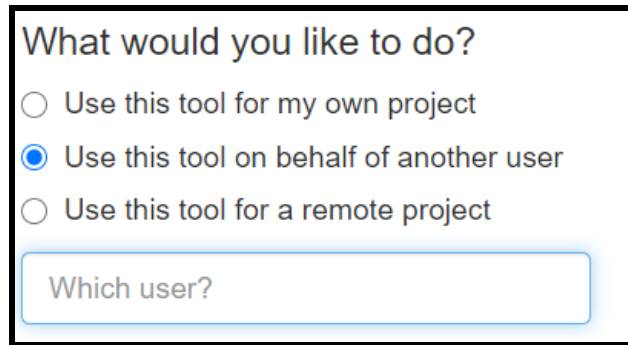

Figure 6.69: *Tool control login staff*

Selecting 'Use this tool for my own project' will proceed the same as a user tool login detailed above. Staff can enable any tool regardless of qualifications and therefore do not need to be explicitly qualified on a tool. If a staff member is already charging staff time to a user, that option will be greyed out.

Chapter 6 Tool control

6.4.8.5 Staff tool login on behalf of another user

If Staff select to use a tool on behalf of another user, a search dialog will appear (Figure 6.70). Enter the users name. As the name is typed, a list of possible users will appear under the dialog. Select the user from the list at any time.

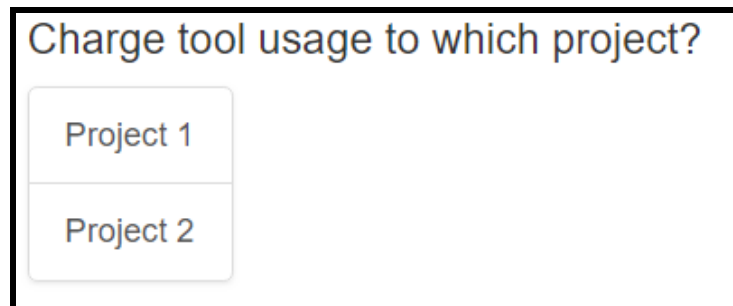

What would you like to do?

- Use this tool for my own project
- Use this tool on behalf of another user
- Use this tool for a remote project

Which user?

Figure 6.70: *Tool control login on behalf of user*

Once a user is selected, a list of the user's projects will appear if they have more than one (Figure 6.71).

Charge tool usage to which project?

- Project 1
- Project 2

Figure 6.71: *Tool control staff login select project*

Chapter 6 Tool control

Clicking the project will enable the start button (Figure 6.72).

Figure 6.72: *Tool control staff login multiple project start button*

If a user only has one project, a message with the name of their project will appear and the start button will be displayed (Figure 6.73).

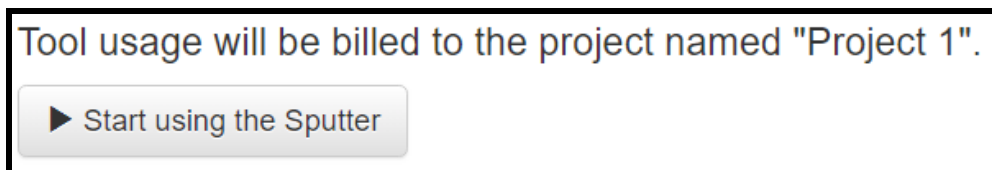

Figure 6.73: *Tool control staff login single project start button*

Click the 'Start using the tool' button to begin usage. NEMO will enable the tool and record usage for the selected user regardless of user qualifications on the tool. If interlocks have been configured, NEMO will enable the interlock. Tool interlocks are discussed in the Detailed administration → Tools section 42.61.

Chapter 6 Tool control

If using the tool for a remote project, the charging staff time indicator will appear on the navigation bar (Figure 6.74). If the tool in use is in an area, area access time will also be recorded. Staff charges are discussed in the Staff charges section.

Charging staff time

Figure 6.74: *Tool control staff charging time*

Chapter 6 Tool control

6.4.9 Tool log out

The tool log out dialogs will vary depending on the options configured.

6.4.9.1 Delayed log out

If delayed log out has been enable for the tool, the user has the option to log out while preventing usage until the delayed log out time has elapsed (Figure 6.75). Enter the number of minutes to delay or leave blank to skip the delay. This feature is useful for tools that require timed conditioning runs such as etch systems. It allows the user to start the post conditioning run, log out, and leave the area while the run completes.

A screenshot of a tool control dialog box. The text inside the box reads: "Prevent others from using the tool for minutes after disabling the tool. [What's this?](#)" The input field contains the number "0".

Figure 6.75: *Tool control log out delayed log out*

Delayed log out configuration is discussed in the Detailed administration → Tools section [42.61](#).

6.4.9.2 Stop using a tool

If a required post usage question has not been answered, the 'Stop using the tool' button will be disabled (Figure 6.76).

Figure 6.76: *Tool control log out button disabled*

Once all required post usage questions have been answered, the 'Stop using the tool' button will be enabled (Figure 6.77).

Chapter 6 Tool control

Figure 6.77: *Tool control log out button enabled*

Click the button to stop using the tool.

NEMO will disable the tool and stop recording usage. The usage record in the database will be updated with the end time. Usage events are found on the Detailed administration → Usage events page in section [42.63](#).

If interlocks have been configured, NEMO will disable the interlock immediately even if delayed log out have been selected. Tool interlocks are discussed in the Detailed administration → Tools section [42.61](#).

Staff only – If using the tool on behalf of another user and charging staff time, a dialog will pop up asking if staff time charges should continue (Figure [6.78](#)). Click the appropriate button to continue or stop charging staff time. Staff charges are discussed in the Staff charges section.

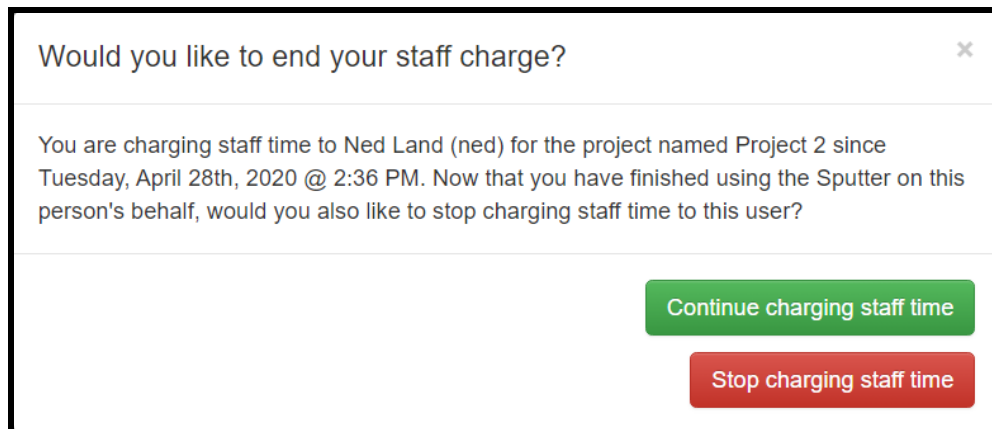

Figure 6.78: *Tool control log out staff charges*

Chapter 6 Tool control

6.4.10 Tool description

The bottom of the tool summary page can be configured to display a description (Figure 6.79).

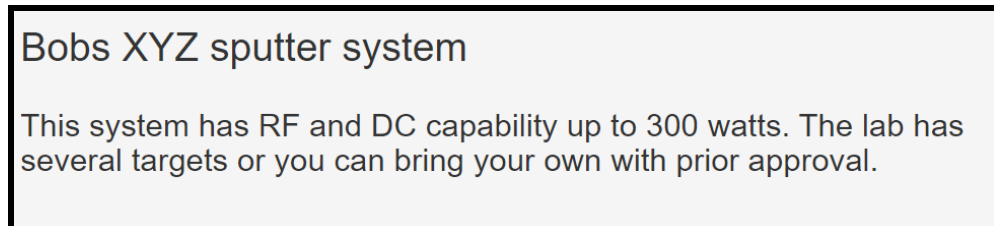

Figure 6.79: *Tool control example tool description*

The description is optional and html coding can be used to control appearance. Tool descriptions are discussed in the Detailed administration → Tools section 42.61.

Chapter 6 Tool control

6.4.11 Tool image

A tool image can be configured to display at the bottom of the tool summary page (Figure 6.80). If a tool description is configured, the image will be displayed next to the tool description.

Figure 6.80: *Tool control example tool image*

The image is optional. Tool images are discussed in the Detailed administration → Tools section [42.61](#).

Chapter 6 Tool control

6.4.12 Tool Documents

Tool documents can be added and displayed at the bottom of the summary page. They are displayed in reverse order of date uploaded (Figure 6.81).

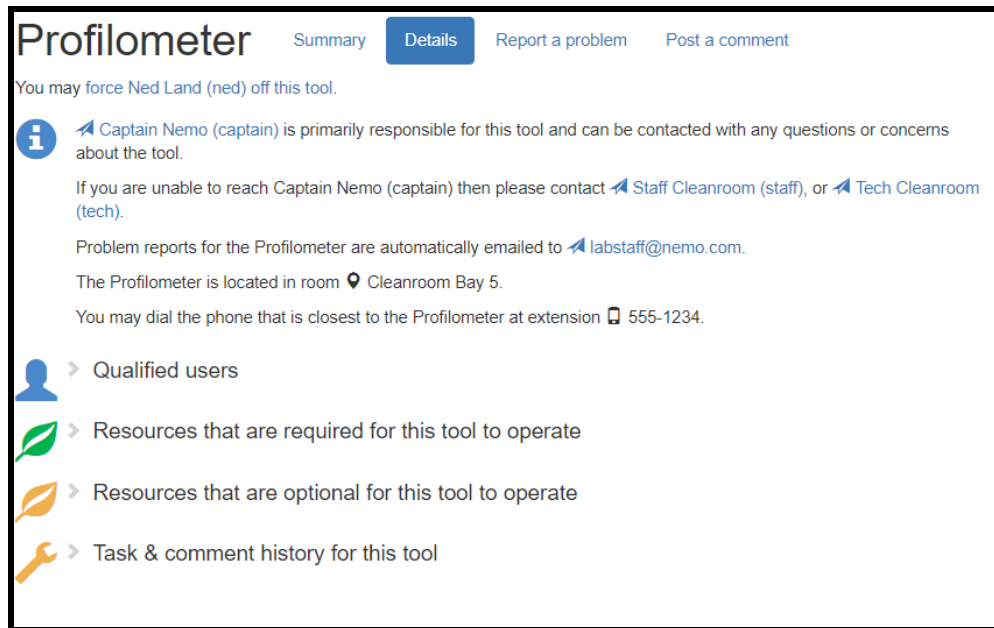

Figure 6.81: *Tool control example tool documents*

The documents are optional. Tool documents are discussed in the Detailed administration → Tools section [42.61](#).

Chapter 6 Tool control

6.5 Details Tab

The details tab provides users and staff with information about the selected tool including the responsible staff, tool location, qualified users, required and optional resources, and task and comment history (Figure 6.82).

The screenshot shows the 'Details' tab for the 'Profilometer' tool. At the top, there are tabs for 'Summary' and 'Details', along with links for 'Report a problem' and 'Post a comment'. Below the tabs, a message states: 'You may force Ned Land (ned) off this tool.' An information icon (i) is followed by text: 'Captain Nemo (captain) is primarily responsible for this tool and can be contacted with any questions or concerns about the tool. If you are unable to reach Captain Nemo (captain) then please contact Staff Cleanroom (staff), or Tech Cleanroom (tech). Problem reports for the Profilometer are automatically emailed to labstaff@nemo.com. The Profilometer is located in room Cleanroom Bay 5. You may dial the phone that is closest to the Profilometer at extension 555-1234.' Below this, there are four expandable sections: 'Qualified users' (with a person icon), 'Resources that are required for this tool to operate' (with a green leaf icon), 'Resources that are optional for this tool to operate' (with a yellow leaf icon), and 'Task & comment history for this tool' (with a wrench icon).

Figure 6.82: Tool control details page

Chapter 6 Tool control

6.5.1 Force user off of tool (staff only)

At the top of the page, staff are provided a quick link to for the currently logged in user off of the currently selected tool (Figure 6.83). Clicking the link will log the current user out of the tool and return the view to the summary tab. If there are required post usage questions, an email will be sent to the user, the staff member who forced him off, the tool owner and backup owners, as well as the lab managers. The email will contain the required questions and the tool usage data entry will be blank for usage.

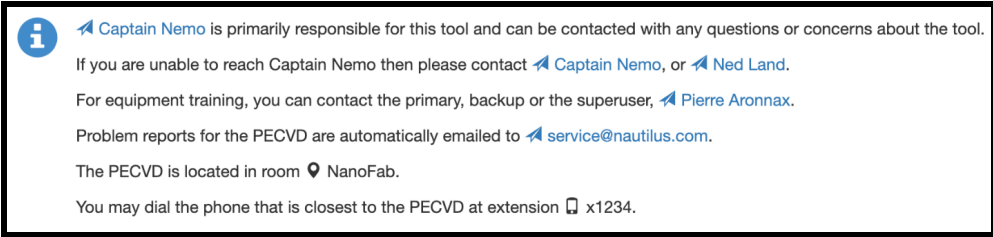

You may force Ned Land (ned) off this tool.

Figure 6.83: Tool details force user off of tool

6.5.2 Tool information

The tool information section of the details tab provides primary and back up staff contacts, problem report email, tool location, and tool location phone number (Figure 6.84).

i Captain Nemo is primarily responsible for this tool and can be contacted with any questions or concerns about the tool.
If you are unable to reach Captain Nemo then please contact Captain Nemo, or Ned Land.
For equipment training, you can contact the primary, backup or the superuser, Pierre Aronnax.
Problem reports for the PECVD are automatically emailed to service@nautilus.com.
The PECVD is located in room NanoFab.
You may dial the phone that is closest to the PECVD at extension x1234.

Figure 6.84: Tool details tool information

Chapter 6 Tool control

- Primary tool owners are required. If the primary tool owner is associated with a contact, clicking on the arrow next to the primary tool owners name will display additional contact information (Figure 6.85).

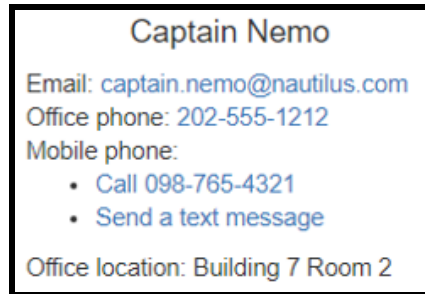

Figure 6.85: *Tool details additional information*

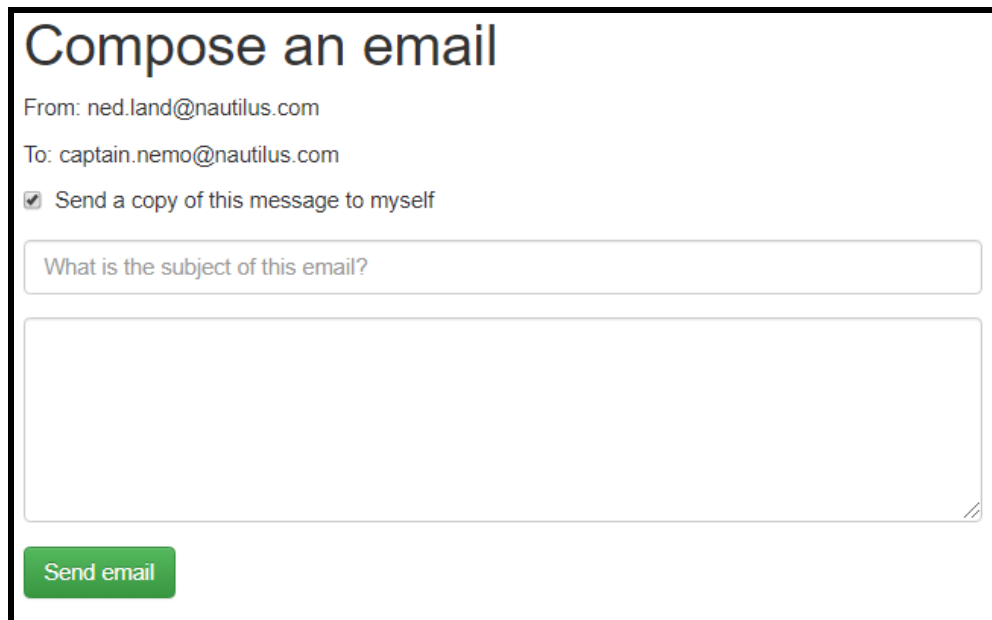

- Backup tool owners are optional and will only display if configured. If the backup tool owners are associated with a contact, clicking on the arrow next to the backup tool owners name will display additional contact information in the same manner for primary tool owners.
- Tool superusers are optional and will only display if configured. If the superusers are associated with a contact, clicking on the arrow next to the superuser name will display additional contact information in the same manner for primary tool owners.
- Associating primary, backup tool owners and superusers with contacts is discussed in the Detailed administration → Contact information section 42.20.
- Problem reporting emails are optional and will only display if configured.
- Tool location is required.
- Tool phone number is required.

Chapter 6 Tool control

All tool information fields are set at the tool level and are discussed in the Detailed administration → Tools section [42.61](#).

6.5.2.1 Emailing tool contacts through NEMO

Clicking on a tool contact link will open the email dialog (Figure [6.86](#)).

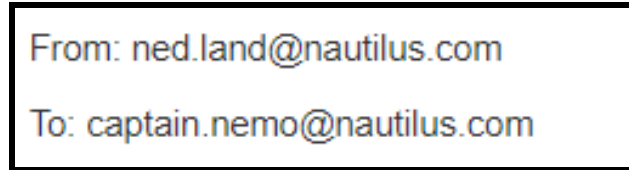

The image shows a 'Compose an email' dialog box. At the top, the title 'Compose an email' is displayed in a large, dark font. Below the title, the 'From' field is populated with 'ned.land@nautilus.com' and the 'To' field with 'captain.nemo@nautilus.com'. A checkbox labeled 'Send a copy of this message to myself' is checked. Below these fields is a text input field with the placeholder text 'What is the subject of this email?'. Underneath the subject field is a large, empty text area for the email body. At the bottom left of the dialog is a green button labeled 'Send email'.

Figure 6.86: *Tool control detail email dialog*

Chapter 6 Tool control

To send an email:

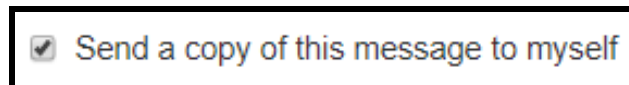

- The from and to fields are automatically set and cannot be changed (Figure 6.87).

A screenshot of an email interface showing two fields. The first field is labeled 'From:' and contains the email address 'ned.land@nautilus.com'. The second field is labeled 'To:' and contains the email address 'captain.nemo@nautilus.com'. Both fields are enclosed in a black rectangular border.

From: ned.land@nautilus.com
To: captain.nemo@nautilus.com

Figure 6.87: *Tool control detail email address*

- Set the send a copy checkbox (Figure 6.88). By default, the user will be copied however, the checkbox can be unchecked if desired.

A screenshot of a checkbox interface. The checkbox is checked, and the text next to it reads 'Send a copy of this message to myself'. The entire element is enclosed in a black rectangular border.

Send a copy of this message to myself

Figure 6.88: *Tool control detail email copy*

- Enter a subject line in the subject dialog box (Figure 6.89).

A screenshot of a text input field for an email subject. The field contains the placeholder text 'What is the subject of this email?'. The field is enclosed in a black rectangular border.

What is the subject of this email?

Figure 6.89: *Tool control email subject*

Chapter 6 Tool control

- Enter the message in the message dialog box (Figure 6.90).

Figure 6.90: *Tool control email message*

- Click 'Send email' button to send the message (Figure 6.91).

Figure 6.91: *Tool control email send button*

Chapter 6 Tool control

6.5.3 Qualified users

Only staff are able to qualify users, but tool superusers (and regular users if the option is set in Tool Customization section 40.15.4) can see the list of all qualified users on a tool (Figure 6.92).

Figure 6.92: Tool control details qualified users

Clicking the > will expand the qualified users' dialog (Figure 6.93). All qualified users are listed and there are dialogs to add qualified users and email all qualified users. If qualifying a user will automatically grant them access to the lab, it will be indicated in red. Active users are displayed boldly, and inactive users are greyed out. NEMO user creation and user status is discussed in the Users chapter 38.

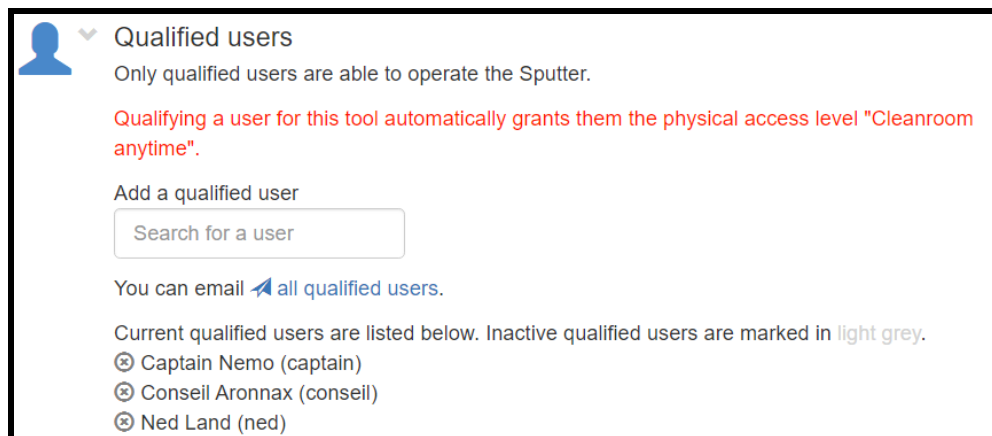

Figure 6.93: Tool control details qualified users expanded

Clicking the < will collapse the qualified user dialog.

Chapter 6 Tool control

6.5.3.1 Qualify a user

Users can be qualified directly using the Add a qualified user search dialog (Figure 6.94). User tool qualifications are detailed in the Qualifications section.

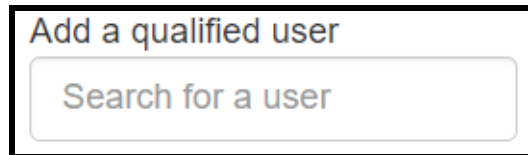

Figure 6.94: Tool control details qualify a user

Start typing the user's name in the search dialog then select the name of the list returned. The return list updates automatically as typed, and a user can be clicked from the list at any time (Figure 6.95). Once clicked, the user is added to the current qualified users list.

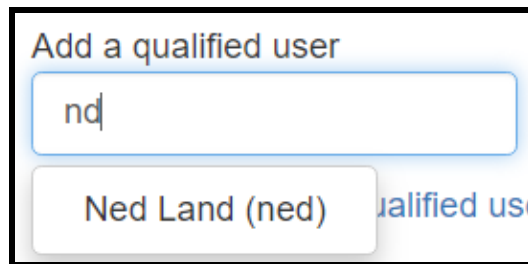

Figure 6.95: Tool control details qualify a user search list

6.5.3.2 Email all tool users

If there are any qualified users, an email link will appear below the add a qualified user dialog (Figure 6.96).

Figure 6.96: Tool control details email all users

Chapter 6 Tool control

Clicking the link will open the user email page which is described in the Email chapter [28](#).

6.5.4 Required resources

The required resources are optional and only display if configured (Figure [6.97](#)). Resources are discussed in the Resources chapter [34](#). Associating resources with tools is discussed in the Detailed administration → Tools section [42.61](#).

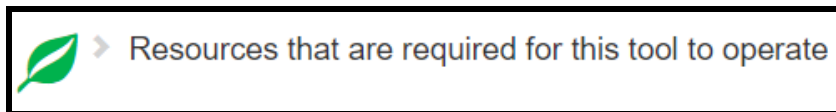

Figure 6.97: *Tool control details required resources*

Clicking the > will expand the required resource list (Figure [6.98](#)).

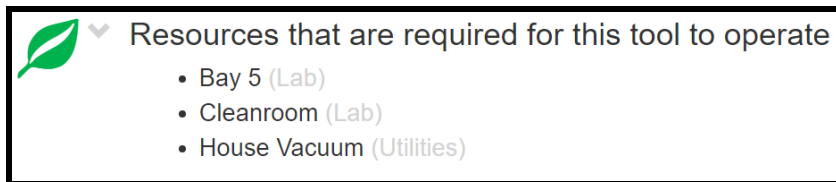

Figure 6.98: *Tool control details require resources expanded*

Clicking the v will collapse the required resource list.

Chapter 6 Tool control

6.5.5 Optional resources

The optional resources are optional and only display if configured (Figure 6.99). Resources are discussed in the Resources chapter 34. Associating resources with tools is discussed in the Detailed administration → Tools section 42.61.

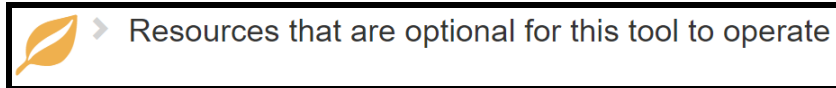

Figure 6.99: *Tool control details optional resources*

Clicking the > will expand the optional resource list (Figure 6.100).

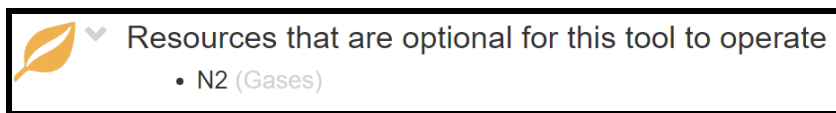

Figure 6.100: *Tool control details optional resources expanded*

Clicking the v will collapse the required resource list.

6.5.6 Task and comment history

The task and comment history provides a way to look at problems, shutdowns, and comments that are currently open or have been previously closed (Figure 6.101).

Figure 6.101: *Tool control details task and comment history*

Chapter 6 Tool control

Clicking the > will expand the optional resource list (Figure 6.102).

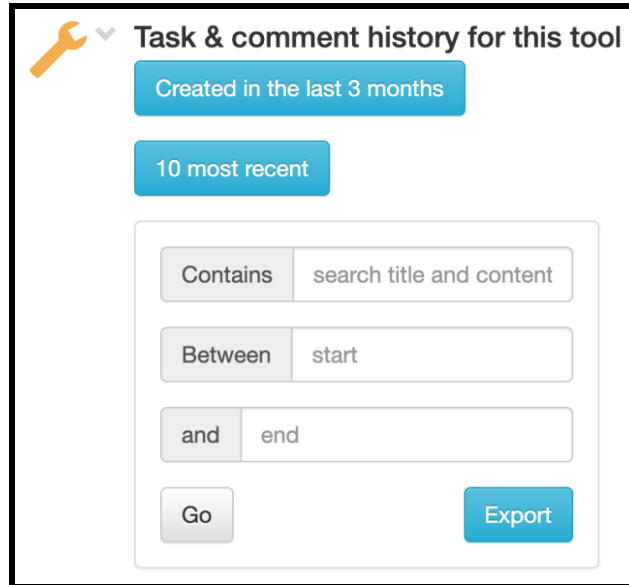

Figure 6.102: *Tool control details task and comment history expanded*

Clicking the ▼ will collapse the required resource list.

The expanded task and comment history provides quick buttons to display all items created in the last three months (Figure 6.103) or the ten most recent events (Figure 6.104). Clicking either will show a list of tasks and comments below the search dialog (Figure 6.105).

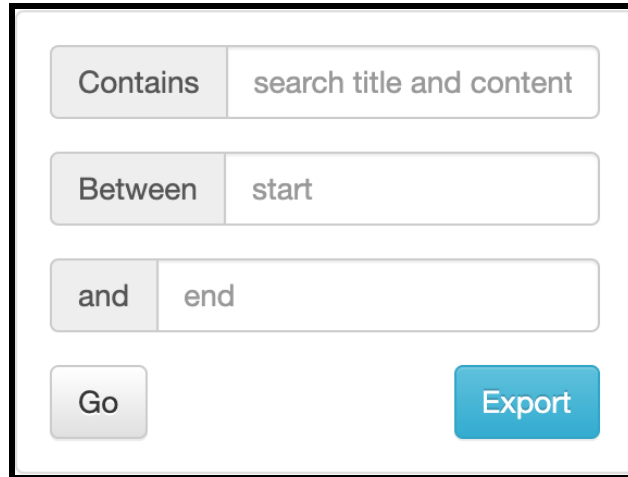

Figure 6.103: *Tool control details task 3-month button*

Figure 6.104: *Tool control details task 10 most recent button*

Chapter 6 Tool control

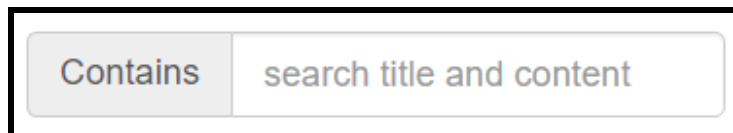

A search dialog is also provided to allow a keyword search or any date range to be displayed (Figure 6.105).

The screenshot shows a search dialog box with four rows of input fields. The first row has a dropdown menu set to 'Contains' and a text input field containing 'search title and content'. The second row has a dropdown menu set to 'Between' and a text input field containing 'start'. The third row has a dropdown menu set to 'and' and a text input field containing 'end'. The fourth row contains two buttons: a 'Go' button on the left and an 'Export' button on the right.

Figure 6.105: *Tool control details task search dialog*

For a key word search, enter the search text in the contains field (Figure 6.106).

This is a close-up of the first row of the search dialog. It shows a dropdown menu with 'Contains' selected and a text input field containing the placeholder text 'search title and content'.

Figure 6.106: *Tool control details task search text*

Chapter 6 Tool control

For a date range search, click the start and end dialogs to enter dates. A calendar dialog will appear that can be used to navigate to the date of interest (Figure 6.107). However, a date can be typed directly into each box.

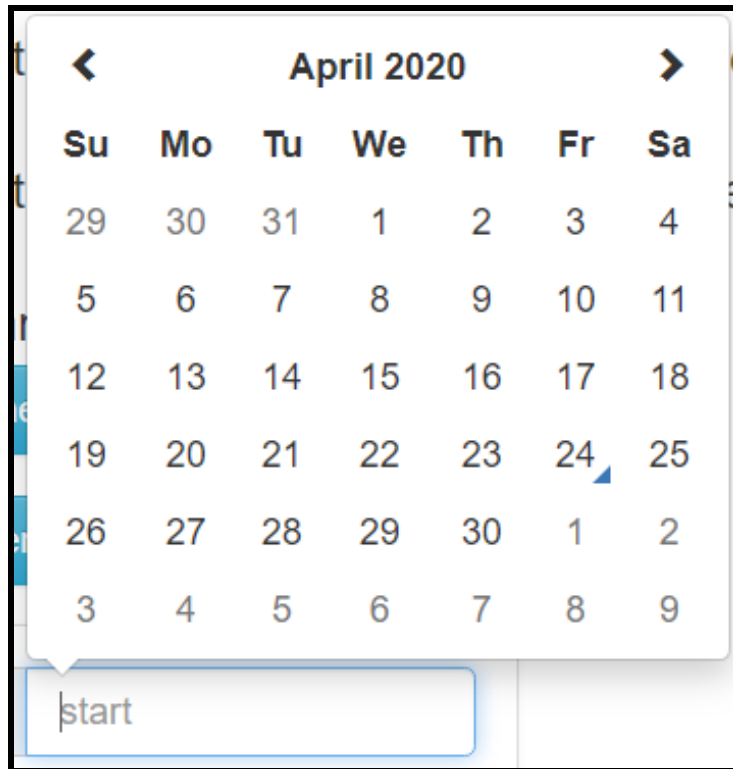

Figure 6.107: Tool control details task calendar dialog

The search can also combine text search and date ranges. To make open ended, leave fields blank. For example, to show all tasks, leave the contains field and start date blank and enter today's date into the end date, all task records will be returned.

Chapter 6 Tool control

Click the  button to display results below the dialog (Figure 6.108).

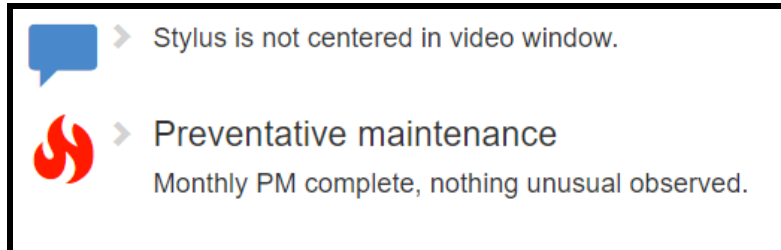

Figure 6.108: *Tool control details task display results*

Clicking the  will expand task or comment details (Figure 6.109).

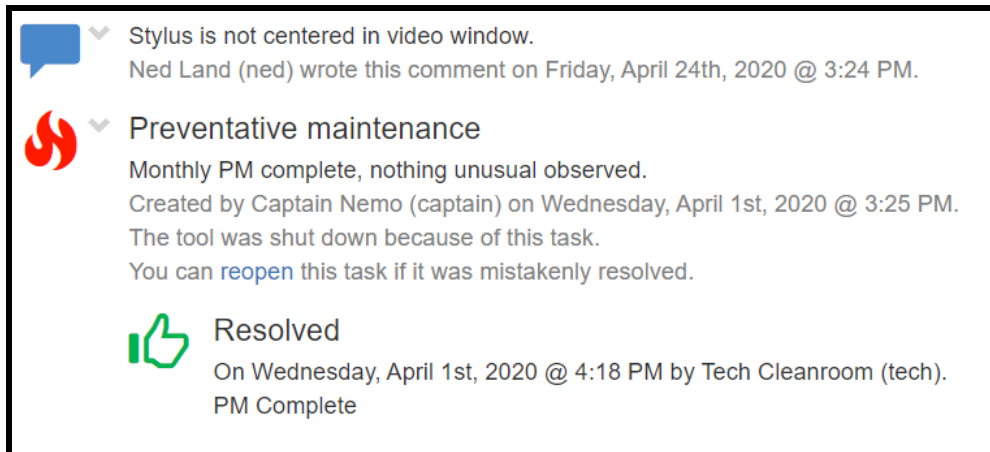

Figure 6.109: *Tool control details task results expanded*

Clicking the  will collapse the details.

Clicking the  button will export current shown tasks and comments into a text file.

Chapter 6 Tool control

6.5.6.1 Reopen closed task (staff only)

If a staff member is viewing task history, a line will be displayed giving the option to reopen the task (Figure 6.110).

A screenshot of a task history entry. The text "You can reopen this task if it was mistakenly resolved." is displayed in a light blue font. The word "reopen" is a hyperlink. The entire text is enclosed in a black rectangular border.

You can [reopen](#) this task if it was mistakenly resolved.

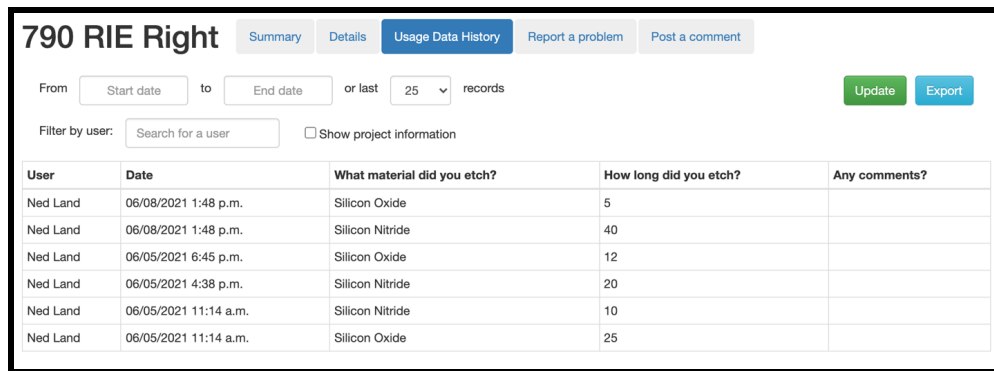

Figure 6.110: *Tool control details task results reopen task link*

Clicking on the reopen link will open the task update page at sub-subsection 6.4.5.5. Click update to reopen the task.

Chapter 6 Tool control

6.6 Usage Data History

The usage data history tab provides users and staff with the ability to see how a tool was used based on answers to pre/post usage questions (Figure 6.111). This feature is useful to replace handwritten logbooks and gives easy access to pre/post usage question data. The tab will only be visible on tools that have pre/post usage questions configured. The usage data history is searchable by date, last records, and can be filtered by user. The selected data can be exported in a comma separated text file.

User	Date	What material did you etch?	How long did you etch?	Any comments?
Ned Land	06/08/2021 1:48 p.m.	Silicon Oxide	5	
Ned Land	06/08/2021 1:48 p.m.	Silicon Nitride	40	
Ned Land	06/05/2021 6:45 p.m.	Silicon Oxide	12	
Ned Land	06/05/2021 4:38 p.m.	Silicon Nitride	20	
Ned Land	06/05/2021 11:14 a.m.	Silicon Nitride	10	
Ned Land	06/05/2021 11:14 a.m.	Silicon Oxide	25	

Figure 6.111: Tool control usage data history

6.6.1 Feature setup

- The usage data history page is automatically displayed once pre or post usage questions have been setup for a tool.
- Pre/Post usage question setup is discussed in detail in the Detailed administration → Tools section 42.61.
- Pre/Post usage questions can be configured so responses are either required or optional. In addition, questions can be grouped and repeated a configurable number of times to capture multiple processes in a single

Chapter 6 Tool control

tool usage. If a combination of grouped and ungrouped questions are configured, the ungrouped question responses only appear with the first group response.

6.6.2 Review usage data history for a tool

- Navigate to the tool control page.
- Select the tool of interest from the tool list on the sidebar.
- Click the usage data history tab.
- The default view lists the last 25 records.

Figure 6.112: *Tool control usage data history tab*

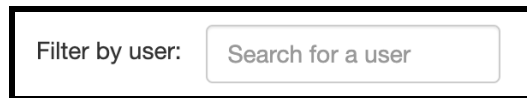

- Select the date range or the last number of records:
 - Enter a start and end date if desired.
 - Or select the last number or records.
 - Click update to refresh the view.

From	<input type="text" value="07/31/2020"/>	to	<input type="text" value="11/30/2020"/>	or last	<input type="text" value="25"/>	records
------	---	----	---	---------	---------------------------------	---------

Figure 6.113: *Tool control usage data history date range or last records*

Chapter 6 Tool control

- Filter by user:
 - Enter a user name in the search box if desired.
 - Click on the user you want to filter by.
 - Click update to refresh the view.

A rectangular box with a black border containing the text "Filter by user:" followed by a search input field with the placeholder text "Search for a user".

- Show project information:
 - Check the box if you want to see project information in the table
 - Click update to refresh the view

A rectangular box with a black border containing a checked checkbox followed by the text "Show project information".

Figure 6.115: *Tool control usage data history show project info*

- The resulting data will include project information:

User	Project	Date	What material did you etch?	How long did you etch?	Any comments?
Ned Land	Project 3	06/08/2021 1:48 p.m.	Silicon Oxide	5	
Ned Land	Project 3	06/08/2021 1:48 p.m.	Silicon Nitride	40	
Ned Land	Project 3	06/05/2021 6:45 p.m.	Silicon Oxide	12	
Ned Land	Project 3	06/05/2021 4:38 p.m.	Silicon Nitride	20	
Ned Land	Project 3	06/05/2021 11:14 a.m.	Silicon Nitride	10	
Ned Land	Project 3	06/05/2021 11:14 a.m.	Silicon Oxide	25	

Figure 6.116: *Tool control usage data history with project information*

Chapter 6 Tool control

- Scroll through the returned data to review.
- To export the selected data, click the export button.

Figure 6.117: *Tool control usage data history export button*

6.7 Config History

The config history tab provides users and staff with the ability to see how a tool was configured previously (Figure 6.118). The tab will only be visible on tools that are configurable. Configuration history is saved in the database and is discussed in the Detailed administration → Configuration histories section 42.15.2. Configurations are discussed in the Configuration Agenda chapter 26.

Chapter 6 Tool control

Figure 6.118: *Tool control config history page*

Click the › icon to expand the details of a particular configuration (Figure 6.119).

Figure 6.119: *Tool control configuration details*

Click the ▼ icon to collapse the details.

Chapter 6 Tool control

6.8 Report a problem Tab

The report a problem tab provides users and staff with the ability to alert others to problems with a tool (Figure 6.120). If a tool is unusable, it can be shut down and the tool owner notified. If it poses a safety hazard, more staff can be alerted.

Chlorine Etch Summary Details Config History **Report a problem** Post a comment

Use this form to report a problem relating to the currently selected tool. The NanoFab staff will be notified of the problem by email and the details of the problem will be visible to everyone on the website.

Please choose a category that best describes this problem. If there is no appropriate category then leave this field blank.

What is the status of this task?

Please provide a **detailed** description of the problem so that the NanoFab staff have enough information to resolve the problem efficiently.

What is your best estimate of when the problem will be resolved? Leave this field blank if you are unsure.

This problem represents a safety hazard to the NanoFab and should be regarded as urgent. Notify the NanoFab safety officer of this issue.

Shut down the tool so that it may not be used until this problem is resolved.

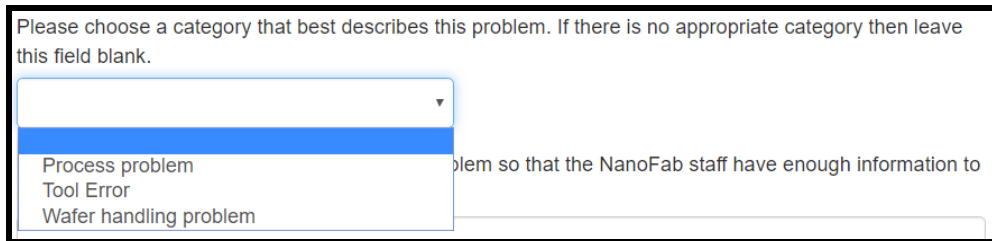

No file chosen

Figure 6.120: *Tool control report a problem page*

Chapter 6 Tool control

6.8.1 To report a problem

- Navigate to the tool control page.
- Select the tool of interest from the tool list on the sidebar.
- Click the report a problem tab.
- If task categories have been defined, a dropdown and instruction will appear. Click the dropdown and select the problem category that best describes the problem (Figure 6.121). If no category describes the problem, leave this blank. Task categories can be used to bin problems making future problem analysis easier. Categories are configured on the Detailed administration → Task categories page, see section 42.54.

Please choose a category that best describes this problem. If there is no appropriate category then leave this field blank.

Process problem
Tool Error
Wafer handling problem

Problem so that the NanoFab staff have enough information to

Figure 6.121: *Tool problem category selection*

- (Staff Only) If task statuses have been defined, a dropdown and instruction will appear (Figure 6.122). If the status is not known, the field can be left blank. Click the dropdown and select the initial status for the problem. Task statuses are used to update various staff as a problem progresses to resolution. For example, once the maintenance team has finished a repair, they can change the status to qualification which notifies the process engineer that the tool is ready to requalify. Statuses are configured on the Detailed administration → Task statuses page, see section 42.55.

Chapter 6 Tool control

Figure 6.122: *Tool problem task status selection*

- Provide a detailed description of the problem in the dialog box (Figure 6.123).

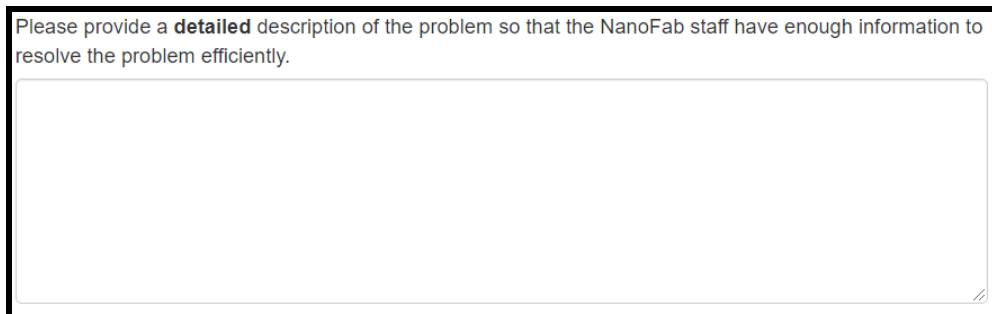

A screenshot of a dialog box with a text input field. The text above the field reads: "Please provide a **detailed** description of the problem so that the NanoFab staff have enough information to resolve the problem efficiently." The input field is empty and has a small cursor icon in the bottom right corner.

Figure 6.123: *Tool problem detailed description*

- (Staff only) Provide an estimate of when the problem will be resolved if known or leave blank (Figure 6.124). Clicking in the dialog will open a date and time dialog (Figure 6.125).

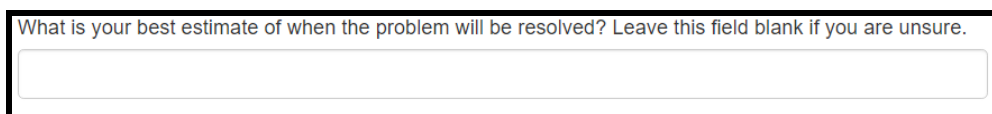

A screenshot of a dialog box with a text input field. The text above the field reads: "What is your best estimate of when the problem will be resolved? Leave this field blank if you are unsure." The input field is empty.

- Check the safety hazard check box if the problem is a safety hazard to people or equipment (Figure 6.126).

This problem represents a safety hazard to the NanoFab and should be regarded as urgent. Notify the NanoFab safety officer of this issue.

Figure 6.126: Tool problem safety hazard

- Check if the shutdown check box if the tool is not able to be used by others and could potentially ruin samples (Figure 6.127).

Shut down the tool so that it may not be used until this problem is resolved.

Figure 6.127: Tool problem shut down

Chapter 6 Tool control

- The choose files dialog may be used to upload any relevant pictures or data to show details that support the description (Figure 6.128). Clicking the button activate a standard file selection dialog. Multiple files can be uploaded. Note: it is good practice to make note of the files in the description to link the file to the text.

Figure 6.128: *Tool problem upload files*

- Click the report button to finish (Figure 6.129).

Figure 6.129: *Tool problem report button*

Chapter 6 Tool control

6.8.2 Problem posting

Once the Report problem button is clicked, a task is created and saved in the Tasks table of the database which is discussed in the Detailed administration → Tasks section [42.56](#).

Tasks are displayed as problems and shutdowns in the summary tab of the tool control page.

Email notifications are triggered.

- Email notifications are only sent if the New task email has been configured in the Customization chapter [40](#).
- Recipients set at the tool level as discussed in the Detailed administration → Tools section [42.61](#).
 - Primary tool owner.
 - Backup tool owners if any are defined.
 - Notification email if defined.
- Recipients set in settings.py LAB_MANAGERS as discussed in the Configuring NEMO settings → Lab Managers chapter [48](#).
- Recipients any non-staff user with a future reservation.

If the task is marked as a safety hazard

- In addition to the standard email notifications, a safety issue is automatically created, and a safety email is sent. Safety issues are discussed in the Safety page section.

Chapter 6 Tool control

6.9 Post a comment Tab

The post a comment tab provides users and staff with the ability to record information about a tool without changing the tool status (Figure 6.130). It is useful for highlighting tool usage information, process results, and general comments. Unlike reporting a problem, staff are not notified when a comment is posted therefore, comments should not be used to report problems or shutdowns.

Sputter Summary Details Config History Report a problem **Post a comment**

Use this form to comment on the operating status of the selected tool. The comment will be visible to everyone on the website for **informational purposes**. (Note: if there is something wrong with the tool then please report a problem instead of creating a comment). You may remove the comment at any time because you are its author.

How many days would you like the comment to be visible? 30 days ▾

What would you like to say?

Make this comment only visible to staff users

Post comment

Figure 6.130: *Tool control post a comment page*

Chapter 6 Tool control

6.9.1 To post a comment

- Navigate to the tool control page.
- Select the tool of interest from the tool list on the sidebar.
- Click the Post a comment tab.
- Click the drop down and select the amount of time to keep the comment visible (Figure 6.131).

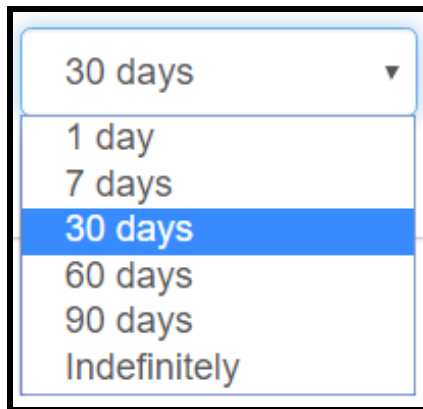

Figure 6.131: *Comment visible time dropdown*

- Enter any relevant information in the dialog box (Figure 6.132).

A screenshot of a comment dialog box. It has a white background and a black border. At the top, there is a text input field with the placeholder text "What would you like to say?". Below the input field is a large, empty rectangular area for writing the comment. In the bottom right corner of the dialog box, there is a small icon of two diagonal lines, likely representing a "done" or "submit" button.

Figure 6.132: *Comment dialog box*

Chapter 6 Tool control

- Check to make comment visible only to staff (staff only) (Figure 6.133). This feature is useful to post special tool information.

Figure 6.133: *Comment dialog staff visible checkbox*

- Click the post comment button (Figure 6.134).

Figure 6.134: *Comment post button*

6.9.2 Comment posting

Once the Post comment button is clicked, the comment is saved in the Comments table of the database which is discussed in the Detailed administration → Comments section 42.14. Comments are displayed in the summary tab of the tool control page. No email notifications are triggered.

Chapter 6 Tool control

6.10 Mobile device tool control

The tool control page will automatically change to a mobile display by stacking information into a single scrollable column (Figure 6.135). All of the features are available while in mobile view. To start, directly enter the name of the tool in the search dialog or select a tool by category. All categories and sub-categories are listed.

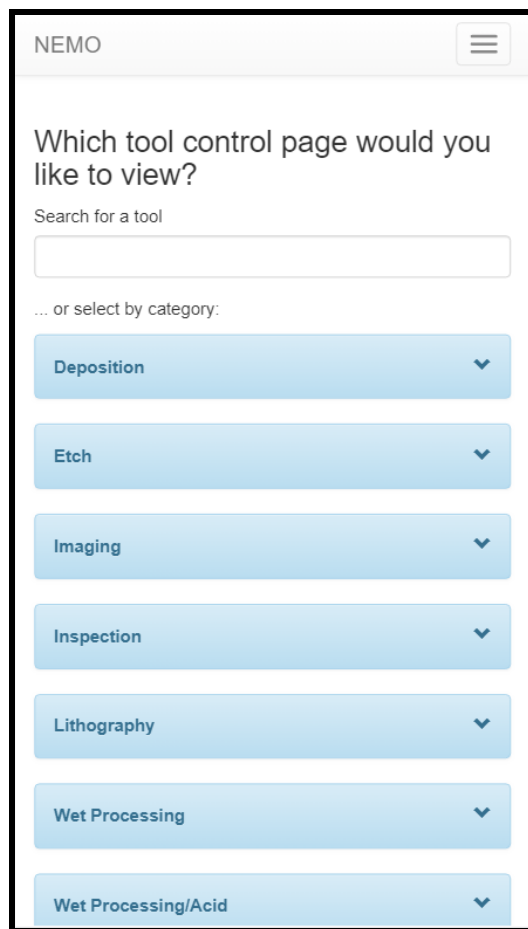

Figure 6.135: *Mobile tool control page*

Chapter 6 Tool control

6.10.1 Search for a tool

To search for a tool, start typing in the search dialog box. A tool button list will appear below the search dialog as characters are entered but at least two characters must be entered (Figure 6.136). Once the tool of interest appears, click the button of the tool of interest to go to the tool control page detailed below.

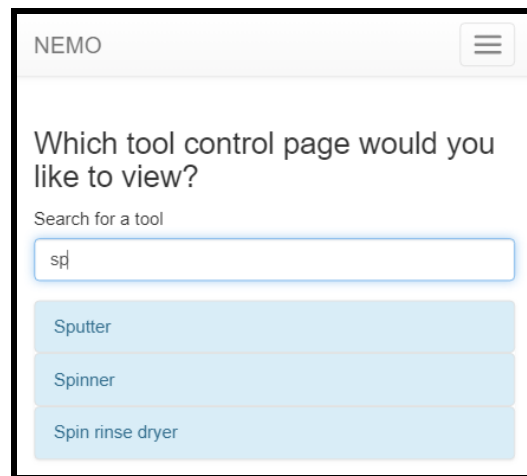

Figure 6.136: *Mobile tool control search box and results*

Chapter 6 Tool control

6.10.2 Select a tool by category

To select a tool by category, click the category button then click the tool link in the drop down. If the tool of interest is not on the list, click another category button (Figure 6.137). Note: it is possible to have more than one category at a time expanded. However, the page resets each time it is opened. Once the tool of interest appears, click the button of the tool of interest to go to the mobile tool reservation page detailed below.

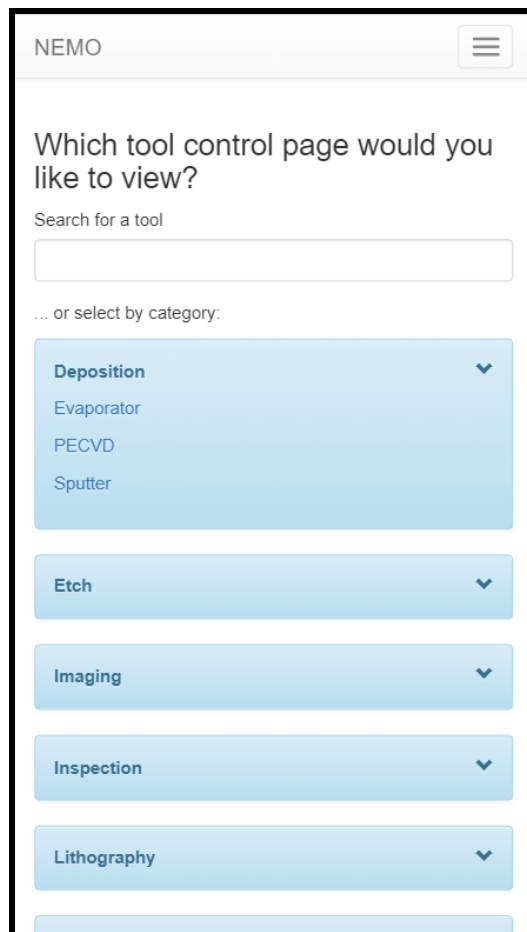

Figure 6.137: Mobile tool control category drop down

Chapter 6 Tool control

6.10.3 Mobile tool control page

The mobile tool control page lands on the summary tab (Figure 6.138). The summary tab, details tab, report a problem tab, and post a comment tab do not have any specializations to render on a mobile device. To select each tab, click or press near the tab title. Functionality is identical to the previously described tab features. If a tab renders larger than a screen, drag the screen to scroll.

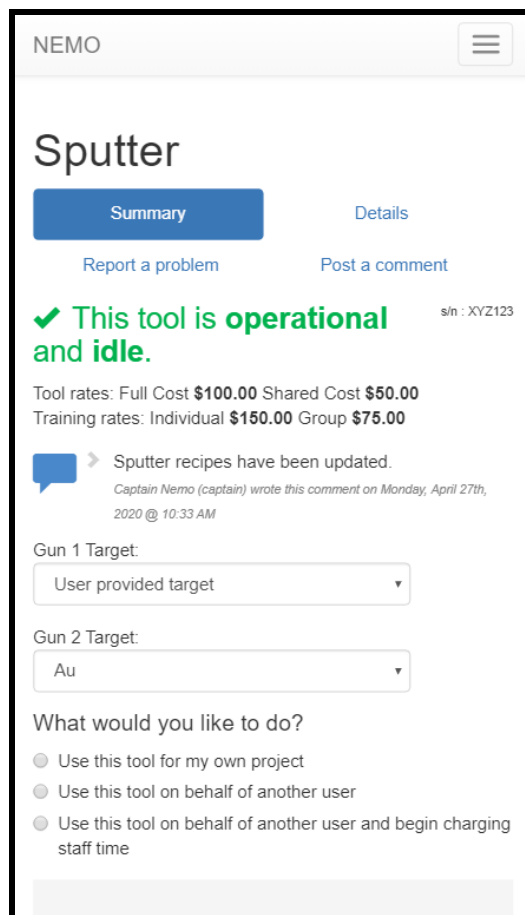

Figure 6.138: Mobile tool control landing page

Chapter 6 Tool control

6.11 Tool control customizations

6.11.1 Notification emails

Email notifications are possible when a task is created, updated, or resolved or a user tries to use a tool they are not qualified for and must be configured to be functional. Email templates are configured in the Customization page, see chapter [40](#).

6.11.2 Tool usage reminders

Tool usage reminder emails can be sent periodically. A timed service app must be properly configured and running which is described in the NEMO timed services section [48.3](#). The usage reminder email template must be configured and is described in the Customization pages, see chapter [40](#).

6.11.3 Tool rates

Tool rates can be customized and are discussed in the Customizations → Tool rates section [40.9](#).

6.11.4 Tool control page refresh rate

The tool control page automatically refreshes every 30 seconds which updates the current tool information and sidebar. To change the update interval, edit the `tool_control.html` and change the `setInterval` constant (in milliseconds) in the `on_load` function.

6.11.5 Tool control hide usage data history for users

Whether to display the usage data history for regular users can be customized in Customization → Tool settings, see section [40.15](#).

Chapter 6 Tool control

6.11.6 Optional tool features

The tool control pages were implemented such that if a feature was not used, its corresponding content would not be displayed. This helps eliminate the need for special setups to view features and easily enables many features to be optional. All of the optional features are detailed in the tool control pages.

CHAPTER 7

Status dashboard

The status dashboard page provides a convenient overview of all users and staff currently logged into any areas or tools. In addition, there are views for problematic tools, idle tools, and an all-tool view. The status dashboard lands on the area occupancy tab by default.

7.1 Web address

The status dashboard page is accessible at `site-address/status_dashboard/`. The page can also be accessed from the navigation bar menu item “Status dashboard”.

Chapter 7 Status dashboard

7.2 Area occupancy tab

The status dashboard lands on the area occupancy tab by default and the area occupancy tab will be highlighted with a blue background (Figure 7.1). This view shows all users that are currently logged into all areas. Staff members are highlighted in green and service personnel are highlighted in orange, so they stand out. Each area will list the number of people in the area if it is greater than 1. Staff and service personnel are listed separately if the area is configured not to include them in the occupancy count. Lab areas are configured through the Detailed administration → Areas page, see section 42.8.

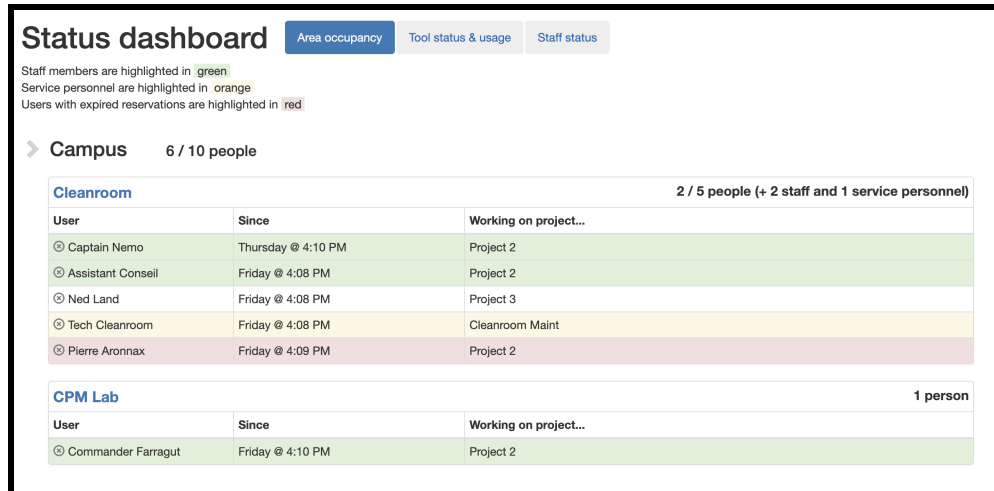

Figure 7.1: Status dashboard area occupancy

7.2.1 Maximum occupancy

If an area has a maximum occupancy set, the number of people will be listed as total of the maximum (Figure 7.2).

Chapter 7 Status dashboard

A rectangular box with a black border containing the text "3 / 5 people" in a black sans-serif font.

Figure 7.2: Status dashboard below maximum occupancy

If the occupancy is within one person, a yellow warning will be displayed with the occupancy (Figure 7.3).

A rectangular box with a black border containing a yellow warning triangle icon on the left, followed by the text "4 / 5 people" in a black sans-serif font.

Figure 7.3: Status dashboard near maximum occupancy

If the occupancy is at or above the limit, a red warning will be displayed with the occupancy (Figure 7.4).

A rectangular box with a black border containing a red warning triangle icon on the left, followed by the text "5 / 5 people" in a black sans-serif font.

Figure 7.4: Status dashboard at or above maximum occupancy

7.2.2 Force user out of area (staff only)

Staff will see a  icon next to each user's name. Clicking the icon will log the user out of the area. There is no prompt for confirmation, the logout is immediate.

Chapter 7 Status dashboard

7.3 Tool status & usage tab

Clicking the 'Tool status & usage' tab will switch the view and highlight the tab with a blue background. The default view is the 'tools in use' filter. To change the filter, click the dropdown and click the filter of interest (Figure 7.5). All filter views show the tool name, user name, and when they started using the tool. The tool names are followed by status icons which are identical to those describe in the Tool control → Side bar Tool list icons section 6.2.

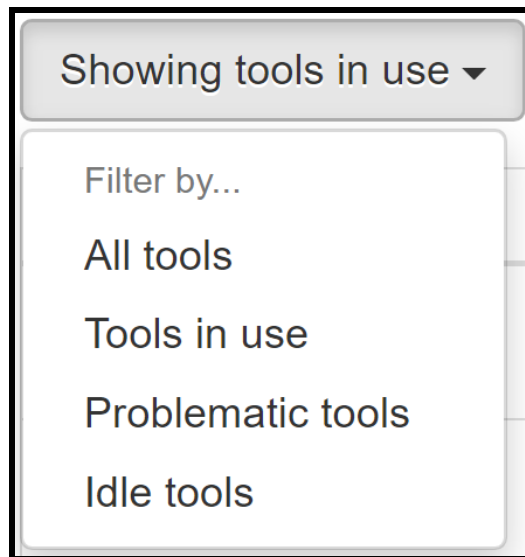

Figure 7.5: Status dashboard tool filter

7.3.1 Force user off of tool (staff only)

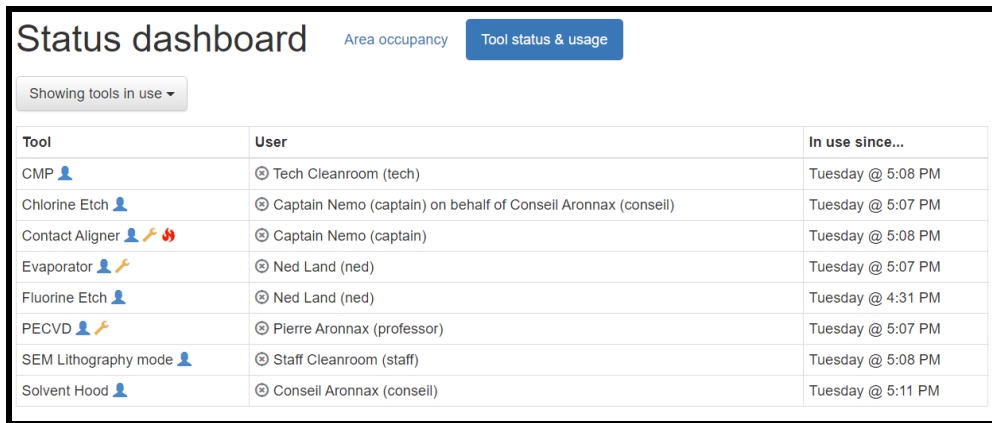

Staff will see a  icon next to each user's name on all tool status views except for idle tools. Clicking the icon will log the user out of the tool. There is no prompt for confirmation, the logout is immediate. All normal logout procedures are skipped and if interlocks are defined, the interlock is turned off immediately. If there are required post usage questions, an email will be sent to the user, the staff member who forced him off, the tool owner and backup owners, as well as

Chapter 7 Status dashboard

the lab managers. The email will contain the required questions and the tool usage data entry will be blank for usage. Tool logout procedures are discussed in the Tool control → Summary tab → Tool log out subsection 6.4.9.

7.3.2 Tools in use

The 'tools in use' filter will only show tools that currently have someone logged in (Figure 7.6).

The screenshot shows the 'Status dashboard' interface. At the top, there are two tabs: 'Area occupancy' and 'Tool status & usage', with the latter being selected. Below the tabs is a dropdown menu labeled 'Showing tools in use'. The main content is a table with three columns: 'Tool', 'User', and 'In use since...'. The table lists eight tools and their current users and start times.

Chapter 7 Status dashboard

7.4.2 User and staff view

Regular and staff users can only see staff names, their availability, and any potential facility closure that was set to make all staff absent. There are 3 colors: green if the staff member is available that day, orange is the staff member is available for part of the day only, and red if the staff member is unavailable.

- When a staff member is only available part of the day, a tooltip will show more information if available (Figure 7.18).

Figure 7.18: Status dashboard staff partial availability details

Chapter 7 Status dashboard

- If the staff member's working hours have been set, a tooltip will show them when hovering over a day when the staff is available (Figure 7.19).

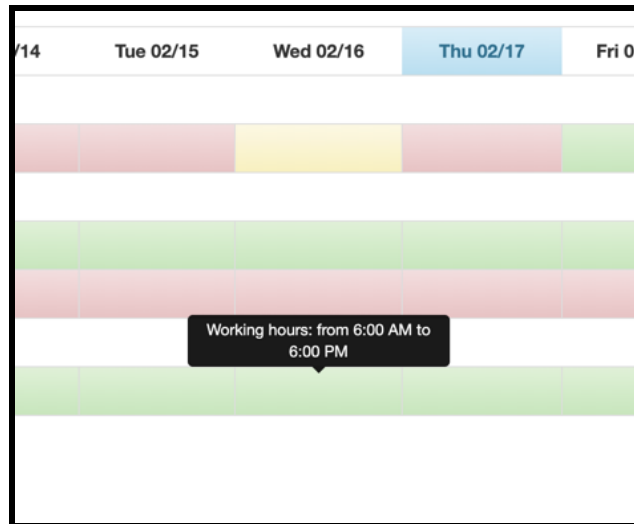

Figure 7.19: Status dashboard staff availability details

Chapter 7 Status dashboard

- If there is a facility closure and the closure was set to make all staff absent, it will say “Closed” and the tooltip will show the closure details (Figure 7.20).

The screenshot shows a status dashboard for two days: Mon 02/21 and Tue 02/22. A tooltip is displayed over the Mon 02/21 column, indicating a facility closure: "President's day Feb. 21, 2022 from 12:00 AM to 11:59 PM". The dashboard is organized into three categories: Night shift, Staff, and Other. Each category lists staff members and their status for each day. Red bars indicate "Closed" status, and green bars indicate active status.

- Facility managers' view of the staff status page is more detailed and provide more functionality (Figure 7.21).

Figure 7.21: Status dashboard staff status facility managers' view

- In addition to the red, orange, and green colors for staff availability, facility managers see a white block when the staff member doesn't work on a specific day. In the following example, Captain Nemo doesn't work on Saturdays and Sundays (Figure 7.22).

Figure 7.22: Status dashboard staff non workdays

Chapter 7 Status dashboard

- Facility managers can see the absence type and the details by hovering over the absence (Figure 7.23).

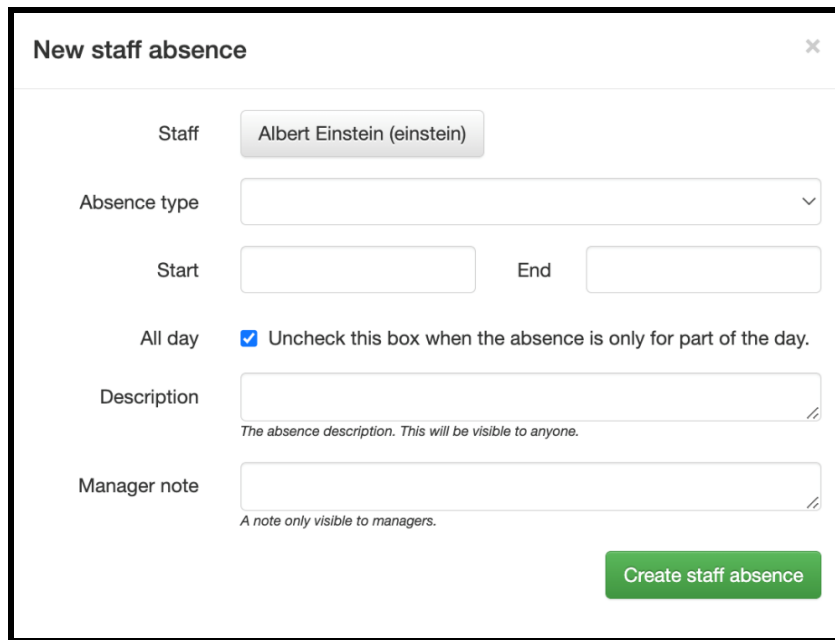

Figure 7.23: Status dashboard staff absence details

Chapter 7 Status dashboard

7.4.4 Create a new absence (facility managers only)

- Facility manager can add new staff absences by clicking on the green plus button  next to a staff member's name. The staff absence popup will show up (Figure 7.24).

The screenshot shows a 'New staff absence' popup window. At the top, it says 'New staff absence' with a close button (x). Below this, there are several fields: 'Staff' with a dropdown menu showing 'Albert Einstein (einstein)'; 'Absence type' with a dropdown menu; 'Start' and 'End' with date input fields; 'All day' with a checked checkbox and the text 'Uncheck this box when the absence is only for part of the day.'; 'Description' with a text area and a small icon, with a note below it: 'The absence description. This will be visible to anyone.'; and 'Manager note' with a text area and a small icon, with a note below it: 'A note only visible to managers.' At the bottom right, there is a green button labeled 'Create staff absence'.

Figure 7.24: Status dashboard staff create absence popup

- The staff field is not a direct reference to a user, but to a Staff availability defined in Staff availability, see section 42.49.
- The description field will be shown to all users.
- The Manager note field will only be shown to facility managers.
- Absence type, start and end dates are required.

Chapter 7 Status dashboard

- After filling out the information, clicking on the “Create staff absence” button will create the absence and refresh the staff status page (Figure 7.25).

Create staff absence

Figure 7.25: Status dashboard create staff absence button

7.4.5 Edit/Delete an absence (facility managers only)

- Facility manager can click on the name of an absence in the view (Figure 7.26).

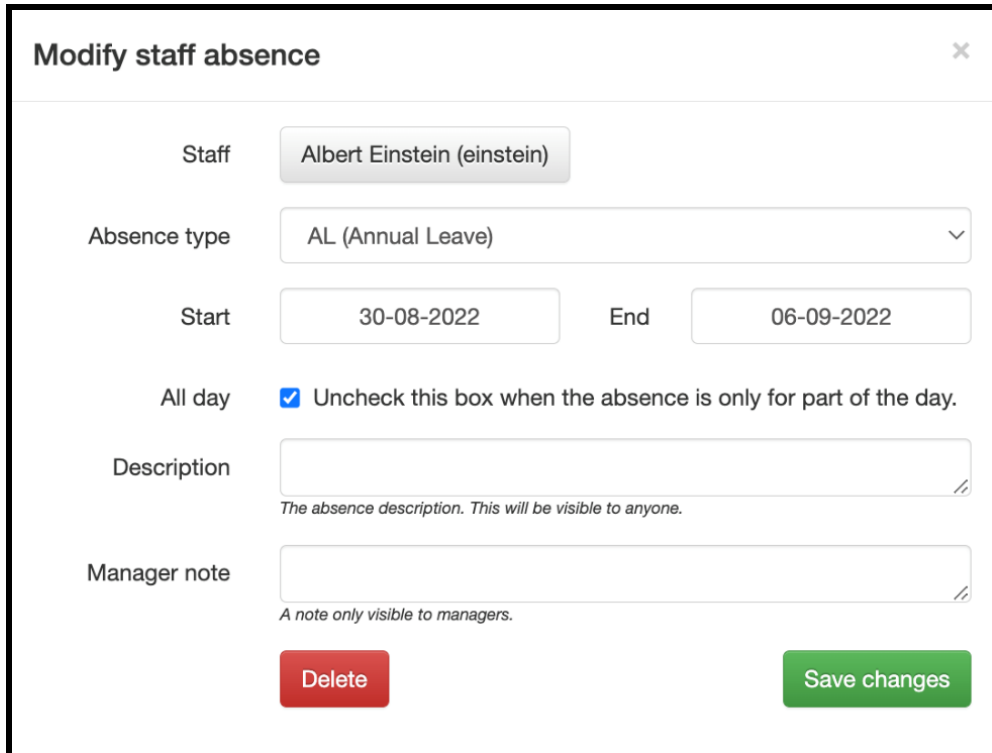

AL

Figure 7.26: Status dashboard staff absence name

Chapter 7 Status dashboard

- This will bring up the edit popup (Figure 7.27).

The image shows a 'Modify staff absence' popup window. It contains the following fields and controls:

- Staff:** A dropdown menu showing 'Albert Einstein (einstein)'.
- Absence type:** A dropdown menu showing 'AL (Annual Leave)'.
- Start:** A date input field showing '30-08-2022'.
- End:** A date input field showing '06-09-2022'.
- All day:** A checked checkbox with the text 'Uncheck this box when the absence is only for part of the day.'
- Description:** A text input field with a placeholder text: 'The absence description. This will be visible to anyone.'
- Manager note:** A text input field with a placeholder text: 'A note only visible to managers.'
- Buttons:** A red 'Delete' button and a green 'Save changes' button.

Figure 7.27: Status dashboard edit absence popup

- After changing the details, clicking on the “Save changes” button will update the absence and refresh the staff status page (Figure 7.28).

Figure 7.28: Status dashboard staff save changes button

Chapter 7 Status dashboard

- Clicking on the “Delete” button will delete the absence and refresh the staff status page (Figure 7.29).

Figure 7.29: Status dashboard staff delete changes button

7.4.6 Export staff status (facility managers only)

- Facility managers can export the current view of the staff status by clicking on the “Export” button (Figure 7.30). This will produce a CSV file of the staff status.

Figure 7.30: Status dashboard staff export button

7.5 Mobile device status dashboard

The mobile device view organizes the data to fit the width of the screen without reduction of functionality (Figure 7.31, Figure 7.32).

Chapter 7 Status dashboard

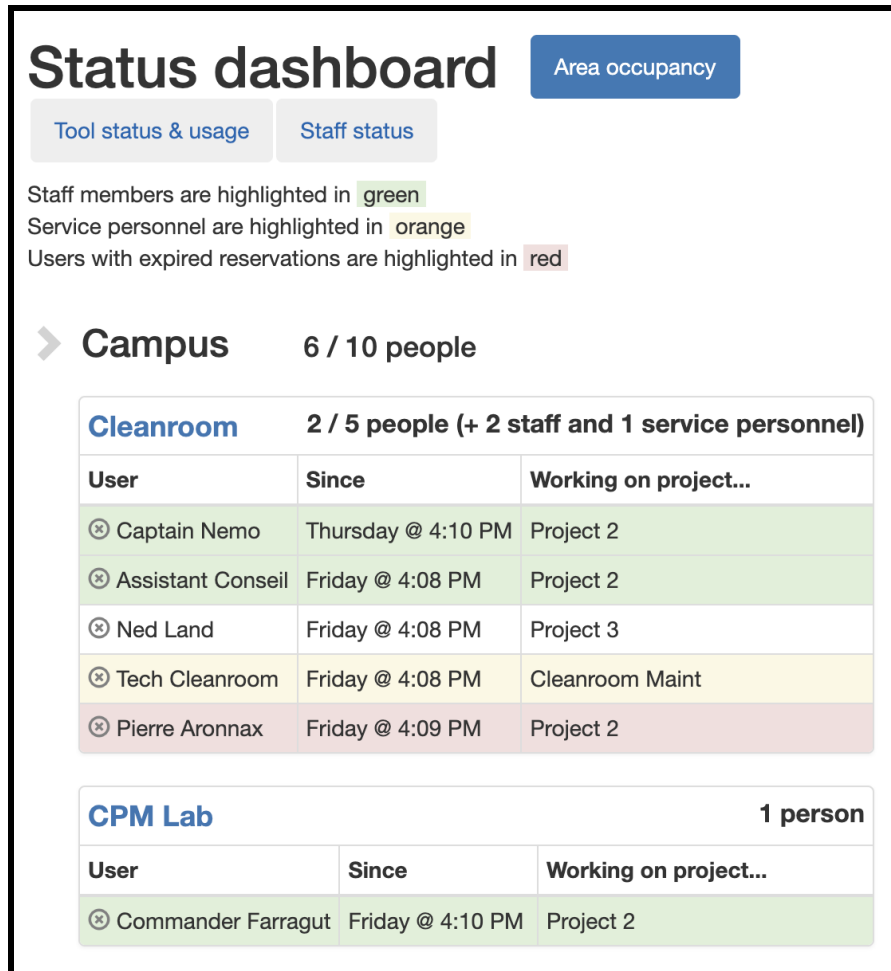

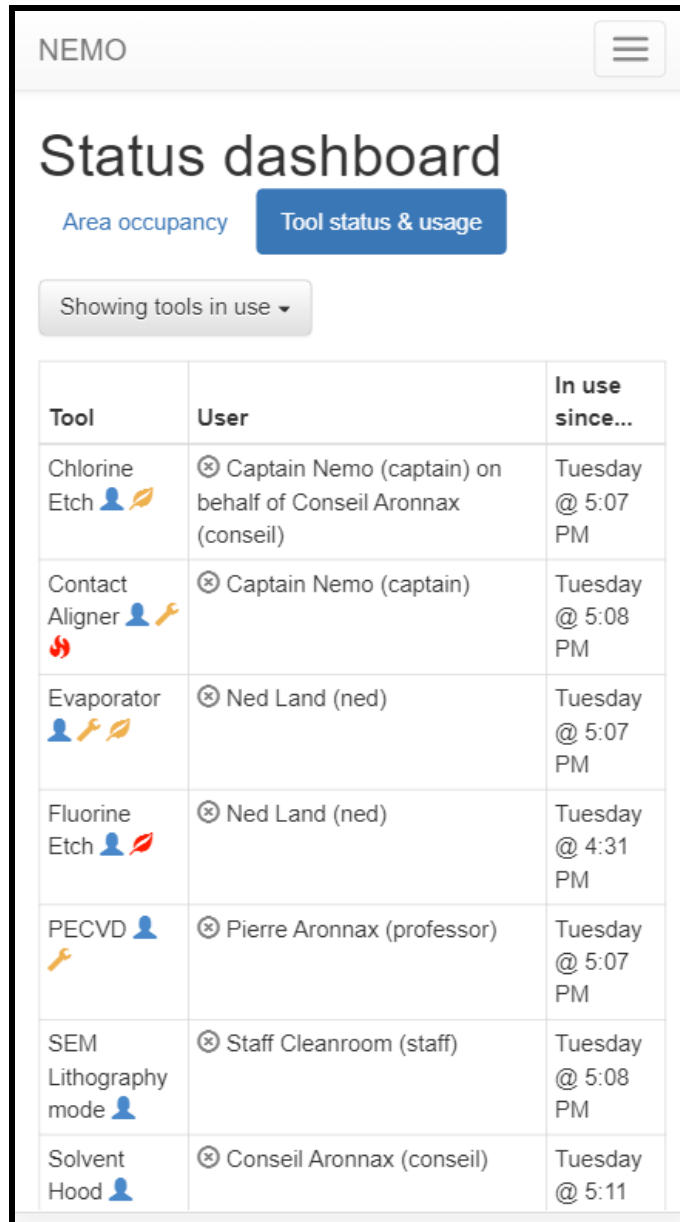

Figure 7.31: Status dashboard mobile area occupancy view

Chapter 7 Status dashboard

The screenshot shows the NEMO Status dashboard. At the top, there is a header with 'NEMO' and a menu icon. Below the header is the title 'Status dashboard'. There are two tabs: 'Area occupancy' and 'Tool status & usage', with the latter being selected. A dropdown menu shows 'Showing tools in use'. The main content is a table with three columns: 'Tool', 'User', and 'In use since...'. The table lists eight tools and their current users and start times.

Tool	User	In use since...
Chlorine Etch  	⊗ Captain Nemo (captain) on behalf of Conseil Aronnax (conseil)	Tuesday @ 5:07 PM
Contact Aligner   	⊗ Captain Nemo (captain)	Tuesday @ 5:08 PM
Evaporator   	⊗ Ned Land (ned)	Tuesday @ 5:07 PM
Fluorine Etch  	⊗ Ned Land (ned)	Tuesday @ 4:31 PM
PECVD  	⊗ Pierre Aronnax (professor)	Tuesday @ 5:07 PM
SEM Lithography mode 	⊗ Staff Cleanroom (staff)	Tuesday @ 5:08 PM
Solvent Hood 	⊗ Conseil Aronnax (conseil)	Tuesday @ 5:11

Figure 7.32: Status dashboard tool status view

Chapter 7 Status dashboard

7.6 Status dashboard customizations

7.6.1 Status dashboard refresh rate

The status dashboard page automatically refreshes every 10 seconds which updates the current area occupancy and tool usage information. To change the update interval, edit the `status_dashboard.html` and change the `setInterval` constant (in milliseconds) in the `on_load` function.

7.6.2 Other customizations

Other customizations and settings for the status dashboard are discussed in the Status dashboard settings page [40.14](#).

CHAPTER 8

Requests

The Requests page is meant to be a common place for user requests. It includes the buddy board and the access requests. At least one of the 2 features needs to be enabled for the Requests menu item to show up (Figure 8.1).

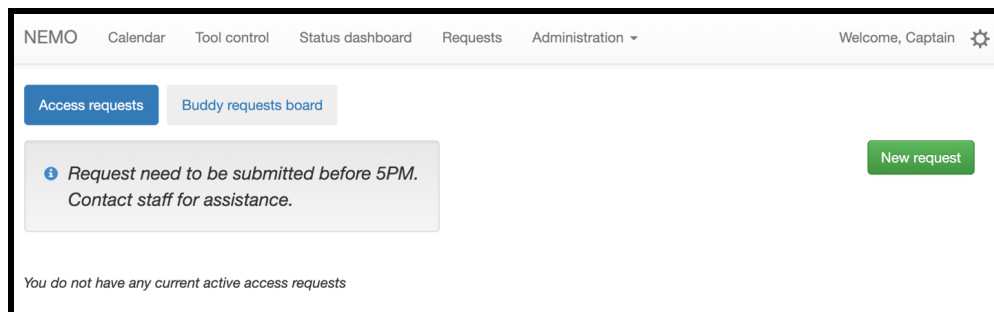

Figure 8.1: *Requests page*

Chapter 8 Requests

8.1 Buddy board

The buddy board is a simple message system that enables facility users to pair up or form working groups required in many facilities for out of hours access.

To enable the buddy board, you must first enable it on an area. See Detailed administration → Areas section [42.8](#).

8.1.1 Web address

The buddy board page is accessible at site-address/user_requests/buddy/. The page can also be accessed from the navigation bar menu item “Requests”.

Chapter 8 Requests

8.1.2 Usage

8.1.2.1 Open the buddy board

Click the Requests then on the Buddy board to access the buddy board. The page shows a new request button in the right upper corner, instructions, and the current list of buddy requests and replies (Figure 8.2).

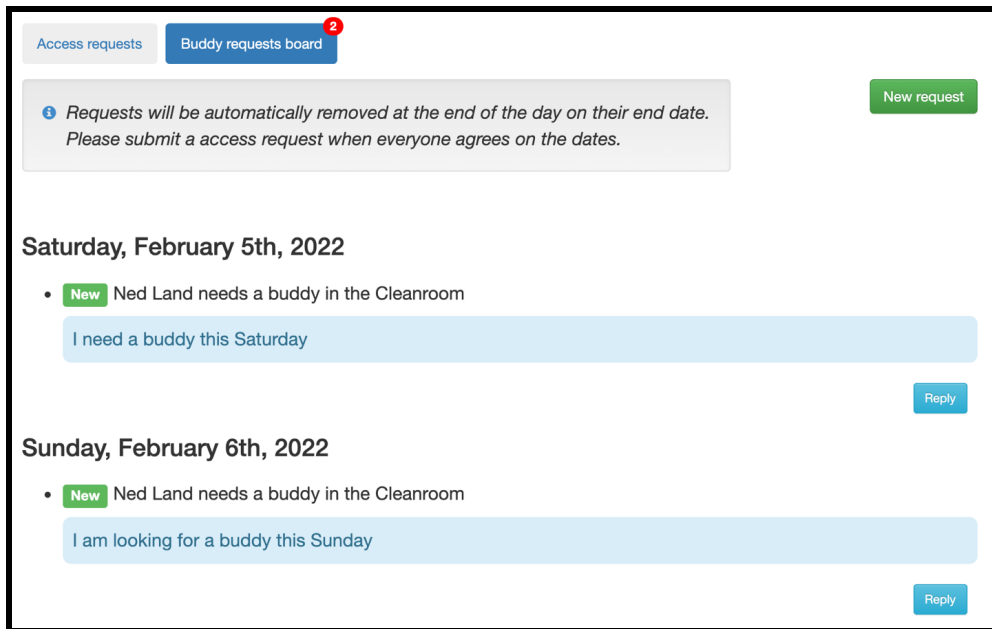

Figure 8.2: *Buddy board display*

Chapter 8 Requests

8.1.2.2 Create a new request

To create a new buddy request:

- Click the New request button (Figure 8.3).

Figure 8.3: *Buddy board new request button*

- The new request page will open (Figure 8.4).

New buddy request

Start date End date

Area

Description

Figure 8.4: *Buddy board new request dialog*

Chapter 8 Requests

- Click in the Start date dialog and click the start date on the calendar pop-up (Figure 8.5).

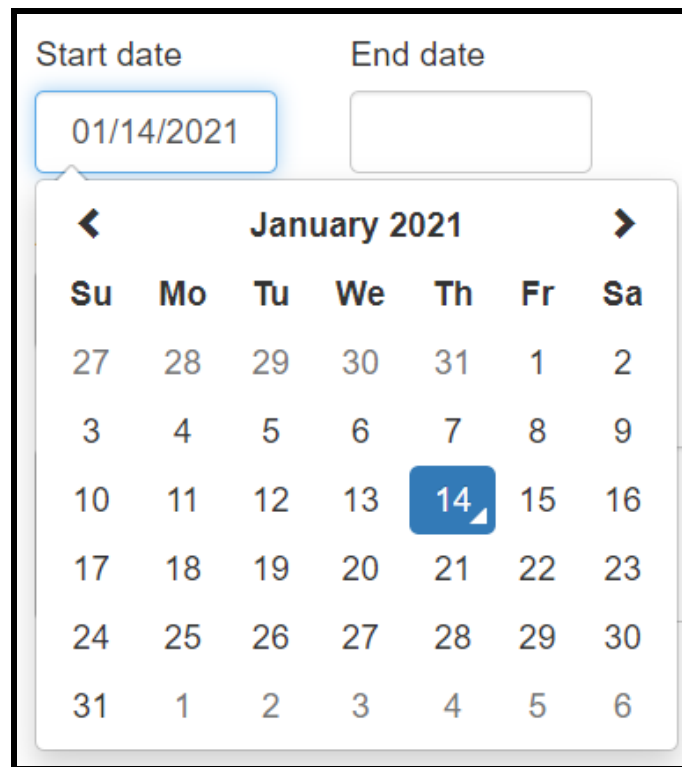

Figure 8.5: *Buddy board start date*

Chapter 8 Requests

- Click in the End date dialog and click the end date on the calendar pop-up (Figure 8.6).

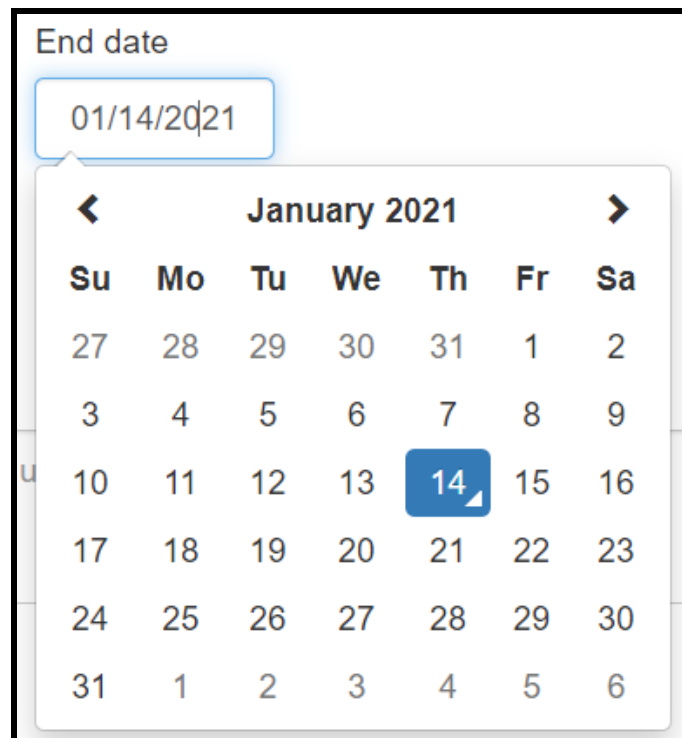

Figure 8.6: *Buddy board end date*

Chapter 8 Requests

- If you have access to multiple areas that use the buddy system, click the area you are looking for a buddy. Otherwise, your area is automatically selected (Figure 8.7).

Figure 8.7: *Buddy board area button*

- Enter a description that includes details another user would need to determine if they want to join your buddy group (Figure 8.8).

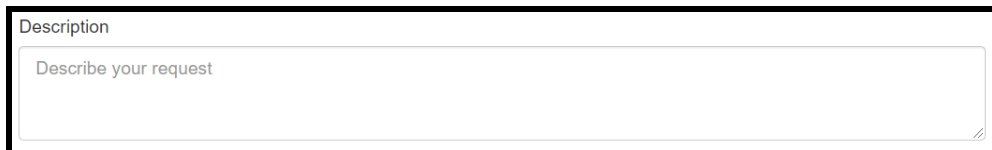

A screenshot of a text input field with the label 'Description' and the placeholder text 'Describe your request'.

Figure 8.8: *Buddy board description*

- Click create buddy request button (Figure 8.9).

Figure 8.9: *Buddy board create request button*

- Your request will be created, and the page will return to the buddy board.

Chapter 8 Requests

- All users with preferences set to see new buddy requests will see a notification icon next to requests menu on the navigation bar (Figure 8.10).

Figure 8.10: *Requests navigation bar notification*

8.1.2.3 Edit or delete your request

- Only the owner of a request can edit or delete the request.
- Once there is a reply, the request can't be edited or deleted.
- Click the edit button to edit the request (Figure 8.11).

Figure 8.11: *Buddy board edit request button*

- All of the fields entered to create the request can be edited.
- Click save changes when finished (Figure 8.12).

Figure 8.12: *Buddy board save changes button*

Chapter 8 Requests

- Click the delete button to delete the request (Figure 8.13).

Figure 8.13: *Buddy board delete request button*

- The request will be deleted without further input.

8.1.2.4 Reply to a request

- Find a request in the time frame of interest (Figure 8.14).

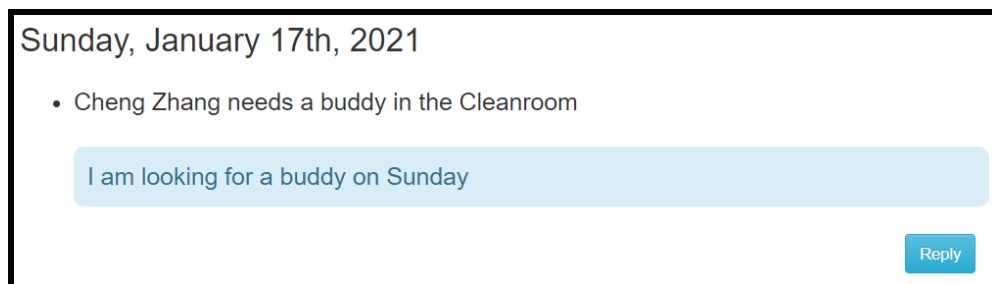

Figure 8.14: *Buddy board request*

- Click the reply button (Figure 8.15).

Figure 8.15: *Buddy board reply button*

Chapter 8 Requests

- Enter a message in the dialog to respond to the initiator (Figure 8.16).

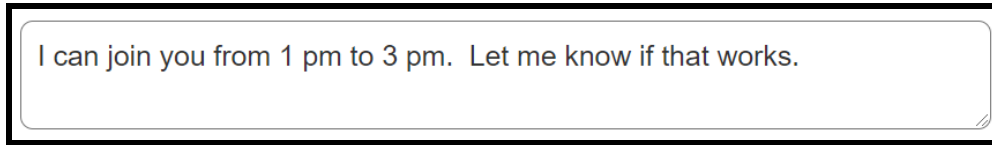

Figure 8.16: *Buddy board reply dialog*

- Click send to post your reply (Figure 8.17).

Figure 8.17: *Buddy board send reply button*

- All users with preferences set to see buddy request replies that they replied to will see a notification icon next to the buddy board menu on the navigation bar (Figure 8.18).

Figure 8.18: *Requests navigation bar notification*

- All users with preferences set to receive emails for buddy request replies that they replied to will receive an email notification

8.1.3 Mobile device buddy board page

There are no mobile device views for the buddy board page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

Chapter 8 Requests

8.1.4 Buddy board page customizations

The tab title and description can be customized in Customization → Buddy requests settings, see subsection [40.18.3](#).

8.2 Access requests

The access requests feature is a system that enables facility users to temporarily request access to an area they don't typically have access to at certain times. Most often this would be used to request after-hours access to a lab/cleanroom.

To enable the access requests, you must first enable it on a physical access level. See Detailed administration → Physical access level section [42.33](#) and by setting at least one facility manager in the Detailed administration → Users section [42.68](#).

8.2.1 Web address

The access requests page is accessible at site-address/user_requests/access/. The page can also be accessed from the navigation bar menu item "Requests".

8.2.2 Usage

8.2.2.1 Open the access requests

Click the Requests then on the Access requests tab to access the access requests (by default when clicking on Requests it will display the access requests tab). The page shows a new request button in the right upper corner, instructions, and the current list of access requests grouped by status. Possible statuses are: Pending, Approved, Denied and Expired (Figure [8.19](#)).

Chapter 8 Requests

Access requests | Buddy requests board

Request need to be submitted before 5PM.
Contact staff for assistance.

Figure 8.19: Access requests display

8.2.2.2 Create a new request

To create a new access request:

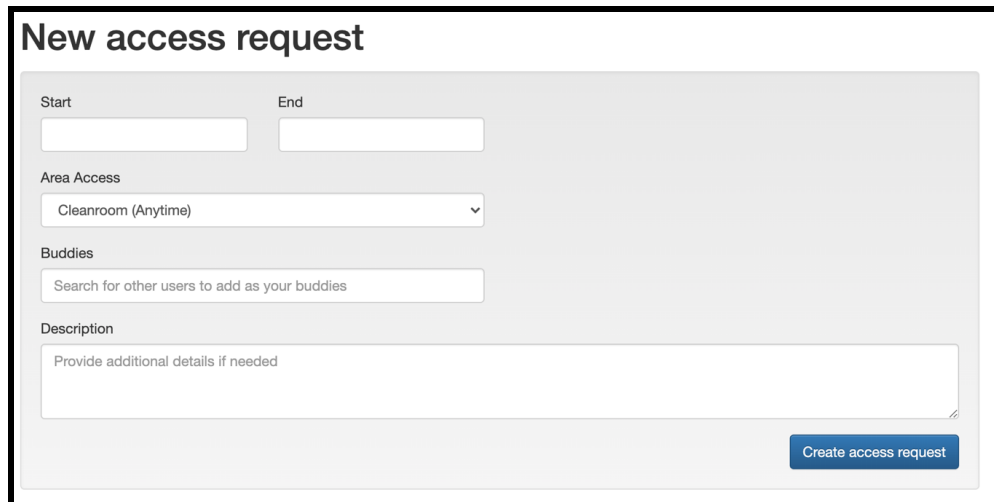

- Click the New request button (Figure 8.20).

Figure 8.20: Access request new request button

Chapter 8 Requests

- The new request page will open (Figure 8.21).

The image shows a web form titled "New access request". It contains several input fields and a button. The fields are: "Start" and "End" (text boxes), "Area Access" (a dropdown menu with "Cleanroom (Anytime)" selected), "Buddies" (a text box with the placeholder "Search for other users to add as your buddies"), and "Description" (a large text area with the placeholder "Provide additional details if needed"). A blue button labeled "Create access request" is located at the bottom right of the form.

Figure 8.21: Access request new request dialog

Chapter 8 Requests

- Click in the Start text field and pick the start date and time on the calendar pop-up (Figure 8.22).

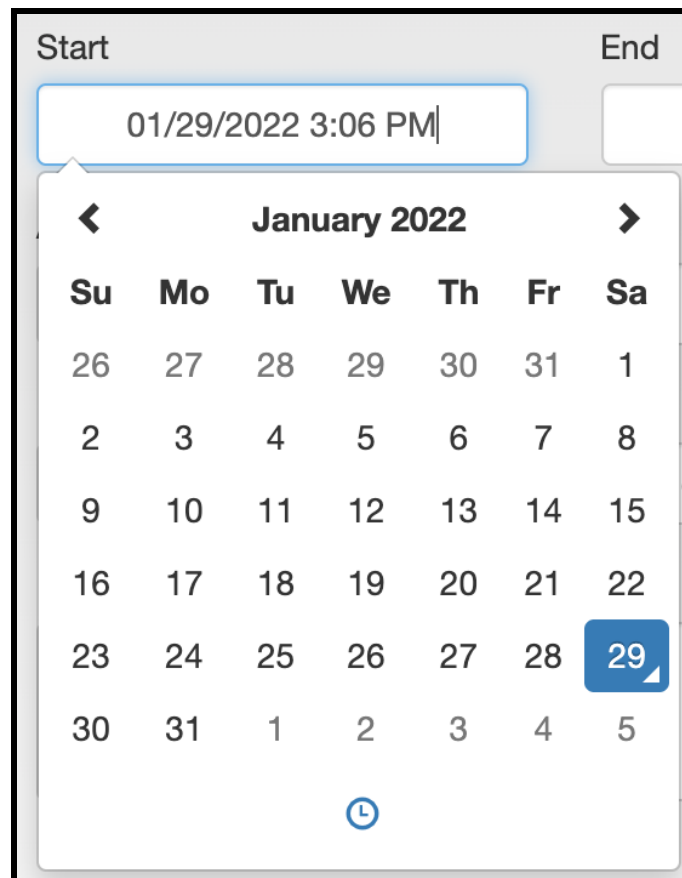

Figure 8.22: Access request start date and time

Chapter 8 Requests

- Click in the End text field and pick the end date and time on the calendar pop-up (Figure 8.23).

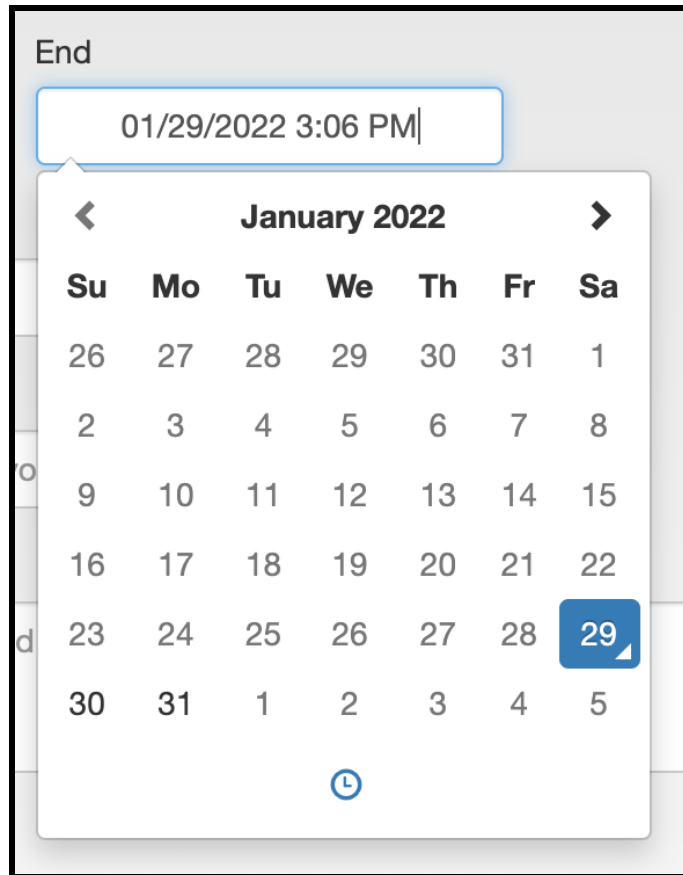

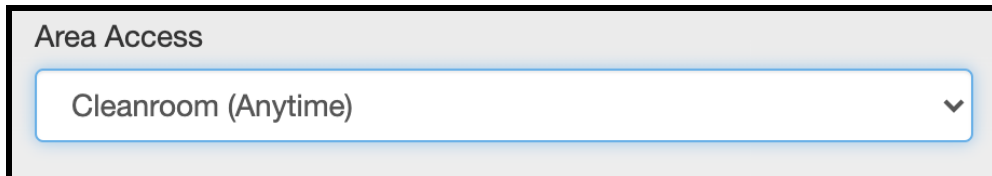

Figure 8.23: Access request end date and time

Chapter 8 Requests

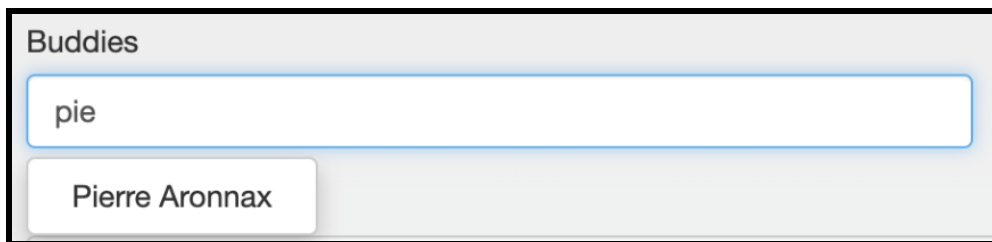

- If you have set multiple physical access levels that users can request, click the Area Access drop down you are looking to request access for. Otherwise, your area access is automatically selected (Figure 8.24).

The screenshot shows a rectangular box with a light gray background. At the top left, the text "Area Access" is displayed. Below it is a white dropdown menu with a blue border. The menu is currently open, showing the text "Cleanroom (Anytime)" and a small downward-pointing chevron icon on the right side.

Figure 8.24: Access request area access dropdown

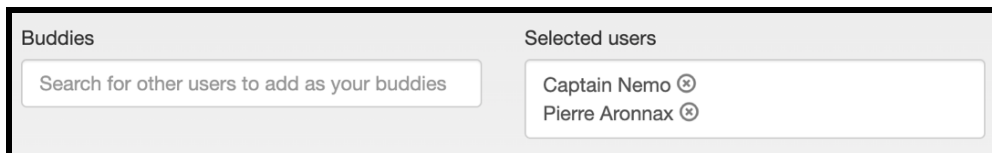

- Click on the Buddies text field and start typing the name of the buddy you would like to add to your request. Click on the name to add the buddy (Figure 8.25).

The screenshot shows a rectangular box with a light gray background. At the top left, the text "Buddies" is displayed. Below it is a white search input field with a blue border containing the text "pie". Below the search field is a white button with a blue border containing the text "Pierre Aronnax".

Figure 8.25: Access request add buddies

- The buddy's name will appear in the field next to the search field. Click on the cross next to the buddy's name to remove the buddy (Figure 8.26).

The screenshot shows a rectangular box with a light gray background. On the left side, under the heading "Buddies", there is a white search input field with a blue border containing the text "Search for other users to add as your buddies". On the right side, under the heading "Selected users", there is a white list box with a blue border containing two entries: "Captain Nemo" and "Pierre Aronnax", each followed by a small "x" icon for removal.

Figure 8.26: Access request remove buddies

Chapter 8 Requests

- Optionally you can enter a description that includes details the facility manager would need to know about your request (Figure 8.27).

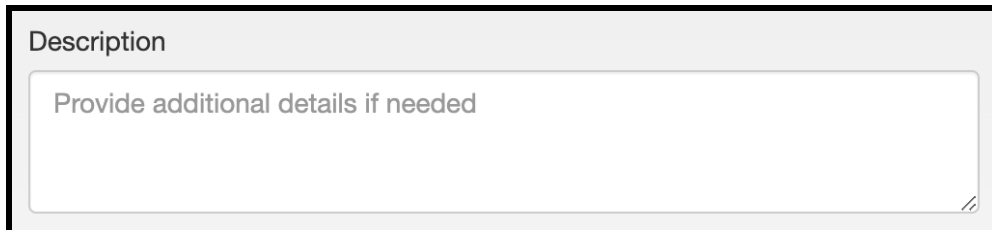

A screenshot of a web form. At the top, the word "Description" is written in a light gray font. Below it is a large, empty text input box with a light gray border and a small cursor icon at the bottom right. Inside the box, the text "Provide additional details if needed" is displayed in a light gray font.

Figure 8.27: Access request description

- Click create access request button (Figure 8.28).

Figure 8.28: Access request create request button

- Your request will be created, and the page will return to the access requests page.
- All users included in the request and facility managers will receive an email confirmation that the request was received. Additionally, they will see a notification icon next to requests menu on the navigation bar (Figure 8.29).

Figure 8.29: Requests navigation bar notification

Chapter 8 Requests

8.2.2.3 Edit or delete your request

- Only the owner of a request can edit or delete the request.
- Once the status is approved, denied, or expired, the request can't be edited or deleted.
- Click the edit button to edit the request (Figure 8.30).

Figure 8.30: Access request edit request button

- All the fields entered to create the request can be edited.
- Click save changes when finished (Figure 8.31).

Figure 8.31: Access request save changes button

- All users and facility managers will receive an email notification that the request was updated as well as a notification icon.
- Click the delete button to delete the request (Figure 8.32).

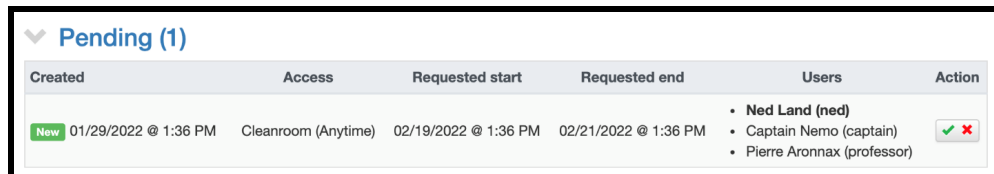

Figure 8.32: Access request delete request button

- A confirmation message will popup asking you to confirm the action before the request is deleted.

Chapter 8 Requests

8.2.2.4 Approve/deny requests (Facility managers only)

- Find a pending request (Figure 8.33).

The screenshot shows a table titled "Pending (1)" with the following columns: Created, Access, Requested start, Requested end, Users, and Action. A single row is visible, marked as "New" in a green box. The "Users" column lists three users: Ned Land (ned), Captain Nemo (captain), and Pierre Aronnax (professor). The "Action" column contains a green checkmark and a red X icon.

Created	Access	Requested start	Requested end	Users	Action
New 01/29/2022 @ 1:36 PM	Cleanroom (Anytime)	02/19/2022 @ 1:36 PM	02/21/2022 @ 1:36 PM	<ul style="list-style-type: none">Ned Land (ned)Captain Nemo (captain)Pierre Aronnax (professor)	<input checked="" type="checkbox"/> <input type="checkbox"/>

Figure 8.33: Access requests pending

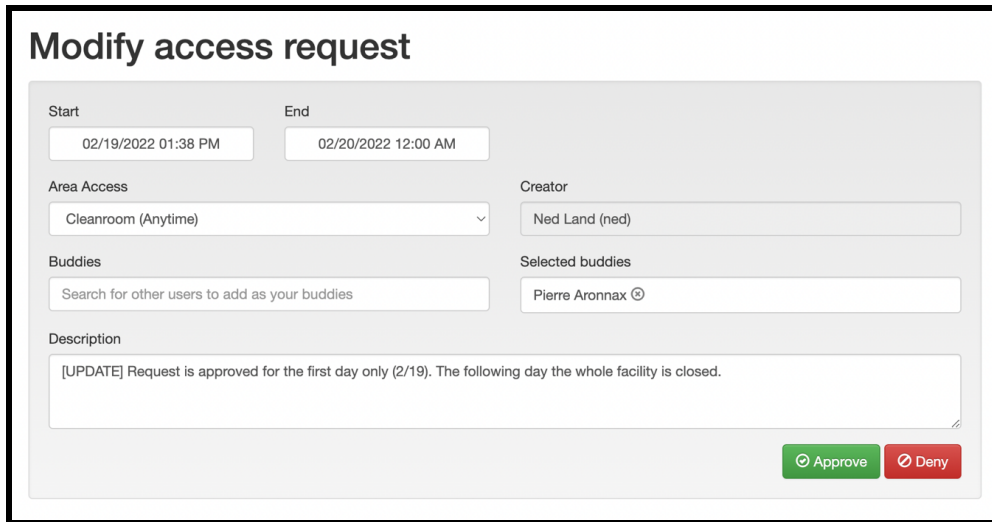

- Click the review button (Figure 8.34).

Figure 8.34: Access requests approve review button

Chapter 8 Requests

- Edit any field of the access request. It is recommended to add a message to the request description to explain the changes (Figure 8.35).

Modify access request

Start: 02/19/2022 01:38 PM End: 02/20/2022 12:00 AM

Area Access: Cleanroom (Anytime) Creator: Ned Land (ned)

Buddies: Search for other users to add as your buddies Selected buddies: Pierre Aronnax

Description: [UPDATE] Request is approved for the first day only (2/19). The following day the whole facility is closed.

Approve Deny

Figure 8.35: Access request approve/deny dialog

- Click approve or deny (Figure 8.36).

Figure 8.36: Access request approve/deny buttons

- A confirmation dialog will ask to confirm the choice. Upon confirmation, the user will be redirected to the access requests page.
- All users included in the request and facility managers will receive an email confirmation of the changes and new status of the request.

Chapter 8 Requests

- Upon approval, a temporary physical access record giving access to the area to all the users included in the request, starting at the start time of the request, and ending at the end time of the request. Temporary physical accesses are discussed in the Detailed administration → Temporary physical access section [42.58](#).

8.2.2.5 Weekend access

The access requests feature comes with a weekend access optional feature. An email can be sent to a customizable list of emails when users are expected to be (or not be) in the facility during weekends. To enable the feature, the weekend access emails setting needs to be set in Customization → Access requests settings (subsection [40.18.2](#)) as well as the user office email address and the weekend email access template in Customization → Weekend access notification email, see subsection [40.5.33](#). This feature also needs to be set through a timed service job as described in the NEMO Timed Services section [48.3](#).

There are 2 cases when the email will be sent:

1. When an approved request's time is overlapping the current weekend time, an email will be sent to inform the emails set in Customization → Access requests settings (see subsection [40.18.2](#)) as well as facility managers that there will be users in the facility this coming weekend. For example, if the cutoff date and time is set to Friday 5 pm and a request is approved before that (or anytime if the cutoff date and time are not set), then the email will be sent with a `weekend_access` variable set to "true".
2. When no requests overlapping the current weekend time are approved before the cutoff day and time set in Customization – Access requests settings subsection [40.18.2](#), an email will be sent at the cutoff date and time to inform the emails set in Customization → Access requests settings (see subsection [40.18.2](#)) as well as the facility managers that no users will be in the facility this coming weekend.

Chapter 8 Requests

For example, if the cutoff date and time is set to Friday 5 pm and by that day and time there are no approved requests with time overlapping the current weekend, then the email will be sent with a `weekend_access` variable set to “false”. If the cutoff day and time are not sent, the email will not be sent.

8.2.3 Mobile device access requests page

There are no mobile device views for the access requests page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

8.2.4 Access requests page customizations

The tab title, description, minimum number of users in a request, maximum requests to display and weekend access details can be set in Customization → Access requests settings, see subsection [40.18.2](#).

8.3 Adjustment requests

The adjustment requests feature is a system that enables users to contest certain charges. To enable adjustment requests, you must have at least one user with the facility manager role, and you must enable it in Customization – Adjustment requests settings, see subsection [40.18.1](#).

8.3.1 Web address

The adjustment requests page is accessible at `site-address/user_requests/adjustment/`. The page can also be accessed from the navigation bar menu item “Requests”.

Chapter 8 Requests

8.3.2 Usage

8.3.2.1 Open the adjustment requests

Click the Requests then on the Adjustment requests tab to access the adjustment requests. The page shows a new request button in the right upper corner, instructions, and the current list of adjustment requests grouped by status. Possible statuses are: Pending, Approved and Denied (Figure 8.37).

The screenshot displays the 'Adjustment requests' page. At the top, there are navigation tabs: 'Access requests', 'Buddy requests board', and 'Adjustment requests' (which is active and has a red notification badge). Below the tabs are two buttons: 'New request' and 'Export'. The main content is organized into three sections based on request status:

- Pending (1):** Contains one request. The table row shows: Created: 03/06/2023 @ 10:46 AM; User: Ned Land; Charge: 790 RIE Middle usage for Ned Land (ned) from 03/04/2023 @ 10:54 AM to 03/05/2023 @ 11:00 AM; New start: 03/05/2023 @ 6:00 AM; New end: 03/05/2023 @ 6:00 AM; Difference: - 5:00:00; Action: Review. Below the table, there is a comment: 'I forgot to logoff the tool' and a reply button.
- Approved:** Contains one request. The table row shows: Created: 01/22/2023 @ 12:35 PM; User: Ned Land; Charge: 790 RIE Middle usage for Ned Land (ned) from 01/20/2023 @ 6:54 PM to 01/21/2023 @ 2:00 PM; New start: 01/21/2023 @ 1:00 PM; New end: 01/21/2023 @ 1:00 PM; Difference: - 1:00:00; Approved by: Captain Nemo. Below the table, there is a comment: 'I forgot to logoff the tool'.
- Denied:** Contains one request. The table row shows: Created: 02/13/2023 @ 12:36 PM; User: Ned Land; Charge: 790 RIE Middle usage for Ned Land (ned) from 02/10/2023 @ 5:54 AM to 02/11/2023 @ 10:00 AM; New start: 02/11/2023 @ 4:00 AM; New end: 02/11/2023 @ 4:00 AM; Difference: - 6:00:00; Denied by: Captain Nemo. Below the table, there is a comment: 'I forgot to logoff the tool'.

Figure 8.37: Adjustment requests display

Chapter 8 Requests

8.3.2.2 Create a new request

There are two ways to create a new adjustment request, from the usage page and from the requests page.

From the Usage page:

- Click the Request an adjustment button (Figure 8.38).

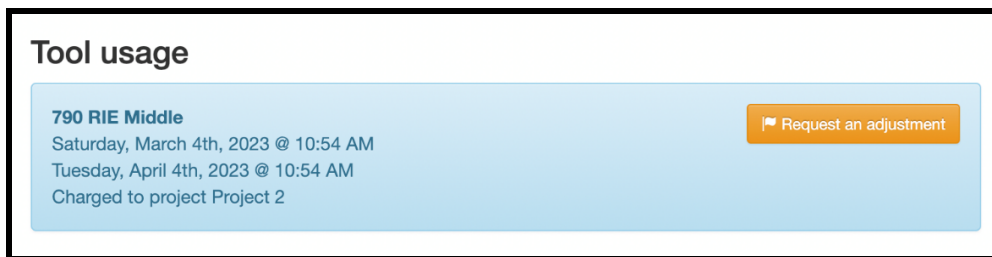

Figure 8.38: Adjustment requests request an adjustment button

From the Requests main menu item:

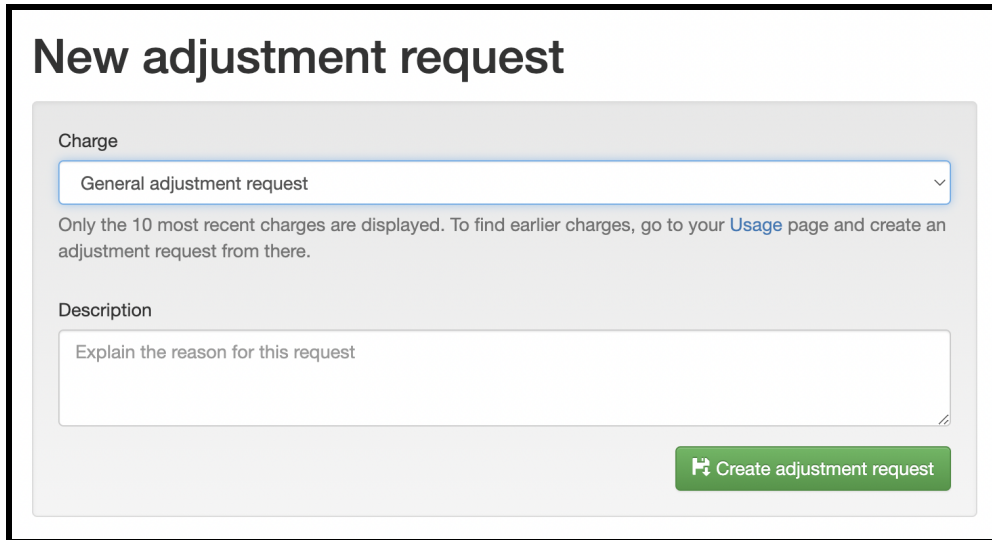

- Click the New request button (Figure 8.39).

Figure 8.39: Adjustment requests new request button

Chapter 8 Requests

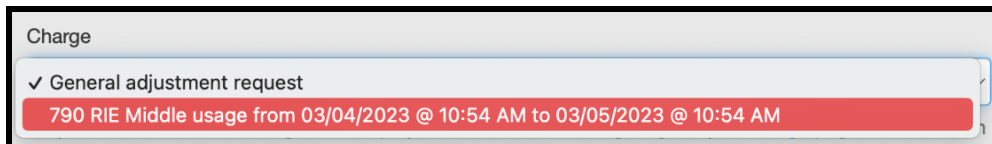

- The new request page will open (Figure 8.40).

The screenshot shows a web form titled "New adjustment request". At the top, there is a "Charge" dropdown menu with "General adjustment request" selected. Below the dropdown, a note states: "Only the 10 most recent charges are displayed. To find earlier charges, go to your Usage page and create an adjustment request from there." Underneath is a "Description" text area with the placeholder text "Explain the reason for this request". At the bottom right, there is a green button with a plus icon and the text "Create adjustment request".

Figure 8.40: Adjustment requests new request dialog

- Click in the “Charge” dropdown menu and pick the charge you would like to request an adjustment for, or select “General adjustment request” (Figure 8.41).

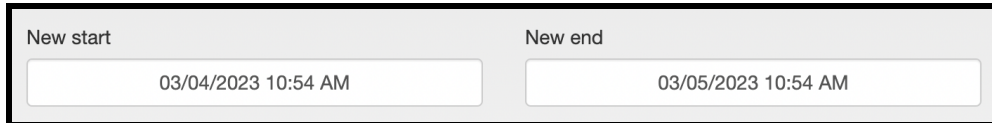

This is a close-up of the "Charge" dropdown menu. The selected item is "General adjustment request" with a checkmark. Below it, another option is visible: "790 RIE Middle usage from 03/04/2023 @ 10:54 AM to 03/05/2023 @ 10:54 AM", which is highlighted in red.

Figure 8.41: Adjustment requests charge selection

Chapter 8 Requests

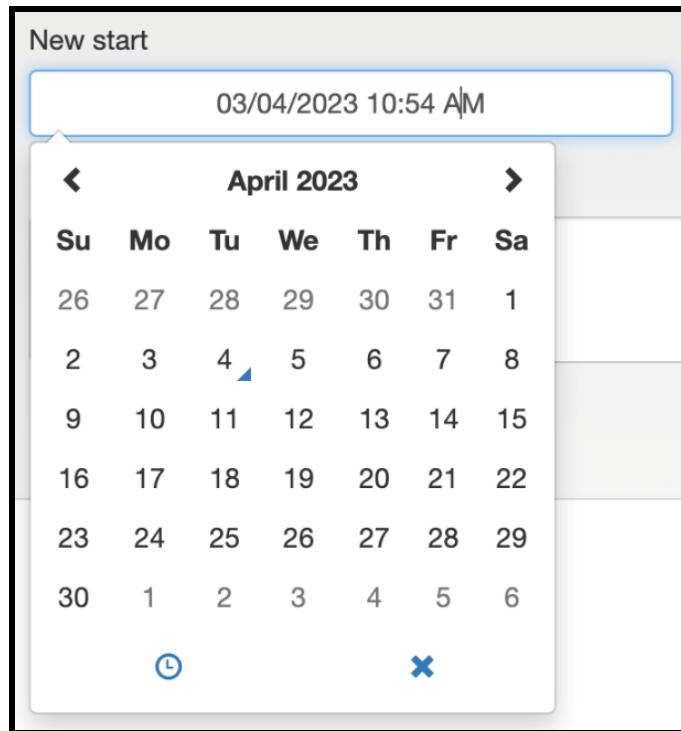

- If a charge is selected, the user will have the option to change the start and end date and time (Figure 8.42).

The image shows a form with two text input fields. The first field is labeled 'New start' and contains the text '03/04/2023 10:54 AM'. The second field is labeled 'New end' and contains the text '03/05/2023 10:54 AM'.

Figure 8.42: Adjustment requests start and end date and time

- Click in the New start text field and pick the new start date and time on the calendar pop-up, or leave it as-is (Figure 8.43).

The image shows the 'New start' text field with the text '03/04/2023 10:54 AM'. A calendar pop-up is displayed below the text field, showing the month of April 2023. The calendar has a grid of days from Sunday to Saturday. The date '03/04/2023 10:54 AM' is highlighted in the text field. The calendar pop-up has a blue clock icon at the bottom left and a blue 'X' icon at the bottom right.

Figure 8.43: Adjustment requests new start date and time

Chapter 8 Requests

- Click in the New end text field and pick the new end date and time on the calendar pop-up, or leave it as-is (Figure 8.44).

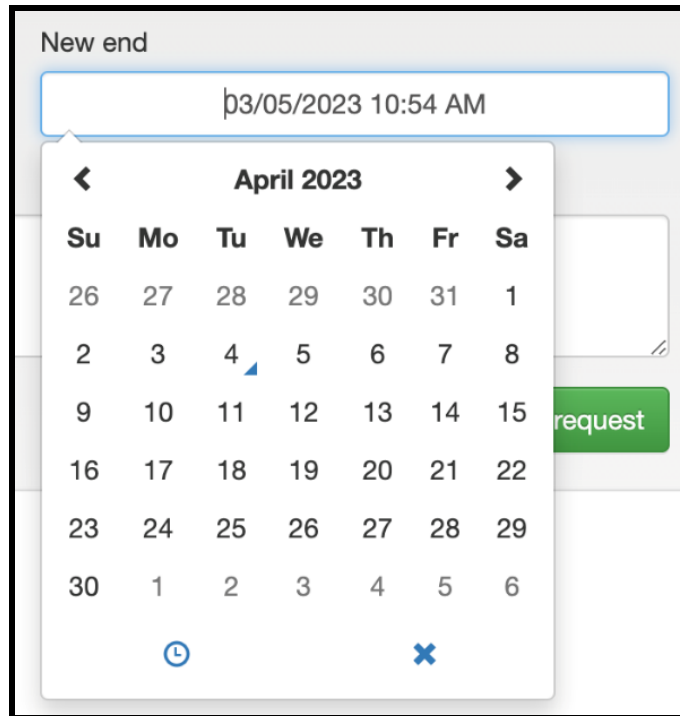

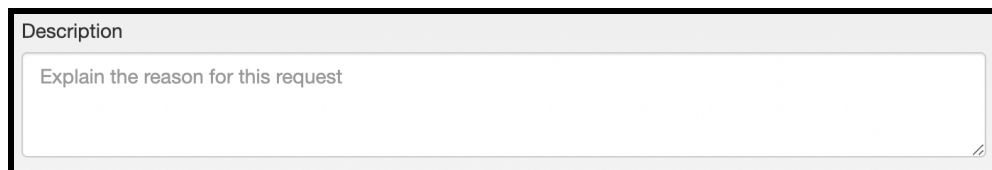

Figure 8.44: Adjustment requests new end date and time

- Enter a description that includes details the facility manager would need to know about your request (Figure 8.45).

The image shows a text input field labeled 'Description'. The field contains the placeholder text 'Explain the reason for this request'. The field is outlined with a black border and has a small icon in the bottom right corner.

Figure 8.45: Adjustment requests description

Chapter 8 Requests

- Click the Create adjustment request button (Figure 8.46).

Figure 8.46: *Adjustment requests create request button*

- Your request will be created, and the page will return to the adjustment requests page.
- The user and facility managers will receive an email confirmation that the request was received. Additionally, facility managers will see a notification icon next to requests menu on the navigation bar (Figure 8.47).

Figure 8.47: *Requests navigation bar notification*

8.3.2.3 Edit or delete your request

- Only the owner of a request can edit or delete the request.
- Once the status is approved, or denied, the request can't be edited or deleted.
- Click the edit button to edit the request (Figure 8.48).

Figure 8.48: *Adjustment requests edit request button*

Chapter 8 Requests

- All the fields entered to create the request can be edited.
- Click save changes when finished (Figure 8.49).

Figure 8.49: *Adjustment requests save changes button*

- The user and facility managers will receive an email notification that the request was updated as well as a notification icon.
- Click the delete button to delete the request (Figure 8.50).

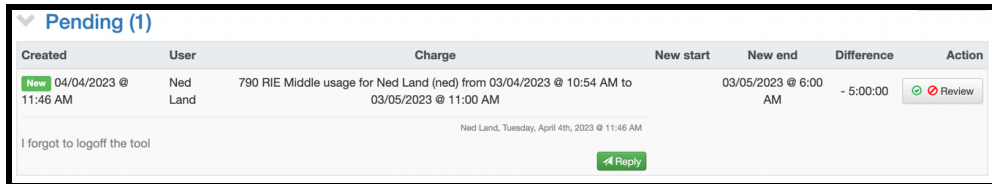

Figure 8.50: *Adjustment requests delete request button*

- A confirmation message will popup asking you to confirm the action before the request is deleted.

Chapter 8 Requests

8.3.2.4 Reply/Approve/deny requests (Facility managers only)

- Find a pending request (Figure 8.51).

The screenshot shows a table with the following data:

Created	User	Charge	New start	New end	Difference	Action
New 04/04/2023 @ 11:46 AM	Ned Land	790 RIE Middle usage for Ned Land (ned) from 03/04/2023 @ 10:54 AM to 03/05/2023 @ 11:00 AM		03/05/2023 @ 6:00 AM	- 5:00:00	Review

Below the table, there is a message: "I forgot to logoff the tool" and a "Reply" button.

Figure 8.51: Adjustment requests pending

- [Optional] Click the reply button to start a conversation with the user prior to reviewing the request (Figure 8.52).

Figure 8.52: Adjustment requests reply button

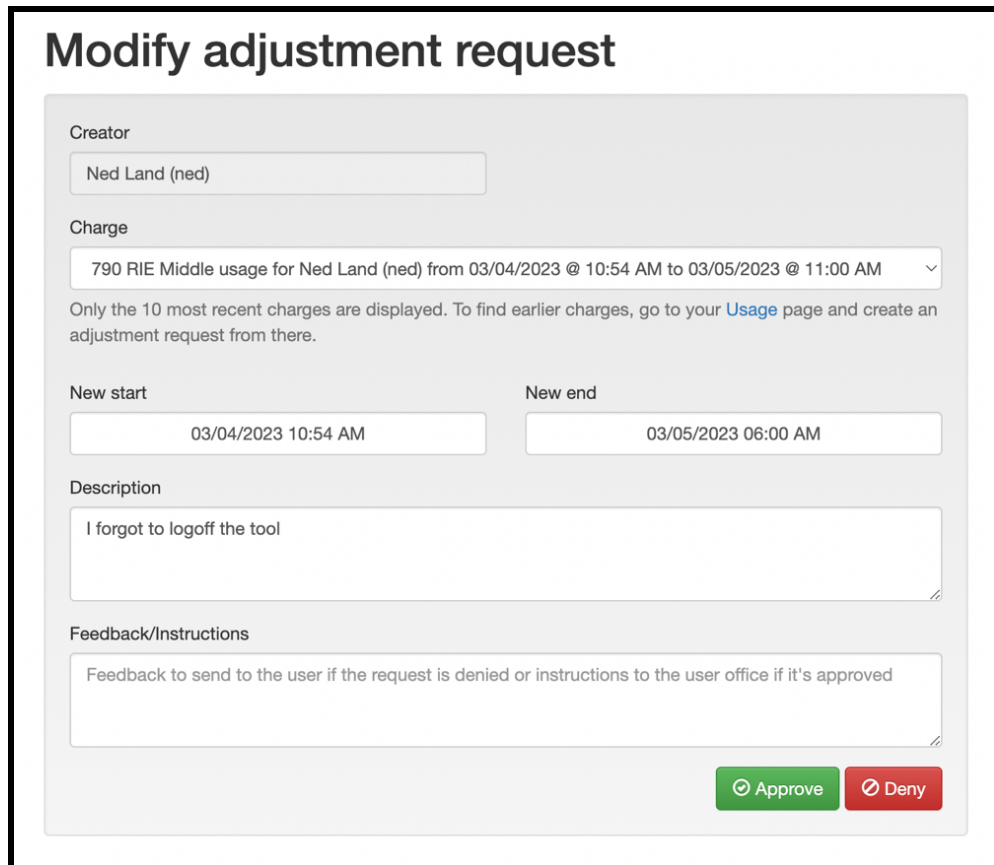

- To approve/deny a request, click the review button (Figure 8.53).

Figure 8.53: Adjustment requests approve deny button

Chapter 8 Requests

- Edit any field of the adjustment request. An addition field is provided for additional feedback/instructions (sent to the user if the request is denied, sent to the user office if the request is approved) (Figure 8.54).

The screenshot shows a web form titled "Modify adjustment request". The form contains several fields: "Creator" with the value "Ned Land (ned)"; "Charge" with a dropdown menu showing "790 RIE Middle usage for Ned Land (ned) from 03/04/2023 @ 10:54 AM to 03/05/2023 @ 11:00 AM"; "New start" with the value "03/04/2023 10:54 AM"; "New end" with the value "03/05/2023 06:00 AM"; "Description" with the text "I forgot to logoff the tool"; and "Feedback/Instructions" with the text "Feedback to send to the user if the request is denied or instructions to the user office if it's approved". At the bottom right of the form are two buttons: a green "Approve" button and a red "Deny" button.

Figure 8.54: Adjustment requests approve/deny dialog

- Click approve or deny (Figure 8.55).

Figure 8.55: Adjustment requests approve/deny buttons

Chapter 8 Requests

- A confirmation dialog will ask to confirm the choice. Upon confirmation, the user will be redirected to the adjustment requests page.
- The user and facility managers will receive an email confirmation of the changes and of the new status of the request.
- Upon approval, an additional email will be sent to the User Office containing the details of the request as well as the additional instructions if provided.

8.3.2.5 Adjust charge (Reviewers only)

- If enabled in Customization, charges can be adjusted directly in NEMO by the reviewers. This can be done when reviewing the adjustment request by clicking the “Approve and adjust” button (Figure 8.56) or from the list of approved adjustment requests by clicking the “Adjust charge” button (Figure 8.59).

Figure 8.56: *Adjustment requests adjust charge review button*

Figure 8.57: *Adjustment requests adjust charge button*

8.3.2.6 Mark as applied (Reviewers and User office only)

- Find an approved request (Figure 8.58).

Chapter 8 Requests

Approved						
Created	User	Charge	New start	New end	Difference	Approved by
01/22/2023 @ 12:35 PM	Ned Land	790 RIE Middle usage for Ned Land (ned) from 01/20/2023 @ 6:54 PM to 01/21/2023 @ 2:00 PM		01/21/2023 @ 1:00 PM	- 1:00:00	Captain Nemo <input checked="" type="checkbox"/> Mark as applied

I forgot to logoff the tool

Ned Land, Sunday, January 22nd, 2023 @ 12:35 PM

Figure 8.58: *Adjustment requests approved*

Chapter 8 Requests

- Click the “Mark as applied” button to mark the adjustment as applied (Figure 8.59). This is particularly useful if the adjustment was made outside of NEMO, to keep track of it here.

Figure 8.59: Adjustment requests mark as applied button

8.3.3 Mobile device adjustment requests page

There are no mobile device views for the adjustment requests page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

8.3.4 Adjustment requests page customizations

The tab title, description, maximum requests to display and weekend access details can be set in Customization → Adjustment requests settings, see subsection 40.18.2.

Additionally, facility managers can limit tools for which they receive adjustment requests notifications, in User Preferences → Adjustment requests, see subsection 19.1.5.

CHAPTER 9

Jumbotron

The jumbotron is similar to the status dashboard but provides an integrated page to display user occupancy, tools in use, and any alerts or outages (Figure 9.1).

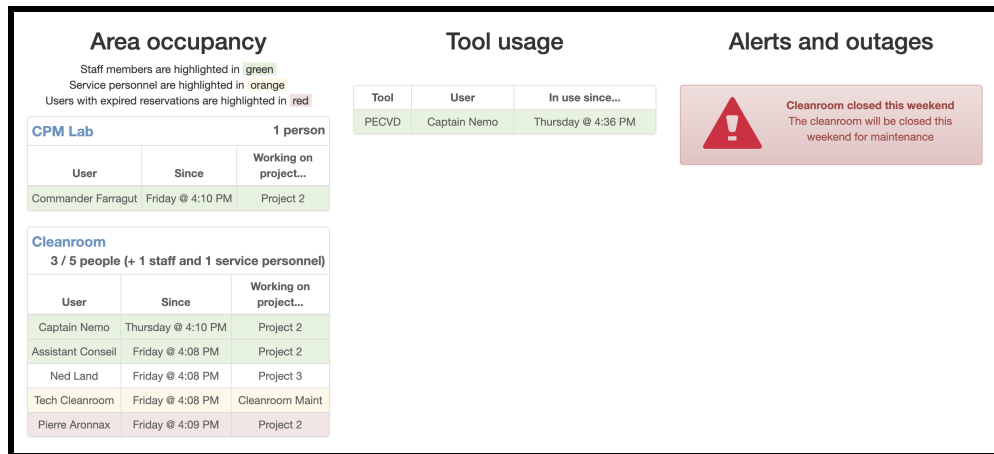

Figure 9.1: Jumbotron display

Chapter 9 Jumbotron

9.1 Usage

The intent of this page is to run continuously on a monitor.

- Area occupancy information will only be displayed if areas have been defined.
 - This section shows all users that are currently logged into all areas. Staff members are highlighted in green and service personnel are highlighted in orange, so they stand out. Each area will list the number of people in the area if it is greater than 1. Staff and service personnel are listed separately if the area is configured not to include them in the occupancy count.
 - When area reservations are in use, users with expired reservations are highlighted in red.
- Tool usage information will only be displayed if tools have been defined.
- Alerts and outages are only displayed if any are present (Figure 9.2).
- An optional watermark can be used on the page to highlight the lab.

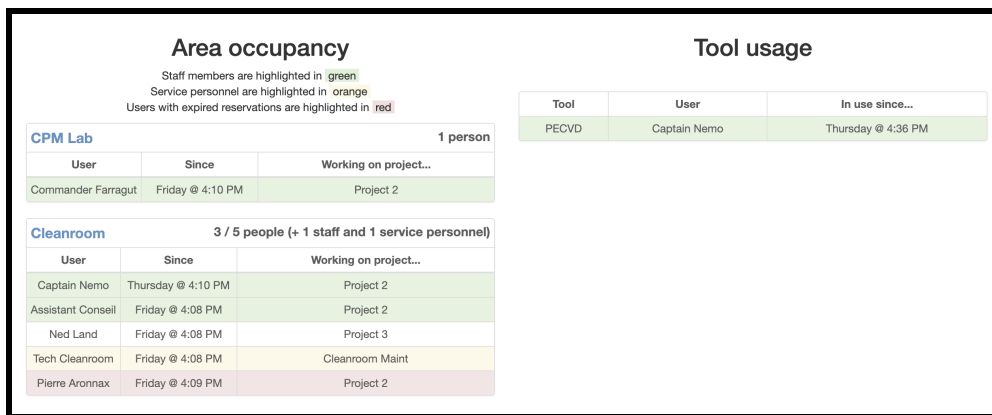

Figure 9.2: Jumbotron with no alerts or outages

Chapter 9 Jumbotron

If there is no area occupancy or tool usage, then not-in-use messages are displayed (Figure 9.3).

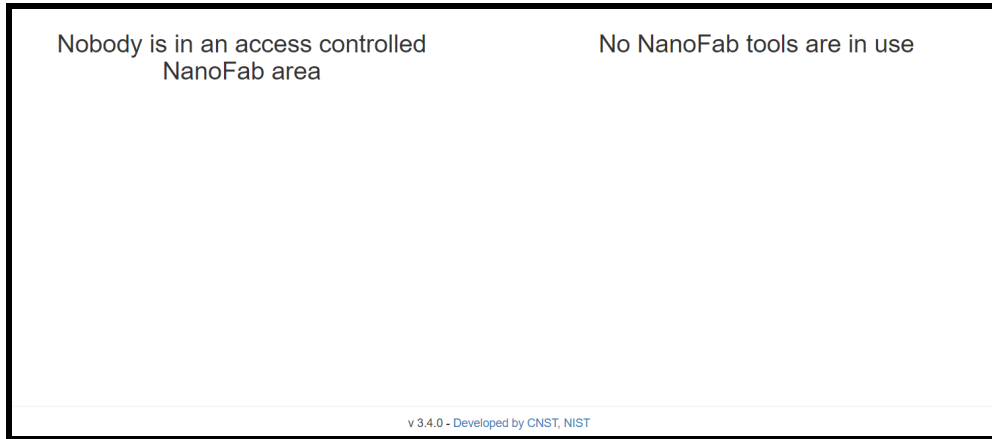

Figure 9.3: *Jumbotron not in use messages*

The page automatically refreshes periodically to keep the information current. If NEMO has gone offline and does not respond to a refresh request, the page will display “NEMO is offline” (Figure 9.4).

Figure 9.4: *Jumbotron NEMO offline*

Chapter 9 Jumbotron

9.2 Web address

The jumbotron page is accessible at `site-address/jumbotron/`. The page is not accessible from the navigation bar and must be either directly addressed or have a quick link created in the landing page.

9.3 Mobile device jumbotron

There are no mobile device views for the jumbotron page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

9.4 Jumbotron customizations

9.4.1 Background watermark

The jumbotron can display a background watermark image. The jumbotron watermark is configured through the Customizations → Jumbotron watermark, see subsection [40.5.6](#).

9.4.2 Jumbotron refresh rate

The jumbotron page automatically refreshes every 10 seconds which updates the current area occupancy, tool usage information, alerts, and outages. To change the update interval, edit the `jumbotron.html` and change the `setInterval` constant (in milliseconds) in the `on_load` function.

CHAPTER 10

Safety items

The Safety items page provides safety information for users (Figure 10.1). Safety items and safety categories can be added in Detailed administration → Safety items (see section 42.43) and Detailed administration → Safety categories (see section 42.41), respectively.

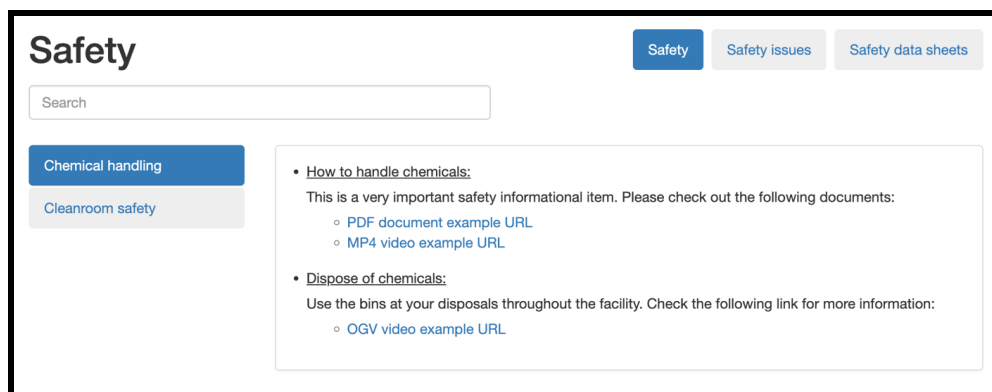

Figure 10.1: *Safety items page*

Chapter 10 Safety items

10.1 Usage

Click on categories on the left-hand side to see Safety items related to that category (Figure 10.2).

Figure 10.2: *Safety items categories menu*

When looking at safety items, click on the document links to open a popup (Figure 10.3).

Figure 10.3: *Safety items open link*

Chapter 10 Safety items

PDF and Video formats (.mp4, .ogv, .webm, .3gp) will be played directly in the popup (Figure 10.4, Figure 10.5).

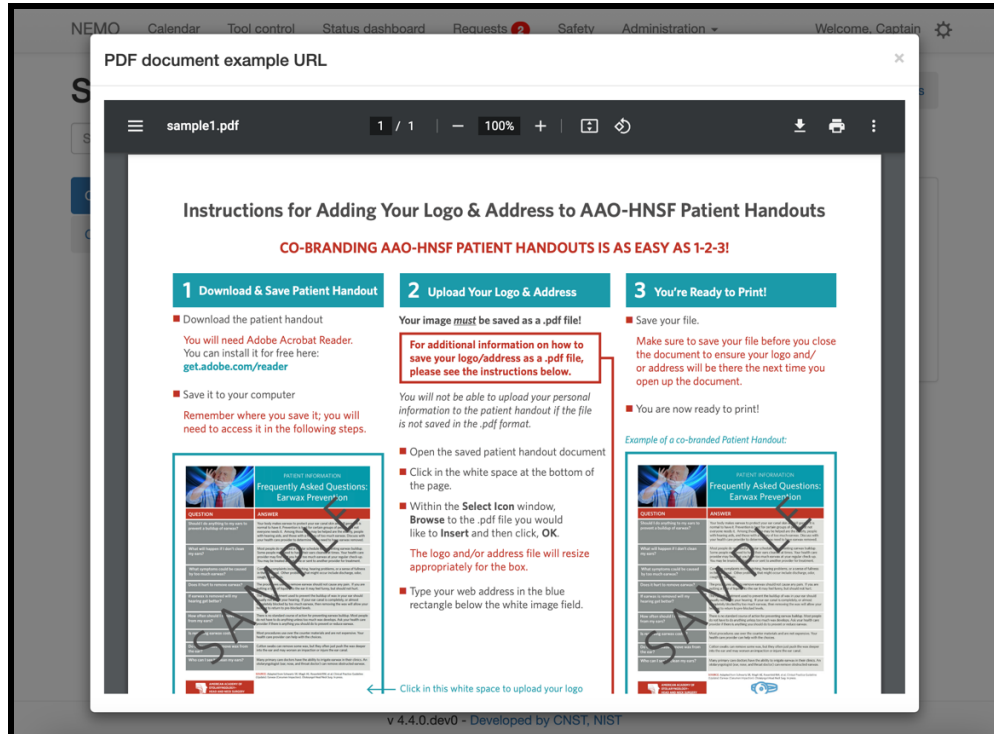

Figure 10.4: Safety items PDF popup

Chapter 10 Safety items

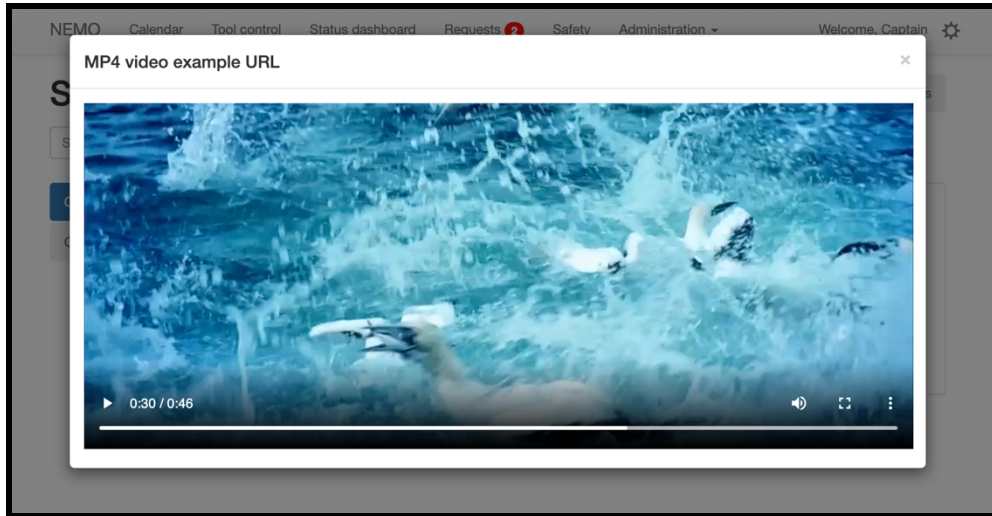

Figure 10.5: *Safety items Video popup*

Other links will initiate a download if the target is a file or redirect the user if the link is a URL (Figure 10.6).

o [Entering a cleanroom](#)

Figure 10.6: *Safety items redirect link*

10.2 Web address

The safety items page is accessible at site-address/safety/. The page is accessible from the navigation bar by clicking the Safety menu item.

10.3 Mobile device safety items page

There are no mobile device views for the safety issues page however, as the page size is reduced, the headings are stacked, and all information is viewable

Chapter 10 Safety items

by scrolling.

10.4 Safety items customizations

By going to Customization → Safety (see section [40.12](#)), you can customize:

- Whether the Safety menu is displayed.
- Whether the Safety items is displayed as a tab.
- Which Safety category view is used (all in one page, or separate on a side menu)

CHAPTER 11

Safety issues

The safety issues page provides users a method to report and view non-emergency issues in the lab and gives staff a method to document progress and resolutions (Figure 11.1). If a user reports a problem with a tool and checks that the problem is also a safety hazard, as described in the Tool control → Report a problem section 6.8, a new safety issue will automatically be created here. Users and staff can see current issues and look at closed issues.

Chapter 11 Safety issues

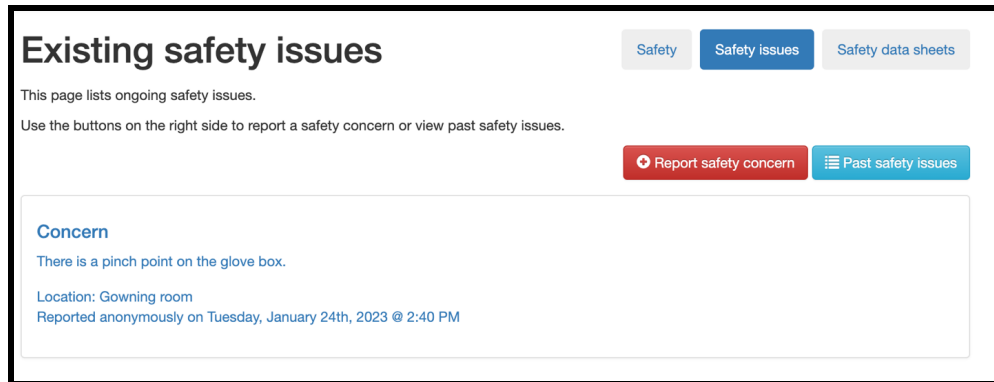

Figure 11.1: *Safety issues page*

11.1 Safety message

NEMO has a default safety message displayed at the top of the safety issues page. It can be customized to specific lab requirements (Figure 11.2). A customized html safety message can be loaded into NEMO through the Customizations → Safety introduction message.

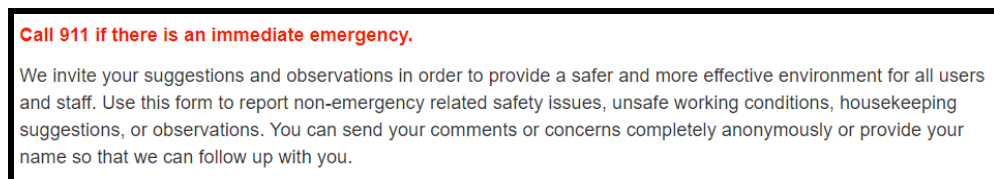

Figure 11.2: *Safety issues page default safety message*

Chapter 11 Safety issues

11.2 View resolved safety issues

Safety issues that have been closed can be accessed by clicking the view past safety issues button (Figure 11.3).

Figure 11.3: *Safety issues past issues link*

Clicking the link will open the resolved safety issues page (Figure 11.4).

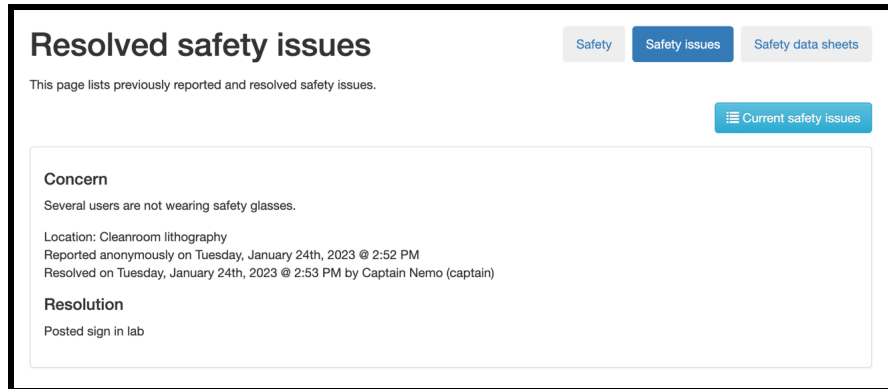

Figure 11.4: *Safety issues resolved issues page*

All resolved issues will be listed with the most recent resolution listed first. If there are not any resolved safety issues to list, the user will be notified with “There are no past issues.”

Clicking the current safety issues button will return to the main safety page (Figure 11.5).

Figure 11.5: *Safety issues return to main page*

Chapter 11 Safety issues

11.3 Report a new safety issue

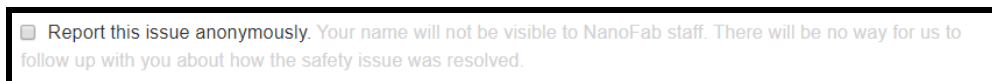

New safety issues can be created by any user or staff member. To report a new safety issue, provide a location and a description of your concern (Figure 11.6).

The screenshot shows a web form titled "Report a new safety issue". It contains two input fields: "Where is the problem?" and "Why are you concerned?". Below these fields is a checkbox labeled "Report this issue anonymously. Your name will not be visible to NanoFab staff. There will be no way for us to follow up with you about how the safety issue was resolved." At the bottom of the form is a red button labeled "Report a new safety concern".

Figure 11.6: *Safety issues report new issue*

Users can select to report issues anonymously if desired and their name will not be recorded with the report (Figure 11.7). However, the staff will not be able to follow up directly with the user about the problem or how it was resolved.

This is a close-up of the checkbox from Figure 11.6. The text next to the checkbox reads: "Report this issue anonymously. Your name will not be visible to NanoFab staff. There will be no way for us to follow up with you about how the safety issue was resolved."

Figure 11.7: *Safety issues report new issue anonymously*

Once all information is correct, click the report button (Figure 11.8).

This is a close-up of the red button from Figure 11.6. The text on the button is "Report a new safety concern".

Figure 11.8: *Safety issues issue report button*

Chapter 11 Safety issues

Upon clicking the report button NEMO will:

- Create a new safety issue in the safety issues table of the database as discussed in the Detailed administration → Safety Issues section [42.42](#).
- Send an email to the safety email address using the safety email template. If either are missing, no email will be sent. Safety email address and email template are detailed in the Customization section [40.12](#).
- Upon success, a confirmation message will appear to verify that the safety issue was received and recorded (Figure [11.9](#)).

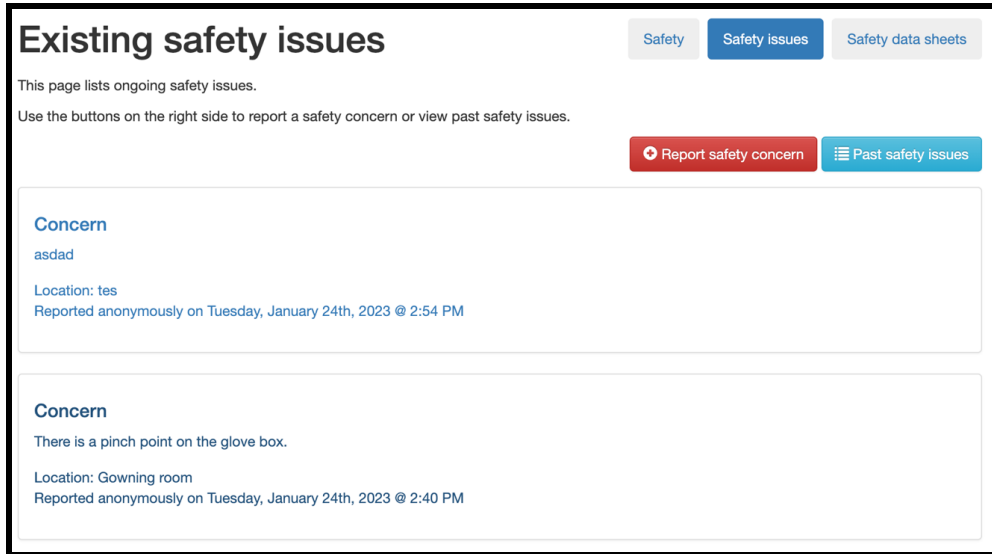

Figure 11.9: *Safety issues report confirmation*

Chapter 11 Safety issues

11.4 View open safety issues

All open safety issues are listed at the bottom of the page (Figure 11.10).

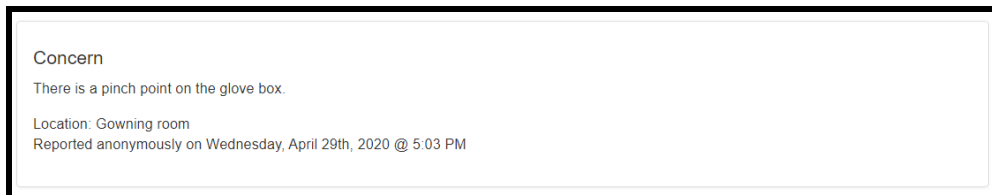

The screenshot shows a web interface titled "Existing safety issues". At the top right, there are three tabs: "Safety", "Safety issues" (which is active), and "Safety data sheets". Below the title, there is a brief instruction: "This page lists ongoing safety issues. Use the buttons on the right side to report a safety concern or view past safety issues." To the right of this text are two buttons: a red button with a plus icon labeled "Report safety concern" and a blue button with a list icon labeled "Past safety issues". Below these are two entries for safety concerns. Each entry starts with the word "Concern" in blue, followed by a description, the location, and the time and date of reporting.

Concern
asdad Location: tes Reported anonymously on Tuesday, January 24th, 2023 @ 2:54 PM
There is a pinch point on the glove box. Location: Gowning room Reported anonymously on Tuesday, January 24th, 2023 @ 2:40 PM

Figure 11.10: Safety issues open issues

11.4.1 User view

Each concern will list a description, location, the time and date (Figure 11.11).

The screenshot shows a single safety concern entry in a user view. It includes the title "Concern", a description "There is a pinch point on the glove box.", the location "Gowning room", and the reporting time and date "Reported anonymously on Wednesday, April 29th, 2020 @ 5:03 PM".

Concern
There is a pinch point on the glove box. Location: Gowning room Reported anonymously on Wednesday, April 29th, 2020 @ 5:03 PM

Figure 11.11: Safety issues open issue user view

Chapter 11 Safety issues

11.4.2 Staff view

The staff view will list a description, location, the time and date, and the user who reported the concern (Figure 11.12). In addition, staff can update a concern by clicking anywhere in the listing box.

Figure 11.12: *Safety issues open issue staff view*

11.4.3 Hidden issues

Some issues may be hidden from users however staff will still be able to view them (Figure 11.13). Issues hidden from users are notated.

Figure 11.13: *Safety issues issue hidden from user view*

Chapter 11 Safety issues

11.4.4 Automatic safety issues

If a safety issue was created automatically with a tool problem report, it will say so (Figure 11.14).

Figure 11.14: *Safety issues report created by tool problem report*

11.4.5 Progress

If a safety has an update but has not been resolved, it will have a progress section that lists the progress made so far (Figure 11.15).

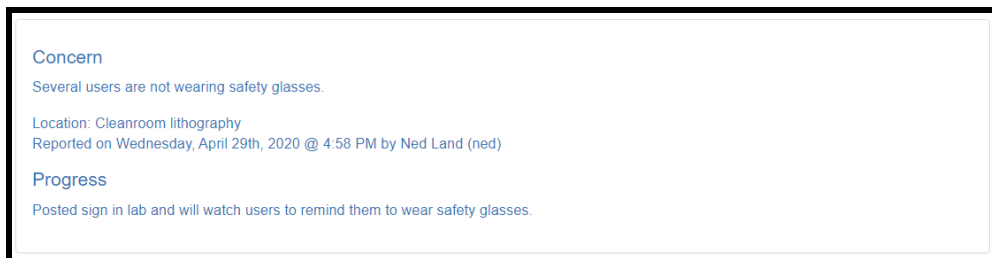

Figure 11.15: *Safety issues issue showing progress*

Chapter 11 Safety issues

11.5 Resolve or update a safety issue (staff only)

Staff can resolve an open issue or make progress updates. Clicking anywhere in a concern box will open the update page (Figure 11.16). The update page has check boxes to resolve an issue and hide an issue, a dialog box to enter information, save and abandon update buttons, and a listing of all information to date.

Update a safety issue Safety Safety issues Safety data sheets

This issue has been resolved
 This issue is visible to users

Provide an update on how this safety issue is being handled or resolved.

Save update

Concern
There is a pinch point on the glove box.
Location: Gowning room
Reported anonymously on Tuesday, January 24th, 2023 @ 2:40 PM

Figure 11.16: *Safety issues issue update page*

If this is the final update and the issue will be closed, check the issue resolved checkbox (Figure 11.17).

This issue has been resolved

Figure 11.17: *Safety issues update issue resolved checkbox*

Chapter 11 Safety issues

All issues are visible to users by default, if an issue needs to be hidden from users, uncheck the visible to users' checkbox (Figure 11.18).

Figure 11.18: *Safety issues update issue visible checkbox*

Enter a detailed narrative or the progress to date or the final resolution (Figure 11.19).

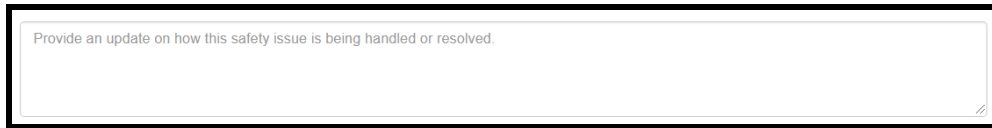

A rectangular text input field with a black border. Inside the field, there is a light gray placeholder text that reads "Provide an update on how this safety issue is being handled or resolved." The field is currently empty.

Figure 11.19: *Safety issues update narrative dialog box*

To save, click the save update button (Figure 11.20). After clicking save, the main safety issues page is opened.

Figure 11.20: *Safety issues update save button*

Chapter 11 Safety issues

11.6 Notifications (staff only)

When safety alerts are created, the notification status is set for staff members. It automatically expires after one month. If a user accesses a page with a notification within that time, there will be a notification indicating new content since their last visit. The safety notifications are reset upon visiting the safety page. Notifications are detailed in the Detailed administration → Notifications section [42.31](#).

If the safety issues page has a link on the landing page, a red number that represents the number of new safety issues reported since the user last visited the safety page will appear to the right of the link name (Figure [11.21](#)). Setup details can be found under the Detailed administration → Landing page choices section [42.28](#).

Figure 11.21: *Landing page safety issues notification*

The next time the safety issues page is visited, any new issues that have been created since the user last visited the safety issues page will have a special “new” icon to highlight the concern (Figure [11.22](#)).

Figure 11.22: *Safety issues page new issues*

Chapter 11 Safety issues

11.7 Web address

The safety issues page is accessible at site-address/safety/issues. For example, www.nemo.com/safety/issues. The page is accessible from the navigation bar under Safety.

11.8 Mobile device safety page

There are no mobile device views for the safety issues page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

11.9 Safety page customizations

Whether the Safety issues is displayed as a tab in the Safety page can be customized in Customization → Safety, see section [40.12](#).

Safety email address and email template are detailed in the Customization chapter [40](#).

A customized html safety message can be loaded into NEMO through the Customizations → Safety introduction message.

CHAPTER 12

Safety data sheets

The safety data sheet page allows users to check the required safety documentation for chemical and to quickly check which hazard apply to chemicals (Figure 12.1). Chemical hazards are managed in the Detailed administration → Chemical hazards section 42.11. Chemicals are managed in the Detailed administration → Chemicals, see section 42.12.

Chapter 12 Safety data sheets

The screenshot shows a search interface for Safety Data Sheets. At the top, there is a search input field with the placeholder text "Search for a chemical name or keyword" and a checkbox labeled "check this box to show and search through keywords". To the right is an "Export" button. Below the search bar is a row of eight hazard pictograms: Flammable, Oxidizing, Compressed gas, Corrosive, Toxic, Harmful, Health hazard, and Environment hazard. Underneath is a table with the following data:

Name	Flammable	Oxidizing	Compressed gas	Corrosive	Toxic	Harmful	Health hazard	Environment hazard
Acetylene			✓		✓			
Boron trifluoride			✓	✓				
Carbon tetrafluoride			✓					
Formaldehyde						✓		
Glycolic acid				✓			✓	

Figure 12.1: Safety data sheets

12.1 Search for a chemical

Use the search input field to type the name of a chemical. Only matching chemicals will appear in the table (Figure 12.2).

The screenshot shows the same search interface as Figure 12.1, but with the search input field containing the text "fluoride". The table below shows only the results for "fluoride":

Name	Flammable	Oxidizing	Compressed gas	Corrosive	Toxic	Harmful	Health hazard	Environment hazard
Boron trifluoride			✓	✓				
Carbon tetrafluoride			✓					

Figure 12.2: Safety data sheets search

Chapter 12 Safety data sheets

Keywords can be shown and included in the search by checking the checkbox (Figure 12.3, Figure 12.4).

check this box to show and search through keywords

Figure 12.3: Safety data sheets keywords checkbox

Safety data sheets

etha check this box to show and search through keywords

Name	Flammable	Oxidizing	Compressed gas	Corrosive	Toxic	Harmful	Health hazard	Environment hazard	Keywords
Carbon tetrafluoride			✓						Tetrafluoromethane, Perfluoromethane, Freon 14, Halon 14, Arcton 0, CFC 14, PFC 14, R 14
Glycolic acid				✓			✓		Hydroxyacetic acid, 2-Hydroxyethanoic acid

Figure 12.4: Safety data sheets keywords search

Chapter 12 Safety data sheets

12.2 Document/URL

The specific chemical document/link can be view when available by click on the chemical name. A new tab will open in your web browser with the link or download the document (Figure 12.5).

Figure 12.5: *Safety data sheets chemical document link*

12.3 Export Safety data sheets

Safety data sheets can be exported into a CSV file for further processing, filtering, and sorting. Click the export button to download the file (Figure 12.6).

Figure 12.6: *Safety data sheets export*

12.4 Web address

The safety data sheets page is accessible at `site-address/safety_data_sheets/`. The page is accessible from the navigation bar under Safety.

12.5 Mobile device news and events page

There are no mobile device views for the safety data sheets page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

Chapter 12 Safety data sheets

12.6 Safety data sheets customizations

Whether the Safety data sheet is displayed as a tab in the Safety page and whether the search through keywords is enabled by default can be customized in Customization → Safety, see section [40.12](#).

CHAPTER 13

KnowledgeBase

The Knowledge base page provides information for users and staff (Figure 13.1). Knowledge base items and categories can be added for users and staff in Detailed administration → User knowledge base items (see section 42.65), Detailed administration → User knowledge base categories (see section 42.64), Detailed administration → Staff knowledge base items (see section 42.53), Detailed administration → Staff knowledge base categories (see section 42.52).

Chapter 13 KnowledgeBase

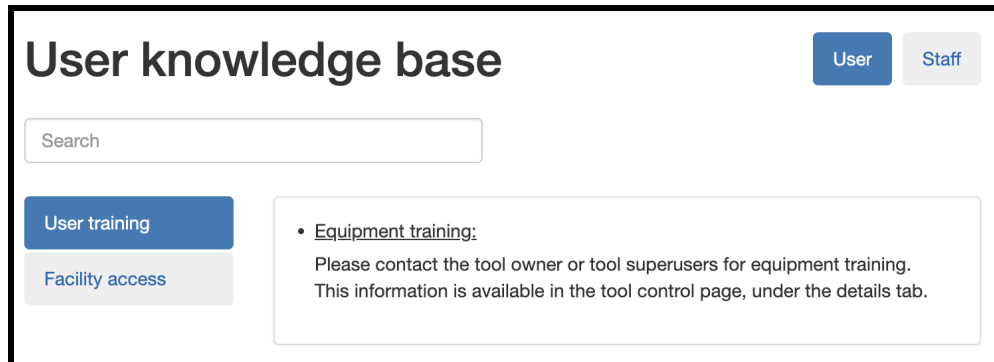

Figure 13.1: Knowledge base page

13.1 Usage

Click on categories on the left-hand side to see knowledge base items related to that category (Figure 13.2).

Figure 13.2: Knowledge base categories menu

When looking at knowledge base items, clicking on the document links will open a popup. PDF and Video formats (.mp4, .ogv, .webm, .3gp) will be shown or played directly in the popup.

Other links will initiate a download if the target is a file or redirect the user if the link is a URL.

Chapter 13 KnowledgeBase

13.2 Web address

The Knowledge base page is accessible at site-address/knowledge_base/. For staff member, the page is accessible from the Administration menu item.

For regular user, a Landing page choice needs to be added with the URL “/knowledge_base/user”.

13.3 Mobile device knowledge base page

There are no mobile device views for the knowledge base page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

13.4 Knowledge base customizations

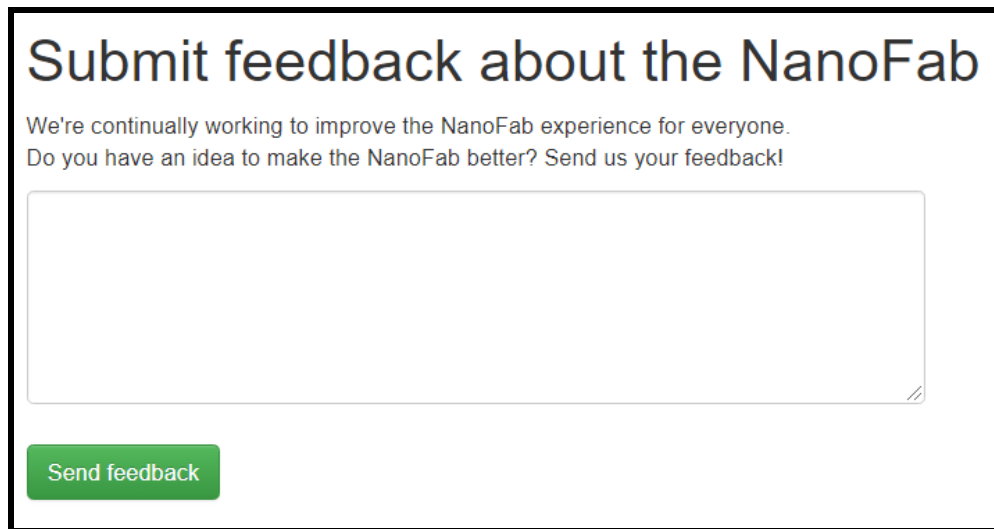

By going to Customization → Knowledge base (see section 40.7), you can customize:

- Which category view is used for users knowledge base (all in one page, or separate on a side menu)
- Which category view is used for staff knowledge base (all in one page, or separate on a side menu)

CHAPTER 14

Send feedback

The send feedback provides users a dialog to send general comments and suggestions to staff that are not safety related (Figure 14.1).

The image shows a dialog box titled "Submit feedback about the NanoFab". Below the title, there is a short paragraph: "We're continually working to improve the NanoFab experience for everyone. Do you have an idea to make the NanoFab better? Send us your feedback!". Underneath this text is a large, empty text input field with a small cursor icon in the bottom right corner. At the bottom left of the dialog box is a green button with the text "Send feedback".

Figure 14.1: *Send feedback page*

Chapter 14 Send feedback

If either the email address or email template have not been configured, a warning message the feature has not been customized will be displayed instead of the feedback page (Figure 14.2). Configuration is detailed in the Customization section.

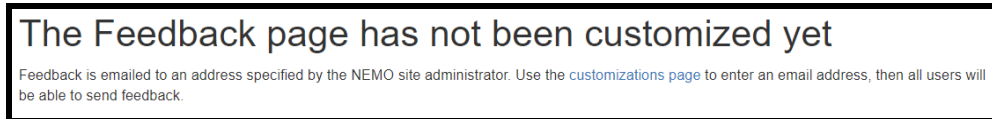

Figure 14.2: *Send feedback not configured*

14.1 Usage

To send user feedback:

- Provide a detailed narrative in the dialog box (Figure 14.3).

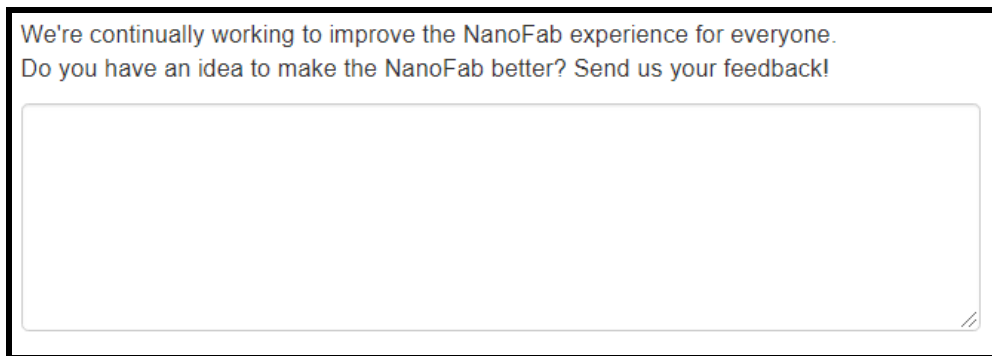

Figure 14.3: *Feedback dialog box*

Chapter 14 Send feedback

- Click the send feedback button (Figure 14.4).

Figure 14.4: *Feedback send button*

- The dialog is checked for size. If the dialog is empty, the user is prompted to add information (Figure 14.5).

Figure 14.5: *Feedback empty dialog prompt*

- If the dialog is too long, it is truncated without warning.
- Feedback is sent to the configured feedback email address using the configured email template.

14.2 Web address

The send feedback page is accessible at `site-address/feedback/`. The page is not accessible from the navigation bar and must be either directly addressed or have a quick link created in the landing page.

14.3 Mobile device send feedback page

There are no mobile device views for the send feedback page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

Chapter 14 Send feedback

14.4 Send feedback page customizations

14.4.1 Feedback email address and email template

Safety email address and email template are detailed in the Customization section.

14.5 Feedback message length

The maximum length of the feedback message is 5000 characters and can be changed in the constants.py file.

CHAPTER 15

Contact staff

The contact staff page can be used to provide information to help users get in touch with staff members (Figure [15.1](#)). Contact information can be grouped into categories and the displayed in any order. Contacts are managed in the Detailed administration → Contact information, see section [42.20](#).

15.1 Fields

Each contact can have the following information. Any optional fields that are left blank will not be displayed.

- Picture (optional) – pictures are automatically resized to 266 pixels high by 200 pixels wide and can be any common picture format such as png, tiff, jpg, etc.
- Name (required) – contact first and last name.

Chapter 15 Contact staff

- Email (optional) – any valid email address. The email address is displayed as a link to send email.
- Office phone (optional) – any valid phone number. The phone number is displayed as a link to make a call on a mobile device.
- Mobile phone (optional) – any valid phone number. The phone number is displayed as a link to make a call on a mobile device. In addition, a link to send a text message from a mobile device can be enabled.
- Office location (required) – description to find the contact, limited to 200 characters.

The contact staff page is accessible at site-address/contact_staff/. The page is not accessible from the navigation bar and must be either directly addressed or have a quick link created in the landing page.

15.3 Mobile device contact staff page

There are no mobile device views for the contact staff page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

15.4 Contact staff page customizations

There are no contact staff page customizations

CHAPTER 16

View usage

The view usage page allows a user to review all records for a selectable period (Figure 16.1). When the page is first opened, it displays any records for the current month.

The screenshot shows a web interface for viewing usage and billing information. At the top, it says "Usage and billing information between August 1st, 2020 and August 31st, 2020". Below this is a sub-header: "This page presents a monthly report of your NanoFab usage and billing information. Approved adjustments are reflected in the billing information data but not in the usage data." The main form area includes a "Select month" dropdown menu currently set to "August, 2020". Below this are two date input fields: "or from" with "08/01/2020" and "to" with "08/31/2020". To the right of these fields are two buttons: a green "Update" button and a blue "Export" button. Below the form, there are two tabs: "Usage" (which is active) and "Billing Information". A note states: "Adjustment activities are not included in the usage information." At the bottom, a message reads: "There was no usage between August 1st, 2020 and August 31st, 2020."

Figure 16.1: *View usage and billing*

Chapter 16 View usage

16.1 Select date range

The date range may be selected from either the select month dropdown (Figure 16.2) or entered in the from and to dialogs. Clicking the from or to dialog will open a calendar view to select the dates (Figure 16.3).

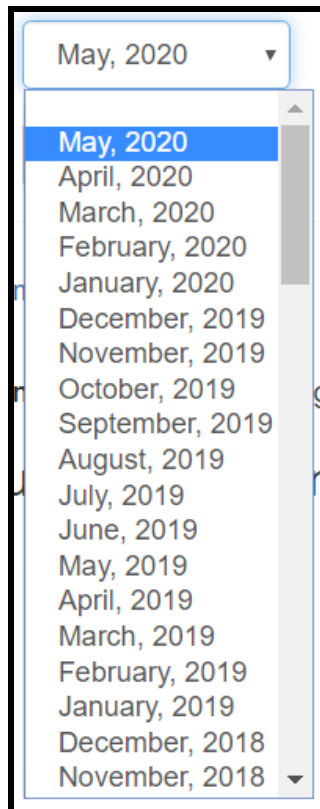

Figure 16.2: Usage month dropdown

Chapter 16 View usage

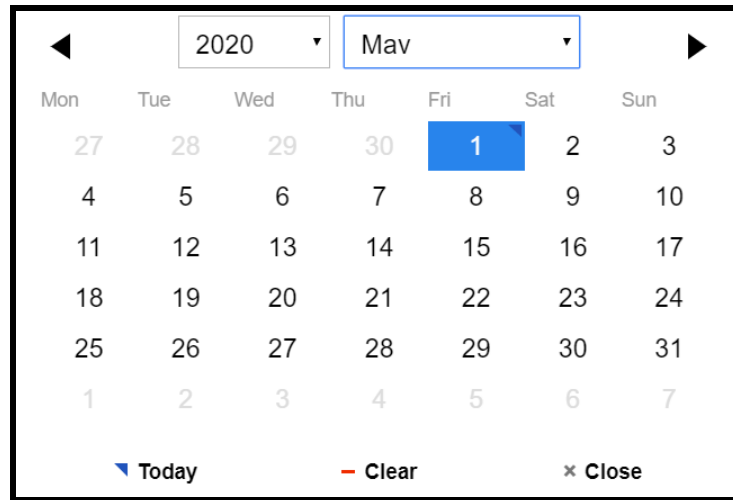

Figure 16.3: Usage date selection

Click update to search for records in the selected date range (Figure 16.4).

Figure 16.4: Usage date update

Chapter 16 View usage

16.2 Select project

If users have more than one active projects, they can select one in the dropdown (Figure 16.5). Upon clicking update, all their activities on that project will be displayed.

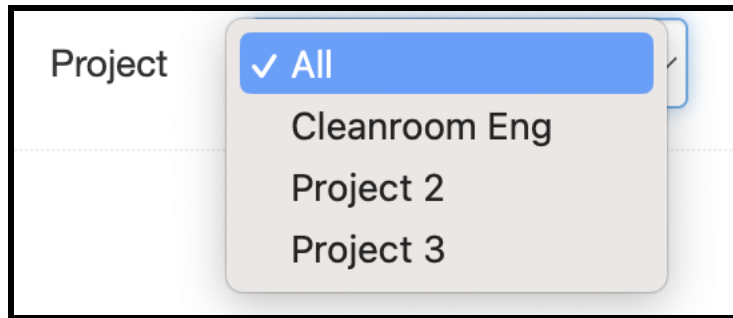

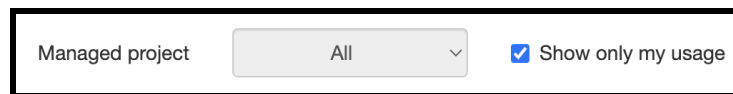

Figure 16.5: *View usage select project*

Chapter 16 View usage

16.3 Select managed project (for Principal Investigators only)

Principal Investigators can uncheck the “Show only my usage” box to select a project they managed in the dropdown (Figure 16.6). Upon clicking update, all the activities for that project will be displayed, regardless of the user being billed. This allows PIs to check their project’s users activities for example.

The image shows a user interface element for selecting a project. It consists of a label 'Managed project' followed by a dropdown menu currently displaying 'All' with a downward arrow. To the right of the dropdown is a checkbox labeled 'Show only my usage', which is currently checked.

Figure 16.6: *View usage select managed project*

Chapter 16 View usage

16.4 Usage

The usage tab will display usage data for the selected period (Figure 16.7). Clicking 'Usage' will highlight and activate the tab.

Figure 16.7: *View usage, usage tab*

If no usage records exist for a given period, it is indicated. If usage records exist, they are categorized in the following order:

- Missed reservations – the tool, date, time, and project information are provided (Figure 16.8).

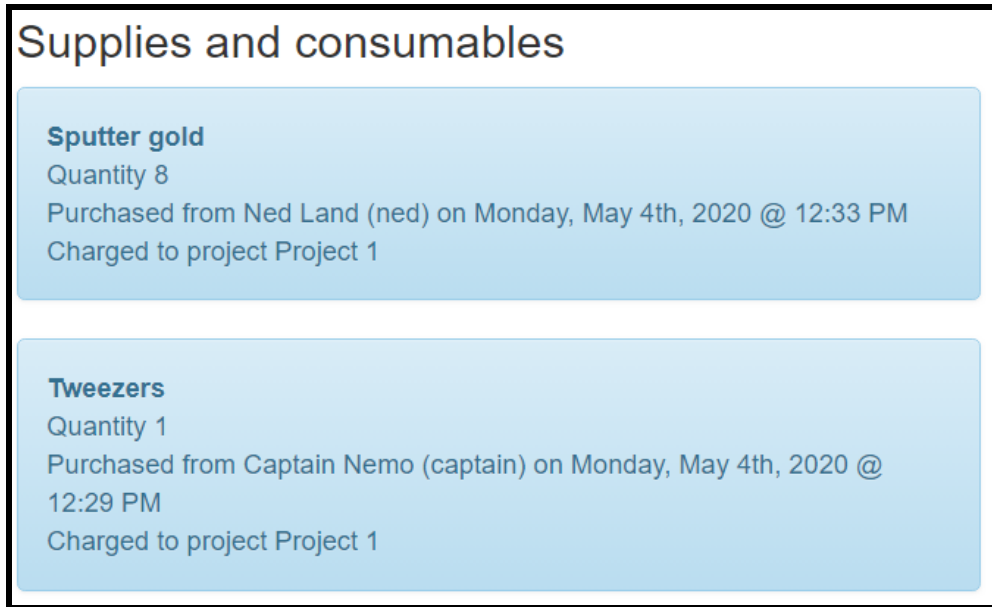

Figure 16.8: *View usage missed reservations*

Chapter 16 View usage

- Supplies and consumables – the supply, quantity, seller, date, time, and project are provided (Figure 16.9). If the supply is related to a tool usage charge, the user will also be the seller.

The screenshot displays a list of supplies and consumables within a light blue bordered box. The title 'Supplies and consumables' is at the top. Below it are two entries, each in a light blue rounded rectangle. The first entry is for 'Sputter gold', with a quantity of 8, purchased from 'Ned Land (ned)' on Monday, May 4th, 2020 at 12:33 PM, and charged to 'Project 1'. The second entry is for 'Tweezers', with a quantity of 1, purchased from 'Captain Nemo (captain)' on Monday, May 4th, 2020 at 12:29 PM, and charged to 'Project 1'.

Item	Quantity	Seller	Date/Time	Project
Sputter gold	8	Ned Land (ned)	Monday, May 4th, 2020 @ 12:33 PM	Project 1
Tweezers	1	Captain Nemo (captain)	Monday, May 4th, 2020 @ 12:29 PM	Project 1

Figure 16.9: *View usage supplies and consumables*

Chapter 16 View usage

- Staff charges – any work performed by a staff member for a user will be listed. The staff member, start date and time, end date and time, and project are listed (Figure 16.10).

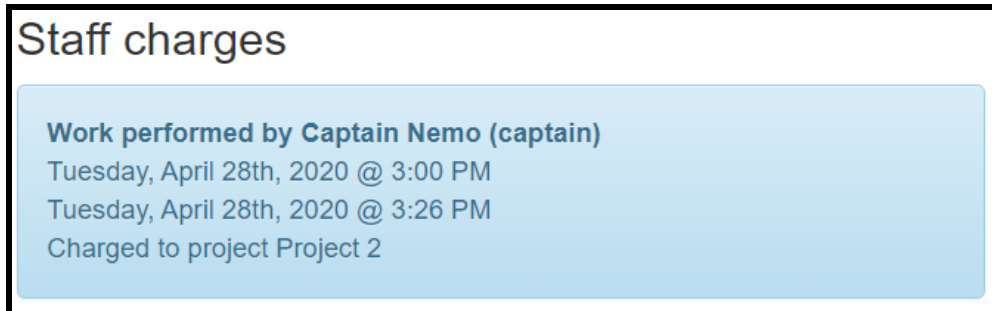

Figure 16.10: *View usage staff charges*

- Training sessions – the type of training, duration, staff member trainer, tool, project, date, and time are listed (Figure 16.11).

Figure 16.11: *View usage training sessions*

Chapter 16 View usage

- Area access – the area accessed, start date and time, end date and time, and project are listed. If the area was accessed by a staff member on behalf of the user, it is highlighted in yellow, and the staff members name is also listed (Figure 16.12).

Area access

Cleanroom
Monday, September 21st, 2020 @ 1:33 PM
Monday, September 21st, 2020 @ 2:06 PM
Charged to project Project 2

Cleanroom
Area accessed by Captain Nemo (captain) on your behalf
Monday, September 21st, 2020 @ 11:53 AM
Monday, September 21st, 2020 @ 12:07 PM
Charged to project Project 1

Figure 16.12: *View usage area access*

Chapter 16 View usage

- Tool usage – tool name, start date and time, end date and time, and project are listed. If the tool was operated by a staff member on behalf of the user, it is highlighted in yellow, and the staff members name is also listed (Figure 16.13).

The screenshot shows a 'Tool usage' section with two entries. The first entry, 'Fluorine Etch', is in a light blue box and lists two usage times on Tuesday, April 28th, 2020, at 4:31 PM and 5:27 PM, charged to Project 1. The second entry, 'Sputter', is in a yellow box and lists two usage times on the same day at 3:00 PM and 3:26 PM, charged to Project 2. The 'Sputter' entry is marked as 'Operated by Captain Nemo (captain) on your behalf'.

Figure 16.13: *View usage tool time*

Only categories with usage are displayed.

- Export: usage data can be exported in CSV format by clicking on the “Export” button (Figure 16.14).

Figure 16.14: *ViewUsageUsage data export*

Chapter 16 View usage

16.5 Billing Information

The billing information tab will display charge data for the selected period (Figure 16.15). Clicking 'Billing information' will highlight and activate the tab.

Figure 16.15: View usage, billing information tab

The billing information tab can be used to display actual charges for a user through a customized interface to your institutions billing and project data. An example is shown in the views/usage.py file under the billing_dict function. It is beyond the scope of this manual to describe how to customize this feature for your institution. If the feature has not been configured a message will appear (Figure 16.16).

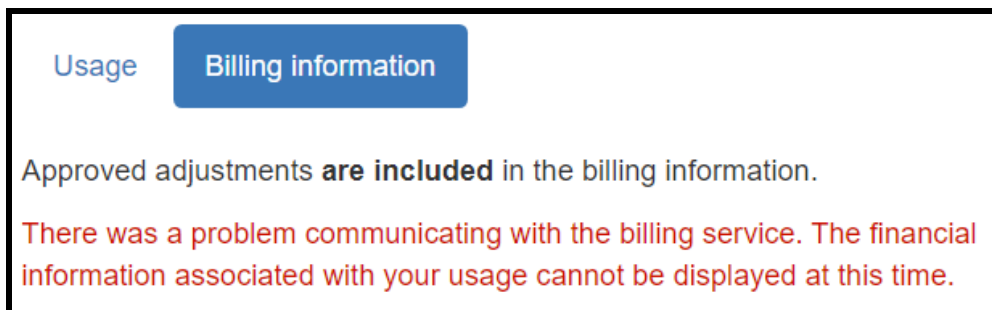

Figure 16.16: View usage billing information error

Chapter 16 View usage

16.6 Web address

The view usage page is accessible at `site-address/usage/` and the view billing at `site-address/billing/`. The page is not accessible from the navigation bar and must be either directly addressed or have a quick link created in the landing page.

16.7 Mobile device usage page

There are no mobile device views for the view usage page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

16.8 View usage page customizations

16.8.1 Billing information

Billing information data access must be customized for each institution. An example is shown in the `views/usage.py` file under the `billing_dict` function. It is beyond the scope of this manual to describe how to customize this feature for your institution.

CHAPTER 17

News and events

The news and events page provides a convenient way for the lab staff to communicate with users about non-emergency topics. For example, new equipment on order, tool installation progress, future plans, etc. Each time NEMO is updated, news articles are automatically generated and describe the new features, improvements, and bug fixes implemented in the new release.

Chapter 17 News and events

17.1 Recent news

The news and events page shows recent news articles by default (Figure 17.1).

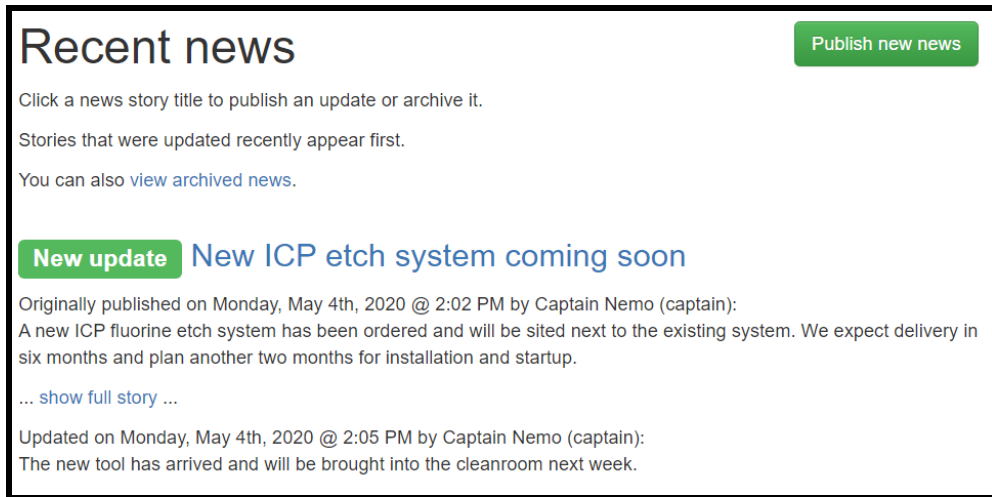

Figure 17.1: *News and events recent news*

Staff can create new news articles by clicking the Publish new news button (Figure 17.2). The button will not be visible to non-staff users.

Figure 17.2: *News and events publish new news button*

Users can view archived news articles by clicking the link (Figure 17.3).

Figure 17.3: *News and events archived news link*

Chapter 17 News and events

If the article was recently created or updated, the new update icon will appear next to the article title (Figure 17.4).

Figure 17.4: *News and events new update icon*

Staff can update a news article by clicking the title (Figure 17.5). The title will not appear as a link for non-staff users.

Figure 17.5: *News and events update article title link*

If a story has more than 2 updates, only the first and last are shown (Figure 17.6).

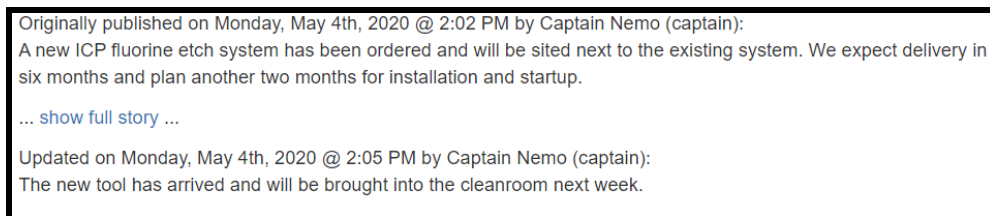

Figure 17.6: *News and events story collapsed*

Chapter 17 News and events

Clicking the show full story link (Figure 17.7) will expand the article to include all updates (Figure 17.8).

Figure 17.7: News and events show full story link

New update New ICP etch system coming soon

Originally published on Monday, May 4th, 2020 @ 2:02 PM by Captain Nemo (captain):
A new ICP fluorine etch system has been ordered and will be sited next to the existing system. We expect delivery in six months and plan another two months for installation and startup.

Updated on Monday, May 4th, 2020 @ 2:03 PM by Captain Nemo (captain):
The vendor has informed us that the system will be delayed by a month.

Updated on Monday, May 4th, 2020 @ 2:03 PM by Captain Nemo (captain):
While we have been waiting for delivery of the new system the gas lines have been installed and the electric has been pre-wired.

Updated on Monday, May 4th, 2020 @ 2:05 PM by Captain Nemo (captain):
The new tool has arrived and will be brought into the cleanroom next week.

Figure 17.8: News and events story expanded

Chapter 17 News and events

17.2 Archived news

The archived news page displays older articles in order of creation date from most recent to oldest (Figure 17.9).

Figure 17.9: *News and events archived articles*

Clicking the view recent news link will return to the recent news page (Figure 17.10).

Figure 17.10: *News and events view recent news link*

Up to 20 articles are displayed per page fully expanded. If more than 20 archived articles are available, buttons will appear below the recent news link to go to the older articles [Older »](#) or newer articles [« Newer](#) .

Chapter 17 News and events

17.3 Publish new news (staff only)

Staff may publish new news articles by clicking the publish new news button from the recent news page (Figure 17.11).

Figure 17.11: *News and events recent news with publish new news button*

The publish new news page provides dialogs for the new story title and story body (Figure 17.12).

A screenshot of a web form titled "Publish new news". It features a text input field with the placeholder "Provide a news story title". Below that is a larger text area with the placeholder "What's happening?". At the bottom left, there is a checkbox labeled "Keep this news story at the top of the news feed". At the bottom right, there is a green button labeled "Publish".

Figure 17.12: *News and events publish new news page*

Chapter 17 News and events

To publish a new news article:

- Enter a story title in the top dialog box (Figure 17.13). This title will be displayed at the top of the article.

Provide a news story title

Figure 17.13: *News and events publish new news story title dialog*

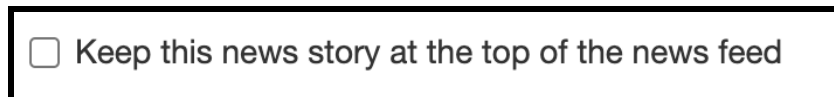

- Enter the body of the story in the what's happening dialog (Figure 17.14).

What's happening?

Figure 17.14: *News and events publish new news story body dialog*

- Check the box if you'd like the story to stay atop the news feed (Figure 17.15).

Keep this news story at the top of the news feed

Figure 17.15: *News and events publish new news story pinned checkbox*

Chapter 17 News and events

- Click the publish button (Figure 17.16).

Figure 17.16: *News and events publish new news story button*

- The news story is automatically created in the database with author and time and date stamp added as discussed in the Detailed administration → News section 42.30.
- Notifications for all active users are set which are detailed in the Detailed administration → Notifications section 42.31.

17.4 Update news article (staff only)

Staff may update news articles by clicking the article title link from the recent news page (Figure 17.17).

Figure 17.17: *News and events article title update link*

Chapter 17 News and events

The update a news story page will show the original posting, all updates, an archive button, an update dialog, and publish button (Figure 17.18).

Update a news story

Provide an update

[Publish](#)

Figure 17.18: *News and events update page*

Chapter 17 News and events

Clicking the 'Archive this news story' button will set the archive flag immediately without confirmation (Figure 17.19). Archived news stories are removed from the recent news page and displayed on the archived news page.

Figure 17.19: *News and events update page archive button*

To publish an update:

- Enter the update in the dialog box (Figure 17.20)

A rectangular dialog box with a black border. Inside, the text "Provide an update" is displayed in a light gray font at the top left. The rest of the box is empty, intended for user input.

Figure 17.20: *News and events update dialog box*

- Check/uncheck the box if you'd like to change the pinned status of the story (Figure 17.21).

A rectangular box with a black border containing a single line of text: an unchecked checkbox followed by the text "Keep this news story at the top of the news feed".

Figure 17.21: *News and events update pinned checkbox*

Chapter 17 News and events

- Click the publish button (Figure 17.22).

Figure 17.22: *News and events update publish button*

- The news story is automatically updated in the database with author and time and date stamp added as discussed in the Detailed administration → News section 42.30.
- Notifications for all active users are set which are detailed in the Detailed administration → Notifications section 42.31.

Chapter 17 News and events

17.5 Notifications

When news and events are created or updated, the notification status is set for all users. It automatically expires after one month. If a user accesses a page with a notification within that time, there will be a notification indicating new content since their last visit. The notifications are reset upon visiting the news and events page. Notifications are detailed in the Detailed administration → Notifications section [42.31](#).

If the news and events page has a link on the landing page, a red number that represents the number of articles created or updated since the user last visited the news and events page will appear to the right of the link name (Figure [17.23](#)). Setup details can be found under the Detailed administration → Landing page choices section [42.28](#).

Figure 17.23: *Landing page news notification*

The next time the news and events page is visited, any new or updated articles will have a special “new update” icon to highlight the update (Figure [17.24](#)).

New update

Figure 17.24: *News and events News update icon*

Chapter 17 News and events

17.6 Web address

The news and events page is accessible at `site-address/news/`. The page is not accessible from the navigation bar and must be either directly addressed or have a quick link created in the landing page.

17.7 Mobile device news and events page

There are no mobile device views for the news and events page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

17.8 News and events customizations

A news story is published when a new NEMO release is installed with links to the release notes and the feature manual. This feature can be disabled by setting `NEW_VERSION_NEWS = False` in `settings.py`.

CHAPTER 18

Sensor data

The sensor data page provides a dashboard to navigate through sensors and sensor categories, display or export sensor data and alert logs.

18.1 Setup

To enable this feature, you need to have 'NEMO.apps.sensors' in `INSTALLED_APPS` in your `settings.py`. In addition, a timed service app must be properly configured and running which is described in the NEMO timed services section [48.3](#). Setting up sensor categories is discussed in Detailed administration → Sensor categories section [43.5](#). Setting up sensors is discussed in Detailed administration → Sensors chapter [43](#). Setting up email alerts is discussed in Detailed administration → Sensor alert emails subsection [43.1](#).

Chapter 18 Sensor data

18.2 Usage

- Select a category or sensor from the dashboard (Figure 18.1) until reaching the desired sensor data.

Figure 18.1: *Sensor data dashboard*

- The sensors square will display the latest value and time read (Figure 18.2).

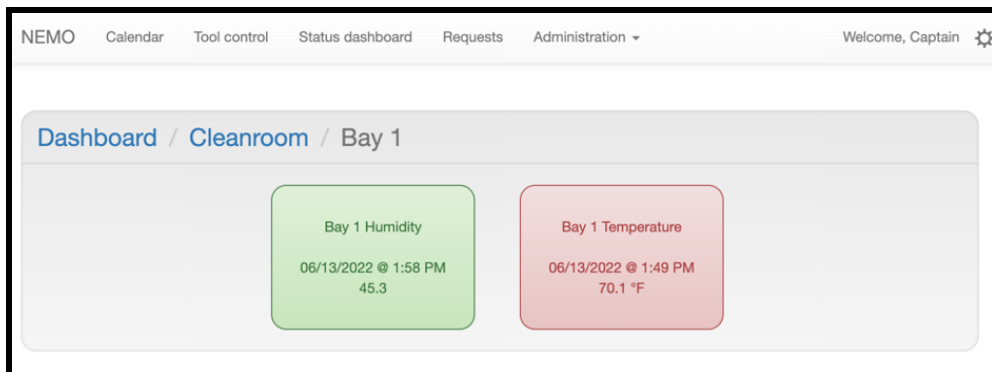

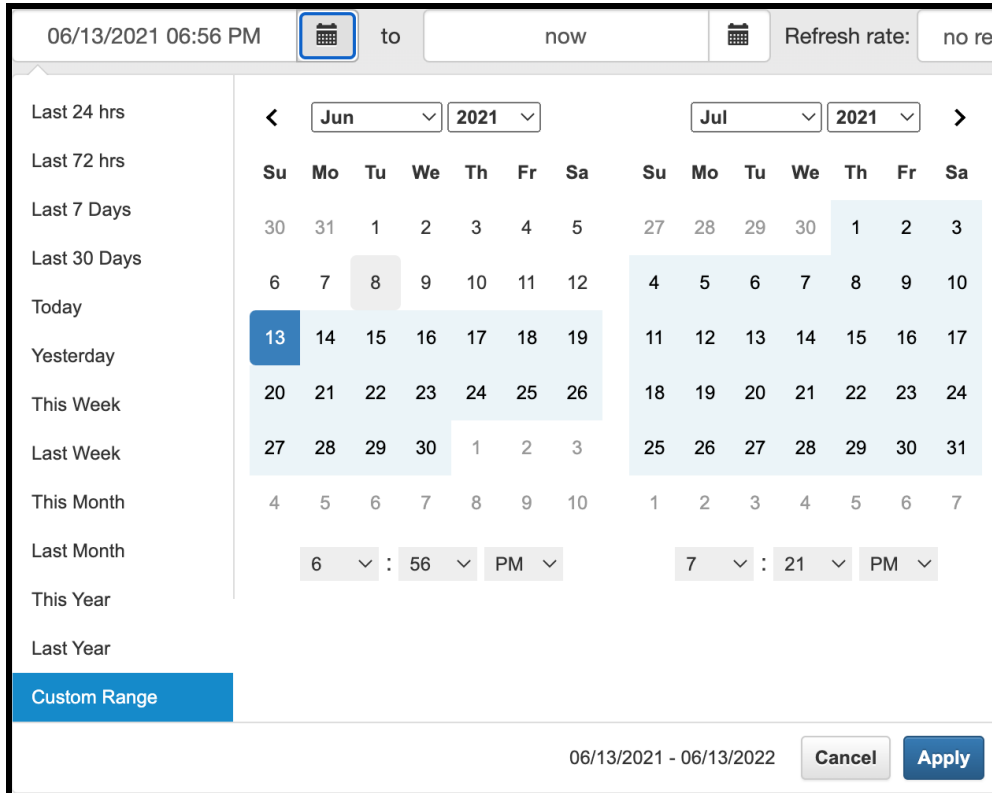

Figure 18.2: *Sensor data dashboard sensors*

Chapter 18 Sensor data

- The date range can be changed by clicking on the calendar icon  next to either the start or the end date (Figure 18.3). You can select a preset range or a custom date range.

- The data tab will show the time and raw values (Figure 18.8).

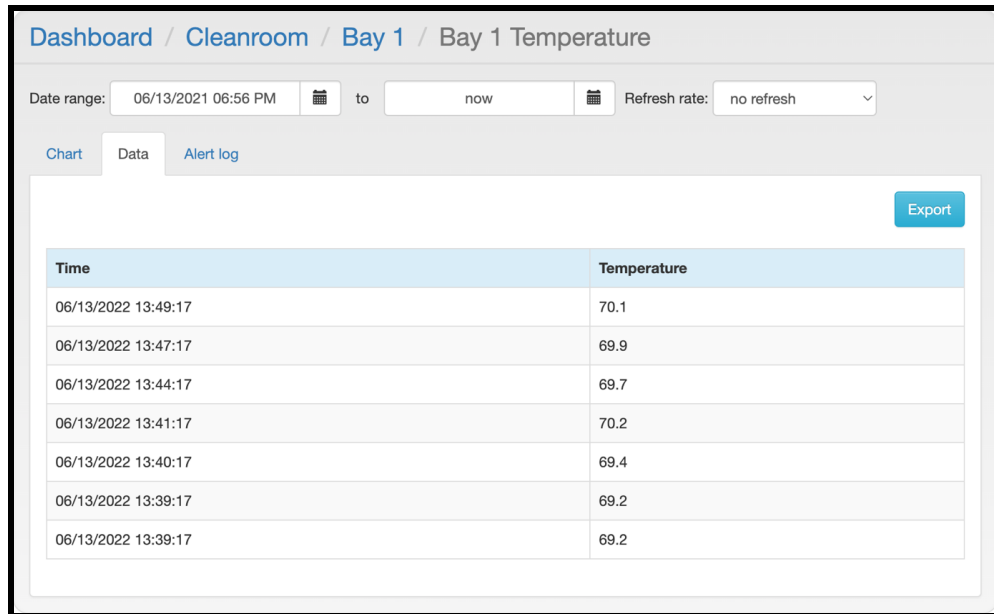

Figure 18.8: *Sensor data tab*

- You can click on the export button to get a CSV file (Figure 18.9).

Figure 18.9: *Sensor data export*

Chapter 18 Sensor data

18.5 Alerts

- When an alert is triggered, the sensor and all its parent categories will be displayed in red color (Figure 18.10, Figure 18.11, Figure 18.12).

Figure 18.10: *Sensor data alert dashboard*

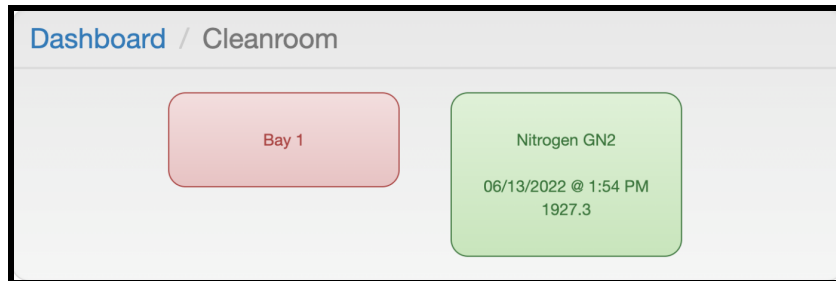

Figure 18.11: *Sensor data alert dashboard category*

Figure 18.12: *Sensor data alert dashboard sensor*

Chapter 18 Sensor data

- On a sensor page, the alert log tab will show when alerts were triggered and/or reset (Figure 18.13).

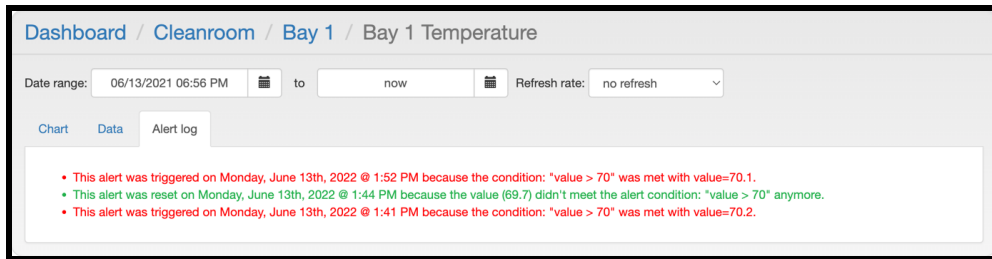

Figure 18.13: Sensor data alert log

18.6 Web address

The sensor data page is accessible at `site-address/sensors/`. The page is accessible from the navigation bar by clicking Administration then clicking Sensor data.

18.7 Mobile device sensor data page

There are no mobile device views for the sensor data page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling. To visualize and interact with the graph data, it is recommended to use a tablet or desktop computer.

18.8 Sensor page customizations

Some sensor parameters can be customized in Customization → Sensor settings, see section 40.13.

CHAPTER 19

User Preferences

The user preferences page provides a dialog to enable user specific reservation notifications with meeting invites, tool freed time notifications, buddy system preferences, staff status view preferences and general email notification preferences (Figure [19.1](#), Figure [19.2](#)).

Chapter 19 User Preferences

User Preferences

Reservations

- Check this box to receive ICS calendar invitation when creating reservation
- Check this box to receive ICS calendar invitation when cancelling a reservation
- Check this box to not be asked to confirm before making a reservation
- Check this box to be asked to confirm before moving or resizing a reservation

Tool freed time notifications

Minimum freed time Minimum amount of minutes freed to receive a notification.

Maximum future days Maximum number of days in the future to receive a notification for.

Tools

You are not receiving notifications for any tools.

Buddy System

- Check this box to see notification badges for new buddy requests
- Check this box to receive an email notification when users reply to buddy requests you replied to

Adjustment Requests

- Check this box to receive an email notification for replies to your adjustment requests

Reservation reminders Both emails Main email only Alternate email only Off

Reservation ending reminders Both emails Main email only Alternate email only Off

Recurring charges reminder days Set the number of days to receive a reminder prior to recurring charges being charged. A comma-separated list can be used.

Recurring charges reminders: Both emails Main email only Alternate email only Off

Figure 19.2: User preferences page (continued)

Chapter 19 User Preferences

19.1 Usage

19.1.1 Reservation invites preferences

- Check the top box to receive a calendar invite when creating a reservation (Figure 19.3).

Figure 19.3: *User preferences creation email checkbox*

- Check the bottom box to receive a calendar cancellation when canceling a reservation (Figure 19.4).

Figure 19.4: *User preferences cancellation email checkbox*

19.1.2 Reservation confirmation preferences

- Check the box to be asked to confirm when creating a reservation (Figure 19.5).

Figure 19.5: *User preferences creation confirmation checkbox*

Chapter 19 User Preferences

- Check the box to be asked to confirm when moving/resizing a reservation (Figure 19.6).

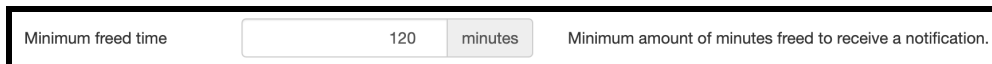

Check this box to be asked to confirm before moving or resizing a reservation

Figure 19.6: *User preferences move/resize confirmation checkbox*

19.1.3 Tool freed time notifications

- Enter the minimum amount of time (in minutes) you'd like to be notified for. If the time freed is less than this amount, you will not get any notification. (Figure 19.7).

Minimum freed time minutes Minimum amount of minutes freed to receive a notification.

Figure 19.7: *User preferences tool time freed minimum time*

- Enter the maximum number of days in the future you'd like to be notified for. If the reservation time is later than this number of days in the future, you will not get any notification. (Figure 19.8).

Maximum future days days Maximum number of days in the future to receive a notification for.

Figure 19.8: *User preferences tool time freed maximum days in future*

- Finally, search and select the tools you'd like to be notified for (Figure 19.9). An email will be sent to you when someone cancels, moves, missed or shortens a reservation that frees up time of a duration greater than your minimum, and that is not more than your maximum days in the future.

Chapter 19 User Preferences

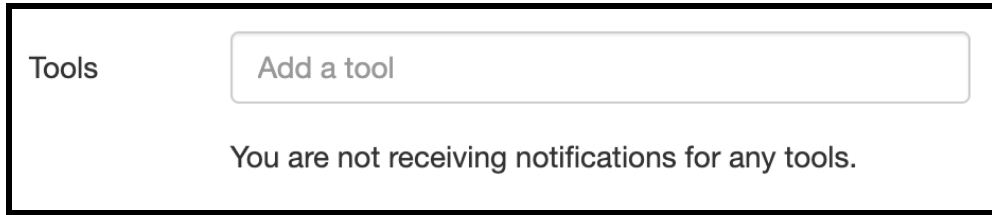

Figure 19.9: *User preferences tool time freed tool list selection*

19.1.4 Buddy board notifications

- Check the top box to see notifications for new buddy requests (Figure 19.10). They will appear as a number next to the buddy board heading on the navigation bar (Figure 19.11).

Figure 19.10: *User preferences new buddy request notification checkbox*

Figure 19.11: *User preferences buddy navigation bar notification*

- Check the middle box to see notifications when users reply to buddy requests you replied to (Figure 19.12).

Figure 19.12: *User preferences buddy response notification checkbox*

Chapter 19 User Preferences

- Check the bottom box to receive email notifications when users reply to buddy requests you replied to (Figure 19.13).

Figure 19.13: *User preferences buddy response email checkbox*

19.1.5 Adjustment requests notifications

- Check the box to receive email notifications when users reply to adjustment requests you replied to (you will always see badge notifications) (Figure 19.14).

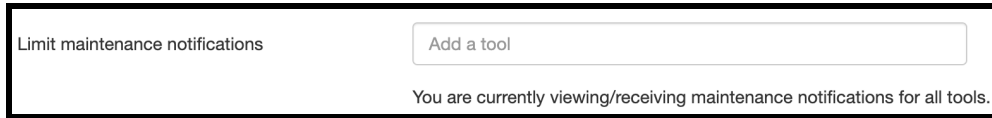

Figure 19.14: *User preferences adjustment request response email checkbox*

19.1.6 Tool maintenance & notifications

- (Facility managers, technical staff and service personnel only) Search and select tools you would like to receive maintenance notifications for. For technical staff and service personnel, this list of tools is in addition to automatically getting emails and viewing maintenance records for tools they are owners or backup owners of. For facility managers this list is a way of limiting the notification received to a subset of tools (instead of the default to receive all of them). (Figure 19.15).

Chapter 19 User Preferences

Limit maintenance notifications

You are currently viewing/receiving maintenance notifications for all tools.

Figure 19.15: *User preferences maintenance and notification tools*

19.1.7 Staff status default view

- Check the radio button corresponding to the default view you would like to use when looking at the staff status (Figure 19.16). Note that the option won't be displayed if the user isn't authorized to see the staff status or if he can only use the day view.

Default view Day Week Month

Figure 19.16: *User preferences staff status default view*

Chapter 19 User Preferences

19.1.8 Email notifications

- Enter an optional alternate email address to receive notifications to.
- Check the radio button corresponding to one of the options. Some notifications can be turned off completely, while others must be sent to at least the main email address.

Email notifications

Figure 19.17: *User preferences email notifications*

Chapter 19 User Preferences

19.1.9 Save user preferences

- Click the update preferences button (Figure 19.18).

Figure 19.18: *User preferences update button*

- Selections will be updated in the database as discussed in the Detailed administration → User preferences section 42.66.

19.2 Web address

The user preferences page is accessible at `site-address/user_preferences/`. The page is accessible from the navigation bar by clicking the  link or in mobile view by selecting preferences.

19.3 Mobile device user preferences page

There are no mobile device views for the safety page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

19.4 User preferences page customizations

There are no user preferences customizations.

CHAPTER 20

Administration menu (staff only)

The administration menu provides the interfaces to manage accounts, projects, users, tools, areas, training, and maintenance as well as customize NEMO setups and access the NEMO database (Figure [20.1](#)). Only staff have access to the administration menu and pages. Some administration pages also require super-user privilege (API, Customization, Impersonate).

Chapter 20 Administration menu (staff only)

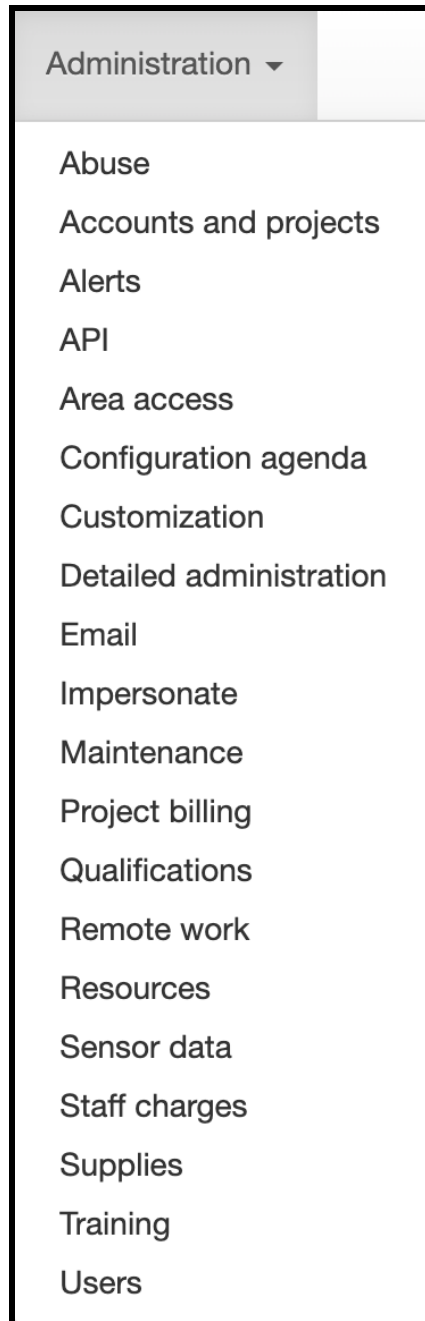

Figure 20.1: Administration menu

CHAPTER 21

Abuse (managers only)

The abuse page can take various inputs to score users on their missed reservations and last-minute cancelations (Figure [21.1](#)).

Chapter 21 Abuse (managers only)

Reservation abuse

This page ranks users that abuse reservation privileges. Abuse is defined as cancelling, moving, or extending a reservation shortly before the reservation would have started. A point penalty is calculated per abuse. Point penalties increase the shorter the notice of a reservation change. (That is, cancelling a reservation right before it would have started will incur a high amount of points, while cancelling it 6 hours before would incur fewer points).

The weight & details of what constitutes abuse can be configured (though reasonable defaults have been chosen).

Cancellation horizon hours

Cancellation penalty Up to points

Evaluate for the

Starting Ending

Figure 21.1: Abuse managers only Reservation abuse page

21.1 Web address

The abuse page is accessible at site-address/abuse/. For example, www.nemo.com/abuse/. The page is also accessible from the navigation bar by clicking Administration then clicking Abuse.

21.2 Mobile device abuse page

There are no mobile device views for the abuse page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

Chapter 21 Abuse (managers only)

21.3 Mobile device abuse page

There are no customizations for the abuse page.

CHAPTER 22

Accounts and projects (user office, accounting and managers only)

The accounts and projects page provides the interface to administer accounts, projects, and user permissions on projects.

An account is at the top of the hierarchy. This is where you send the bill. An account can have many projects.

Projects are used to identify different efforts by the same account. This is what department or group is charging the account. Each project can have many users.

A user can be active on any number of projects under any number of accounts.

Many accounts will have one project with one or more users, but NEMO has the flexibility to accommodate any mode of operation.

Chapter 22 Accounts and projects (user office, accounting and managers only)

Upon entering the page, there are buttons to add accounts, add projects, search for accounts or projects, and a list of all accounts and projects (Figure 22.1).

Cleanroom Eng		PROJ.2019.02	<input checked="" type="checkbox"/>	View

Figure 22.1: Accounts and projects page

22.1 Search for existing accounts or projects

To search for an existing account or project, start typing in the search dialog (Figure 22.2).

Figure 22.2: Accounts and projects search dialog

Chapter 22 Accounts and projects (user office, accounting and managers only)

Results are returned as characters are typed and the account or project of interest can be selected at any time by clicking the name (Figure 22.3).

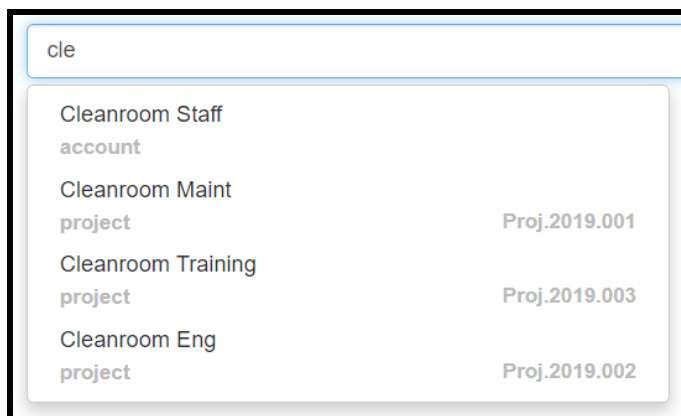

Figure 22.3: Accounts and projects search return list

Upon selecting an account, the base account and all associated projects are displayed (Figure 22.4).

Figure 22.4: Accounts and projects list view

Chapter 22 Accounts and projects (user office, accounting and managers only)

The top of the list is the account name (Figure 22.5).

Cleanroom Staff Active

Figure 22.5: *Accounts and projects view account*

Each project title is listed (Figure 22.6).

Cleanroom Eng Active

Figure 22.6: *Accounts and projects view project*

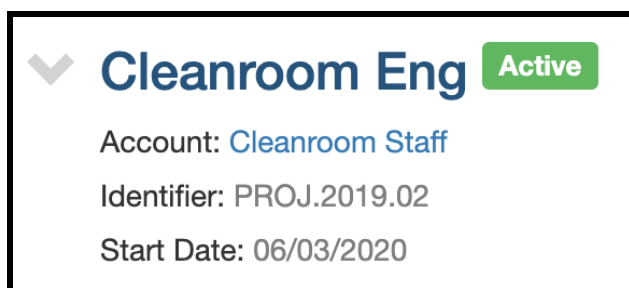

The application identifier is listed below the project title (Figure 22.7).

Proj.2019.002

Figure 22.7: *Accounts and projects project application identifier*

Upon selecting a project, the project name, account, project identifier and start date (if defined) are displayed (Figure 447). Clicking on the account name will link back to the account view (Figure 22.8)

▼ Cleanroom Eng Active
Account: Cleanroom Staff
Identifier: PROJ.2019.02
Start Date: 06/03/2020

Figure 22.8: *Accounts and projects project view*

Chapter 22 Accounts and projects (user office, accounting and managers only)

22.2 Account and project status

Accounts and projects can be either active or inactive and their status is indicated by an icon. Changing an account to inactive will cause all of its associated projects to inherit the inactive state regardless of individual project statuses. Although a project will inherit its account inactive status, the individual project statuses are not changed. Projects that are inactive, either directly or inherited from account, cannot be selected on any lab use activity.

Clicking the icon will toggle the status.

Active

Account or project is active

Inactive

Account or project is inactive

On the list view, account or project status can be toggled by clicking on the green icon  to deactivate, or the red icon  to reactive an account/project.

Any change in account or project status is recorded in the activity histories table of the database detailed in the Detailed administration → Activity histories section [42.3](#).

Chapter 22 Accounts and projects (user office, accounting and managers only)

22.3 Manage users on a project

Users can be added and removed to any project regardless of associated accounts through the Accounts and project page or the Users page.

To manage users on a project:

- Search for a project or select one from the list view using the details icon .
- Click the  on a project listing to expand the project dialog and include qualified users (Figure 22.9).

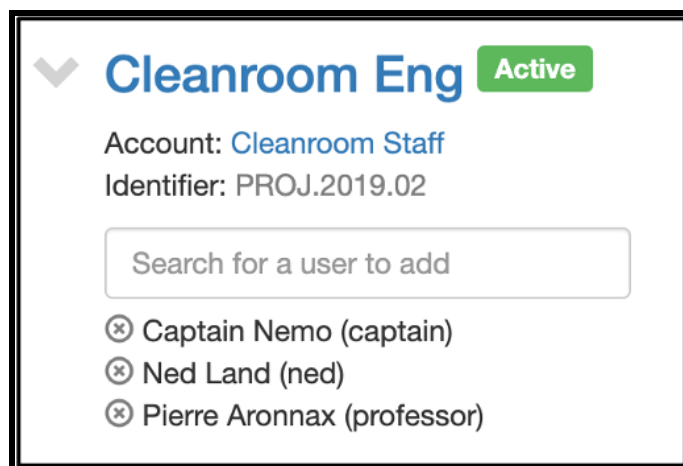

Figure 22.9: Accounts and projects expanded dialog

- To add a user, click in the search dialog box (Figure 22.10).

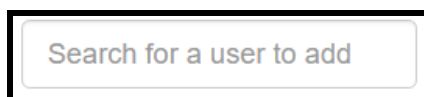

Figure 22.10: Accounts and projects search for user

Chapter 22 Accounts and projects (user office, accounting and managers only)

- Results are returned as characters are typed and the name of interest can be selected at any time by clicking the name on the list (Figure 22.11).

Figure 22.11: *Accounts and projects add user*

- The selected user is added immediately without confirmation and the list of users displayed is updated.
- Click the  to remove a user from a project. The removal is immediate without confirmation and the list of users displayed is updated.
- Adding or removing a user on a project is recorded in the membership history table of the database detailed in the Detailed administration → Membership histories section 42.29.
- Clicking the  will collapse the project dialog.

Chapter 22 Accounts and projects (user office, accounting and managers only)

22.4 Create an account

To create an account:

- Click the new account button on the accounts and projects page (Figure 22.12).

Figure 22.12: Accounts and projects new account button

- The new account dialog will open (Figure 22.13).

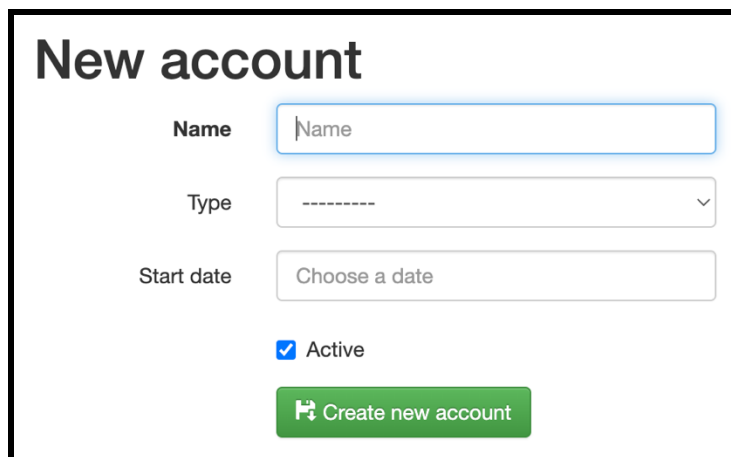

A white dialog box with a black border. At the top, the title "New account" is displayed in a large, bold, black font. Below the title, there are three input fields: "Name" with a text box containing "Name", "Type" with a dropdown menu showing "-----" and a downward arrow, and "Start date" with a text box containing "Choose a date". Below these fields, there is a checked checkbox labeled "Active". At the bottom of the dialog, there is a green button with rounded corners and a white plus icon, labeled "Create new account" in white text.

Figure 22.13: Accounts and projects new account dialog

- Enter the account name in the dialog box (Figure 22.14).

A white dialog box with a black border. It contains a single input field labeled "Name" on the left. The text box contains the word "Name".

Figure 22.14: Accounts and projects new account name dialog box

Chapter 22 Accounts and projects (user office, accounting and managers only)

- If account types are defined, you have the option to select the type (Figure 22.15).

A screenshot of a web form element. It consists of a rectangular box with a thin border. On the left side of the box, the word "Type" is written in a small, grey font. To the right of "Type" is a white rectangular input field with a thin border. Inside the input field, there are several horizontal dashes "-----" and a small downward-pointing chevron icon on the right side, indicating a dropdown menu.

Figure 22.15: *Accounts and projects new account type selector*

- Enter the start date of the account (optional) (Figure 22.16).

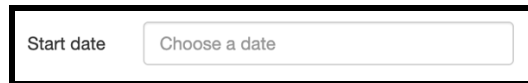

A screenshot of a web form element. It consists of a rectangular box with a thin border. On the left side of the box, the text "Start date" is written in a small, grey font. To the right of "Start date" is a white rectangular input field with a thin border. Inside the input field, the text "Choose a date" is written in a small, grey font.

Figure 22.16: *Accounts and projects new account start date*

- The active checkbox is checked by default. It can be unchecked for inactive status (Figure 22.17).

A screenshot of a web form element. It consists of a rectangular box with a thin border. On the left side of the box is a blue square checkbox with a white checkmark inside. To the right of the checkbox, the word "Active" is written in a bold, black font.

Figure 22.17: *Accounts and projects new account active checkbox*

- Click the create new account button (Figure 22.18).

A screenshot of a web form element. It is a green rectangular button with rounded corners and a thin white border. On the left side of the button is a white icon of a document with a plus sign. To the right of the icon, the text "Create new account" is written in a white, sans-serif font.

Figure 22.18: *Accounts and projects new account create button*

Chapter 22 Accounts and projects (user office, accounting and managers only)

- The new account is recorded in the accounts table of the database detailed in the Detailed administration → Accounts section [42.2](#).
- The page will return to the accounts and projects page with the new account selected (Figure [22.19](#)).

Chapter 22 Accounts and projects (user office, accounting and managers only)

22.6 Web address

The accounts and projects page is accessible at site-address/accounts_and_projects/. The page is also accessible from the navigation bar by clicking Administration then clicking Accounts and projects.

22.7 Mobile device accounts and projects page

There are no mobile device views for the accounts and projects page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

22.8 Accounts and projects page customizations

There are several customizations available for accounts and projects. They are discussed in the Customizations → Project and accounts section [40.8](#).

CHAPTER 23

Alerts (staff and user office only)

The alerts page creates notifications to all users and can have a scheduled start date and time as well as a scheduled end date and time. Any existing alerts are displayed at the bottom of the page and can be edited or deleted. (Figure [23.1](#)). Existing alerts display the title, details, start date/time and end date/time.

Chapter 23 Alerts (staff and user office only)

Alerts

You can create and edit alerts that will be visible to everyone. The alert will only be visible after the debut time and will be deleted after the expiration time.

Create a new alert

Title

Type

Debut time
05/04/2020 9:28 PM

Expiration time

Sputter tool annual PM next week
The sputter tool will have a full annual preventative maintenance performed next week. During this time the tool will not be available to users.
Debuts on Monday, April 13th, 2020 @ 1:52 PM
This alert will never expire

Figure 23.1: Alerts page

23.1 Create an alert

To create an alert:

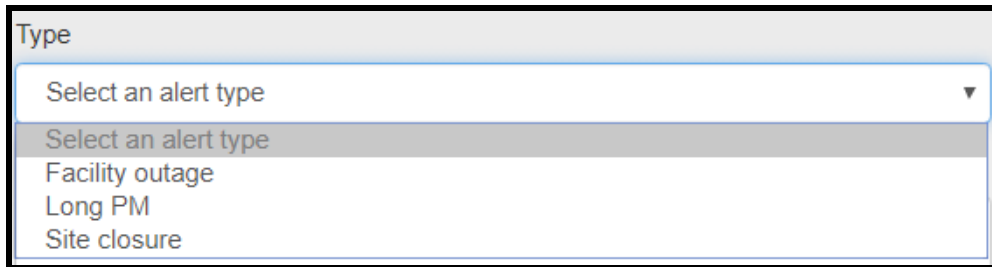

- Enter an alert title (Figure 23.2). The title is displayed in bold at the top of the alert message.

Title

Figure 23.2: Alerts title dialog box

Chapter 23 Alerts (staff and user office only)

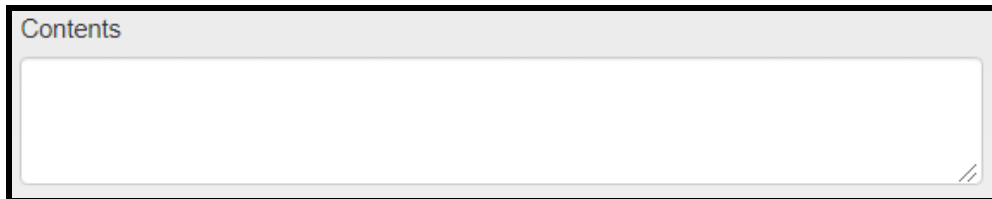

- Select an alert type (Figure 23.3). The alert type will only display if alert types have been defined in the alert categories table of the database detailed in the Detailed administration → Alert categories section 42.5.1. Categorizing alerts can be useful for binning alerts aiding in future analysis and trending.

The image shows a dropdown menu titled "Type". The menu is open, displaying a list of options. The first option is "Select an alert type" with a downward arrow. Below it are three other options: "Select an alert type", "Facility outage", "Long PM", and "Site closure". The second "Select an alert type" option is highlighted with a grey background.

Figure 23.3: Alerts type dropdown

- Provide details to share with users (Figure 23.4).

The image shows a dialog box titled "Contents". The dialog box is empty, with a large white area for text input. There is a small icon in the bottom right corner of the dialog box.

Figure 23.4: Alerts details dialog box

- Select a start date and time (Figure 23.5). The default is now.

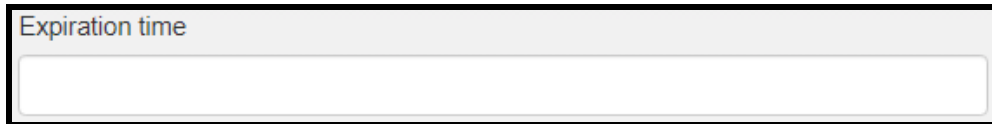

The image shows a text input field titled "Debut time". The field contains the text "05/04/2020 9:13 PM".

Figure 23.5: Alerts start date and time

Chapter 23 Alerts (staff and user office only)

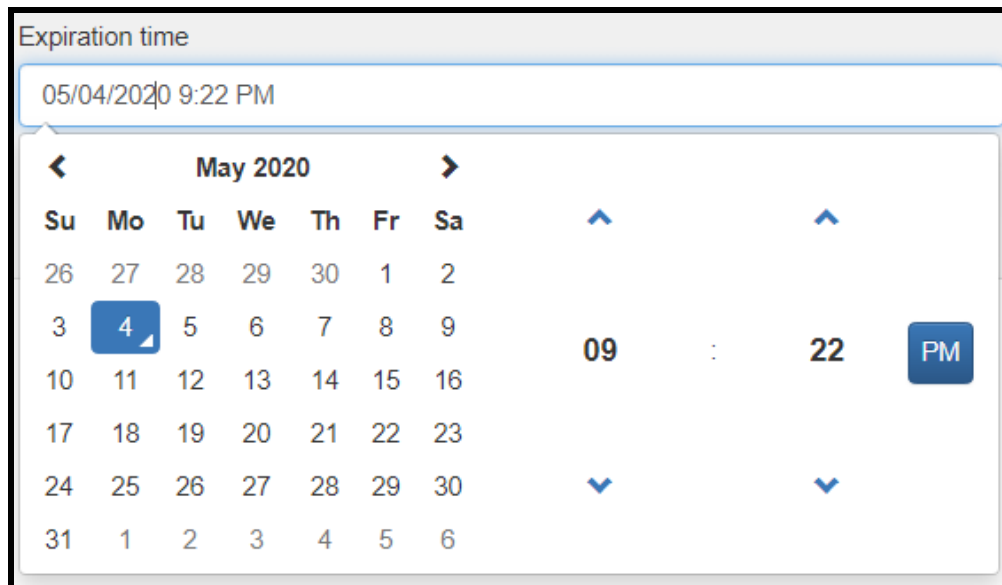

- Select an end date and time (Figure 23.6). To prevent alert expiration, leave this blank.

A screenshot of a web form with a label 'Expiration time' above a single-line text input field. The input field is currently empty.

Figure 23.6: Alerts end date and time

- Clicking in the start or end date/time area will bring up the calendar/clock selection dialog (Figure 23.7). Click to the appropriate date and time. The date/time dialog will update as you click.

A screenshot of a web form with a label 'Expiration time' above a text input field containing '05/04/2020 9:22 PM'. Below the input field is a calendar/clock selection dialog. The calendar shows May 2020 with the 4th selected. The clock shows 09:22 PM.

May 2020						
Su	Mo	Tu	We	Th	Fr	Sa
26	27	28	29	30	1	2
3	4	5	6	7	8	9
10	11	12	13	14	15	16
17	18	19	20	21	22	23

31	1	2	3	4	5	6

09 : 22 PM

Figure 23.7: Alerts calendar/clock dialog

Chapter 23 Alerts (staff and user office only)

- Click the create alert button (Figure 23.8).

Figure 23.8: Alerts create button

- Upon creation, the alert will be saved in the database and is detailed in the Detailed administration → Alerts section 42.6.
- The new alert will be displayed at the bottom of the alerts page and on the landing page.

23.2 Delete an alert

An alert can be deleted by clicking the  icon in the alert of interest at the bottom of the alerts page (Figure 23.9). The deletion is immediate without confirmation. The alert is still saved in the database but marked as deleted and will no longer be displayed.

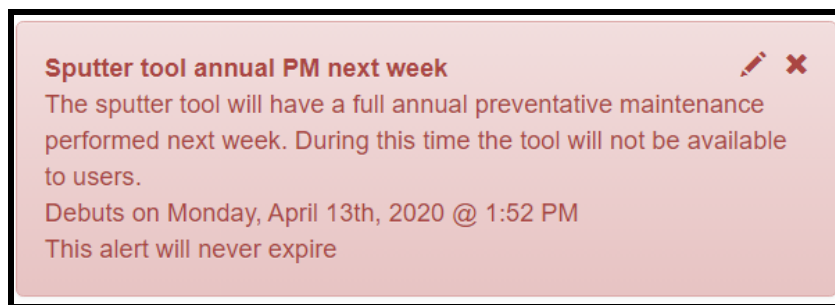

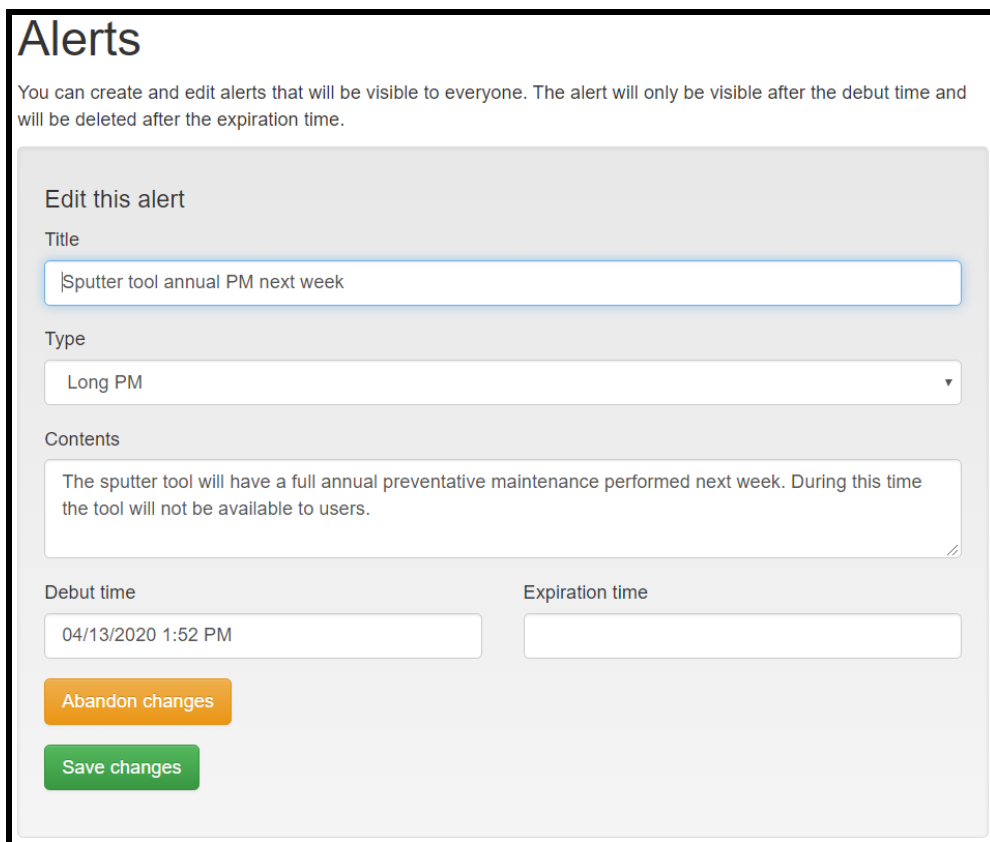

Figure 23.9: Alerts existing alert dialog

Chapter 23 Alerts (staff and user office only)

23.3 Edit an alert

To edit an alert:

- Click the  icon in the alert dialog of interest.
- The alert edit page will open (Figure 23.10).

The screenshot shows a web interface for editing an alert. At the top, the heading "Alerts" is followed by a brief instruction: "You can create and edit alerts that will be visible to everyone. The alert will only be visible after the debut time and will be deleted after the expiration time." Below this is a form titled "Edit this alert". The form contains several fields: a "Title" text box with the value "Sputter tool annual PM next week"; a "Type" dropdown menu currently set to "Long PM"; a "Contents" text area with the text "The sputter tool will have a full annual preventative maintenance performed next week. During this time the tool will not be available to users."; a "Debut time" text box with the value "04/13/2020 1:52 PM"; and an empty "Expiration time" text box. At the bottom of the form are two buttons: an orange "Abandon changes" button and a green "Save changes" button.

Figure 23.10: Alerts edit existing alert page

- Edit any fields that need updating. The process is identical to creating an alert above.

Chapter 23 Alerts (staff and user office only)

- To cancel click the abandon changes button (Figure 23.11).

Figure 23.11: Alerts edit abandon changes button

- To save the update click the save changes button (Figure 23.12).

Figure 23.12: Alerts edit save changes button

23.4 Web address

The alerts page is accessible at site-address/alerts/. The page is also accessible from the navigation bar by clicking Administration then clicking Alerts.

23.5 Mobile device alerts page

There are no mobile device views for the alerts page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

Chapter 23 Alerts (staff and user office only)

23.6 Alerts page customizations

23.6.1 Alerts page customizations

The alert type will only display if alert types have been defined in the alert categories table of the database detailed in the Detailed administration → Alert categories section.

CHAPTER 24

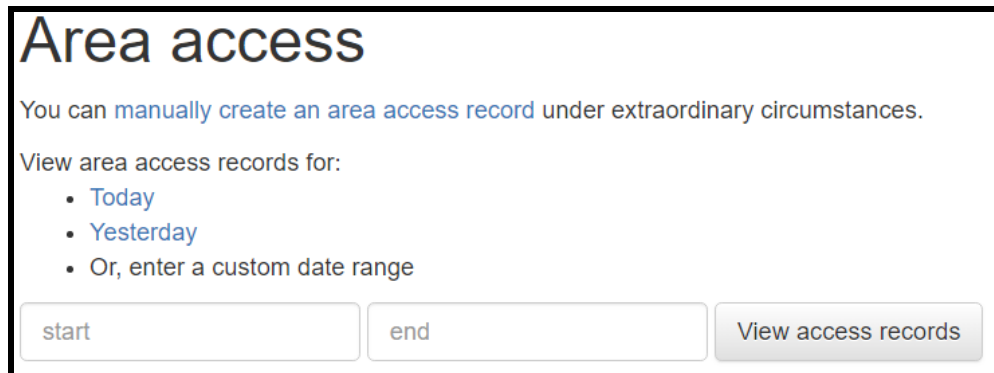

API (admin only)

This topic is discussed in more details in the API access chapter [45](#).

CHAPTER 25

Area Access (staff and user office only)

The area access page can be used to manually create an area access record and view area access (Figure 25.1).

Area access

You can [manually create an area access record](#) under extraordinary circumstances.

View area access records for:

- [Today](#)
- [Yesterday](#)
- Or, enter a custom date range

start end [View access records](#)

Figure 25.1: *Area access page*

Chapter 25 Area Access (staff and user office only)

25.1 Create an access record

An area access record can be manually created due to a door access hardware or network failure. However, the preferred method to bypass area access requirements is to enable users to log themselves in and out of areas from the landing page which is setup in Customizations → Application settings section [40.1](#).

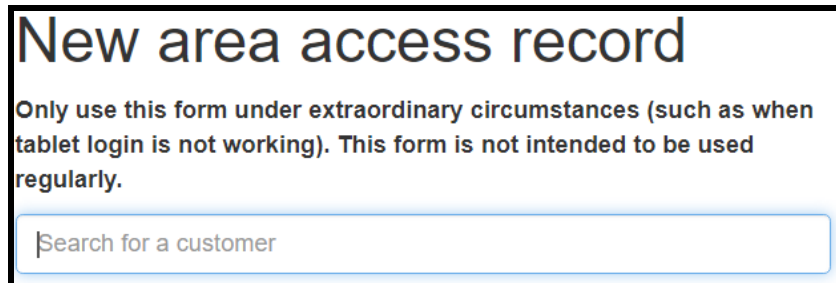

To create an area access record:

- Click the manually create an access record link (Figure [25.2](#)).

You can manually create an area access record under extraordinary circumstances.

Figure 25.2: Area access new record link

- The new area access record page will open (Figure [25.3](#)).

New area access record

Only use this form under extraordinary circumstances (such as when tablet login is not working). This form is not intended to be used regularly.

Figure 25.3: Area access new record page

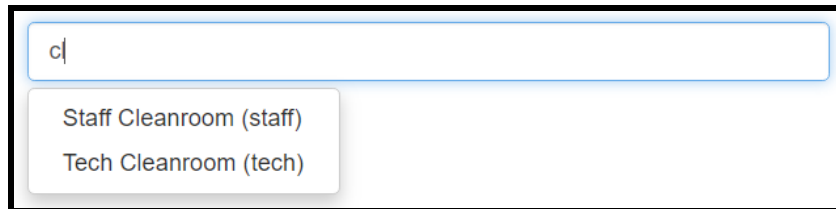

- Enter the user name in the dialog box (Figure [25.4](#)).

Figure 25.4: Area access new record search dialog

Chapter 25 Area Access (staff and user office only)

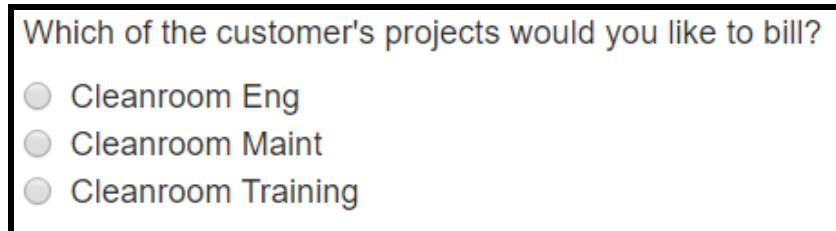

- Results are returned as characters are typed and the name of interest can be selected at any time by clicking the name on the list (Figure 25.5).

A screenshot of a search interface. At the top, there is a text input field containing the characters 'c|'. Below the input field, a dropdown menu is open, displaying two options: 'Staff Cleanroom (staff)' and 'Tech Cleanroom (tech)'. The dropdown menu has a light gray background and a thin border.

Figure 25.5: Area access new record search list

- If the user has multiple projects, select which project to bill time against (Figure 25.6).

A screenshot of a form with the question 'Which of the customer's projects would you like to bill?' at the top. Below the question, there are three radio button options: 'Cleanroom Eng', 'Cleanroom Maint', and 'Cleanroom Training'. Each option is preceded by a radio button icon.

Figure 25.6: Area access new record multiple projects

- If the user has only one project, it will be selected automatically (Figure 25.7).

Area access will be billed to the customer's only project, "Project 1"

Figure 25.7: Area access new record one project

Chapter 25 Area Access (staff and user office only)

- If the user has access to multiple areas, select which area to log the user into (Figure 25.8).

Staff Cleanroom (staff) has access to the following areas. Which would you like to bill for access?

Cleanroom anytime

CMP Anytime

Figure 25.8: Area access new record multiple areas

- If the user has access to only one area, it will be selected by default (Figure 25.9).

The customer only has access to the cleanroom anytime. Access will be billed for that area.

Figure 25.9: Area access new record single area

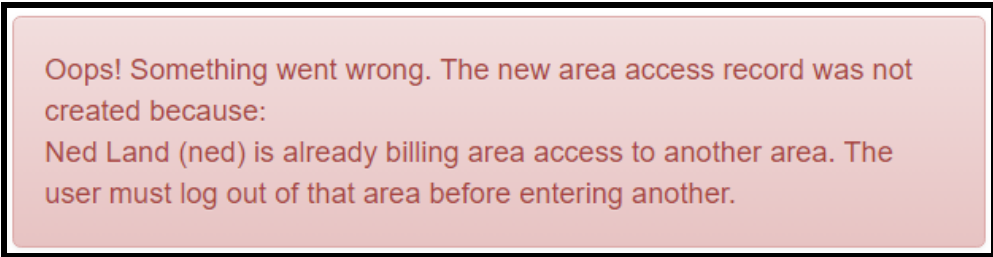

- Click the create area access record (Figure 25.10).

Figure 25.10: Area access new record create button

Chapter 25 Area Access (staff and user office only)

- The area access policy will be checked to determine if the user may access the selected area. If there is a failure, the user will be prompted with the problem (Figure 25.11).
 - The user must be active.
 - The user must be associated with an active project.
 - The user must have access to the area.
 - The user must have current unexpired physical access to the lab.
 - The user must not be currently logged into an area.
 - The user must have a physical access level that permits access at the login time.
 - The area must not be shut down as a resource.
 - The area must not be over its occupancy limit.
 - If the area requires a reservation, the user must have a reservation that encompasses the area access start time.

Oops! Something went wrong. The new area access record was not created because:
Ned Land (ned) is already billing area access to another area. The user must log out of that area before entering another.

Figure 25.11: *Area access new record error dialog*

Chapter 25 Area Access (staff and user office only)

- Upon success, a new area access record will be created in the area access table of the database and a success message will be displayed (Figure 25.12).

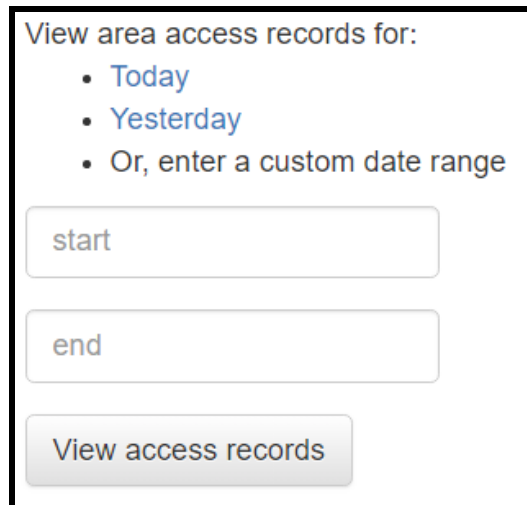

Figure 25.12: Area access new record success message

25.2 View access record

Area access records can be viewed for any custom date range however, two shortcuts for today and yesterday are provided (Figure 25.13).

A form titled "View area access records for:" with three bullet points: "Today", "Yesterday", and "Or, enter a custom date range". Below the bullet points are three input fields: "start", "end", and a "View access records" button.

View area access records for:

- Today
- Yesterday
- Or, enter a custom date range

start

end

View access records

Figure 25.13: Area access view access records

Chapter 25 Area Access (staff and user office only)

To view area access records:

- Set a date range.
- Click the 'Today' quick link to populate the start and end date with the current date (Figure 25.14). The view will automatically update with any records.

Figure 25.14: Area access view record today link

Figure 497 Area access view record today link

- Click the 'Yesterday' quick link to populate the start and end date with the previous days date (Figure 25.15). The view will automatically update with any records.

Figure 25.15: Area access view record yesterday link

- Manually enter a start and end date (Figure 25.16).

Two vertically stacked input fields. The top field is labeled "start" and the bottom field is labeled "end". Both fields are empty and have a light gray border. The entire set of fields is enclosed in a black rectangular border.

Figure 25.16: Area access view record manual date range

Chapter 25 Area Access (staff and user office only)

- * Click in the start and end date dialog boxes directly to bring up the calendar dialog and navigate to the desired start and end date (Figure 25.17).

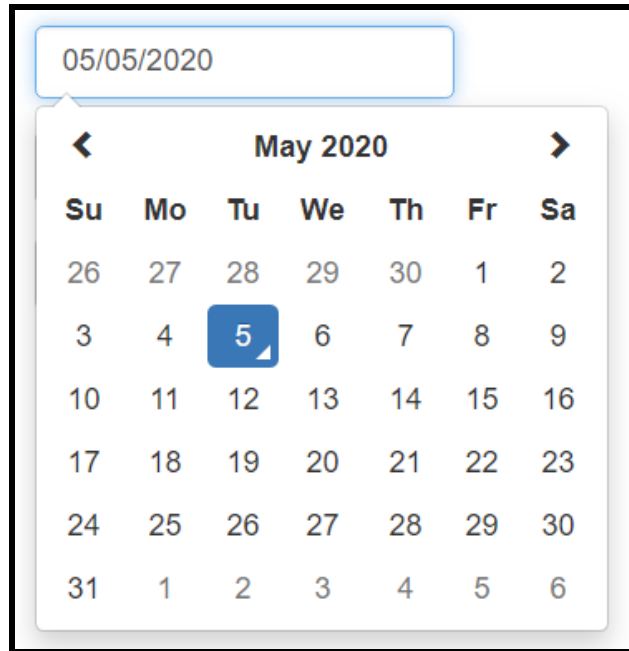

Figure 25.17: Area access view record calendar dialog

- * Click view access records button (Figure 25.18).

Figure 25.18: Area access view record button

Chapter 25 Area Access (staff and user office only)

- The page will update with access records from the selected date range (Figure 25.19). Fields returned are the record identifier, user name, project, start date/time and end date/time. If a user is currently logged into an area, the end will be indicated as “In progress”.

Identifier	User	Project	Start	End
54	Ned Land (ned)	Project 2	Tuesday, May 5th, 2020 @ 12:18 PM	In progress
53	Ned Land (ned)	Project 2	Tuesday, May 5th, 2020 @ 12:17 PM	Tuesday, May 5th, 2020 @ 12:17 PM
52	Captain Nemo (captain)	Cleanroom Eng	Tuesday, May 5th, 2020 @ 12:10 PM	Tuesday, May 5th, 2020 @ 12:10 PM

Figure 25.19: Area access view record data

25.3 Web address

The area access page is accessible at site-address/area_access/. The page is also accessible from the navigation bar by clicking Administration then clicking Area access.

25.4 Mobile device area access page

There are no mobile device views for the area access page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

25.5 Area access page customizations

There are no customizations for the area access page.

CHAPTER 26

Configuration agenda (staff only)

The configuration agenda is an organizational tool for staff to view all required configurations for each configurable tool on the same page and allows the configuration steps to be accomplished without navigating to other pages (Figure 26.1). Two views are available, the default current day and a near future that shows the next business day (configurable). Each tool requiring configuration is displayed and if the near future includes Saturday or Sunday, those days will be automatically included.

Tools that require staff to configure a tool for a user or when the type of usage needs to be tracked can have configurations created. Configurations are created in the configurations table of the database discussed in the Detailed administration → Configurations section 42.16. A history of configurations can be found in the configuration history table of the database discussed in the Detailed administration → Configuration histories section 42.15.

Chapter 26 Configuration agenda (staff only)

Configuration agenda for the near future

Below is a list of reservations which require tool configurations. The reservations are grouped by tool and ordered by start time. Reservations that have a red background were created on short notice, thus there is no guarantee the tool will be configured properly when the user arrives. Reservations that have already started or have no configuration information are excluded. You can also [view reservations for today](#) that will require configuration changes.

CMP

Figure 26.1: Configuration agenda page with today view

26.1 Usage

All configurations required in a day are displayed for each tool in order of nearest to latest. This allows planning without the need to closely monitor the reservation calendar of each tool that requires configuration. To switch to the near future view, click the link in the dialog at the top of the page (Figure 26.2).

Chapter 26 Configuration agenda (staff only)

You can also [view reservations in the near future](#) that will require configuration changes.

Figure 26.2: Configuration agenda future view link

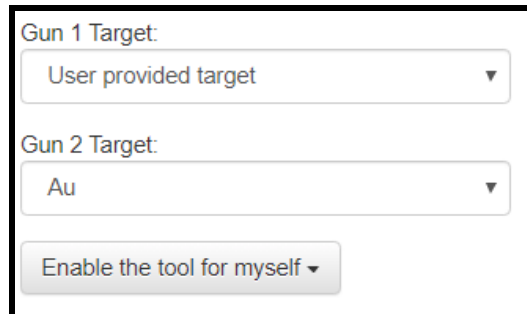

From the near future view, you can switch to the today view by clicking the link in the dialog at the top of the page (Figure 26.3 Configuration agenda today view link).

You can also [view reservations for today](#) that will require configuration changes.

Figure 26.3: Configuration agenda today view link

Each tool displays the reservations on the left and the current tool configuration on the right. The tool name heading is a link to that tool's calendar page.

Configurations can only be changed when the tool is idle. The configurations will be listed with a drop down and a tool enable button will be provided to facilitate quick access (Figure 26.4). Select the new configuration as needed from the drop downs. Updates are automatic and immediate.

The screenshot shows a configuration interface for two tools. The first tool, 'Gun 1 Target', has a dropdown menu with 'User provided target' selected. The second tool, 'Gun 2 Target', has a dropdown menu with 'Au' selected. Below these dropdowns is a button labeled 'Enable the tool for myself' with a small downward arrow.

Figure 26.4: Configuration agenda idle tool

If a tool is enabled, the configuration will be locked, and a disable tool button will be displayed (Figure 26.5). The tool must be disabled to change the

Chapter 26 Configuration agenda (staff only)

configuration however caution should be used to not impair a tool that may be currently running a process.

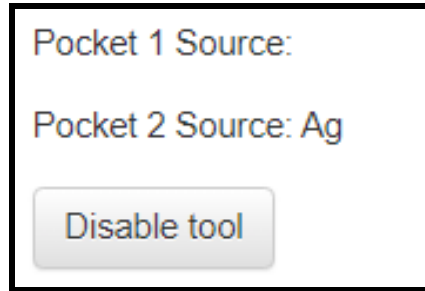

Figure 26.5: Configuration agenda tool in use

In some cases, it might be desirable to charge users for tool configuration changes. The user reservation dialog provides a short cut button to enable the tool on behalf of a user while the configuration is in progress (Figure 26.6).

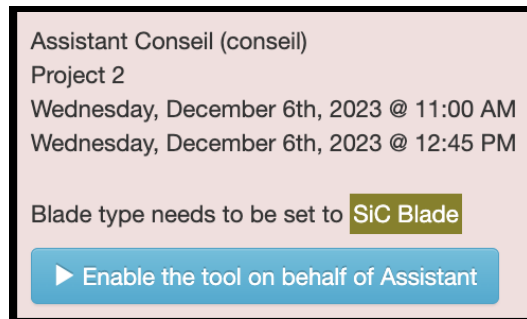

Figure 26.6: Configuration agenda user reservation info

26.2 Web address

The configuration agenda page is accessible at `site-address/configuration_agenda/`. The page is accessible from the navigation bar by clicking Administration then clicking Configuration agenda.

Chapter 26 Configuration agenda (staff only)

26.3 Mobile device configuration agenda page

There are no mobile device views for the configuration agenda page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

26.4 Configuration agenda page customizations

The number of days included in the near future window can be configured in Customization → Tool settings section [40.15](#).

CHAPTER 27

Contracts and procurements

The contracts & procurements page provides a way to manage service contracts, procurements and contractor agreements.

27.1 Setup

To enable this feature, you need to have 'NEMO.apps.contracts' in `INSTALLED_APPS` in your `settings.py`. In addition, for email reminders to be sent, a timed service job must be properly configured and running which is described in the NEMO timed services section [48.3](#).

Chapter 27 Contracts and procurements

27.2 Usage

Select one of the available tabs (service contracts, procurements or contractors) to go to the corresponding list. (Figure 27.1).

General info	Year	Submitted	Awarded	Contract/Requisition number	Start	End	Reminder	Cost	Actions
NEMO	1 of 10	05/01/2023	06/01/2023	234567 890123	07/01/2023	07/01/2024	04/01/2024	123,456.00	Edit Renew
Cleanroom Garments	3 of 5	01/01/2023	02/01/2023	345678 901234	03/01/2023	02/29/2024	02/01/2024	12,345.00	Edit Renew
JEOL	1 of 5	11/01/2021	12/01/2021	123456 789012	01/01/2022	12/31/2022	10/01/2022	123,456.00	Notes Edit Renew

Figure 27.1: Contracts and procurements

27.2.1 Permissions

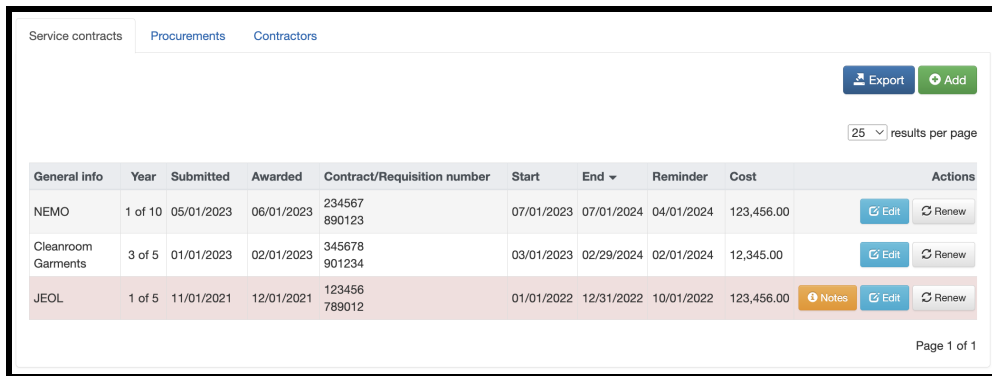

Permissions for service contracts, procurements and contractor agreements are controlled the following way:

- read/view permissions: you can customize which staff type (User of-
fice, Accounting officer, Technical staff) can view contracts by going to
Customization → Contracts & procurements settings, see section 40.3.
- add/edit/renew permissions: those permissions are controlled by Django's
internal permission system (can add procurements, can change service
contracts etc.). Admins automatically have all permissions, other users
will need to be given those permissions in Detailed administration →
Users, see section 42.68.3 (Figure 42.184)

Chapter 27 Contracts and procurements

27.2.2 Service contracts tab

The service contracts tab allows users to see, add, edit and renew service contracts (Figure 27.2).

General info	Year	Submitted	Awarded	Contract/Requisition number	Start	End	Reminder	Cost	Actions
NEMO	1 of 10	05/01/2023	06/01/2023	234567 890123	07/01/2023	07/01/2024	04/01/2024	123,456.00	Edit Renew
Cleanroom Garments	3 of 5	01/01/2023	02/01/2023	345678 901234	03/01/2023	02/29/2024	02/01/2024	12,345.00	Edit Renew
JEOL	1 of 5	11/01/2021	12/01/2021	123456 789012	01/01/2022	12/31/2022	10/01/2022	123,456.00	Notes Edit Renew

Figure 27.2: Service contracts

- To add a service contract, click on the Add button (Figure 27.3) and you will be redirected to the corresponding section in Detailed administration → Service contracts, section 44.1.2

Figure 27.3: Add service contract

- To edit a service contract, click on the Edit button (Figure 27.4) and you will be redirected to the corresponding section in Detailed administration → Service contracts, section 44.1.2

Figure 27.4: Edit service contract

Chapter 27 Contracts and procurements

- To renew a service contract, click on the Renew button (Figure 27.5) which will automatically create a new service contract with the same name, adding 1 to the current year. If the service contract is in its last year (5 out of 5 for example), a new service contract will be created starting back at year 1.

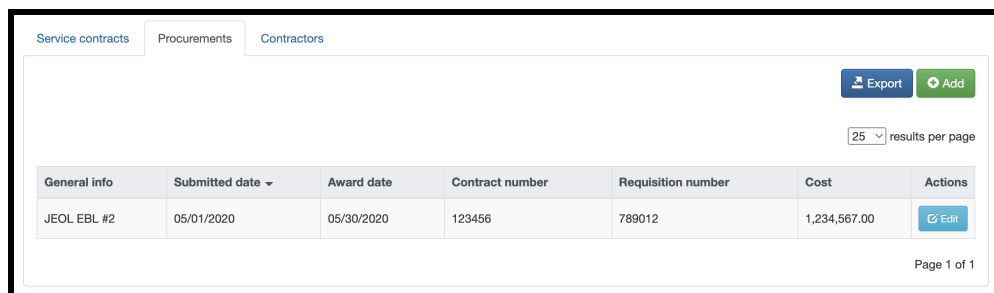

Figure 27.5: Renew service contract

- Expired service contracts, defined as service contracts with an end date in the past, will be displayed with a red background.
- Contracts in their renewal phase (between their reminder date and the end date) will be displayed with an orange background.

27.2.3 Procurements tab

The Procurements tab allows users to see, add and edit procurements (Figure 27.6).

General info	Submitted date	Award date	Contract number	Requisition number	Cost	Actions
JEOL EBL #2	05/01/2020	05/30/2020	123456	789012	1,234,567.00	Edit

Figure 27.6: Procurements

- To add a procurement, click on the Add button (Figure 27.7) and you will

Chapter 27 Contracts and procurements

be redirected to the corresponding section in Detailed administration → Procurements, section [44.2.2](#)

Figure 27.7: Add procurement

27.2.4 Contractors tab

The contractors tab allows users to see, add, edit and renew contractor agreements (Figure [27.8](#)).

The screenshot shows a web interface with three tabs: "Service contracts", "Procurements", and "Contractors". The "Contractors" tab is active. In the top right corner, there are "Export" and "Add" buttons. Below them is a dropdown menu set to "25" results per page. The main content is a table with the following data:

Contractor	Contract	Contract number	Start	End	Reminder	Actions
Matt	NEMO	234567	07/01/2023	07/01/2024	05/01/2024	Edit Renew
John	JEOL	123456	06/01/2022	12/31/2022	11/01/2022	Notes Edit Renew

Page 1 of 1

Figure 27.8: Contractor agreements

- To add a contractor agreement, click on the Add button (Figure [27.9](#)) and you will be redirected to the corresponding section in Detailed administration → Contractor agreements, section [44.3.2](#).

Figure 27.9: Add contractor agreement

Chapter 27 Contracts and procurements

- To edit a contractor agreement, click on the Edit button (Figure 27.10) and you will be redirected to the corresponding section in Detailed administration → Contractor agreements, section [44.3.2](#)

Figure 27.10: *Edit contractor agreement*

- To renew a contractor agreement, click on the Renew button (Figure 27.11) which will automatically create a new contractor agreement with the same name, starting on the end date of the previous agreement.

Figure 27.11: *Renew contractor agreement*

- Expired contractor agreements, defined as agreements with an end date in the past, will be displayed with a red background.
- Contractor agreements in their renewal phase (in between their reminder date and the end date) will be displayed with an orange background.

27.3 Export

Service contracts, procurements and contractor agreements can be exported by clicking the “Export” button on each respective tab (Figure 27.12). The data is exported in CSV format.

Chapter 27 Contracts and procurements

Figure 27.12: Export button

27.4 Web address

The contracts and procurements page is accessible at `site-address/service_contracts/`. The page is accessible from the navigation bar by clicking Administration then clicking Contracts & procurements.

27.5 Mobile device contracts and procurement page

There are no mobile device views for the contracts and procurements page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

27.6 Contract and procurements page customizations

Some contracts & procurements parameters (which staff roles have view access and the default label for contractors without a contract associated with them), can be customized in Customization → Contracts & procurements settings, see section 40.3. Add and change permissions for contracts are controlled directly in Detailed administration → Users section 42.68

CHAPTER 28

Email (any staff role)

The email page provides staff with an interface to send emails to users. The user groups available are users who have an account in NEMO, users qualified on certain tools, users who have an upcoming reservation on certain tools, users with access to certain areas, users working on a project, or all users working under an account (Figure 28.1).

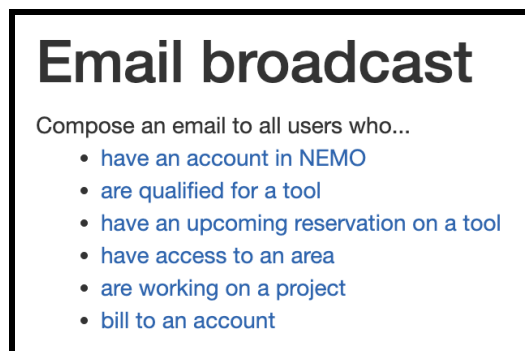

Figure 28.1: *Email page*

Chapter 28 Email (any staff role)

28.1 Usage

The email broadcast process starts with selecting the group of users to email, making some recipient selections, adding email content, then sending as detailed in the sections below.

28.1.1 Group selection

Click one of the user group links (Figure 28.2).

- [have an account in NEMO](#)
- [are qualified for a tool](#)
- [have an upcoming reservation on a tool](#)
- [have access to an area](#)
- [are working on a project](#)
- [bill to an account](#)

Figure 28.2: *Email groups*

A search dialog will open below the group list. Enter the tool, area, project, or account depending on the link selected (Figure 28.3).

Figure 28.3: *Email selection*

Results are returned as characters are typed and the item of interest can be selected at any time by clicking on the list (Figure 28.4).

Chapter 28 Email (any staff role)

Figure 28.4: Email selection list

Upon selecting the item of interest, the compose email page will be opened (Figure 28.5).

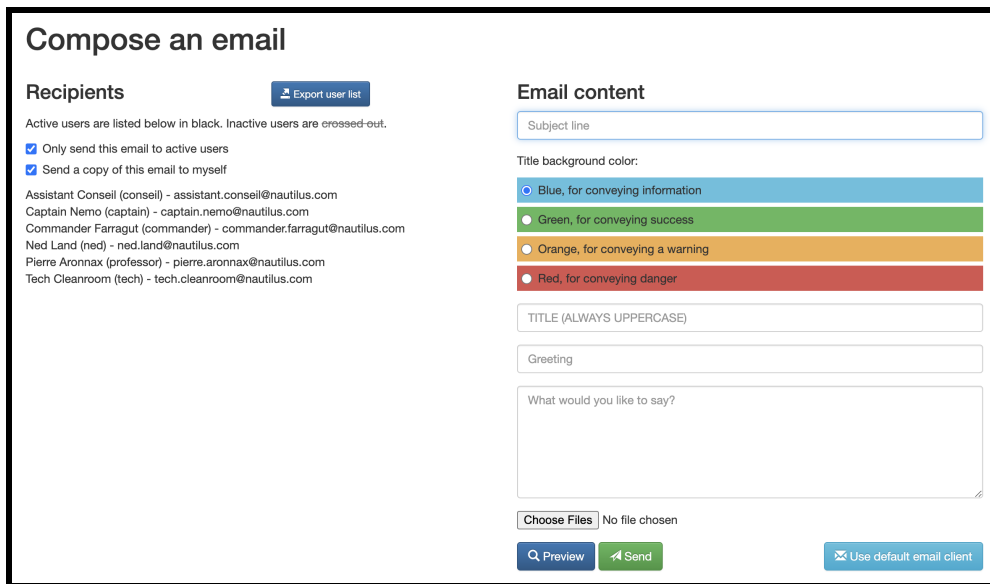

Figure 28.5: Email compose email page

If an email template has not been loaded yet, an error message will be displayed preventing the process from continuing (Figure 28.6).

Chapter 28 Email (any staff role)

Figure 28.6: *Email compose error page*

28.1.2 Recipients

The recipients section shows all users in the group chosen and provides options to only include active users and to copy the sender (Figure 28.7).

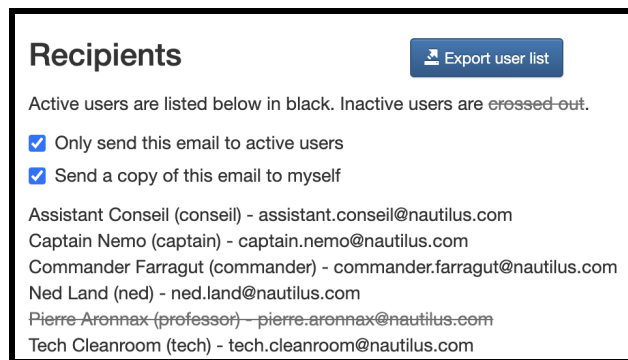

Figure 28.7: *Email recipients dialog*

By default, only active users will receive the email. Uncheck the checkbox to include all users (Figure 28.8).

Figure 28.8: *Email recipients active user checkbox*

By default, the staff member sending the message will be copied. Uncheck the checkbox to not be copied (Figure 28.9).

Chapter 28 Email (any staff role)

Figure 28.9: *Email recipients copy sender checkbox*

The list of recipients can be exported to use outside of NEMO, for example to load into your preferred email client. Click on the “export user list” button to get a CSV file with first name, last name, username, and email for each recipient (Figure 28.10).

Figure 28.10: *Email recipients export user list*

Chapter 28 Email (any staff role)

28.1.3 Email content

The mail content section provides options for subject, title, title color, greeting, and body (Figure 28.11).

Email content

Subject line

Title background color:

- Blue, for conveying information
- Green, for conveying success
- Orange, for conveying a warning
- Red, for conveying danger

TITLE (ALWAYS UPPERCASE)

Greeting

What would you like to say?

Choose Files No file chosen

Figure 28.11: *Email content dialog*

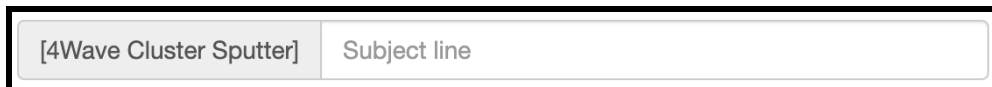

The subject line will appear as the subject in the email (Figure 28.12). The topic will be included if only one item is selected (Figure 28.13).

Chapter 28 Email (any staff role)

A rectangular dialog box with a thin border and a light gray background. The text "Subject line" is centered within the box.

Figure 28.12: *Email content subject dialog box*

A rectangular dialog box with a thin border and a light gray background. On the left side, there is a small gray box containing the text "[4Wave Cluster Sputter]". To the right of this box, the text "Subject line" is centered.

Figure 28.13: *Email content subject dialog box with topic*

The title background color can be selected to emphasize the importance of the email (Figure 28.14).

A dialog box titled "Title background color:". Below the title are four radio button options, each with a colored background bar to its right:

- Blue, for conveying information
- Green, for conveying success
- Orange, for conveying a warning
- Red, for conveying danger

Figure 28.14: *Email content title background checklist*

The title text is entered in the title dialog box (Figure 28.15).

A rectangular dialog box with a thin border and a light gray background. The text "TITLE (ALWAYS UPPERCASE)" is centered within the box.

Figure 28.15: *Email content title dialog box*

The greeting is entered in the greeting dialog box (Figure 28.16).

Chapter 28 Email (any staff role)

Figure 28.16: *Email content greeting dialog box*

Chapter 28 Email (any staff role)

The email body is entered in the “what would you like to say?” dialog box (Figure 28.17).

A screenshot of a dialog box with a white background and a black border. The text "What would you like to say?" is displayed in a light gray font at the top left. The rest of the box is empty, with a small double-slash icon in the bottom right corner.

Figure 28.17: *Email content body dialog box*

Files can be attach using the “Choose files” button (Figure 28.18).

A screenshot of a horizontal dialog box with a black border. On the left, there is a button labeled "Choose Files". To the right of the button, the text "No file chosen" is displayed.

Figure 28.18: *Email attach files button*

Chapter 28 Email (any staff role)

28.1.4 Preview Email

Clicking the preview button will render the email (Figure 28.19). Changes can be made in the email form above and the preview will be updated each time the preview button is clicked.

Figure 28.19: *Email preview button*

The email preview will render below the preview button (Figure 28.20).

Chapter 28 Email (any staff role)

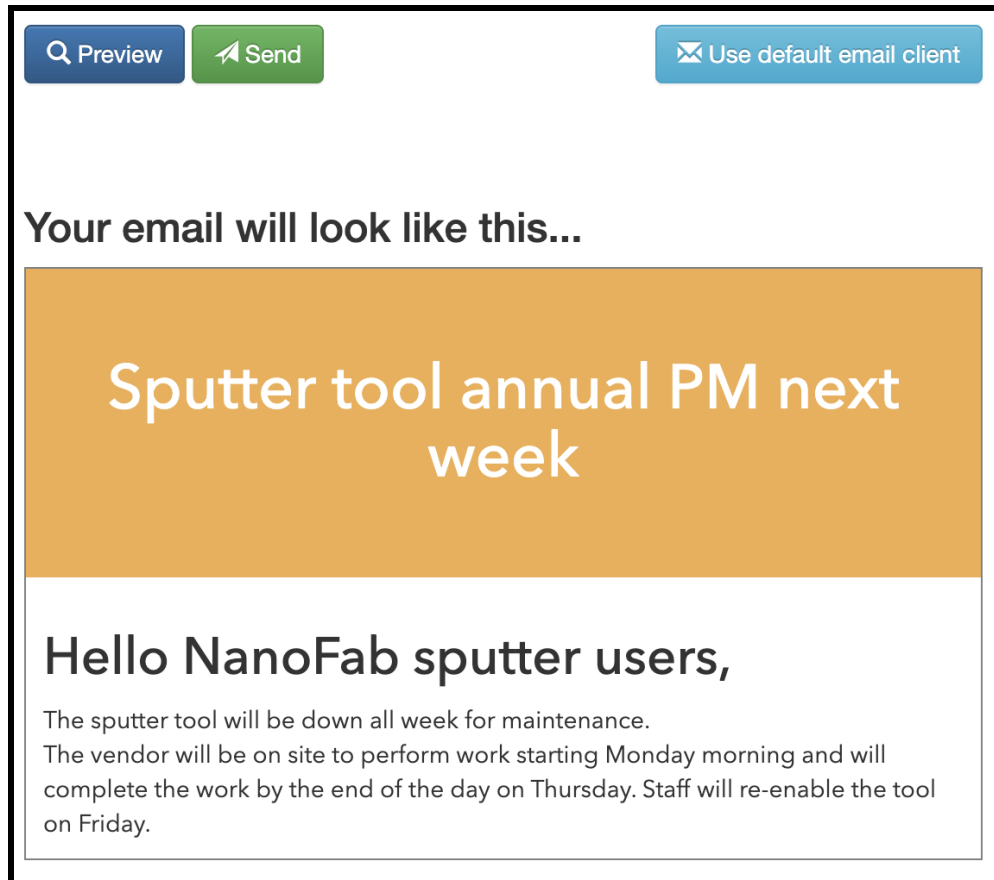

Figure 28.20: *Email rendered preview*

28.1.5 Send Email

Clicking the send button will send the message to all recipients selected (Figure 28.21).

Figure 28.21: *Email send button*

Chapter 28 Email (any staff role)

Upon successful completion, a message will be displayed (Figure 28.22).

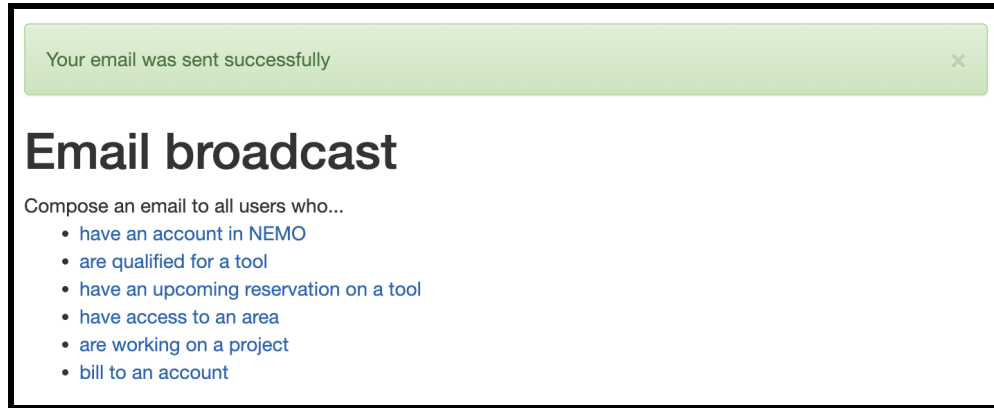

Figure 28.22: *Email send success*

28.1.6 Send using default email client

Clicking the use default email client button will open the default email application set up on your computer and load up the recipients as bcc and the subject, title, greeting and message (Figure 28.23).

Figure 28.23: *Email use default email client button*

This feature only works if the total characters for all email addresses is less than 2000 characters. This is a limitation of the MAILTO browser functionality. The button will be disabled if that limit is reached (Figure 28.24).

Chapter 28 Email (any staff role)

Figure 28.24: *Email use default email client button disabled*

28.2 Web address

The configuration agenda page is accessible at `site-address/email_broadcast/`. The page is accessible from the navigation bar by clicking Administration then clicking Email.

28.3 Mobile device email page

There are no mobile device views for the email page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

28.4 Email page customizations

Emails require a generic email template that is used to format messages. The email template is configured in the Customization → Generic email page, see subsection [40.5.13](#).

CHAPTER 29

Impersonate (admin/special permission only)

The impersonate feature allows an admin or user with the “can_impersonate_users” permission to impersonate any active user (Figure 29.1). This feature is useful to replicate problems a user may be having accessing different features of NEMO.

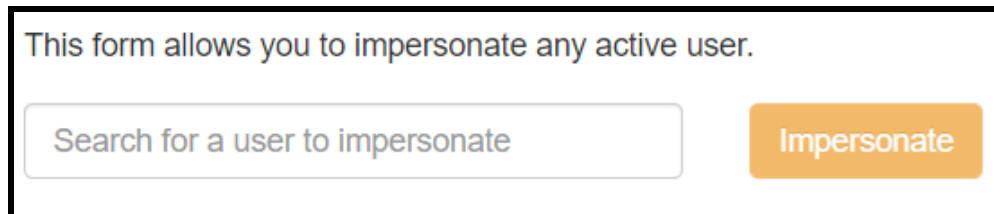

A screenshot of a web form for impersonating a user. The form is enclosed in a black rectangular border. At the top, it contains the text "This form allows you to impersonate any active user." Below this text, there is a light gray search input field with the placeholder text "Search for a user to impersonate". To the right of the search field is an orange button with the text "Impersonate" in white.

Figure 29.1: *Impersonate page*

Chapter 29 Impersonate (admin/special permission only)

29.1 Usage

To impersonate a user:

- Enter the users name in the search dialog box (Figure 29.2).

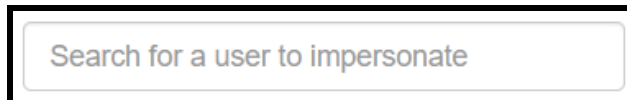

A rectangular search dialog box with a light gray background and a thin black border. Inside the box, the text "Search for a user to impersonate" is displayed in a light gray font.

Figure 29.2: *Impersonate search dialog*

- A list of users is returned as characters are typed (Figure 29.3). The user can be selected from the return list at any time by clicking the users name.

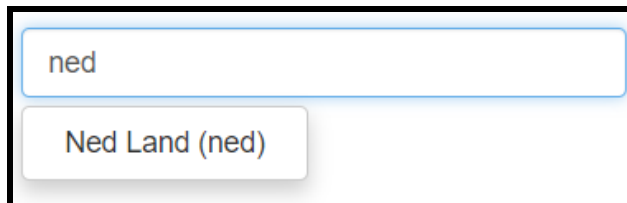

A search dialog box showing a search input field with the text "ned" and a dropdown list below it. The dropdown list contains one item: "Ned Land (ned)".

Figure 29.3: *Impersonate search dialog return list*

- If the incorrect user is selected, use the backspace to delete characters and names will be returned with each character deleted.
- Click the impersonate button to begin impersonating the selected user (Figure 29.4).

Figure 29.4: *Training record button*

Chapter 29 Impersonate (admin/special permission only)

- NEMO will return to the landing page and a header will appear at the top of each page indicating that you are currently impersonating another user (Figure 29.5). NEMO will act as if the selected user is currently logged in.

Figure 29.5: *Impersonate page header*

- Click the switch back button on the impersonate page header to return to normal operation (Figure 29.6).

Figure 29.6: *Impersonate header switch back button*

29.2 Web address

The impersonate page is accessible at site-address/impersonate/. The page is accessible from the navigation bar by clicking Administration then clicking Impersonate.

29.3 Mobile device impersonate page

There are no mobile device views for the impersonate page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

Chapter 29 Impersonate (admin/special permission only)

29.4 Impersonate page customizations

There are no customizations for the impersonate page.

CHAPTER 30

Maintenance (staff only)

The maintenance page provides staff with a list of all pending and recently closed tasks on a single page which is useful for determining priorities across the lab. When first opening the page, it defaults to the pending tasks tab.

30.1 Pending tasks

The pending tasks tab displays urgency, severity, tool name, problem category, the last update, date created, and description for each pending task (Figure 30.1). The listing is ordered by urgency then by date created, oldest first. The list can be sorted by any heading except description by clicking the heading name.

Chapter 30 Maintenance (staff only)

Maintenance						
Urgency	Severity	Tool	Category	Last updated	Created	Description
High		Ellipsometer			2 weeks, 5 days ago	Measurements incorrect.
High		Microscope		1 week, 2 days ago by Captain	2 weeks, 5 days ago	Smoke coming from lamp housing when on.
High		Contact Aligner	Tool Error		1 week, 2 days ago	it doesnt work
High		Spinner	Process problem		53 seconds ago	Wafers are flying off the spinner.
Normal		PECVD	Wafer handling problem	1 week, 2 days ago by Captain	2 weeks, 5 days ago	Wafers floating on platen.
Normal		Evaporator			2 weeks, 2 days ago	test problem
Normal		Fluorine Etch	Tool Error		a minute ago	The tool errors with temperature alarms when idle

Figure 30.1: Maintenance pending tasks

Clicking on the row of any pending task will display the task details on the right side of the screen (Figure 30.2). The task details view provides important links and information about the current task to streamline access for updates.

Chapter 30 Maintenance (staff only)

Microscope task

Primary tool owner: Captain Nemo (captain)

Created by Captain Nemo (captain) on Friday, April 17th, 2020 @ 12:31 PM (2 weeks, 5 days ago).
Last updated by Captain Nemo (captain) on Monday, April 27th, 2020 @ 2:11 PM (1 week, 2 days ago).

Urgency

No file chosen

Problem description
Smoke coming from lamp housing when on.

Progress
On Monday, April 27th, 2020 @ 2:09 PM Captain Nemo (captain) updated this task:
Possible frayed wires to lamp socket. Will test socket and wiring.
On Monday, April 27th, 2020 @ 2:09 PM, Captain Nemo (captain) set the status of this task to "Repair".

Figure 30.2: Maintenance pending task details

Chapter 30 Maintenance (staff only)

The pending task details contains the following information:

- Tool name (Figure 30.3)

Microscope task

Figure 30.3: Maintenance pending task tool name

- Primary tool owner (Figure 30.4)

Primary tool owner: Captain Nemo (captain)

Figure 30.4: Maintenance pending task primary tool owner

- Quick link buttons – quick link buttons are provided to streamline common operations while performing maintenance to resolve tasks.
 - Enable/disable the tool.
 - Enable tool, single project – click enable tool to start logging time (Figure 30.5).

Enable tool

Figure 30.5: Maintenance pending task enable tool button

Chapter 30 Maintenance (staff only)

- * Enable tool, multiple projects – click enable button to reveal dropdown list of projects (Figure 30.6). Select a project from the list to start logging time (Figure 30.7).

Figure 30.6: Maintenance pending task enable tool button multiple projects

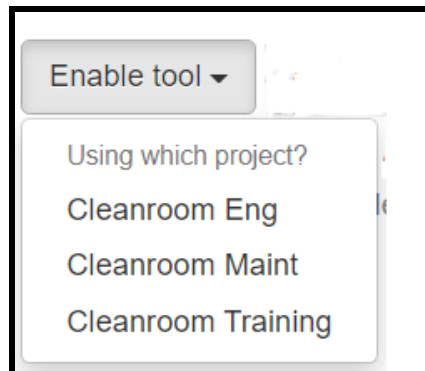

Figure 30.7: Maintenance pending task multiple projects list

- * Disable tool – click to stop logging time on a tool (Figure 30.8). In the maintenance mode of operation, the disable tool is immediate, and the user is not prompted for logout questions.

Figure 30.8: Maintenance pending task disable tool button

Chapter 30 Maintenance (staff only)

- Navigate to the calendar page for the tool – this link will open the calendar page in a new tab and select the task subject tool (Figure 30.9).

Figure 30.9: *Maintenance pending task calendar page link*

- Navigate to the tool control page for the tool – this link will open the tool control page in a new tab and select the task subject tool (Figure 30.10).

Figure 30.10: *Maintenance pending task tool control page link*

- Who created the task and when (Figure 30.11)

Created by Captain Nemo (captain) on Friday, April 17th, 2020 @ 12:31 PM (2 weeks, 5 days ago).

Figure 30.11: *Maintenance pending task creation info*

- Who last updated the task and when (Figure 30.12)

Last updated by Captain Nemo (captain) on Monday, April 27th, 2020 @ 2:11 PM (1 week, 2 days ago).

Figure 30.12: *Maintenance pending task update info*

Chapter 30 Maintenance (staff only)

- Update the task
 - The current urgency is displayed (Figure 30.13). Shutdowns and safety problems default to high urgency while problems default to normal urgency. To update, use the dropdown to change the task urgency to high, normal, or low (Figure 30.14).

Figure 30.13: *Maintenance pending task urgency*

Figure 30.14: *Maintenance pending task urgency dropdown*

Chapter 30 Maintenance (staff only)

- The current problem category is displayed only if task categories have been defined in the task categories table of the database (Figure 30.15). Task categories are discussed in the Detailed administration → Task categories section 42.54. To update, use the dropdown to change the problem category (Figure 30.16).

A screenshot of a web form element. It consists of a rectangular box with a black border. On the left side of the box, the text "Problem category" is displayed in a standard font. To the right of this text is a white dropdown menu with a small downward-pointing triangle icon on its right edge.

Figure 30.15: *Maintenance pending task problem category*

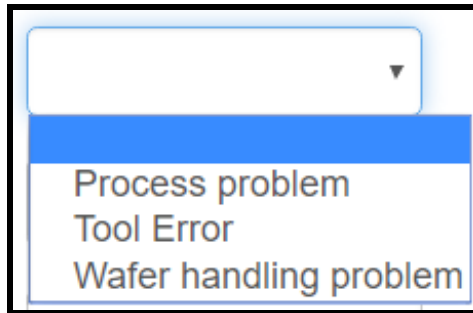

A screenshot of a dropdown menu. The menu is open, showing three options. The top option, "Process problem", is highlighted with a blue background. Below it are "Tool Error" and "Wafer handling problem". The menu is enclosed in a black border.

Figure 30.16: *Maintenance pending task problem category dropdown*

Chapter 30 Maintenance (staff only)

- The current status is displayed only if task statuses have been defined in the task statuses table of the database (Figure 30.17). Task statuses are discussed in the Detailed administration → Task statuses section 42.55. To update, use the dropdown to change the task status (Figure 30.18).

Figure 30.17: *Maintenance pending task status*

Figure 30.18: *Maintenance pending task status dropdown*

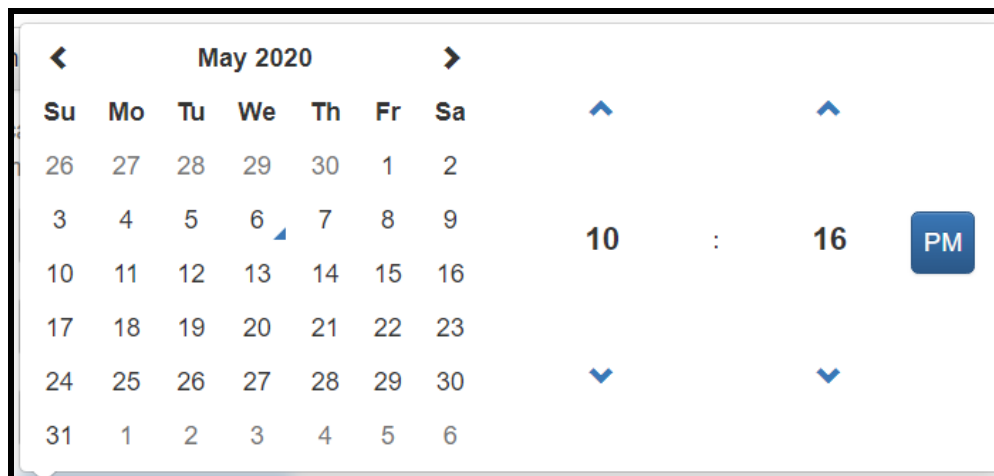

Chapter 30 Maintenance (staff only)

- The current estimated resolution time is displayed (Figure 30.19). To update, click the dialog box to open the clock-calendar dialog (Figure 30.20). Select the new date and time estimate. The dialog box is updated as the calendar and clock are clicked.

A screenshot of a web form element. It consists of a rectangular box with a black border. On the left side of the box, the text "Estimated resolution" is displayed in a standard sans-serif font. To the right of this text is a white rectangular input field with a thin grey border.

Figure 30.19: Maintenance pending task estimated resolution

A screenshot of a clock/calendar dialog box. The calendar shows the month of May 2020. The days of the week are abbreviated as Su, Mo, Tu, We, Th, Fr, Sa. The dates are arranged in a grid. The current date is 6th May, indicated by a small blue triangle. To the right of the calendar is a digital clock display showing the time 10:16 PM. The hour and minute digits are large and black, and the PM indicator is in a blue box. There are blue up and down arrows on either side of the clock display to adjust the time.

Figure 30.20: Maintenance pending task estimated resolution clock/calendar

Chapter 30 Maintenance (staff only)

- The current shutdown status is displayed (Figure 30.21). To update click the checkbox to select or deselect as needed.

Figure 30.21: *Maintenance pending task shutdown status*

- The current safety hazard status is displayed (Figure 30.22). To update click the checkbox to select or deselect as needed.

Figure 30.22: *Maintenance pending task safety hazard status*

- Use the radio button to select update or resolve for the task (Figure 30.23). Selecting resolve will show the resolution category below the details dialog if resolution categories have been defined.

Figure 30.23: *Maintenance pending task update or resolve radio*

Chapter 30 Maintenance (staff only)

- Provide update or resolution details that describe any actions taken (Figure 30.24).

Figure 30.24: *Maintenance pending task update details*

- The resolution category is displayed only if the resolve radio button is selected, and task categories have been defined in the task categories table of the database (Figure 30.25). Task categories are discussed in the Detailed administration → Task categories section 42.54. To update, use the dropdown to change the resolution category (Figure 30.26).

Figure 30.25: *Maintenance pending task resolution category*

Chapter 30 Maintenance (staff only)

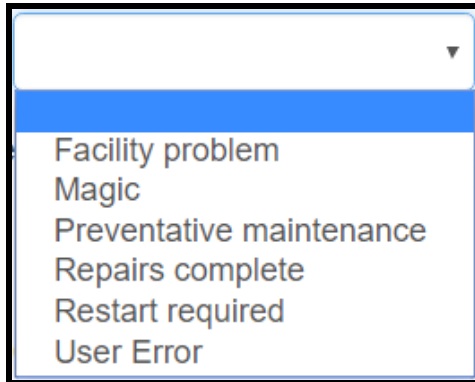

Figure 30.26: Maintenance pending task resolution category dropdown

- The image listing is only displayed if images have been uploaded previously (Figure 30.27). Clicking on an image will open it in a new tab.

Figure 30.27: Maintenance pending task uploaded images

- The choose files dialog may be used to upload any relevant pictures to show details that support the description (Figure 30.28). Clicking the button activates a standard file selection dialog. Multiple files can be uploaded. Note: it is good practice to make note of the files in the description to link the file to the text.

Figure 30.28: Maintenance pending task upload new images

Chapter 30 Maintenance (staff only)

- Click the save button to commit the update/resolution (Figure 30.29).

Figure 30.29: *Maintenance pending task save button*

- The problem description is displayed for information (Figure 30.30).

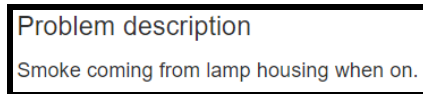

Figure 30.30: *Maintenance pending task problem description*

- The progress to date is displayed for information (Figure 30.31).

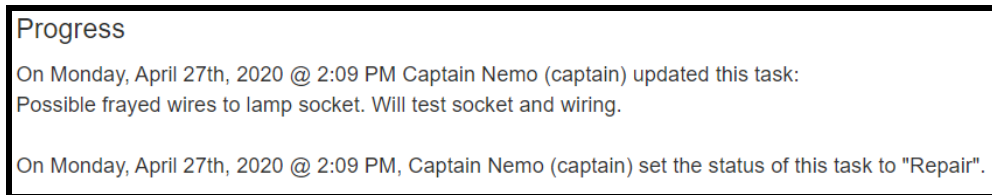

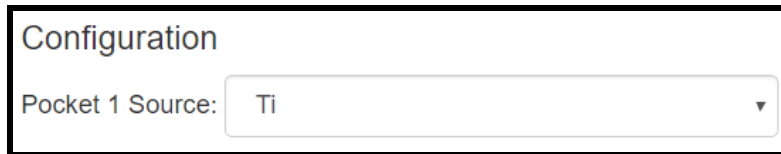

Figure 30.31: *Maintenance pending task progress*

Chapter 30 Maintenance (staff only)

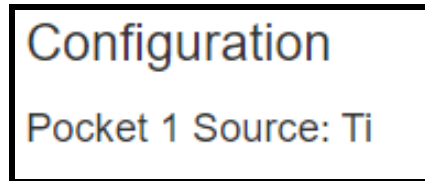

- Tool configuration
 - Disabled tool — tool configurations are changeable (Figure 30.32). Use the dropdown to select a different configuration from the list. Changes take effect immediately on selection.

The image shows a rectangular box with a black border. Inside the box, the word "Configuration" is displayed in a large, dark font at the top. Below it, the text "Pocket 1 Source:" is followed by a dropdown menu. The dropdown menu is currently open, showing the selected option "Ti" and a small downward-pointing triangle on the right side of the menu.

Figure 30.32: *Maintenance pending task configuration update*

- Enabled tool – the current tool configuration is displayed for information (Figure 30.33).

The image shows a rectangular box with a black border. Inside the box, the word "Configuration" is displayed in a large, dark font at the top. Below it, the text "Pocket 1 Source: Ti" is displayed in a smaller, dark font.

Figure 30.33: *Maintenance pending task configuration*

Chapter 30 Maintenance (staff only)

30.2 Closed tasks

The closed tasks tab displays urgency, severity, tool name, problem category, date created, date resolved, and description for up to 20 closed tasks (Figure 30.34). The listing is ordered by date closed, more recent closure first. The list can be sorted by any heading except description by clicking the heading name.

Maintenance						
Pending Closed						
Urgency	Severity	Tool	Category	Created	Resolved	Description
High		Ellipsometer		Friday, April 17th, 2020 @ 12:29 PM	Wednesday, May 6th, 2020 @ 9:25 PM	Measurements incorrect.
High		Profilometer		Wednesday, April 1st, 2020 @ 3:25 PM	Wednesday, May 6th, 2020 @ 8:56 PM	Monthly PM complete, nothing unusual observed.
Normal		Fluorine Etch		Monday, April 20th, 2020 @ 8:18 PM	Monday, April 27th, 2020 @ 4:22 PM	trouble
Normal		Sputter	Tool Error	Thursday, April 23rd, 2020 @ 3:52 PM	Monday, April 27th, 2020 @ 10:30 AM	Chamber door is hard to close
High		Sputter	Process problem	Thursday, April 23rd, 2020 @ 3:51 PM	Monday, April 27th, 2020 @ 10:30 AM	Cant get the RF to strike, looks like bad vacuum
Normal		Sputter	Wafer handling problem	Friday, April 24th, 2020 @ 4:59 PM	Monday, April 27th, 2020 @ 10:30 AM	Stuck in vacuum transfer

Figure 30.34: Maintenance closed tasks

Chapter 30 Maintenance (staff only)

Clicking on the row of any closed task will display the task details on the right side of the screen (Figure 30.35).

PECVD task

Created by Captain Nemo (captain) on Friday, April 17th, 2020 @ 12:30 PM (2 weeks, 5 days ago).
Urgency: normal
Problem category: wafer handling problem

Problem description

Wafers floating on platen.

images:

- [2020-04-27_pecvd_01.png](#)

Progress

On Monday, April 20th, 2020 @ 8:53 PM Captain Nemo (captain) updated this task:
Tested pump down curve. Need new soft pump valve, on order will arrive 5/6/2020.

On Monday, April 27th, 2020 @ 2:13 PM, Captain Nemo (captain) set the status of this task to "Triage".

Resolved by Captain Nemo (captain) on Wednesday, May 6th, 2020 @ 9:39 PM

Resolution category: repairs complete
Parts arrived and were installed. System tested and operating normally.

Figure 30.35: Maintenance closed task details

All details and updates are listed including the initial task information, problem description, progress updates, and resolution information. Any images associated with the task are linked and can be open by clicking the links.

Chapter 30 Maintenance (staff only)

30.3 Web address

Web address The maintenance page is accessible at site-address/maintenance/. For example, www.nemo.com/maintenance/. The page is accessible from the navigation bar by clicking Administration then clicking Maintenance.

30.4 Mobile device maintenance page

There are no mobile device views for the maintenance page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

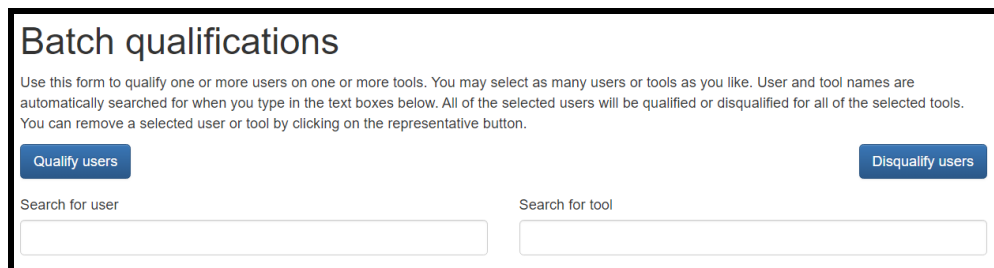

30.5 Maintenance page customizations

- Tools for which to display maintenance tasks can be limited to a subset of tools in User preferences → Tool maintenance and notifications, see section [19.1.6](#)
- The number of closed tasks returned is set in the maintenance.py file, maintenance function, `closed_tasks = statement`. Change `[:20]` to the number of closed tasks to return.

CHAPTER 31

Qualifications (staff only)

The qualifications page provides a convenient interface for performing batch qualification or disqualification for one or more users on one or more tools (Figure 31.1).

Batch qualifications

Use this form to qualify one or more users on one or more tools. You may select as many users or tools as you like. User and tool names are automatically searched for when you type in the text boxes below. All of the selected users will be qualified or disqualified for all of the selected tools. You can remove a selected user or tool by clicking on the representative button.

Search for user Search for tool

Figure 31.1: *Qualifications page*

Chapter 31 Qualifications (staff only)

31.1 Tool qualifications

Users can be qualified on tools through several interfaces within NEMO. Each has its particular value.

- Tool control page discussion [6](#) – users may be qualified or disqualified one at a time on the tool displayed. If the selected tool is configured to grant a physical access level to the user upon qualification, the users access level will be updated.
- Qualifications page discussion [31](#) – many users may be qualified or disqualified on many tools at the same time. If a selected tool is configured to grant a physical access level to the user upon qualification, the users access level will be updated.
- Training page discussion [37](#) – many users may be qualified on many tools at the same time. In addition, training type and time will be recorded. If a selected tool is configured to grant a physical access level to the user upon qualification, the users access level will be updated.
- Users page discussion [38](#) – the selected user may be qualified or disqualified on one tool at a time. The users physical access level is not updated.
- Tool table in the database discussion [42.61](#) – many users may be qualified or disqualified on a single tool. The users physical access level is not updated.

Chapter 31 Qualifications (staff only)

31.2 Usage

31.2.1 Select users

- Select one or more users by typing the first users name in the search for user dialog (Figure 31.2).

A rectangular dialog box with a black border. At the top left, it says "Search for user". Below this is a single-line text input field that is currently empty.

Figure 31.2: *Qualifications user search dialog*

- Results are returned as characters are typed and the name of interest can be selected at any time by clicking on the list (Figure 31.3).

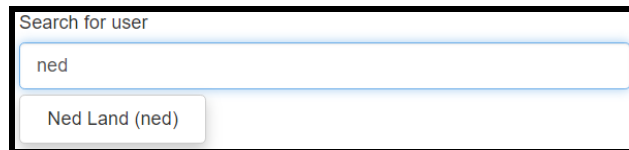

A rectangular dialog box with a black border. At the top left, it says "Search for user". Below this is a text input field containing the text "ned". Underneath the input field is a list of search results, with the first item being "Ned Land (ned)".

Figure 31.3: *Qualifications user search dialog return list*

- After clicking the user will be listed below the search dialog (Figure 31.4).

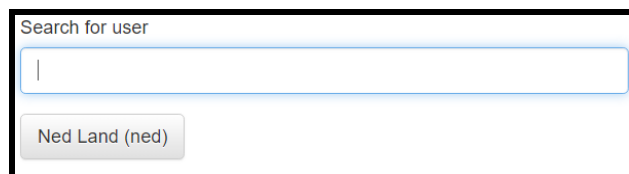

A rectangular dialog box with a black border. At the top left, it says "Search for user". Below this is a text input field containing a vertical cursor. Underneath the input field is a list of search results, with the first item being "Ned Land (ned)".

Figure 31.4: *Qualifications user search name added*

Chapter 31 Qualifications (staff only)

- If a user is selected by mistake, click the users name below the search dialog to remove them from the list (Figure 31.5).

Figure 31.5: *Qualifications user search name button*

- Repeat for each user to be qualified or disqualified.

31.2.2 Select tools

- Select one or more tools or tool groups by typing the tool name in the search for tool dialog (Figure 31.6).

Figure 31.6: *Qualifications tool search dialog*

- Results are returned as characters are typed and the tool or tool group of interest can be selected at any time by clicking on the list (Figure 31.7).

Figure 31.7: *Qualifications tool search return list*

Chapter 31 Qualifications (staff only)

- After clicking the tool or tool group will be listed below the search dialog (Figure 31.8).

Figure 31.8: *Qualifications tool search tool added*

- If a tool or tool group is selected by mistake, click the tool name below the search dialog to remove it from the list (Figure 31.9).

Figure 31.9: *Qualifications tool search name button*

- Repeat for each tool or tool group to be qualified or disqualified.

31.2.3 Qualify or disqualify users

- Qualify users – click the qualify users button to qualify the selected users on the selected tools (Figure 31.10). If a tool is configured to grant a physical access level to the user upon qualification, the users access level will be updated. Granting access levels for tools is discussed in the Detailed administration → Tools section 42.61.

Figure 31.10: *Qualifications qualify button*

Chapter 31 Qualifications (staff only)

- Disqualify users – click the disqualify users button to disqualify the selected users on the selected tools (Figure 31.11).

Figure 31.11: *Qualifications disqualify button*

- Change status – upon selection of either qualify or disqualify, the selected updates will be made. A success message will be shown (Figure 31.12). Click the continue button to return to the NEMO home page. Note: to be successful, at least one user and one tool must be selected. If not, the user will be prompted to correct the problem.

Figure 31.12: *Qualifications success message*

Chapter 31 Qualifications (staff only)

31.3 Web address

The qualifications page is accessible at site-address/qualifications/. The page is accessible from the navigation bar by clicking Administration then clicking Qualifications.

31.4 Mobile device qualifications page

There are no mobile device views for the qualifications page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

31.5 Qualifications page customizations

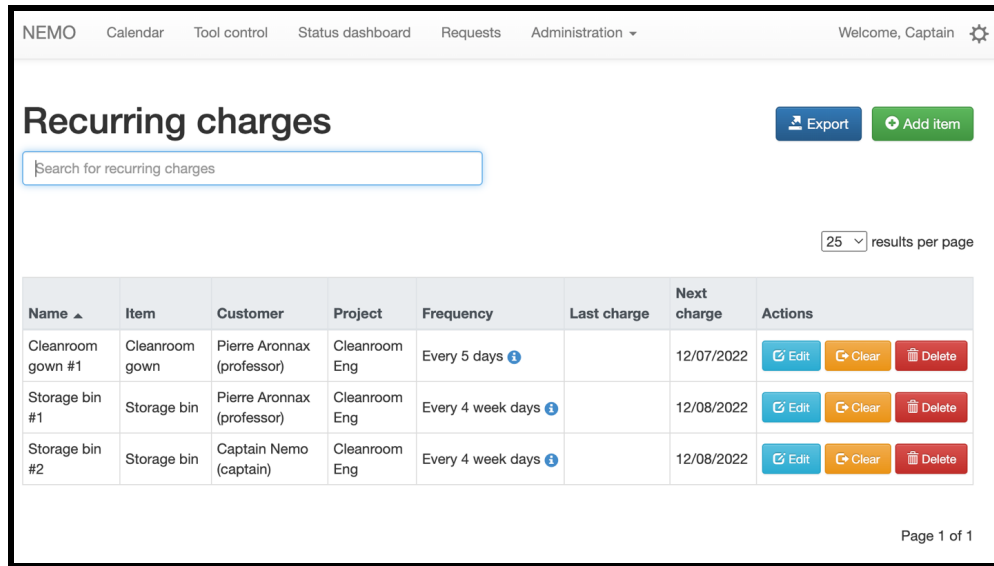

There are a few customizations available for automatically expiring tool qualifications for users. They are discussed in the Customizations → User section [40.17](#).

CHAPTER 32

Recurring charges (user office and managers only)

The recurring charges page allows to charge for supplies/consumables at regular intervals (Figure [32.1](#)). For example, it can be used to record storage bin rentals or cleanroom gown rentals. Supplies are setup in the consumables table of the database detailed in the Detailed administration → Consumables section [42.19](#).

Chapter 32 Recurring charges (user office and managers only)

The screenshot shows the 'Recurring charges' page in the NEMO system. At the top, there is a navigation bar with 'NEMO', 'Calendar', 'Tool control', 'Status dashboard', 'Requests', and 'Administration'. A user greeting 'Welcome, Captain' is visible on the right. The main heading is 'Recurring charges', with an 'Export' button and an 'Add item' button. A search bar is provided for finding charges. A dropdown menu indicates '25 results per page'. The table below lists three recurring charges:

Name	Item	Customer	Project	Frequency	Last charge	Next charge	Actions
Cleanroom gown #1	Cleanroom gown	Pierre Aronnax (professor)	Cleanroom Eng	Every 5 days		12/07/2022	Edit Clear Delete
Storage bin #1	Storage bin	Pierre Aronnax (professor)	Cleanroom Eng	Every 4 week days		12/08/2022	Edit Clear Delete
Storage bin #2	Storage bin	Captain Nemo (captain)	Cleanroom Eng	Every 4 week days		12/08/2022	Edit Clear Delete

Page 1 of 1

Figure 32.1: Recurring charges page

32.1 Usage

32.1.1 Create recurring charge

To create a new recurring charge:

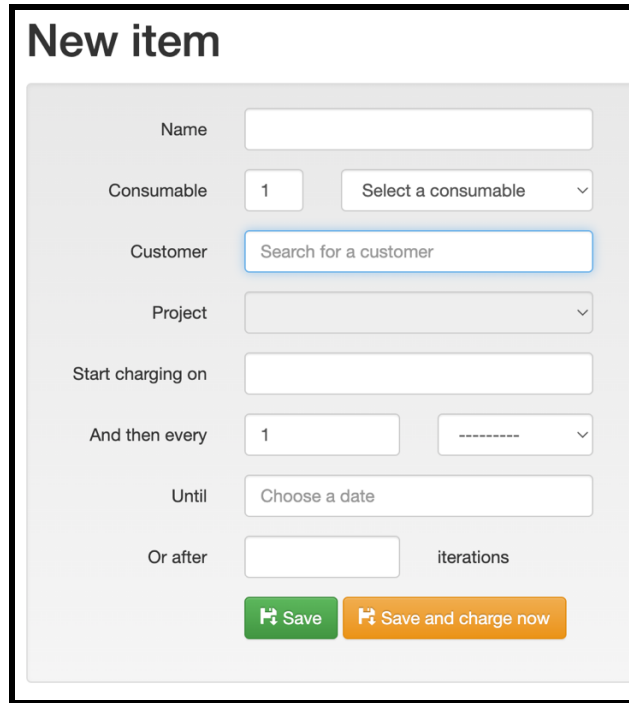

- Click the new item button on the recurring charges page (Figure 32.2).

Figure 32.2: Recurring charges new item button

Chapter 32 Recurring charges (user office and managers only)

- The new item dialog will open (Figure 32.3).

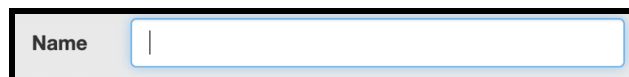

The screenshot shows a 'New item' dialog box with the following fields and controls:

- Name:** A text input field.
- Consumable:** A dropdown menu with '1' selected and a 'Select a consumable' button.
- Customer:** A search input field with the placeholder text 'Search for a customer'.
- Project:** A dropdown menu.
- Start charging on:** A date input field.
- And then every:** A dropdown menu with '1' selected and a frequency selection dropdown.
- Until:** A date input field with the placeholder text 'Choose a date'.
- Or after:** A text input field followed by the text 'iterations'.
- Buttons:** A green 'Save' button and an orange 'Save and charge now' button.

Figure 32.3: Recurring charges new item dialog

- Enter the item name in the name dialog box (Figure 32.4).

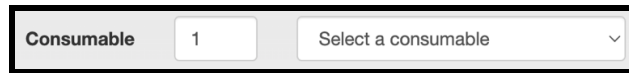

The screenshot shows a 'Name' dialog box with a single text input field for entering the item name.

Figure 32.4: Recurring charges new item name

Chapter 32 Recurring charges (user office and managers only)

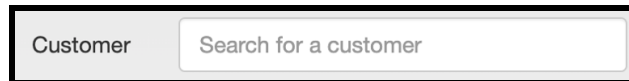

- Select the consumable and its quantity in dialog box and selector (Figure 32.5).

A dialog box with a light gray background. On the left, the word "Consumable" is displayed. To its right is a small input field containing the number "1". Further right is a dropdown menu with the text "Select a consumable" and a downward-pointing arrow.

Figure 32.5: *Recurring charges new item consumable*

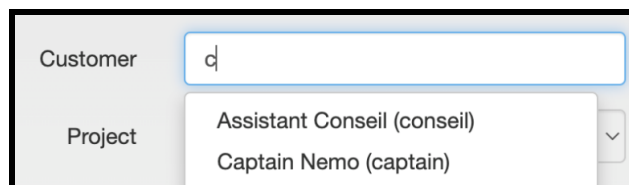

- All other fields are optional unless you are also trying to charge for the recurring charge right away, in which case all fields except the end date will be required.
- Enter the customer's name in dialog box (Figure 32.6).

A dialog box with a light gray background. On the left, the word "Customer" is displayed. To its right is a search input field with the placeholder text "Search for a customer".

Figure 32.6: *Recurring charges new item customer*

- Results are returned as characters are typed and the name of interest can be selected at any time by clicking the name on the list (Figure 32.7).

A dialog box with a light gray background. On the left, the word "Customer" is displayed. To its right is a search input field containing the letter "d". Below the search field is a dropdown list with two items: "Assistant Conseil (conseil)" and "Captain Nemo (captain)". A downward-pointing arrow is visible on the right side of the list.

Figure 32.7: *Recurring charges new item customer list*

Chapter 32 Recurring charges (user office and managers only)

- After selecting the customer, select the project to bill in the selector (Figure 32.8).

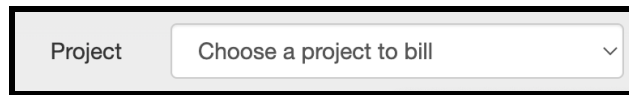

A screenshot of a web form element. It consists of a label 'Project' on the left and a dropdown menu on the right. The dropdown menu has a light gray background and contains the text 'Choose a project to bill' followed by a small downward-pointing chevron icon.

Figure 32.8: *Recurring charges new item project*

- Enter the date to start charging on (Figure 32.9).

A screenshot of a web form element. It features a label 'Start charging on' on the left and an empty text input field on the right. The input field has a light gray background and a thin border.

Figure 32.9: *Recurring charges new item charge date*

- Select the charge frequency (Figure 32.10).

A screenshot of a web form element. It includes a label 'And then every' on the left. To its right is a text input field containing the number '1'. Further right is a dropdown menu with a light gray background and a downward-pointing chevron icon.

Figure 32.10: *Recurring charges new item charge frequency*

- Select an optional end for the recurring charge. This is optional. If not filled, the charges will continue indefinitely (Figure 32.11).

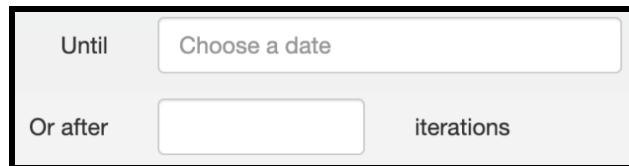

A screenshot of a web form element. It has two rows of options. The first row has a label 'Until' on the left and a text input field containing 'Choose a date'. The second row has a label 'Or after' on the left, a text input field, and the word 'iterations' on the right.

Figure 32.11: *Recurring charges new item end options*

Chapter 32 Recurring charges (user office and managers only)

- Click the save button (Figure 32.12) to confirm.

Figure 32.12: *Recurring charges new item save button*

- Alternatively, you can click the save and charge now button (Figure 32.13) to confirm and charge the first occurrence right away.

Figure 32.13: *Recurring charges new item save and charge now button*

- The new recurring charge is recorded in the recurring charges table of the database detailed in the Detailed administration → Recurring charges section 42.36.
- The page will redirect back to the recurring charges page.

32.1.2 Editing recurring charge item

From the recurring charge list page, click on the Edit button (Figure 32.14). The same fields as shown in the previous section will be shown and editable (unless the recurring charges are locked, see below).

Figure 32.14: *Recurring charges edit button*

Chapter 32 Recurring charges (user office and managers only)

32.1.3 Clearing recurring charge item

From the recurring charge list page, click on the Clear button (Figure 32.15). This will remove the customer from this recurring charge and reset the last charge date, allowing a new customer to be assigned to it.

Figure 32.15: *Recurring charges clear button*

32.1.4 Deleting recurring charge item

From the recurring charge list page, click on the Delete button (Figure 32.16). A confirmation dialog will appear. Upon confirmation, the recurring charge item will be removed.

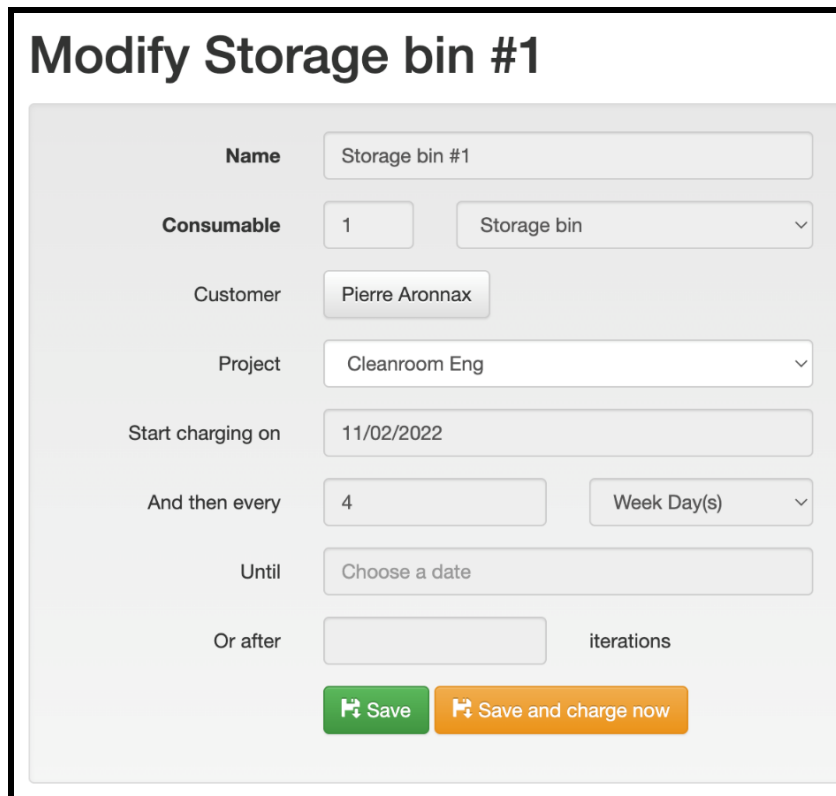

Figure 32.16: *Recurring charges delete button*

Chapter 32 Recurring charges (user office and managers only)

32.1.5 Locking recurring charges

In the Detailed administration → Recurring charges section [42.36](#), select the option to lock recurring charges. Locking recurring charges is useful to keep the current name, consumable and charge frequency locked except for facility managers. User office staff can only assign the items and charge them but cannot edit anything else (Figure [32.17](#)).

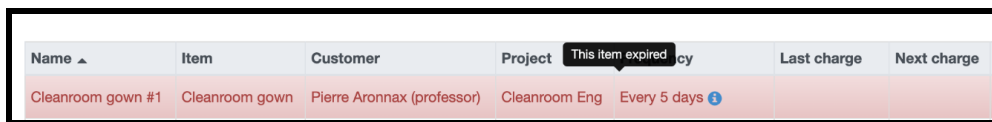

The screenshot shows a web form titled "Modify Storage bin #1". The form contains several input fields and buttons. The fields are: "Name" (text input with "Storage bin #1"), "Consumable" (text input with "1" and a dropdown menu with "Storage bin"), "Customer" (text input with "Pierre Aronnax"), "Project" (dropdown menu with "Cleanroom Eng"), "Start charging on" (text input with "11/02/2022"), "And then every" (text input with "4" and a dropdown menu with "Week Day(s)"), "Until" (text input with "Choose a date"), and "Or after" (text input). At the bottom, there are two buttons: "Save" (green) and "Save and charge now" (orange).

Figure 32.17: *Recurring charges locked form*

Chapter 32 Recurring charges (user office and managers only)

32.1.6 Recurring charges validation

If there are any potential issues with charging for an item, the entire row will be highlighted in red (Figure 32.18). Hovering over the row will provide more information about the issue. Potential errors are item expired (end date or occurrences reached), customer error (inactive or access expired) or project error (project or account inactive, consumable withdraw not allowed).

Name ▲	Item	Customer	Project	This item expired	Frequency	Last charge	Next charge
Cleanroom gown #1	Cleanroom gown	Pierre Aronnax (professor)	Cleanroom Eng	Every 5 days	ⓘ		

Figure 32.18: Recurring charges item expired

32.1.7 Customer upcoming charges reminder

For customers to receive reminders of their upcoming charges, the Recurring charges reminder email template must be set in Customization → File and email templates → Reorder supplies reminder email, see subsection 40.5.18. By default, users will receive reminders 2 months prior to a recurring charge and another reminder one week prior. These parameters can be changed for each user individually in their user preferences (Figure 32.19). User preferences are discussed in depth in the User Preferences section.

Recurring charges reminder days Set the number of days to receive a reminder prior to recurring charges being charged. A comma-separated list can be used.

Figure 32.19: Recurring charges reminder days

Chapter 32 Recurring charges (user office and managers only)

32.2 Web address

The recurring charges page is accessible at site-address/recurring_charges/. The page is accessible from the navigation bar by clicking Administration then clicking Recurring charges.

32.3 Mobile device recurring charges page

There are no mobile device views for the recurring charges page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

32.4 Recurring charges page customizations

Recurring charges page customizations There are several customizations available for recurring charges. They are discussed in the Customizations → Recurring charges section [42.36](#).

CHAPTER 33

Remote Work (staff only)

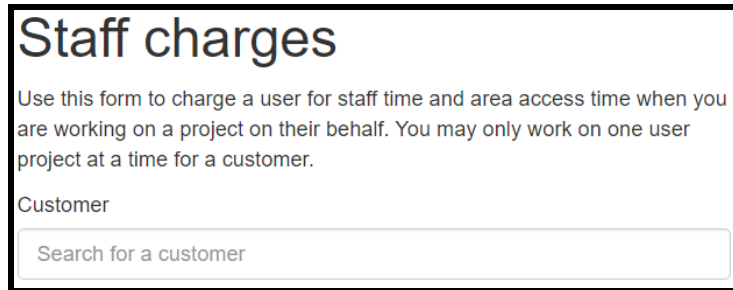

33.1 Staff charges

The staff charges page provides an interface to manage work performed by staff on behalf of users. The page can take several forms depending on what a staff member is currently doing on behalf of a user.

Chapter 33 Remote Work (staff only)

33.1.1 Usage

- If a staff member is not performing any work on behalf of a user, a dialog will be displayed to select a user (Figure 33.1).

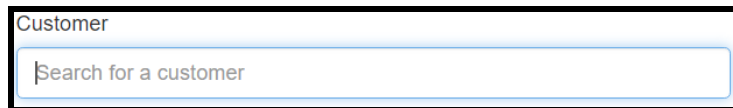

Staff charges

Use this form to charge a user for staff time and area access time when you are working on a project on their behalf. You may only work on one user project at a time for a customer.

Customer

Figure 33.1: Staff charge page, staff not currently working on behalf of user

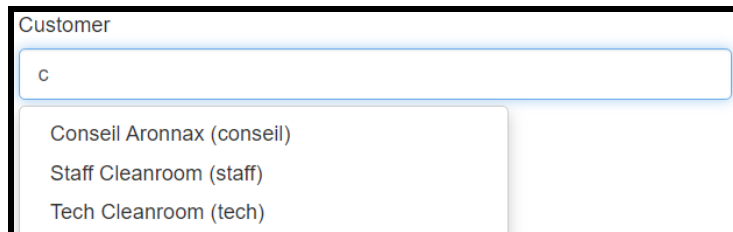

- Enter a user name in the search dialog (Figure 33.2).

Customer

Figure 33.2: Staff charge user search dialog

- A list of users is returned as characters are typed (Figure 33.3). The user can be selected from the return list at any time by clicking the name.

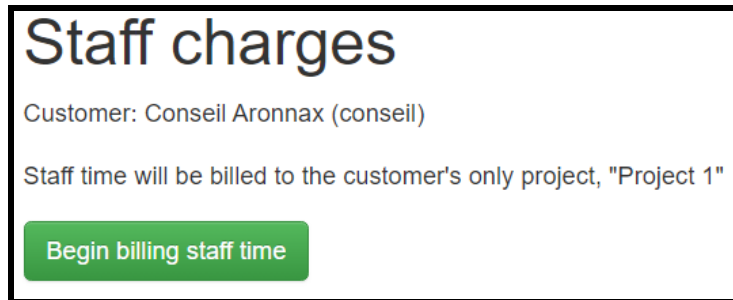

Customer

- Conseil Aronnax (conseil)
- Staff Cleanroom (staff)
- Tech Cleanroom (tech)

Figure 33.3: Staff charge user search return list

Chapter 33 Remote Work (staff only)

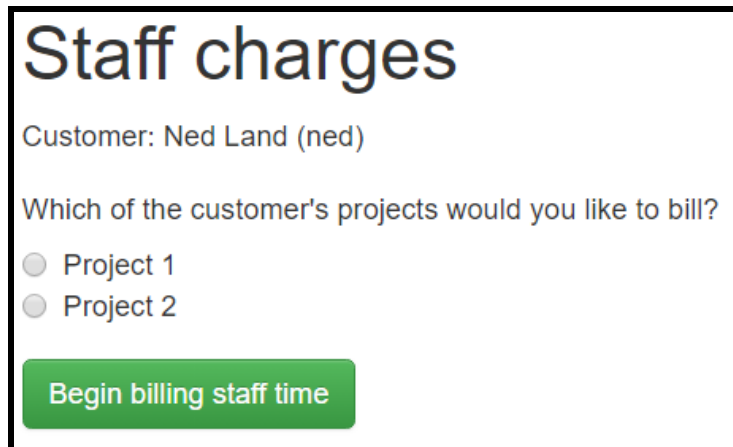

- If the user has only one project, it will be listed and automatically selected (Figure 33.4).

The screenshot shows a web interface titled "Staff charges". Below the title, it displays "Customer: Conseil Aronnax (conseil)". A message states "Staff time will be billed to the customer's only project, 'Project 1'". At the bottom, there is a green button labeled "Begin billing staff time".

Figure 33.4: Staff charge user with one project

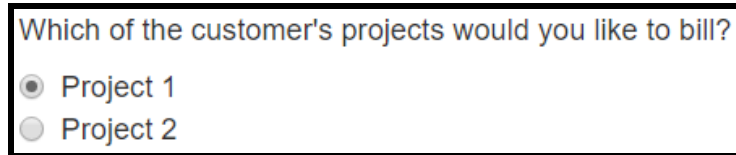

- If the user has multiple projects, a list of projects will be returned to select from (Figure 33.5). Click one of the available projects to select it (Figure 33.6).

The screenshot shows a web interface titled "Staff charges". Below the title, it displays "Customer: Ned Land (ned)". A question asks "Which of the customer's projects would you like to bill?". There are two radio button options: "Project 1" and "Project 2". At the bottom, there is a green button labeled "Begin billing staff time".

Figure 33.5: Staff charge user with multiple projects

Chapter 33 Remote Work (staff only)

A screenshot of a web form with a black border. The text inside reads "Which of the customer's projects would you like to bill?". Below the text are two radio button options: "Project 1" and "Project 2". The "Project 1" radio button is selected, indicated by a small black dot in the center of the circle.

Which of the customer's projects would you like to bill?

Project 1

Project 2

Figure 33.6: *Staff charge user project selection*

- Click the begin billing button to start charging staff time (Figure 33.7). The user, project, and start time will be recorded in the staff charges table of the database which is discussed in the Detailed administration → Staff charges section 42.51.

Figure 33.7: *Staff charge begin billing button*

- The navigation bar will display the charging staff time indicator in red (Figure 33.8).

Figure 33.8: *Staff charge navigation bar indicator*

Chapter 33 Remote Work (staff only)

- Hovering over the charging staff time indicator will provide user and project details (Figure 33.9).

Figure 33.9: Staff charge navigation bar indicator details

Chapter 33 Remote Work (staff only)

- The staff member is now working on a project on behalf of a user. The staff charges page will provide dialog to stop working on the project and, if areas have been defined, provide a dialog to also begin charges for area access. In addition, if the staff member is logged into a tool on behalf of a user, it will be listed as well (Figure 33.10).

Staff charges

You are charging staff time to Ned Land (ned) for the project named Cleanroom Eng since Sunday, January 30th, 2022 @ 12:22 AM.

Charge note:

Here is a summary of the current charges:

Type	Start	End
Dicing saw usage	Sunday, January 30th, 2022 @ 12:22 AM	
Start time charge	Sunday, January 30th, 2022 @ 12:22 AM	

I have entered a billable area on behalf of this user:

Campus
 Cleanroom

Figure 33.10: Staff charge page, staff working on project, not billing area access

Chapter 33 Remote Work (staff only)

- To add a charge note, simply click on the text area and enter the note (Figure 33.11), then click on the save button (Figure 33.12).

A screenshot of a web form element. It consists of a rectangular box with a black border. On the left side of the box, the text "Charge note:" is displayed. To the right of this text is a large, empty white rectangular input field. A small cursor icon is visible at the bottom right corner of the input field.

Figure 33.11: Staff charge note text area

Figure 33.12: Staff charge text area save button

- To stop working on a project, click the finished working button (Figure 33.13). This will write the end time to the staff charges table of the database, turn off the charging staff time indicator, and return to the initial customer search dialog.

Figure 33.13: Staff charge finished working button

- To begin billing for area access, click the area to work in (Figure 33.14) then click the area access button (Figure 33.15). The area, user, project, and start time will be recorded in the area access records table of the database which is discussed in the Detailed administration → Area access records section 42.7.

Chapter 33 Remote Work (staff only)

I have entered a billable area on behalf of this user:

CMP lab

Cleanroom

Figure 33.14: Staff charge area selection

Figure 33.15: Staff charge area access button

- The staff member is now working on a project on behalf of a user and charging area access time. The staff charges page will provide a dialog to stop working in the area (Figure 33.16).

Staff charges

You are charging staff time to Ned Land (ned) for the project named Cleanroom Eng since Sunday, January 30th, 2022 @ 12:22 AM.

Charge note:

Here is a summary of the current charges:

Type	Start	End
Cleanroom access	Sunday, January 30th, 2022 @ 12:26 AM	
Dicing saw usage	Sunday, January 30th, 2022 @ 12:22 AM	
Start time charge	Sunday, January 30th, 2022 @ 12:22 AM	

Figure 33.16: Staff charge page, staff working on project and billing area access

Chapter 33 Remote Work (staff only)

- To stop charging area access, click the no longer in area button (Figure 33.17). This will write the end time to the area access records table of the database and return to the staff member is now working on a project on behalf of a user dialog.

I am no longer in the cleanroom on behalf of this user

Figure 33.17: Staff charge no longer in area button

- The dialog will return to the staff charge dialog however will include the area access billed (Figure 33.18). At this time another area can be entered, or staff charges can be ended.

Staff charges

You are charging staff time to Ned Land (ned) for the project named Cleanroom Eng since Sunday, January 30th, 2022 @ 12:22 AM.

Charge note:

Here is a summary of the current charges:

Type	Start	End
Cleanroom access	Sunday, January 30th, 2022 @ 12:26 AM	Sunday, January 30th, 2022 @ 12:27 AM
Dicing saw usage	Sunday, January 30th, 2022 @ 12:22 AM	
Start time charge	Sunday, January 30th, 2022 @ 12:22 AM	

I have entered a billable area on behalf of this user:

Campus
 Cleanroom

Figure 33.18: Staff charge with area usage summary

Chapter 33 Remote Work (staff only)

33.1.2 Web address

The staff charge page is accessible at site-address/staff_charges/. The page is accessible from the navigation bar by clicking Administration then clicking Staff charges.

33.1.3 Mobile device staff charges page

There are no mobile device views for the staff charges page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

33.1.4 Staff charges page customizations

Email reminders that staff charges are underway can be sent periodically and require an email template that is used to format messages. The email template is configured in the Customization → Staff charge reminder email page detailed in subsection [40.5.24](#). In addition, a timed service app must be properly configured and running which is described in NEMO timed services section [48.3](#).

Chapter 33 Remote Work (staff only)

33.2 Previous work

The previous work page allows staff to review and validate any work performed by staff on behalf of a user (Figure 33.19). Work can be reviewed for any staff member or all staff members and the month/year is selectable. Staff can validate work performed to confirm charges before billing.

Remote work

This page displays remote work done by NanoFab staff on behalf of users. You can filter by which staff member performed the work, and when, by using the dropdown boxes below. Each charge can be validated, which means that you have confirmed that the charge is legitimate and correct, and no adjustment needs to be made to it. Press the green 'Validate' button on an individual row to validate a charge. Charges that have already been validated are highlighted in green.

Do not validate a charge if part or all of it is incorrect. Instead, visit the user office so an adjustment can be entered into the billing system. Furthermore, please visit the user office if there is a charge that you forgot to enter.

Chapter 33 Remote Work (staff only)

33.2.1 Usage

33.2.1.1 Staff and date

By default, records for the current staff member and the current month are displayed (Figure 33.20).

Figure 33.20: Remote work staff and date dialog

To change the user, click the dropdown and select from the list (Figure 33.21). An option for all staff is listed first and will display remote work by any staff member for the selected time period. This can be useful for user office staff to confirm remote work validation before creating bills.

Figure 33.21: Remote work staff dropdown

Chapter 33 Remote Work (staff only)

To change the month, click the dropdown and select from the list (Figure 33.22).

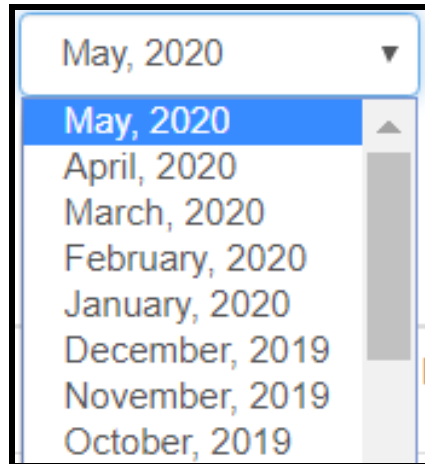

Figure 33.22: Remote work date dropdown

After changing the user and/or month, click the update button to refresh the records displayed (Figure 33.23).

Figure 33.23: Remote work update button

Chapter 33 Remote Work (staff only)

33.2.1.2 Staff charges

Staff charges display the staff member, user, project, start date/time, and end date/time (Figure 33.24). If the staff member entered a billable area that access will be displayed as well. If the user is an administrator or has access to change staff charges, change usage events or change area access records, the id of the charge (staff time, tool usage, or area access record, respectively) will be a link to the relevant part of the detailed administration.

33.2.2 Web address

The remote work page is accessible at site-address/remote_work/. The page is accessible from the navigation bar by clicking Administration then clicking Remote work.

Chapter 33 Remote Work (staff only)

33.2.3 Mobile device remote work page

There are no mobile device views for the remote work page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

33.2.4 Remote work page customizations

A few options are available for remote work in Customization → Remote work, see section [40.11](#).

CHAPTER 34

Resources (staff only)

The resources page lists all resources, grouped by category. Resources in green are currently available while resources in red are unavailable (Figure 34.1).

Chapter 34 Resources (staff only)

Resources

Below is a list of resources, grouped by category.
Resources in **green** are currently available while resources in **red** are unavailable. Click on a resource to modify its availability, status message or to schedule an outage.
When a resource is unavailable, users are blocked from using tools or login to areas that fully depend on that resource.

Gases

- 2% SiH₄
- Ar
- CF₄
- CHF₃
- Cl₂
- N₂
- N₂O
- NH₄
- O₂ - Gas bottle change

Figure 34.1: Resources page

34.1 Resource discussion

Resources provide a method to define tool dependencies such as gases, facility spaces, and utilities that can be associated with tools are either required or non-required resources. When a resource is unavailable, users are blocked from using tools or areas that require the resource and notified on tools that with a non-required association.

Example 1, if 'oxygen' is defined as a resource and shutdown, all tools that have 'oxygen' as a required dependency will also be shutdown. All tools that have 'oxygen' as a non-required dependency will be noted. This can be useful for gas bottle changes.

Example 2, if 'cleanroom' is defined as a resource and all tools require 'cleanroom' then shutting down the 'cleanroom' resource will shut down every

Chapter 34 Resources (staff only)

tool. This can be useful for weather closures or lab wide closures.

Example 3, if 'cleanroom' is defined as a resource and the area 'lab' requires the 'cleanroom' resource, then shutting down the 'cleanroom' resource will prevent users logging in to the area 'lab'. If the area also has physical access defined, the doors for the area will not open for non-staff.

Resources can optionally be grouped by category to visually organize common resources. Resource categories are defined in the Detailed administration → Resource categories section [42.39](#).

Resources are defined in the Detailed administration → Resources section [42.40](#). Areas are associated with resources here.

Tools may optionally have required resources and/or non-required resources assigned. Tools are defined in the Detailed administration → Tools section [42.61](#).

Chapter 34 Resources (staff only)

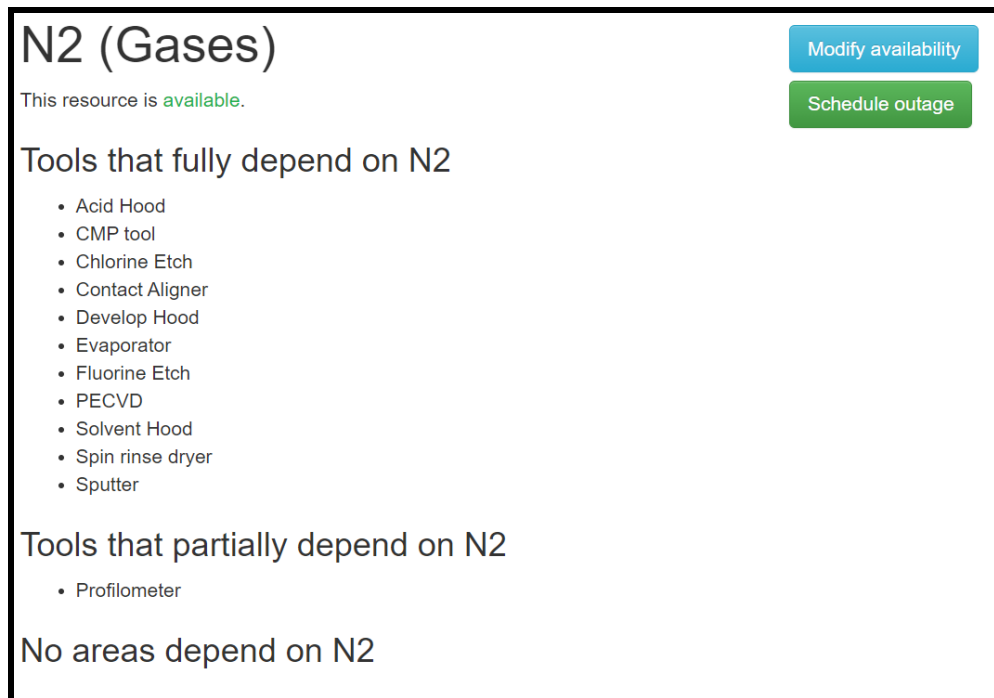

34.2 Resource Detail

To access the details of a resource, click the resource name (Figure 34.2).

Figure 34.2: Resources example of resource name

The resource details page will open and list tools and areas that fully or partially depend on the resource (Figure 34.3). In addition, there are buttons to modify resource availability and to schedule resource outages.

N2 (Gases)

This resource is **available**.

[Modify availability](#)

- Areas that depend on a resource (Figure 34.6).

Figure 34.6: *Resource dependent area list*

34.2.1 Modify a resource

Resource status and status messages can be managed through the modify resource dialogs. A resource can be shut down and details provided to users, and a resource can be brought back to available. Information about impacted tools and areas is also provided.

34.2.1.1 Shut down an available resource

From the resource page, click the resource name (Figure 34.7).

Figure 34.7: *Resources item name*

- Click the modify availability button (Figure 34.8).

Figure 34.8: *Resources modify availability button*

- The modify a resource dialog will open (Figure 34.9).

Chapter 34 Resources (staff only)

Modify N2 resource

N2 is currently **available**. Enter a status message to mark the resource as unavailable.

When a resource is unavailable:

- The status message will be displayed on the landing page and tool control page of each affected tool
- Tools that fully depend on this resource will be **unavailable to users**
- Areas that depend on this resource will be **unavailable to users**
- Tools that partially depend on this resource will be available to users, however it is the user's responsibility to determine if their fabrication process will succeed without the resource available

Why is the resource unavailable?

Warning: the following tools fully depend on this resource and are in use. You must disable the tools individually to block **current** use. It is recommended that you disable these tools before making the resource unavailable.

- Chlorine Etch

Modify resource Nevermind

Figure 34.9: Resources modify resource dialog shutdown

- Provide a reason the resource will be unavailable (Figure 34.10).

Why is the resource unavailable?

Figure 34.10: Resources shutdown reason

Chapter 34 Resources (staff only)

- If any tools that require the resource are currently in use, a warning will be displayed (Figure 34.11).

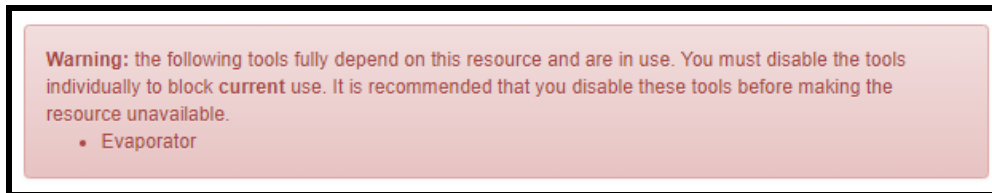

Figure 34.11: Resources shutdown tool in use warning

- Click the modify button to shut down the resource or, click the never mind button to return to the resource page (Figure 34.12).

Figure 34.12: Resource shutdown buttons

- Return to the resources page, if the resource was shutdown, it will now be red with the outage reason listed (Figure 34.13).

Figure 34.13: Resource shutdown listing

Chapter 34 Resources (staff only)

- The outage will be listed in the alerts and outages section of the landing page (Figure 34.14).

Figure 34.14: Resource shutdown landing page message

- The outage will be listed in the tool control summary tab of each impacted tool.
 - Required resource outage will cause the tool to be shut down (Figure 34.15).

Figure 34.15: Resource shutdown tool shutdown message

- Non-required resource outage will list a warning (Figure 34.16).

Figure 34.16: Resource outage tool problem message

Chapter 34 Resources (staff only)

34.2.1.2 Enable a previously shutdown resource

- Click the red resource name (Figure 34.17). Note: only the red text is a link.

N2 - Nitrogen gas bottle change underway, should be completed today.

Figure 34.17: Resource example of red shutdown resource listing

- Click the modify availability button (Figure 34.18).

Modify availability

Figure 34.18: Resources modify availability button

- The modify a resource dialog will open (Figure 34.19).

Modify O2 resource

O2 is currently **unavailable**. What would you like to do?

Make the resource available

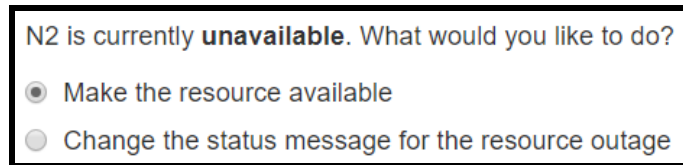

Change the status message for the resource outage

Modify resource Nevermind

Figure 34.19: Resources modify resource dialog enable

Chapter 34 Resources (staff only)

- Select make available or change message radio button (Figure 34.20). The make resource available button is checked by default.

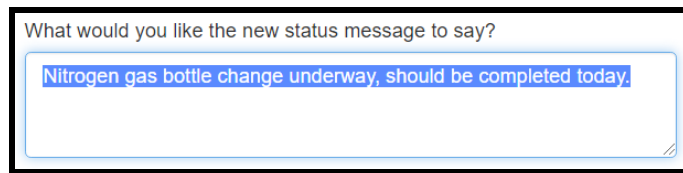

N2 is currently **unavailable**. What would you like to do?

Make the resource available

Change the status message for the resource outage

Figure 34.20: Resources enable selection

- If change message selected, update dialog box (Figure 34.21).

What would you like the new status message to say?

Nitrogen gas bottle change underway, should be completed today.

Figure 34.21: Resources update status message dialog box

- Click modify button to finish or click never mind to return to the resource page (Figure 34.22).

Figure 34.22: Resource enable buttons

Chapter 34 Resources (staff only)

- Return to the resources page, if the resource was enabled, it will now be green (Figure 34.23).

Figure 34.23: *Resource enabled listing*

- All alerts and tool restrictions are removed.

34.2.2 Scheduled resource outages

Resource outages can be scheduled when the start and end time is known. Examples include gas bottle changes or facility maintenance that will happen in a predictable manner. Outages automatically start and end. Once the end time is past, the outage will be hidden. A history of scheduled outages is maintained in the scheduled outages table of the database as discussed.

34.2.2.1 Create a scheduled resource outage

- From the resource page, select the resource of interest (Figure 34.24).

Figure 34.24: *Resource item name link*

Chapter 34 Resources (staff only)

- Click the Schedule outage button on the resource detail page (Figure 34.25).

Figure 34.25: Resource scheduled outage button

- The scheduled resource outage dialog page will open (Figure 34.26).

Schedule N2 outage

You can schedule a resource outage to occur for a specific time window. This prevents users from using affected tools and areas, **but will not kick users off if they're already logged in to an area or using a tool**. It is the staff's responsibility to ensure that all tools and areas that use the resource are properly shutdown.

When a resource is unavailable:

- The status message will be displayed on the landing page and tool control page of each affected tool
- Tools that fully depend on the resource will be **unavailable to users**
- Areas that depend on the resource will be **unavailable to users**
- Tools that partially depend on the resource will be available to users, however it is the user's responsibility to determine if their fabrication process will succeed without the resource available

Sputter gold +

▼ **Rental**

Cleanroom gown +

Storage bin +

Figure 36.1: Supply page

36.1 Usage

To withdraw a consumable item or supply:

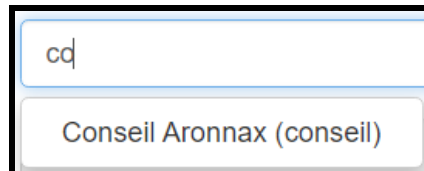

- Enter a user name in the customer dialog (Figure 36.2). This option defaults to the logged in user if this is a self-checkout action.

Customer

Figure 36.2: Supply customer dialog

Chapter 36 Supplies (staff and user office, or all users)

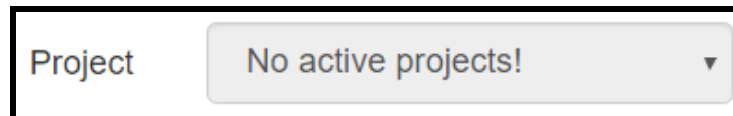

- A list of users is returned as characters are typed (Figure 36.3). The user can be selected from the return list at any time by clicking the name.

A screenshot of a search input field. The input field contains the text 'cd'. Below the input field, a dropdown list is open, showing a single item: 'Conseil Aronnax (conseil)'.

Figure 36.3: *Supply customer dialog return list*

- If the wrong name is selected, clicking the selected users name will reset the form.
- If the selected user does not have an active project, an error is displayed and the withdraw will not be allowed (Figure 36.4).

A screenshot of a dropdown menu. The menu is open, showing the text 'Project' on the left and 'No active projects!' on the right, followed by a downward-pointing arrow.

Figure 36.4: *Supply no active project*

- If the selected user has one project, it is automatically selected (Figure 36.5).

A screenshot of a dropdown menu. The menu is open, showing the text 'Project' on the left and 'Project 1' on the right, followed by a downward-pointing arrow.

Figure 36.5: *Supply single project*

Chapter 36 Supplies (staff and user office, or all users)

- If the selected user has multiple projects, click the dropdown and choose a project to bill (Figure 36.6).

Figure 36.6: Supply multiple projects

- Click on the consumable item or the + icon  in the list to bring up the quantity popup (Figure 36.7).

Figure 36.7: Supply select consumable

- The consumable item list can be organized by categories which are described in the Detailed administration → Consumable categories section [42.17](#).
- The cost of each consumable can be optionally listed by uploading rate information as discussed in the Customizations → Tool rates section [40.9](#).

Chapter 36 Supplies (staff and user office, or all users)

- Enter an integer quantity in the quantity dialog (Figure 36.8).

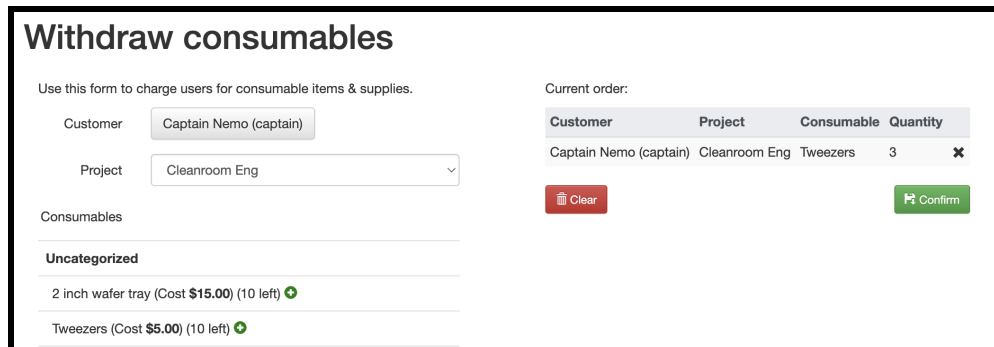

Figure 36.8: Supply quantity

- Click the “Add to order” button or simply press <Enter> (Figure 36.9).

Figure 36.9: Supply add to order

- The item is added to the “current order” on the right side of the screen (Figure 36.10).

A screenshot of a web form titled "Withdraw consumables". The form is split into two columns. The left column contains fields for "Customer" (set to "Captain Nemo (captain)"), "Project" (set to "Cleanroom Eng"), and a list of consumables under the heading "Uncategorized": "2 inch wafer tray (Cost \$15.00) (10 left)" and "Tweezers (Cost \$5.00) (10 left)". The right column is titled "Current order:" and contains a table with columns "Customer", "Project", "Consumable", and "Quantity". The table has one row: "Captain Nemo (captain)", "Cleanroom Eng", "Tweezers", and "3". Below the table are "Clear" and "Confirm" buttons.

Customer	Project	Consumable	Quantity
Captain Nemo (captain)	Cleanroom Eng	Tweezers	3

Figure 36.10: Supply current order

Chapter 36 Supplies (staff and user office, or all users)

- You can keep adding more items to the current order, for the same or for a different customer (Figure 36.11).

Current order:

Customer	Project	Consumable	Quantity	
Captain Nemo (captain)	Cleanroom Eng	Tweezers	3	✘
Captain Nemo (captain)	Cleanroom Eng	2 inch wafer tray	10	✘
Ned Land (ned)	Cleanroom Eng	Tweezers	2	✘

 

Figure 36.11: Supply multiple items order

- You can click the clear button (Figure 36.12) to clear the current order.

Figure 36.12: Supply clear button

- Click the confirm button (Figure 36.13).

Figure 36.13: Supply confirm button

- If the withdraw was successful.

Chapter 36 Supplies (staff and user office, or all users)

- The transaction is recorded in the consumable withdraws table of the database described in the Detailed administration → Consumable withdraws section [42.18](#).
- The total quantity in stock is updated in the consumables table of the database unless the item's reusable property is set to True.
- A success message is displayed at the top of the page (Figure [36.14](#)).

Figure 36.14: *Supply success message*

- If the withdraw was not successful:
 - A failure reason is provided at the top of the page (Figure [36.15](#)).

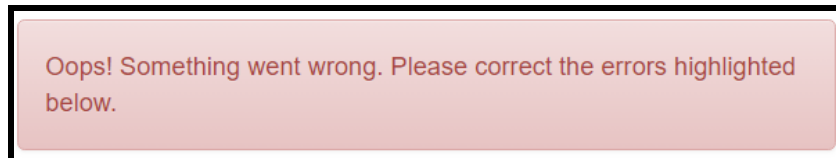

Figure 36.15: *Supply fail message*

- Any missing information is highlighted next to the dialog box (Figure [36.16](#)).

This field is required.

Figure 36.16: *Supply missing information*

- If a non-integer is entered for the quantity, it is noted at the quantity dialog (Figure [36.17](#)).

Chapter 36 Supplies (staff and user office, or all users)

Figure 36.17: *Supply integer error*

- Correct any errors and try again.

36.2 Web address

The supplies page is accessible at `site-address/consumables/`. The page is accessible from the navigation bar by clicking Administration then clicking Supplies.

36.3 Mobile device supplies page

There are no mobile device views for the supplies page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

36.4 Supplies page customizations

- Users can be allowed to self checkout consumables if the option is enabled in the Customizations → Application section [40.1](#).
- Consumable categories can be collapsed by default if the option is checked in the Customizations → Application section [40.1](#).
- Supply rates can be displayed next to each supply in the consumable list and are discussed in the Customizations → Tool rates section [40.9](#).

CHAPTER 37

Training (staff and tool superusers only)

The training page provides staff and tool superusers with an interface to record user training and qualify users (Figure 37.1).

Training

Use this form to charge users for training sessions.

You can add participants to a training session by clicking the 'Add another participant' link. Remove a participant or blank row by clicking the circled X on that row.

When a user has successfully completed a training session you have the option to check the "Qualify" box, which qualifies the user for that tool.

Trainee	Tool	Project	Duration (in minutes)	Training type	Qualify
<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input checked="" type="checkbox"/>

[Add another participant](#)

Figure 37.1: *Training page*

Chapter 37 Training (staff and tool superusers only)

37.1 Usage

To record user training:

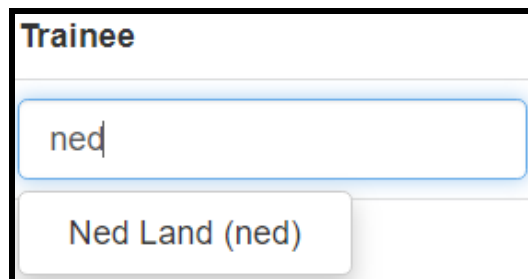

- Enter the user name in the trainee dialog box (Figure 37.2).

The image shows a dialog box titled "Trainee". It has a white background and a black border. Below the title is a large, empty rectangular input field with a thin grey border.

Figure 37.2: Training trainee dialog

- A list of users is returned as characters are typed (Figure 37.3). The user can be selected from the return list at any time by clicking the user name.

The image shows the "Trainee" dialog box with the input field containing the text "ned". Below the input field, a dropdown menu is open, displaying a single search result: "Ned Land (ned)". The dropdown menu has a light blue border and a white background.

Figure 37.3: Training trainee dialog return list

Chapter 37 Training (staff and tool superusers only)

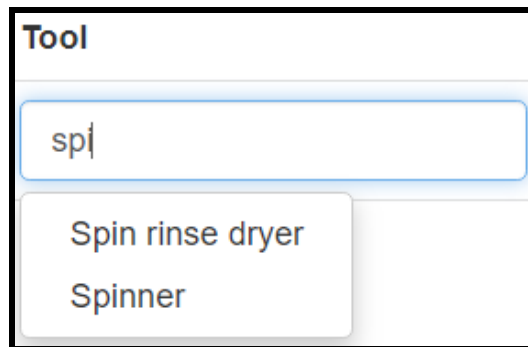

- If the incorrect user is selected, click the users name in the trainee dialog box to clear the entry and retry.
- Enter the tool or tool group in the tool dialog box (Figure 37.4).

The image shows a rectangular dialog box with a black border. At the top left, the word "Tool" is written in a bold, black font. Below the title is a large, empty rectangular input field with a thin grey border, intended for typing a tool or tool group name.

Figure 37.4: Training tool dialog

- A list of tools and tool groups is returned as characters are typed (Figure 37.5). The tool or tool group can be selected from the return list at any time by clicking the tool/group name. Staff can select any tool, superusers can only select the tools they are superusers for.

The image shows the same "Tool" dialog box as in Figure 37.4, but now with the input field containing the text "sp". Below the input field, a dropdown menu is open, displaying a list of suggestions. The first suggestion is "Spin rinse dryer" and the second is "Spinner". The suggestions are listed in a simple, sans-serif font.

Figure 37.5: Training tool dialog return list

Chapter 37 Training (staff and tool superusers only)

- If the incorrect tool or group is selected, click the tool/group name in the tool dialog box to clear the entry and retry.
- If the user has only one project, it will be selected automatically (Figure 37.6).

Figure 37.6: *Training single project*

- If the user has multiple projects, click the dropdown and choose a project to bill (Figure 37.7).

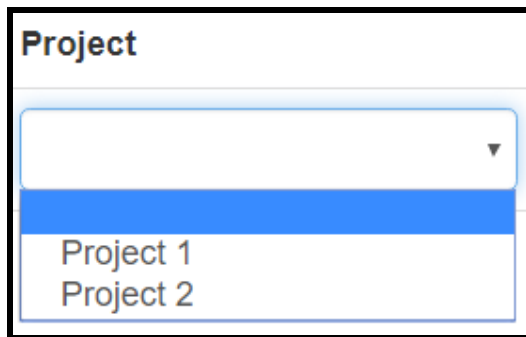

Figure 37.7: *Training multiple projects*

Chapter 37 Training (staff and tool superusers only)

- Enter the training time in the duration dialog box in minutes (Figure 37.8).

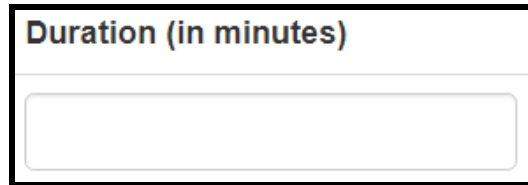

A rectangular dialog box with a black border. The title bar at the top contains the text "Duration (in minutes)". Below the title bar is a large, empty rectangular input field.

Figure 37.8: Training duration

- Select the training type from the dropdown (Figure 37.9).

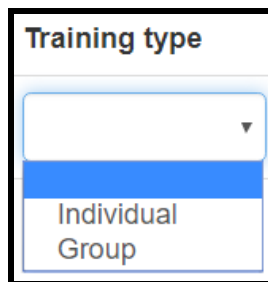

A dropdown menu titled "Training type". The menu is open, showing two options: "Individual" and "Group". The "Individual" option is highlighted with a blue background.

Figure 37.9: Training type

- If the user should not be qualified on the tool at this time, uncheck the qualify checkbox (Figure 37.10).

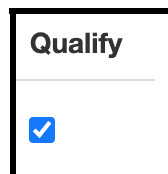

A small rectangular dialog box with a black border. The title bar at the top contains the text "Qualify". Below the title bar is a single checkbox that is checked, indicated by a blue checkmark.

Figure 37.10: Training qualify

Chapter 37 Training (staff and tool superusers only)

- More training sessions can be added by clicking the add participant link (Figure 37.11). Each training row is independent so multiple training sessions do not need to be related in any way.

Add another participant

Figure 37.11: *Training add participant*

- If a training session row needs to be removed, click the  next to the trainee name.
- Click the record button to complete the training (Figure 37.12).

Record training sessions

Figure 37.12: *Training record button*

Chapter 37 Training (staff and tool superusers only)

- If the training was recorded successfully.
- A training record will be written in the training sessions table of the database described on the Detailed administration → Training sessions page in section [42.62](#).
- If the qualify box was checked, the membership histories table in the database is updated. The membership history table is described on the Detailed administration → Membership histories page in section [42.29](#). If the selected tool is configured to grant a physical access level to the user upon qualification, the users access level will be updated.
- A success dialog will be displayed (Figure [37.13](#)). Click continue to return to the NEMO landing page.

Figure 37.13: *Training success message*

- If the training was not recorded successfully, an error message is displayed (Figure [37.14](#)). Correct any missing information and retry.

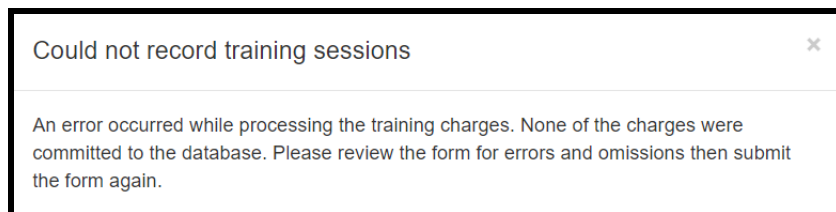

Figure 37.14: *Training error message*

Chapter 37 Training (staff and tool superusers only)

37.2 Web address

The training page is accessible at site-address/training/. The page is accessible from the navigation bar by clicking Administration then clicking Training.

37.3 Mobile device training page

There are no mobile device views for the training page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

37.4 Training page customizations

By going to Customization → Training (see section [40.16](#)), you can customize:

- The types of training offered (Group and/or Individual)
- Whether staff and superusers can specify the training date

CHAPTER 38

Users (any staff role – read-only for staff and accounting)

The users page provides an interface to add new users and update existing users (Figure [38.1](#)). Users can be associated with projects, tools, and physical access areas from this dialog. However, this feature exposes a limited number of parameters of the user table that are necessary to create users. A role beyond user must be defined in the users table of the database discussed in the Detailed administration → Users section [42.68](#).

User office and managers have full access to this feature however, other staff member only have read-only access.

Chapter 38 Users (any staff role – read-only for staff and accounting)

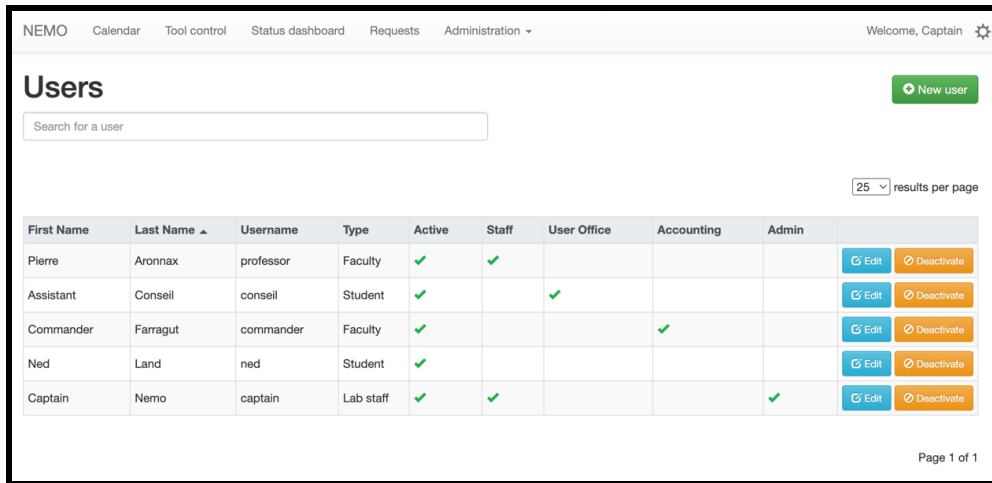

Figure 38.1: Users page

38.1 Create new user

To create a new user:

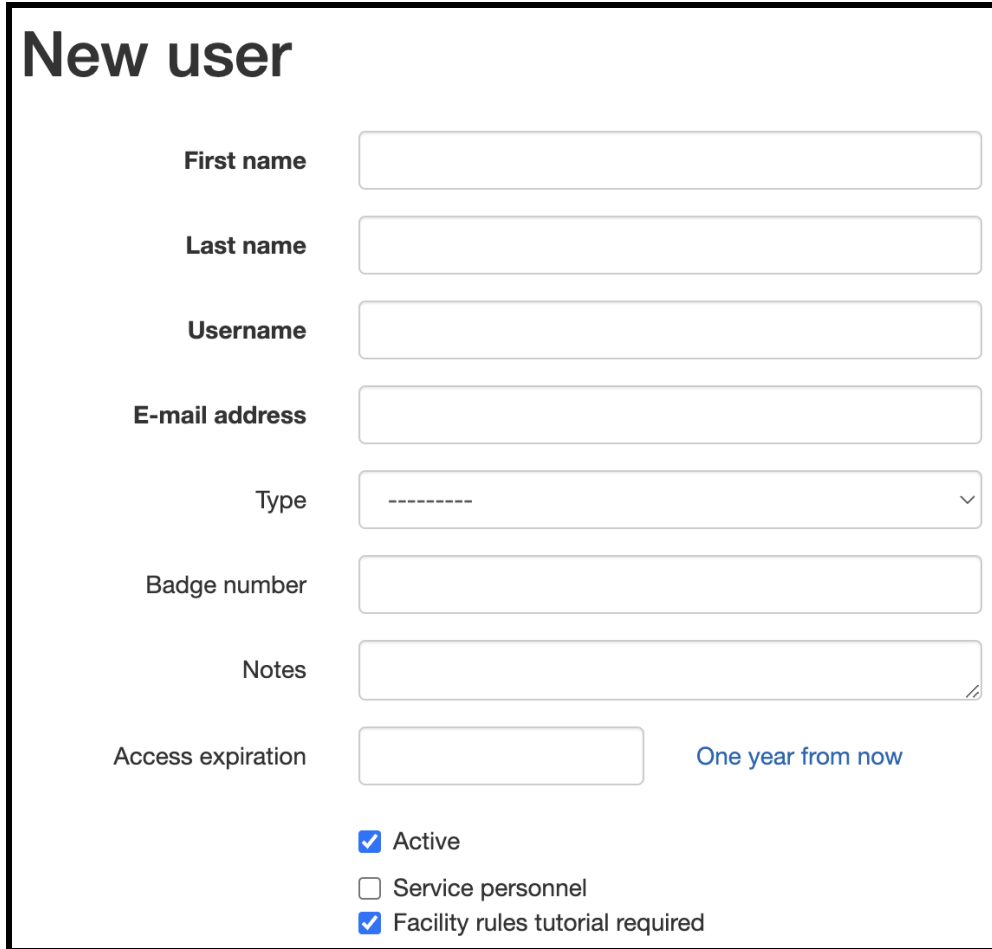

- Click the new user button (Figure 38.2).

Figure 38.2: Users new user button

Chapter 38 Users (any staff role – read-only for staff and accounting)

- The new user form will open (Figure 38.3, Figure 38.4). The items displayed on the form depend on the functionality that has been defined in NEMO.

Figure 38.3: Users new user form

Chapter 38 Users (any staff role – read-only for staff and accounting)

The screenshot displays a web form for configuring a new user. It is organized into several sections, each with a label on the left and a corresponding configuration area on the right.

- Projects:** A text input field labeled "Add a project". Below it, a message states "This user has no assigned projects."
- Tool qualifications:** A text input field labeled "Add a qualification". Below it, a message states "This user is not qualified to use any tools."
- Physical access levels:** A section header "Tablet controlled" is highlighted in light blue. Below it, an information icon and text state "Selecting a parent area access will give access to all sub-areas". A "Campus" section is expanded, showing two checkboxes: "Cleanroom access" and "Cleanroom access weekdays", both of which are currently unchecked.
- Safety training:** A section header "Safety training" is highlighted in light grey. Below it, five checkboxes are listed: "Cleanroom training", "Chemical handling", "Fume hood training", "Compressed gases training", and "Equipment training". All are currently unchecked.
- Onboarding phases:** A section header "Onboarding phases" is highlighted in light grey. Below it, two checkboxes are listed: "General orientation" and "Cleanroom orientation". Both are currently unchecked.
- Documents:** A message states "This user doesn't have any documents." Below it, a "Choose Files" button is shown next to the text "No file chosen".

Figure 38.4: Users new user form continued

Chapter 38 Users (any staff role – read-only for staff and accounting)

- Required: enter first name in dialog box (Figure 38.5).

A rectangular dialog box with a black border. On the left side, the text "First name" is displayed. To the right of this text is a white rectangular input field.

Figure 38.5: *New user first name dialog box*

- Required: enter last name in dialog box (Figure 38.6).

A rectangular dialog box with a black border. On the left side, the text "Last name" is displayed. To the right of this text is a white rectangular input field.

Figure 38.6: *New user last name dialog box*

- Required: enter username in dialog box (Figure 38.7). Some extra validation on the username format can be added by setting `USER-NAME_REGEX` in `settings.py`.

A rectangular dialog box with a black border. On the left side, the text "User name" is displayed. To the right of this text is a white rectangular input field.

Figure 38.7: *New user username dialog box*

- Required: enter email address in dialog box (Figure 38.8).

A rectangular dialog box with a black border. On the left side, the text "E-mail address" is displayed. To the right of this text is a white rectangular input field.

Figure 38.8: *New user email address dialog box*

Chapter 38 Users (any staff role – read-only for staff and accounting)

- Select user type from dropdown (Figure 38.9). User types are defined in the user types table of the database on the Detailed administration → User types page in section 42.67.

A screenshot of a web form element. It consists of a label 'Type' on the left and a dropdown menu on the right. The dropdown menu is currently open, showing the word 'Staff' as the selected option. A small downward-pointing triangle is visible at the end of the dropdown box.

Figure 38.9: *New user type dialog box*

- Enter a badge number that is associated with the user for accessing doors and kiosks (Figure 38.10). This is easily accomplished by having a badge reader on a computer where user profiles are created. Click inside of the dialog box then scan the badge.

A screenshot of a web form element. It features a label 'Badge number' on the left and a rectangular text input field on the right. The input field is currently empty.

Figure 38.10: *New user badge number dialog box*

- Enter notes for the user (Figure 38.11).

A screenshot of a web form element. It features a label 'Notes' on the left and a rectangular text input field on the right. The input field is currently empty.

Figure 38.11: *New user notes dialog box*

Chapter 38 Users (any staff role – read-only for staff and accounting)

- Enter an access expiration date (Figure 38.12). This can be useful to track safety training end dates or project expiration dates and will automatically turn off the users access on the designated date. Leave blank for no expiration.

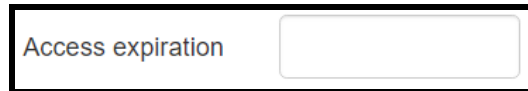

A screenshot of a dialog box with a black border. On the left, the text "Access expiration" is displayed. To the right of this text is a rectangular input field with a thin border and rounded corners.

Figure 38.12: *New user access expiration dialog box*

- Clicking the one year from now will automatically set the date (Figure 38.13).

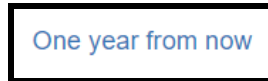

A screenshot of a rectangular button with a black border and rounded corners. The text "One year from now" is centered on the button in a blue font.

Figure 38.13: *New user access expiration one-year quick link*

Chapter 38 Users (any staff role – read-only for staff and accounting)

- Clicking in the date dialog box will display the calendar dialog (Figure 38.14).

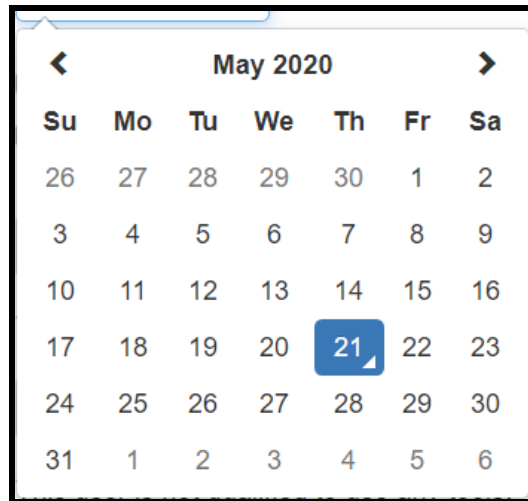

Figure 38.14: *New user access expiration calendar dialog*

- Navigate the calendar and click the date to update the dialog box.
- Make user active or not active by checking the checkbox (Figure 38.15). By default, a new user is active. A user that is not active cannot access NEMO or have reservations or tool usage performed on their behalf. Any change in a user status is recorded in the activity histories table of the database detailed in the Detailed administration → Activity histories section 42.3.

Figure 38.15: *New user active checkbox*

Chapter 38 Users (any staff role – read-only for staff and accounting)

- Give users the service personnel role by checking the checkbox. Service personnel can operate qualified tools without a reservation even when they are shutdown or during an outage and can access authorized areas without a reservation (Figure 38.16).

Figure 38.16: *New user service personnel checkbox*

- Select facility rules tutorial required or not required by checking the checkbox (Figure 38.17). By default, it is required for new users. The default can be changed in the Customization → User settings section. This will display the Facility tutorial and block user tool reservations and tool login.

Figure 38.17: *New user training required checkbox*

- If the identity service is in use, select the domain the user belongs to (Figure 38.18). If only one domain has been defined, it will be selected automatically (Figure 38.19). The identity service is discussed in the Configuring NEMO settings → Identity service section.

Figure 38.18: *New user domain selection*

Chapter 38 Users (any staff role – read-only for staff and accounting)

Figure 38.19: *New user single domain*

- Enter projects to associate the user with (Figure 38.20).

Figure 38.20: *New user project dialog box*

- A list of projects is returned as characters are typed (Figure 38.21). The project can be selected from the return list at any time by clicking the project name. Repeat for all projects.

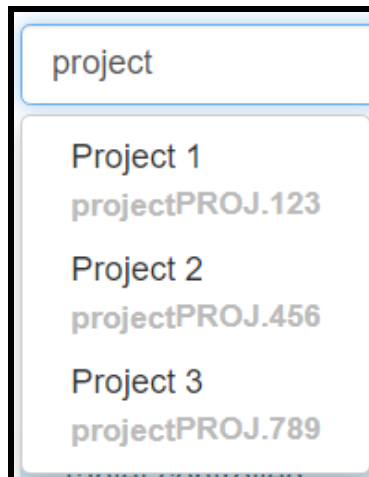

Figure 38.21: *New user projects return list*

- The selected project will appear under the dialog (Figure 38.22). Click the  to remove the user from the project.

Chapter 38 Users (any staff role – read-only for staff and accounting)

Figure 38.22: *New user project added*

- Enter tools the user is qualified on (Figure 38.23).

Figure 38.23: *New user tool qualification dialog box*

- A list of tools is returned as characters are typed (Figure 38.24). The tool can be selected from the return list at any time by clicking the tool name. Repeat for all tools.

Figure 38.24: *New user tool qualification return list*

- The selected tool will appear under the dialog (Figure 38.25). Click the  to remove a tool qualification.

Chapter 38 Users (any staff role – read-only for staff and accounting)

Figure 38.25: *New user tool qualification added*

- If NEMO will control area access permissions, a dialog for physical access levels will be displayed (Figure 38.26).

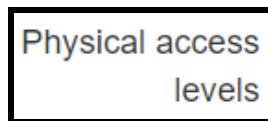

Figure 38.26: *New user physical access levels*

- Check the box for the access levels for the user (Figure 38.27). The physical access levels are a combination of physical areas and access schedules which are defined in the Detailed administration → Physical access levels table, see section 42.33. Areas may also have doors associated with them that are accessed through entrance tablets (see chapter 47).

Figure 38.27: *New user NEMO controlled doors*

Chapter 38 Users (any staff role – read-only for staff and accounting)

- Doors and access periods that are controlled by an external access control system can be setup to communicate permissions through the identity service. Any physical access levels available for NEMO to set user permissions on will be listed as badge-reader controlled (Figure 38.28).

Figure 38.28: *New user external access control*

- Select physical access levels to assign to the user by checking the checkboxes.
- If onboarding phases exist, select the ones that apply to this user by checking the checkboxes (Figure 38.29). Onboarding phases are defined in Detailed administration → Onboarding phases section 42.32.

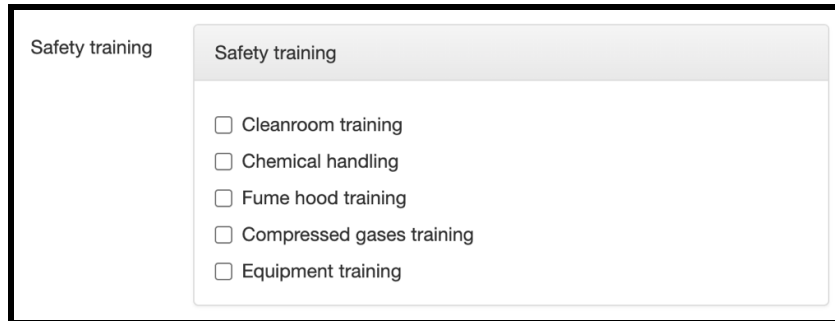

Figure 38.29: *New user onboarding phases*

Chapter 38 Users (any staff role – read-only for staff and accounting)

- If safety trainings exist, select the ones that apply to this user by checking the checkboxes (Figure 38.30). Safety trainings are defined in Detailed administration → Safety trainings section 42.44.

The image shows a web form titled "Safety training". On the left side of the form, the text "Safety training" is displayed. On the right side, there is a panel with a header "Safety training" and a list of five checkboxes, each followed by a training category name:

- Cleanroom training
- Chemical handling
- Fume hood training
- Compressed gases training
- Equipment training

Figure 38.30: *New user safety trainings*

Chapter 38 Users (any staff role – read-only for staff and accounting)

- If user documents are enabled in Customization → User, you can select and upload multiple files by clicking the choose files button (Figure 38.31).

A rectangular button with a light gray border and a white background, containing the text "Choose Files" in a bold, black, sans-serif font.

Figure 38.31: *New user choose files button*

- Click the create user button to save the user information (Figure 38.32).

A green rectangular button with rounded corners, containing a white icon of a person with a plus sign and the text "Create user" in a white, sans-serif font.

Figure 38.32: *New user create user button*

- If the user was recorded successfully:
 - Any externally controlled door accesses are updated through the identity service.
 - A record is written in the users table of the database creating the user.
 - Any tool qualifications selected are written to the membership table.
 - Any physical access levels granted are written to the membership table.
 - Any projects selected are written to the membership table.

Chapter 38 Users (any staff role – read-only for staff and accounting)

- If the user was not recorded successfully:
 - If required fields are left blank, a notice message will be displayed at the field (Figure 38.33).

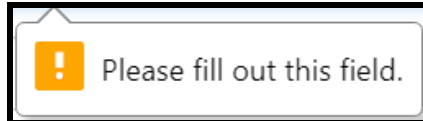

Figure 38.33: *New user blank field error*

- If an invalid email address is entered, a warning message will appear at the top of the page (Figure 38.34) and an error message will be displayed at the email address dialog box (Figure 38.35).

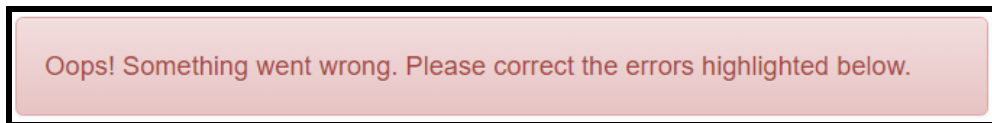

Figure 38.34: *New user error message*

Figure 38.35: *New user bad email address message*

Chapter 38 Users (any staff role – read-only for staff and accounting)

38.2 Modify existing user

To modify an existing user:

- From the users page, enter a user name in the search dialog (Figure 38.36).

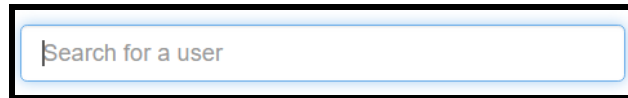

A rectangular search dialog box with a light blue border and a white background. Inside the box, the text "Search for a user" is displayed in a light gray font, indicating a search input field.

Figure 38.36: User page search dialog

- A list of users is returned as characters are typed (Figure 38.37). The user can be selected from the return list at any time by clicking the user's name.

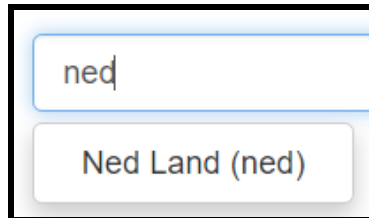

A search return list interface. At the top, a search input field contains the text "ned". Below the input field, a dropdown menu is open, showing a single search result: "Ned Land (ned)".

Figure 38.37: User page search return list

- You can also click on the edit button of the users list (Figure 38.38).

First Name	Last Name	Username	Type	Active	Staff	User Office	Accounting	Admin	
Pierre	Aronnax	professor	Faculty	✓	✓				Edit Deactivate

Figure 38.38: User list edit

Chapter 38 Users (any staff role – read-only for staff and accounting)

- Upon selecting the user, the modify user page will be displayed (Figure 38.39).

Search for another user
View user history
Safely deactivate this user

Modify user

Figure 38.39: *Modify user page*

- The modify user dialog reads the information currently saved user profile including project associations, tool qualifications, and physical access levels. They can be changed under the same process detailed in the create user section above. Once changes are complete, click the save changes button at the bottom of the page (Figure 38.40).

Figure 38.40: *Modify user save button*

Chapter 38 Users (any staff role – read-only for staff and accounting)

38.3 View user history

From the modify user page, click on the view user history button (Figure 38.41).

Figure 38.41: *Modify user view history link*

- Clicking the link opens the membership history page for this user (Figure 38.42).
- The membership history tracks several user actions, who took them, and when. Records are stored in the membership histories table of the database detailed in the Detailed administration → Membership histories section.
 - Activated or deactivated user.
 - Joined or removed from a project.
 - Joined or removed from a tool qualification.
 - Joined or removed from a physical access level.
 - Any tracked changes from the auditlog library.

Chapter 38 Users (any staff role – read-only for staff and accounting)

History for Ned Land (ned)		
Date & time	User	Action
Thursday, April 9th, 2020 @ 2:38 PM	Captain Nemo (captain)	This user now belongs to physical access level "Cleanroom anytime".
Monday, April 13th, 2020 @ 2:43 PM	Captain Nemo (captain)	This user no longer belongs to project "Project 2".
Monday, April 13th, 2020 @ 2:43 PM	Captain Nemo (captain)	This user no longer belongs to project "Project 3".
Tuesday, April 14th, 2020 @ 3:49 PM	Captain Nemo (captain)	User deactivated.
Tuesday, April 14th, 2020 @ 3:49 PM	Captain Nemo (captain)	This user no longer belongs to tool "PECVD".
Tuesday, April 14th, 2020 @ 3:49 PM	Captain Nemo (captain)	This user no longer belongs to physical access level "Cleanroom anytime".
Tuesday, April 14th, 2020 @ 3:49 PM	Captain Nemo (captain)	This user no longer belongs to project "Project 1".
Tuesday, April 14th, 2020 @ 3:49 PM	Captain Nemo (captain)	User activated.
Tuesday, April 14th, 2020 @ 11:01 PM	Captain Nemo (captain)	This user now belongs to physical access level "Cleanroom anytime".
Tuesday, April 14th, 2020 @ 11:03 PM	Captain Nemo (captain)	This user now belongs to project "Project 1".
Thursday, April 16th, 2020 @ 5:34 PM	Captain Nemo (captain)	This user now belongs to tool "PECVD".
Thursday, April 16th, 2020 @ 5:34 PM	Captain Nemo (captain)	This user now belongs to tool "Sputter".

Figure 38.42: *Modify user history detail*

38.4 Safely deactivate this user

From the user list, click the deactivate button (Figure 38.43). This is only displayed if an active user was selected. Safely deactivating a user will ensure no additional billable activity can be accumulated once the user is deactivated.

Figure 38.43: *User safe deactivation link*

- Clicking the link checks to be sure it is safe to deactivate a user by checking for current billable tasks such as:
 - Future reservations.
 - Tools currently in use.
 - Currently in an access-controlled area.
 - Staff charges currently in progress.
- Any current activity is displayed by category (Figure 38.44).
- Checkboxes are selected by default to remove any current billable tasks. Uncheck them to skip removing a category of tasks.
- Clicking the deactivate user button will cancel any reservations and end any current charges for checked usage categories.

Chapter 38 Users (any staff role – read-only for staff and accounting)

38.5 Web address

The users page is accessible at site-address/users/. The page is accessible from the navigation bar by clicking Administration then clicking Users.

38.6 Mobile device configuration agenda page

37.6 Mobile device configuration agenda page There are no mobile device views for the users page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

38.7 Users page customizations

38.7.1 User settings

There are several customizations available for user pages. They are discussed in the Customizations → User section [40.17](#).

38.7.2 Identity service

The identity service requires custom programming to provide a bridge between NEMO and outside systems such as multiple LDAP servers for different types of users, and external access control systems to authorize users to access doors. It is beyond the scope of this manual to provide programming examples for bridge software, but details of the NEMO settings can be found in the Configuring NEMO settings → Identity service section [48.2](#).

CHAPTER 39

Projects (PIs only)

39.1 Usage

This page simply displays the projects the user is a Principal Investigator on. Project Investigators can be set in the Projects administration page, see section [42.35](#). It will display basic information about the project as well as users on the project (Figure [39.1](#)).

Chapter 39 Projects (PIs only)

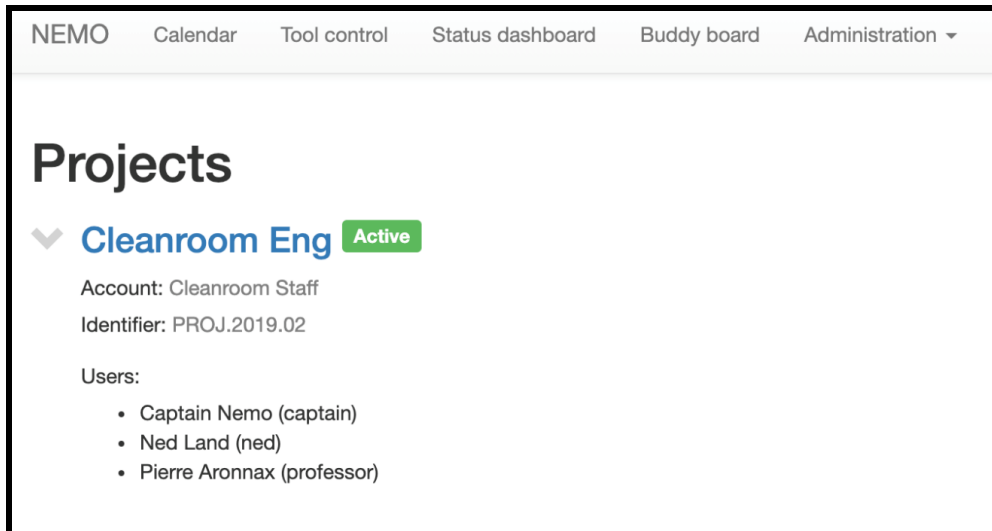

Figure 39.1: *Projects view*

Chapter 39 Projects (PIs only)

39.2 Web address

The projects page is accessible at site-address/projects/. The page is accessible from the navigation bar by clicking Administration then clicking Projects (Figure 39.2).

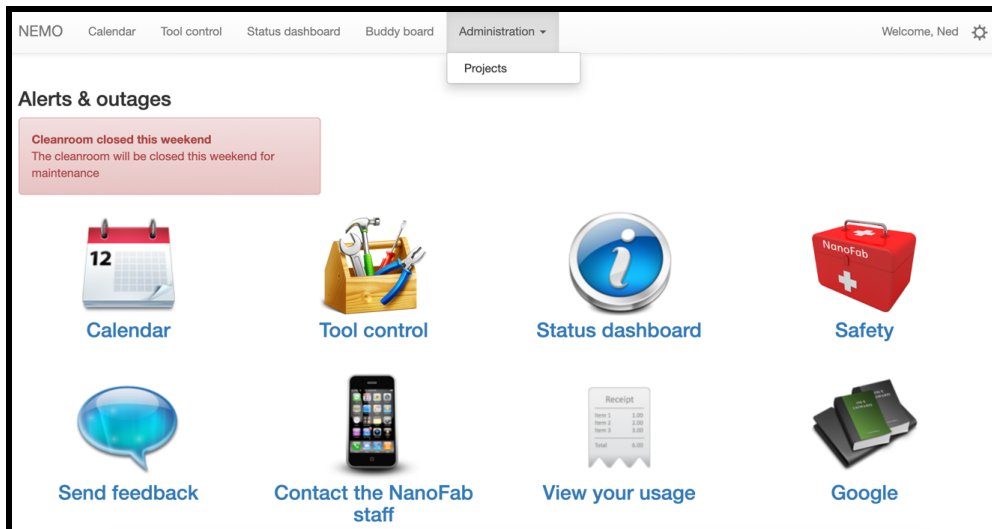

Figure 39.2: Projects view address

39.3 Mobile device

There are no mobile device views for the projects page however, as the page size is reduced, the headings are stacked, and all information is viewable by scrolling.

39.4 Projects page customizations

There are no customizations for the projects page.

CHAPTER 40

Customization (admin only)

The customization section can be used to tailor NEMO to the needs of a particular lab. Customizations include where NEMO will send emails, what the emails should look like, page customizations, and functional settings. HTML content creation and formatting are beyond the scope of this manual. Many resources can be found online. However, sample email templates can be found on the NEMO repository on GitHub at <https://github.com/usnistgov/NEMO/tree/master/resources/emails>

40.1 Application

The application settings can be used to allow users to manually log into and out of areas and to set the facility name, site title, and whether to enable remote work validation (Figure 40.1 & Figure 40.2).

The log in and log out features are useful for labs that use NEMO for door control in the event of an outage and for labs that do not use door control but

Chapter 40 Customization (admin only)

want to track lab access. Tools can be configured to require a user to be logged into an area before they will be allowed to activate the tool.

Customizing the facility name and site title can be used to tailor the application to your institution.

Application settings

Facility name	<input type="text" value="Facility"/>	The name of the facility to use in all templates.
Site title	<input type="text" value="NEMO"/>	The name of the site to use in all templates/headers.
Area login/logout	<input checked="" type="checkbox"/> Allow users to log themselves into access controlled areas from the landing page <input checked="" type="checkbox"/> Allow users to log themselves out of access controlled areas from the landing page <input checked="" type="checkbox"/> Show access controlled area login/logout button on calendar view (requires login and/or logout feature enabled above) <input type="checkbox"/> Automatically log users out when they try to log in to an area they are already logged in (single entrance/exit tablet mode)	
Area usage reminder	<input checked="" type="checkbox"/> In usage reminder emails, show areas users are currently logged in	
Consumables	<input checked="" type="checkbox"/> Allow users to self-checkout consumables If enabled, you need to add a landing page choice with url <code>/consumables/</code> so users can have a way to get to the page. <input type="checkbox"/> Collapse consumable categories by default Check this box to collapse consumable categories by default.	
Default badge reader	<input type="text" value="Default badge reader"/>	The default badge reader to use for the area access and kiosk tablets.
Badge number scan	<input type="checkbox"/> Display badge number when badging in kiosk and area access

If the “allow users to log themselves into access controlled areas” checkbox

Chapter 40 Customization (admin only)

is checked, the log in dialog is displayed (Figure 40.5) on the NEMO landing page as described.

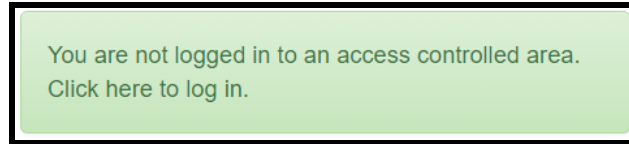

Figure 40.5: Landing page log in dialog box

If the “allow users to log themselves out of access controlled areas” checkbox is checked, the log out dialog is displayed (Figure 40.6) on the NEMO landing page as described.

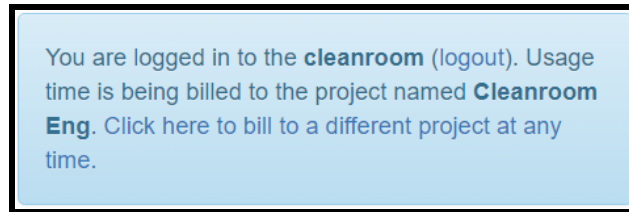

Figure 40.6: Landing page log out dialog box

If the “allow login/logout in the calendar view” checkbox is checked, the area login/logout button is displayed (Figure 40.7) on the NEMO calendar page header when an area is selected. This feature requires that the allow area login and/or allow area logout features above are enabled.

Figure 40.7: Calendar page login button

If the “Automatically log users out when they try to log in to an area they are already logged in (single entrance/exit tablet mode)” checkbox is checked,

Chapter 40 Customization (admin only)

users who try to log into an area they are already logged in to will be logged out. This allows to use a single tablet for entrance/exit.

If the “In usage reminder emails, show areas users are currently logged in” checkbox is unchecked, the usage reminder emails will not include areas the user is logged in.

If the “Allow users to self-checkout consumables” checkbox is checked, users will be able to checkout/withdraw consumables/supplies themselves. However, since the “Supplies” menu item is in the Administration menu, for regular users to be able to access the page, a dashboard item needs to be added in Detailed administration → Landing page choices section [42.28](#) with the url “/consumables/”.

If the “Collapse consumable categories by default” checkbox is checked, the list of consumable categories will be collapsed by default in the supplies page discussed in section [36](#).

If there are badge reader configuration set in Detailed administration → Badge readers section [42.9](#), the default badge reader can be set here so the area access and kiosk tablet pages use the same default configuration. The “Default badge reader” option refers to the F2 (record) and F2 (send) configuration.

If the “Display badge number when badging in Kiosk and area access” checkbox is checked, the badge number will be displayed on the screen when it is read by the badge reader. By default, it will be hidden for security reasons.

- Page title settings:

The default Calendar name is “Calendar” and will be displayed in the main

Chapter 40 Customization (admin only)

menu (Figure 40.8). To edit, click in the dialog box and enter the desired facility name.

The screenshot shows a horizontal dialog box with a black border. On the left, the text "Calendar" is displayed. In the center, there is a text input field containing the word "Calendar". On the right, there is a descriptive text: "The title of the 'Calendar' page and its corresponding link in the navbar."

Figure 40.8: Customization page title setting calendar name

The default Tool control name is "Tool control" and will be displayed in the main menu (Figure 40.9). To edit, click in the dialog box and enter the desired facility name.

The screenshot shows a horizontal dialog box with a black border. On the left, the text "Tool control" is displayed. In the center, there is a text input field containing the words "Tool control". On the right, there is a descriptive text: "The title of the 'Tool control' page and its corresponding link in the navbar."

Figure 40.9: Customization page title setting tool control name

The default Status dashboard name is "Status dashboard" and will be displayed in the main menu (Figure 40.10). To edit, click in the dialog box and enter the desired facility name.

The screenshot shows a horizontal dialog box with a black border. On the left, the text "Status dashboard" is displayed. In the center, there is a text input field containing the words "Status dashboard". On the right, there is a descriptive text: "The title of the 'Status dashboard' page and its corresponding link in the navbar."

Figure 40.10: Customization page title setting status dashboard name

The default Requests name is "Requests" and will be displayed in the main menu (Figure 40.11). To edit, click in the dialog box and enter the desired facility name.

40.2 Calendar

The calendar settings can be used to set the default calendar view, first day of the week, default calendar start time, to customize how dates are displayed for international support, and to set the behavior for reservation confirmations.

40.2.1 Calendar Settings

Calendar settings

Default view Week view Month view Day view

First day of the week Monday Sunday

Start of the day The time the day starts in the calendar view (24h format).

Outage recurrence limit days The maximum number of days a recurring scheduled outage can be set in advance.

Current time indicator Show current time indicator on the calendar

Areas Also show areas (for reservations) that the user doesn't have access to (grayed out)

Overview options: Enable all tools option Enable all areas option Enable all tools & areas option
 Show qualified tools button

Configuration settings Show configuration settings and colors in the reservation calendar

Figure 40.13: Customization calendar settings

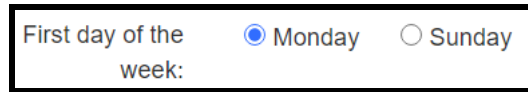

The default view can be changed between week view, month view, or day view by checking the desired radio button (Figure 40.14).

Default view: Week view Month view Day view

Figure 40.14: Customization calendar default view

Chapter 40 Customization (admin only)

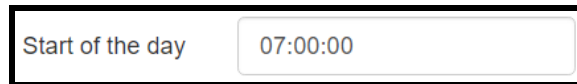

The first day of the week displayed on the week view and month view can be changed between Monday and Sunday by checking the desired radio button (Figure 40.15).

A rectangular box containing the text "First day of the week:" followed by two radio buttons. The first radio button is selected and labeled "Monday". The second radio button is unselected and labeled "Sunday".

Figure 40.15: Customization calendar first day of week

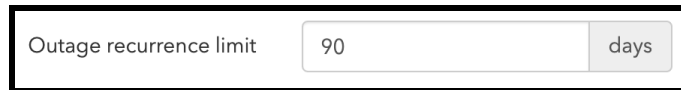

The start time in the week view and day view can be set by entering a time in 24-hour format (Figure 40.16).

A rectangular box containing the text "Start of the day" followed by a text input field containing the value "07:00:00".

Figure 40.16: Customization calendar start time

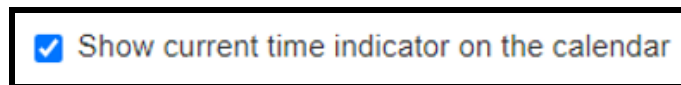

The number of days in advance to create recurring outages can be set by entering an integer number (Figure 40.17).

A rectangular box containing the text "Outage recurrence limit" followed by a text input field containing the value "90" and a dropdown menu with the value "days".

Figure 40.17: Customization calendar recurring outage days in advance

The calendar will highlight the current day and can optionally display a red pointer to indicate the current time on day and week calendar views. Display the red pointer to indicate the time by checking the show current time indicator checkbox (Figure 40.18).

A rectangular box containing a checked checkbox followed by the text "Show current time indicator on the calendar".

Figure 40.18: Customization calendar time indicator

Chapter 40 Customization (admin only)

The calendar will show a user the areas they specifically have permission to enter. However, a user can be given access to see the reservations for all areas by checking the Also show areas checkbox (Figure 40.19).

Figure 40.19: Customization calendar show all areas checkbox

The calendar can show options to display reservation/usage for all tools, all areas or all tools and areas as well as showing a button to show only qualified tools for non-staff users (Figure 40.20).

Figure 40.20: Customization calendar overview options

The calendar can show tool configuration settings picked by users when making a reservation directly in the main reservation feed (instead of having to go to the separate Configuration agenda feed) (Figure 40.21).

Figure 40.21: Customization calendar configuration settings

Chapter 40 Customization (admin only)

40.2.2 Calendar format

Calendar format

The following settings allow to customize the date format in the different calendar views. See [FullCalendar documentation](#) for more information on the syntax.

Axis Time format	<input type="text" value="ha"/>	The time format for the calendar axis labels (only applies to day and week view).
Day column format	<input type="text" value="dddd MM/DD/YYYY"/>	The column date format for the day view.
Day time format	<input type="text" value="h:mm"/>	The reservation time format for the day view.
Week column format	<input type="text" value="ddd M/DD"/>	The column date format for the week view.
Week time format	<input type="text" value="h:mm"/>	The reservation time format for the week view.
Month column format	<input type="text" value="ddd"/>	The column date format for the month view.
Month time format	<input type="text" value="h(:mm)t"/>	The reservation time format for the month view.

Figure 40.22: Customization calendar format settings

The Axis time format for the calendar can be customized by entering the format string in the dialog box (Figure 40.23). See the Calendar documentation in chapter 5 for more information on the syntax.

40.2.3 Reservation Confirmations

Reservation confirmations

Create Require users to confirm by clicking 'Ok' when creating a reservation (this setting can be overwritten by users).

Move/Resize Require users to confirm by clicking 'Ok' when moving/resizing a reservation (this setting can be overwritten by users).

The following settings allow to customize the date and time formats displayed on confirmations when *creating* a reservation.

Date format The date format (not including time).

Time format The time format.

Figure 40.30: Customization reservation settings

When creating reservations, users can be shown a confirmation dialog to verify the information before confirming. The checkbox can be checked to enable it (Figure 40.31). Users can overwrite this setting in their preferences.

Create Require users to confirm by clicking 'Ok' when creating a reservation (this setting can be overwritten by users).

Figure 40.31: Customization reservation confirmation create

When moving and resizing reservations, users can be shown a confirmation dialog to verify the information before confirming. The checkbox can be checked to enable it (Figure 40.32). Users can overwrite this setting in their preferences.

Move/Resize Require users to confirm by clicking 'Ok' when moving/resizing a reservation (this setting can be overwritten by users).

Figure 40.32: Customization reservation confirmation move/resize

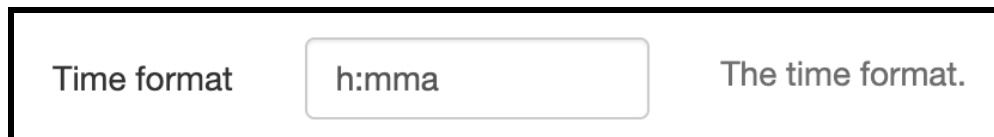

Chapter 40 Customization (admin only)

The date format (Figure 40.33) and time format (Figure 40.34) used in the confirmation dialog can be customized as well.

A screenshot of a customization dialog for the reservation date format. It features a label "Date format" on the left, a text input field containing "MMMM D, yyyy" in the center, and a label "The date format (not including time)." on the right. The entire dialog is enclosed in a black rectangular border.

Figure 40.33: Customization reservation date format

A screenshot of a customization dialog for the reservation time format. It features a label "Time format" on the left, a text input field containing "h:mma" in the center, and a label "The time format." on the right. The entire dialog is enclosed in a black rectangular border.

Chapter 40 Customization (admin only)

40.3 Contracts & Procurements

The contracts & Procurements settings can be used to control which roles (technical staff, user office, accounting staff) have access to the menu item in Administration, and to set the default option name when no contracts are assigned to contractors (Figure 40.35).

Contracts & procurements

View permissions

- Technical staff
- User office
- Accounting staff
- Facility managers

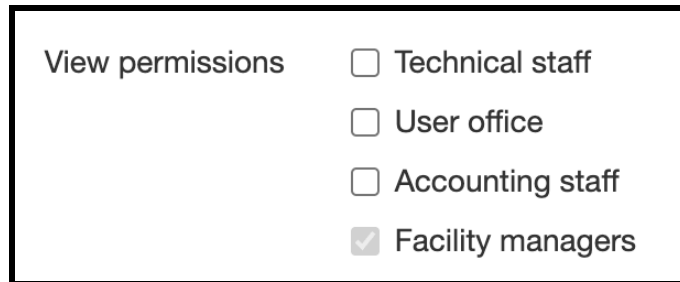

Contractor agreement default:

The default option name when no contracts are selected for a contractor agreement.

Figure 40.35: Customization contracts & procurements settings

By default, only facility managers have access to the “Contracts & Procurement” menu item in Administration. Using the options in this section, view permissions can also be given to Technical staff, User office or Accounting staff (Figure 40.36). (Adding and editing is limited to Administrators and users having being given the permission directly in Detailed Administration → Users section 42.68.

Chapter 40 Customization (admin only)

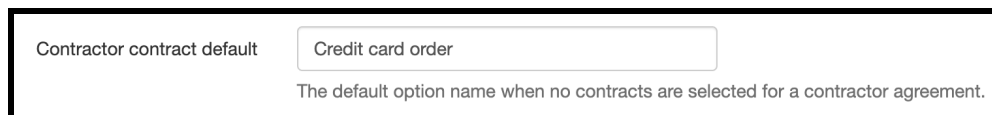

A screenshot of a web interface showing 'View permissions' for contracts and procurements. The interface includes a label 'View permissions' and four checkboxes with corresponding labels: 'Technical staff', 'User office', 'Accounting staff', and 'Facility managers'. The 'Facility managers' checkbox is checked, while the others are unchecked.

View permissions	<input type="checkbox"/>	Technical staff
	<input type="checkbox"/>	User office
	<input type="checkbox"/>	Accounting staff
	<input checked="" type="checkbox"/>	Facility managers

Figure 40.36: *Customization contracts & procurements view permissions*

When assigning contracts (Service contracts or Procurements) to Contractor agreements, the empty option label (usually blank) can be customized here to reflect another option, by default set to “Credit card order” (Figure 40.37).

A screenshot of a web interface showing the 'Contractor contract default' setting. It features a text input field containing the text 'Credit card order'. Below the input field is a descriptive text: 'The default option name when no contracts are selected for a contractor agreement.'

Chapter 40 Customization (admin only)

40.4 Email Addresses

NEMO can send email messages in support of a variety of features (Figure 40.38). The email address customization provides the capability to send different types of email messages to different people or departments in the organization.

Category	Email Address	Description
Feedback	feedback@example.org	User feedback from the Feedback page is sent to this email address.
Safety	safety@example.org	Safety suggestions and observations are sent to this email address.
Abuse	abuse@example.org	Alerts about user activities that could constitute 'abuse' are sent to this email address. Examples include missed reservations and unauthorized tool access.
User office	information@example.org	The main point of contact for users to obtain Facility information. Automated emails sent from NEMO are typically 'from' this address.

[Save settings](#)

Figure 40.38: Customization email addresses

Feedback — emails generated by the send feedback page are sent to this email address. The send feedback feature is described in the send feedback section. The send feedback feature requires both the email address and email template to be configured in the customizations. The feedback email customization is described in the feedback email section below.

Safety — emails generated by the safety page are sent to this email address. The safety page is described in the safety section. Safety email notifications require both the email address and email template to be configured in the customizations. The safety email customization is described in the safety issue email section below.

Abuse — emails generated by either a missed reservation, unauthorized tool login attempt, or tutorial completion are sent to this email address. The

Chapter 40 Customization (admin only)

missed reservation feature is described in the reservation section. The tool login and rules tutorial features are defined in the tool login rules tutorial sections, respectively. Both the email address and email template must be configured in the customizations. The missed reservation email customization is described in the missed reservation email section below. The unauthorized tool login email customization is described below. The tutorial completion email customization is described below.

User office — all emails initiated by NEMO will be from this email address. For example, reservation reminders, missed reservations, and tool in use reminders. Emails initiated by a user will be from the user that initiated the email. For example, feedback emails, staff canceling a user's reservation, and safety.

Chapter 40 Customization (admin only)

40.5 File and email templates

40.5.1 General instructions

Examples of email templates for most features can be found on GitHub in the [resources/emails folder](#).

To upload a file or email template:

- Click the choose file button to open the file selection dialog (Figure 40.39).

Figure 40.39: *Customization instructions choose file button*

- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view or download the file will be shown (Figure 40.40).

Chapter 40 Customization (admin only)

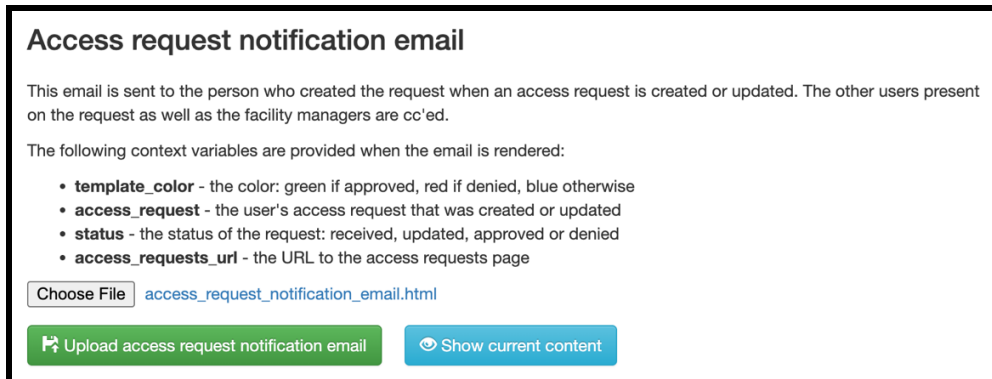

Figure 40.40: Customization instructions file loaded

To delete the currently loaded file:

- Click the upload button without selecting a file to remove the current file from the website media folder.
- A warning dialog will appear (Figure 40.41).

Figure 40.41: Customization instructions file deletion confirmation

- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

Chapter 40 Customization (admin only)

To display the contents of the currently loaded file:

- Click the show current content button (Figure 40.42).

Figure 40.42: *Customization instructions show content button*

- The current file content will be displayed in a separate window.

To download the contents of the currently loaded file:

- Click the blue anchor link with the full filename (Figure 40.43).

[access_request_notification_email.html](#)

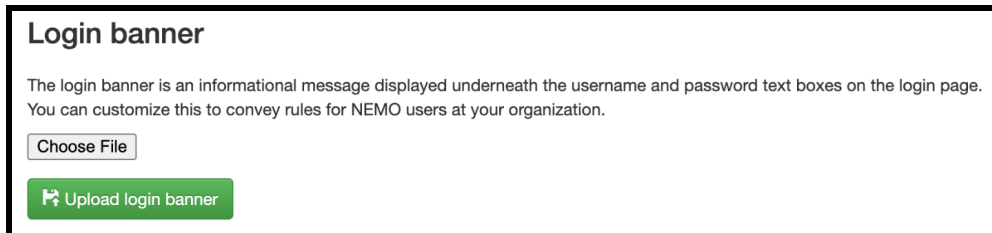

Figure 40.43: *Customization instructions download link*

- The current file will be downloaded by your web browser

Chapter 40 Customization (admin only)

40.5.2 Login banner

The customization for the login banner can be configured using html to display information to users on the login page and is uploaded and viewed through this dialog (Figure 40.44). The login banner is optional, and no default value is displayed if not configured.

Login banner

The login banner is an informational message displayed underneath the username and password text boxes on the login page. You can customize this to convey rules for NEMO users at your organization.

Choose File

Upload login banner

Figure 40.44: Customization login banner

To create a custom login banner:

- Use any html editor to create the desired content.
- Example:
 - The html code in Figure 40.45.

```
<H2><center>
Welcome to our lab!
</center></H2>
<H3><center>
If you are having trouble with your user name or password, please see a user office staff member.
</center></H3>
```

Figure 40.45: Customization login banner html

- Will produce the banner in Figure 40.46 on the login page.

Chapter 40 Customization (admin only)

Figure 40.46: *Customization login banner html rendered*

To upload a login banner:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload login banner button to load the file.
- The selected file will be renamed 'login_banner.html' and saved in the media folder of the NEMO website.

40.5.3 Facility failed login page

The customization for the failed login page can be configured using html to display login trouble information to users and is uploaded and viewed through this dialog (Figure 40.47). The failed login configuration is optional, and a default value is displayed if not configured.

Chapter 40 Customization (admin only)

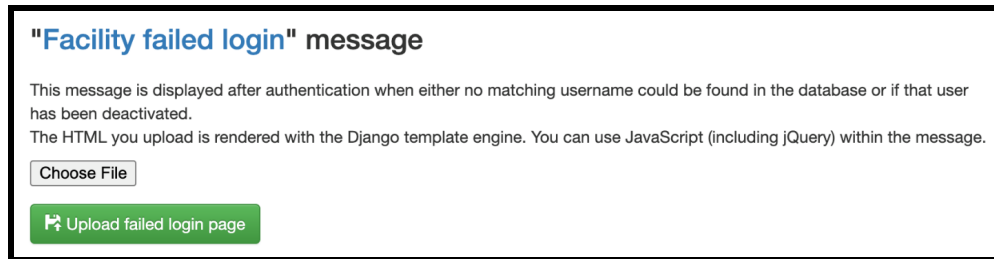

Figure 40.47: *Customization failed login*

Chapter 40 Customization (admin only)

To create a custom failed login page:

- Use any html editor to create the desired content.
- Example:
 - The html code in Figure 40.48.

```
<H2><center>
There was a problem logging you in!
</center></H2>
<H3><center>
We cant find you on our list of active users. If you have used the lab before, your username may
be deactivated for some reason. Please see a user office staff member.
</center></H3>
```

Figure 40.48: Customization failed login html

- Will produce the failed login page in Figure 40.49.

There was a problem logging you in!

We cant find you on our list of active users. If you have used the lab before, your username may be deactivated for some reason. Please see a user office staff member.

Figure 40.49: Customization failed login html rendered

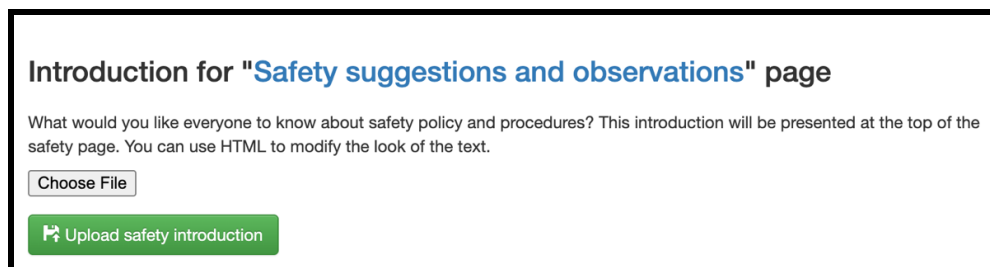

To upload a login banner:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload failed login page button to load the file.
- The selected file will be renamed 'authorization_failed.html' and saved in the media folder of the NEMO website.

Chapter 40 Customization (admin only)

40.5.4 Introduction for Safety suggestions and observations page

39.4.4 Introduction for Safety suggestions and observations page The customization for the introduction for safety suggestions and observations page can be configured using html to display lab specific safety information to users on the safety page and is uploaded and viewed through this dialog (Figure 40.50). The safety introduction is optional, and a default value will be displayed if not configured. More information about the safety page can be found in the safety section.

The screenshot shows a dialog box titled "Introduction for 'Safety suggestions and observations' page". Below the title is a text area containing the instruction: "What would you like everyone to know about safety policy and procedures? This introduction will be presented at the top of the safety page. You can use HTML to modify the look of the text." There are two buttons: a "Choose File" button and a green "Upload safety introduction" button with an upward arrow icon.

Figure 40.50: Customization safety introduction

To create a custom safety introduction:

- Use any html editor to create the desired content:
- Example:
 - The html in Figure 40.51.

```
<p style="font-weight:bold; color:red">For emergency related safety issues involving chemicals spills and exposures, fires, toxic gas release, or any personal injuries call 911 and tell them where you are.</p>  
  
<p>This lab values safety and strives to create a safe working environment for everyone. We invite your suggestions and observations in order to provide a safer and more effective environment for all users and staff. Use this form to report non-emergency related safety issues, unsafe working conditions, housekeeping suggestions, or observations directly to the NanoFab management. This will generate an email that will be automatically sent to the NanoFab management. You can send your comments or concerns completely anonymously or provide your name so that we can follow up with you within 3 business days. If you feel this should be handled sooner than 3 business days, you should contact the lab manager.</p>
```

Figure 40.51: Customization safety introduction html

Chapter 40 Customization (admin only)

- Will produce the introduction in Figure 40.52 on the safety page:

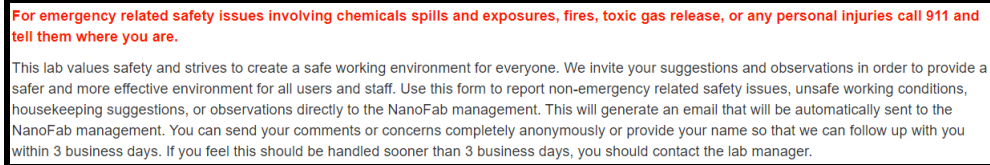

Figure 40.52: Customization safety introduction html rendered

To upload a login banner:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload login banner button to load the file.
- The selected file will be renamed 'safety_introduction.html' and saved in the media folder of the NEMO website.
- To view the uploaded content, navigate to the safety page by clicking the link provided (Figure 40.53).

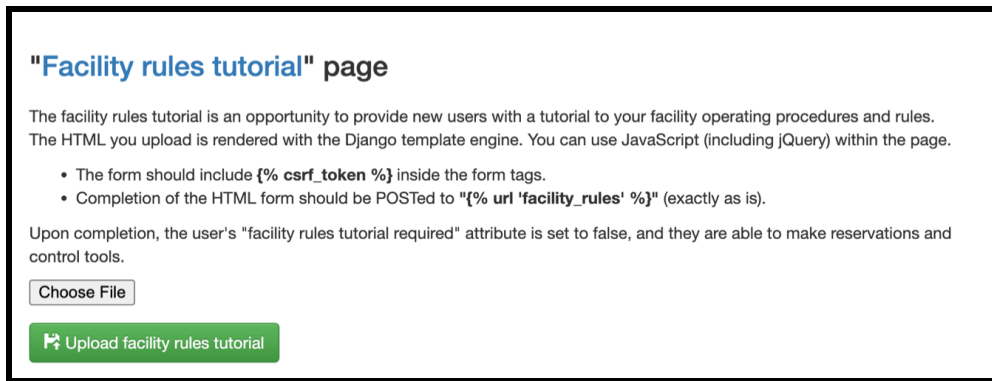

Introduction for "[Safety suggestions and observations](#)" page

Figure 40.53: Customization safety introduction page link

Chapter 40 Customization (admin only)

40.5.5 Facility rules tutorial page

The customization for the facility rules tutorial page can be configured using html to display lab specific tutorial information to users and is uploaded and viewed through this dialog (Figure 40.54). The rules tutorial is optional however there is no default content therefore users with training required while no rules tutorial has been configured will require staff to uncheck the users training required status. More information about the rules tutorial can be found in the landing page section 42.28.

"Facility rules tutorial" page

The facility rules tutorial is an opportunity to provide new users with a tutorial to your facility operating procedures and rules. The HTML you upload is rendered with the Django template engine. You can use JavaScript (including jQuery) within the page.

- The form should include `{% csrf_token %}` inside the form tags.
- Completion of the HTML form should be POSTed to `"{% url 'facility_rules' %}"` (exactly as is).

Upon completion, the user's "facility rules tutorial required" attribute is set to false, and they are able to make reservations and control tools.

Figure 40.54: Customization rules tutorial

The tutorial is triggered by a flag in a user's profile and by default is set to require training upon user creation. NEMO user profiles are discussed in the Users section. A notification is displayed on the landing page and is the user access point for completing the tutorial which is described in the landing page section.

Chapter 40 Customization (admin only)

To create a custom rules tutorial.

- Use any html editor to create the desired content.
- The HTML uploaded is rendered with the Django template engine.
- JavaScript (including jQuery) can be used within the page.
- To mark the training as complete, the form must be POSTed to the 'facility_rules' URL to enable the user to make reservations and control tools.
- Example:
 - The html in Figure 40.55.

```
<h1>NanoFab Rules</h1>

<form action="{% url 'facility_rules' %}" method="post">
  {% csrf_token %}

  <div id="introduction">
    <h4>Introduction</h4>
    <p>The NanoFab operates as a shared resource for both internal and external users. Please work with other
users to ensure everyone is as productive as possible.</p>
    <p>Don't over reserve tools and if you no longer need a reservation, cancel it as soon as possible.
Please be sure that you log in as soon as you begin using each tool and log out only after the tool is available for the
next user.</p>
    <p><strong>Most important, clean up after yourself</strong></p>
    <button type="button" class="btn btn-success" onclick="$('#introduction').hide();
$('#conclusion').show();window.scrollTo(0,0);">I understand and agree</button>
  </div>

  <div id="conclusion" style="display:none">
    <p>Ultimately, the staff want to make your NanoFab experience as productive and fun as possible. We hope
these rules will make everyone's life better.<br></p>
    <button type="submit" style="white-space: normal" class="btn btn-success">Click here to officially
complete your training</button>
  </div>
</form>
```

Figure 40.55: Customization rules tutorial html

Chapter 40 Customization (admin only)

- Will produce the tutorial pages shown in Figure 40.56 and Figure 40.57.

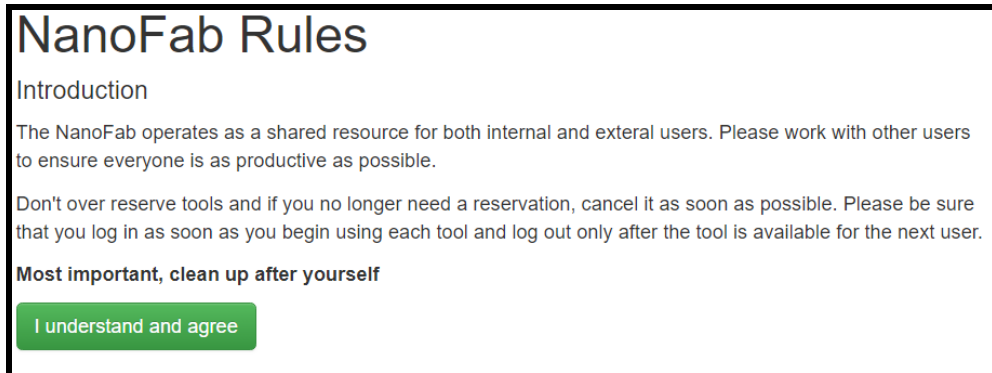

Figure 40.56: Customization rules tutorial html rendered page 1

Chapter 40 Customization (admin only)

To upload a rules tutorial:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload rules tutorial button to load the file.
- The selected file will be renamed 'facility_rules_tutorial.html' and saved in the media folder of the NEMO website.
- To view the uploaded content, navigate to the safety page by clicking the link provided (Figure 40.58).

"NanoFab rules tutorial" page

Figure 40.58: Customization rules tutorial page link

Chapter 40 Customization (admin only)

40.5.6 Jumbotron watermark

The customization for the jumbotron watermark can be configured to display a background on the jumbotron page view (Figure 40.59). The jumbotron watermark configuration is optional and a white background is displayed if not configured. More information about the jumbotron page can be found in the jumbotron chapter 9.

"Jumbotron" watermark

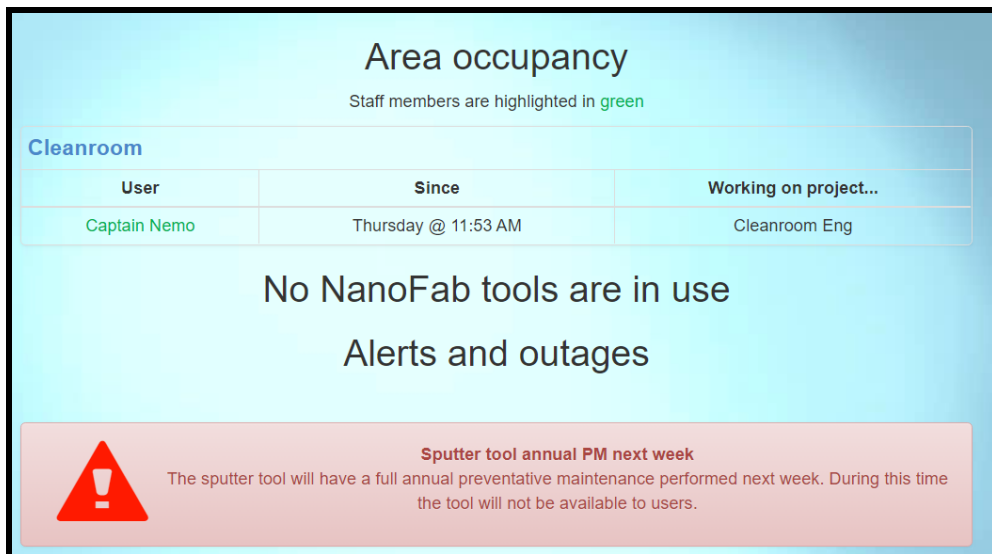

This image is displayed as background for the Jumbotron. It is set as a full background screen, so your image needs to take that into account.
The image you upload should be a valid image file (recommended size is 1500x1000).

Figure 40.59: Configuration jumbotron watermark

Chapter 40 Customization (admin only)

To upload a jumbotron watermark:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed 'jumbotron_watermark' and saved in the media folder of the NEMO website.
- An example of the jumbotron with watermark background is displayed in Figure 40.60.

The screenshot displays a web interface with a light blue background. At the top, the title "Area occupancy" is centered, with a subtitle "Staff members are highlighted in green". Below this is a table with the heading "Cleanroom". The table has three columns: "User", "Since", and "Working on project...". The first row shows "Captain Nemo" in green text, "Thursday @ 11:53 AM", and "Cleanroom Eng". Below the table, the text "No NanoFab tools are in use" and "Alerts and outages" is centered. At the bottom, there is a red warning icon and a text box with the heading "Sputter tool annual PM next week" and the message: "The sputter tool will have a full annual preventative maintenance performed next week. During this time the tool will not be available to users."

User	Since	Working on project...
Captain Nemo	Thursday @ 11:53 AM	Cleanroom Eng

Figure 40.60: Customization watermark behind jumbotron

Chapter 40 Customization (admin only)

40.5.7 Access request notification email

The customization for the access request notification email template can be configured using html to render a specific message when a user creates or updates an access request, and when a facility manager approves or denies a request (Figure 40.61). Basically, any creation or updates of an access request will trigger this email to be sent. The access requests feature is described in the access requests section 8.2. The access request notification template is optional and if not defined email notifications will not be sent.

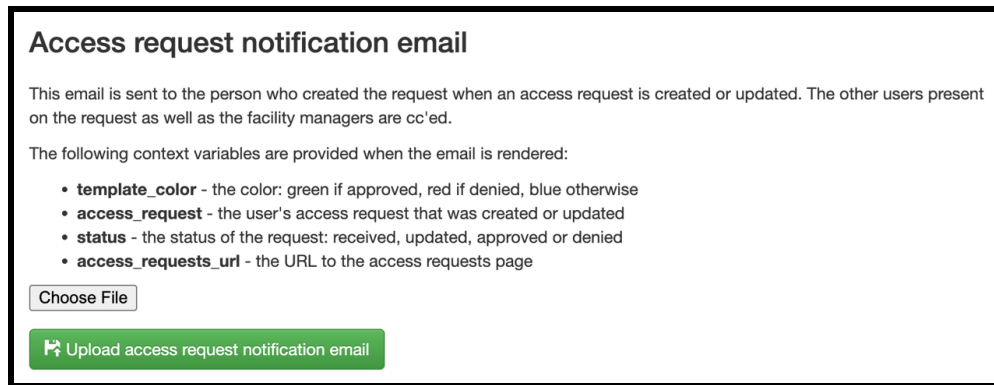

Figure 40.61: Customization access request notification email

To create a custom access request email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - **template_color** – the color to be used in the template, green for an approved request, red for a denied request, and blue otherwise.
 - **access_request** – the access request that was created or updated
 - **status** - the request status: received, updated, approved, or denied.

Chapter 40 Customization (admin only)

– `access_requests_url` – the access requests URL.

- The email subject is “Your access request for the <area> has been <received,updated,approved,denied>”. For example, “Your access request for the Cleanroom has been received”.
- The email will be sent from the user office email.

40.5.8 Adjustment request notification email

The customization for the adjustment request notification email template can be configured using html to render a specific message when a user creates or updates an adjustment request, and when a facility manager approves or denies a request (Figure 40.62). Basically, any creation or updates of an adjustment request will trigger this email to be sent. The adjustment requests feature is described in the adjustment requests section 8.3. The adjustment request notification template is optional and if not defined email notifications will not be sent.

Adjustment request notification email

This email is sent to the person who created the request when an adjustment request is created or updated. Facility managers are cc'ed.

When an adjustment request is approved it is also sent to the User Office

The following context variables are provided when the email is rendered:

- **template_color** - the color: green if approved, red if denied, blue otherwise
- **adjustment_request** - the user's adjustment request that was created or updated
- **status** - the status of the request: received, updated, approved or denied
- **adjustment_requests_url** - the URL to the adjustment requests page
- **manager_note** - an extra (optional) note from the manager sent to the user when the request is denied or to the user office when it is approved
- **user_office** - a flag that is true when the email is addressed to the User Office

Figure 40.62: Customization adjustment request notification email

Chapter 40 Customization (admin only)

To create a custom adjustment request email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - `template_color` – the color to be used in the template, green for an approved request, red for a denied request, and blue otherwise.
 - `adjustment_request` – the adjustment request that was created or updated.
 - `status` - the request status: received, updated, approved, or denied.
 - `adjustment_requests_url` – the adjustment requests URL.
 - `manager_note` – the optional note from the facility manager, sent to the user if the request is denied, and to the User office if the request is approved.
 - `user_office` - a flag set to true if the email is the extra email sent to the user office, or false if it's the regular email.
- The email subject is “Your adjustment request for has been <received,updated,approved,denied>”. For example, “Your adjustment request has been received”.
- The email will be sent from the `DEFAULT_FROM_EMAIL` set in `settings.py` or `SERVER_EMAIL` if the default is not set.

Chapter 40 Customization (admin only)

40.5.9 Cancellation email

The customization for the cancellation email template can be configured using html to render a specific message when a staff member cancels a user's reservation (Figure 40.63). The cancel user reservation feature is described in the reservations section 5.4. The cancellation email template is optional and if not defined cancellation emails will not be sent.

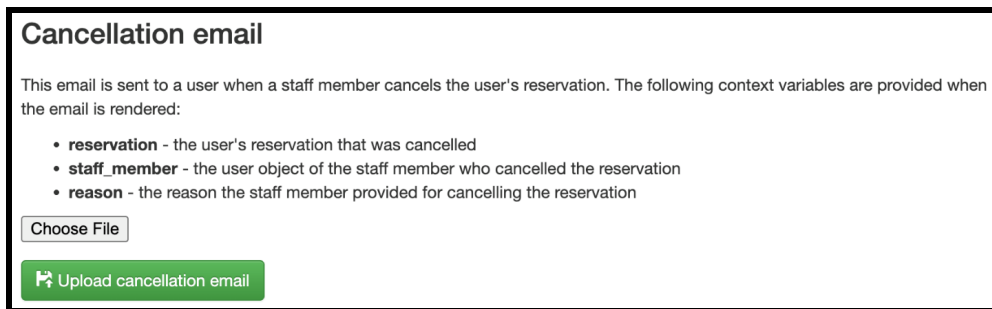

Figure 40.63: *Customization cancellation email*

To create a custom cancellation email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - reservation – the reservation object of the canceled reservation.
 - staff_member – the user object of the staff member who canceled the reservation.
 - reason – the reason the staff member provided for canceling the reservation.
- The email subject is always, “Your reservation was canceled”.
- The email will be from the staff member that canceled the reservation.

Chapter 40 Customization (admin only)

40.5.10 Counter threshold reached email

The customization for the counter threshold reached template can be configured using html to render a specific message when the warning threshold value for a tool usage counter is reached (Figure 40.64). The counter threshold reached email template is optional and if not defined the emails will not be sent.

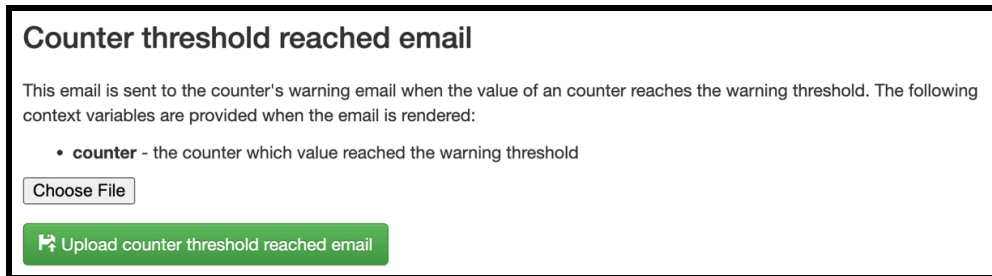

Figure 40.64: Customization counter threshold reached email

To create a custom counter threshold reached email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - counter – the tool usage counter which value reached the warning threshold
 - The email subject is always, “Warning threshold reached for tool.name counter.name counter”.
- The email will be sent from the user office.

Chapter 40 Customization (admin only)

40.5.11 Facility rules tutorial email

The customization for the Facility rules tutorial email template can be configured using html to render a specific message to staff when a user completes the tutorial (Figure 40.65). The rules tutorial feature is described in the landing page section 42.28. The rules tutorial email is optional and will only be sent if the email template is configured. The rules tutorial email requires the email template and the abuse email address, or the email will not be sent.

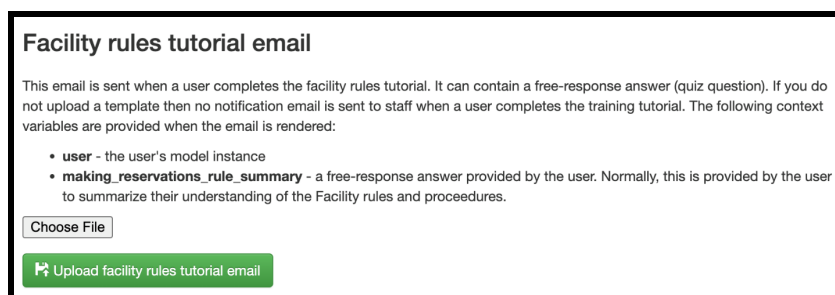

Figure 40.65: Customization rules tutorial email

To create a custom rules tutorial email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - user – the user object of the user who completed the tutorial.
 - making_reservations_rule_summary – a free response answer that can be passed from the rules tutorial to the email.
- The email subject is always "<Facility Name> rules tutorial".
- The email will be from the abuse email defined in the email addresses section above.
- The email will be addressed to the abuse email address.

Chapter 40 Customization (admin only)

40.5.12 Feedback email

The customization for the feedback email template can be configured using html to render a specific message when a user fills out the feedback form (Figure 40.66). The send feedback feature is described in the send feedback chapter 14. The feedback feature requires both the feedback email template and feedback email address customizations or emails will not be sent. The feedback email address customization is described in the email addresses section 40.4 above.

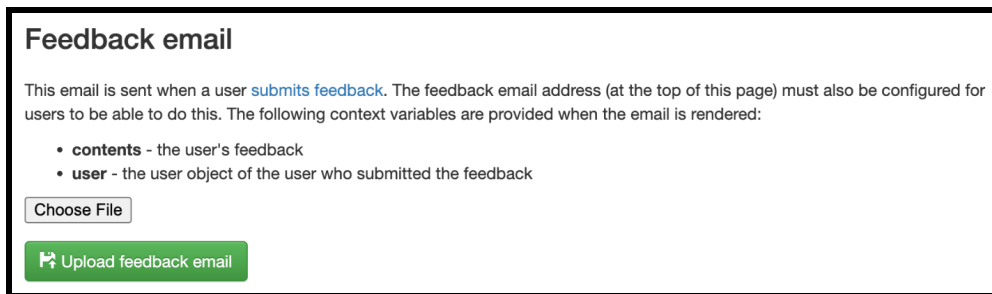

Figure 40.66: Customization feedback email

To create a custom feedback email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - contents – the user's feedback.
 - user – the user object of the user who submitted feedback
- The email subject is always, "feedback from username".
- The email will be from the user leaving feedback.

Chapter 40 Customization (admin only)

40.5.13 Generic email

The customization for the generic email template can be configured using html to render a specific message when a staff member fills out the email form (Figure 40.67). The email feature is described in the email addresses section 40.4. The email feature requires the generic email template or emails will not be sent.

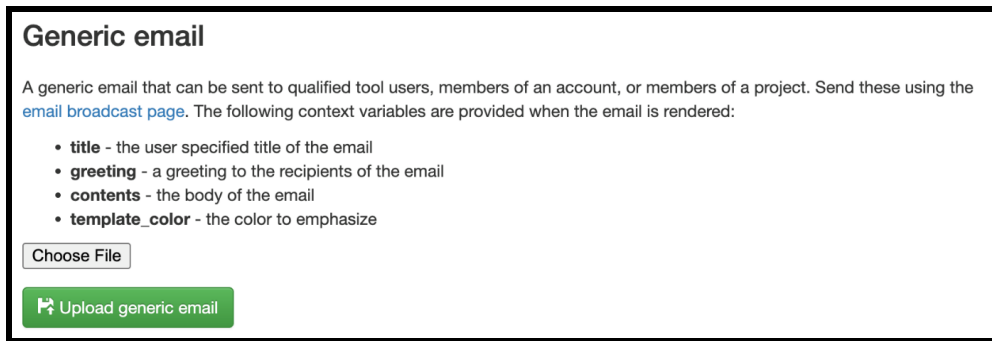

Figure 40.67: Customization generic email

To create a custom generic email template

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - title – the user specified title of the email.
 - greeting – a greeting to the recipients of the email.
 - contents – the body of the email.
 - template_color – the title color to emphasize.
- The email subject is the subject entered on the email feature page.
- The email will be from the user creating the email.

Chapter 40 Customization (admin only)

40.5.14 Missed reservation email

The customization for the missed reservation email template can be configured using html to render a specific message when a user misses a reservation (Figure 40.68). The missed reservation feature is described in the reservation section 5.4. The missed reservation feature requires the missed reservation email template and the abuse email address, or the email will not be sent.

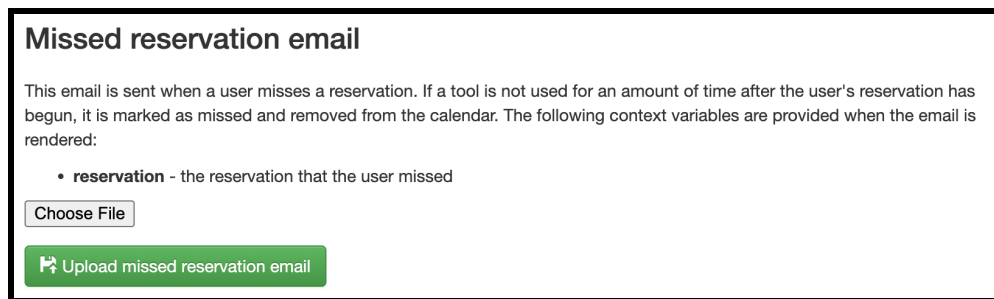

Figure 40.68: Customization missed reservation email

To create a custom missed reservation email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - reservation – the reservation object of the missed reservation.
- The email subject is always “Missed reservation for the reservation.tool.
- The email will be from the user office email defined in the email addresses section above.
- The email will be addressed to the user that missed the reservation, the abuse email address, and the user office email address.

Chapter 40 Customization (admin only)

40.5.15 New task email

The customization for the new task email template can be configured using html to render a specific message to users and staff when a task is created (Figure 40.69). The task feature is described in the tool control section. The new task email is optional and will only be sent if the email template is configured.

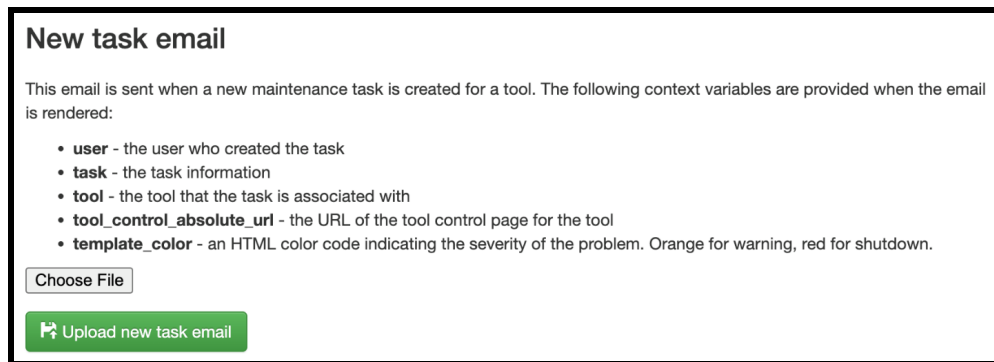

Figure 40.69: Customization new task email

To create a custom rules tutorial email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - user – the user object of the user who created the task.
 - task – the task object information.
 - tool – the tool object that the task is associated with.
 - tool_control_absolute_url – the URL of the tool control page for the tool.
 - template_color – an HTML color code indicating the severity of the problem. Orange for warning, red for shutdown.

Chapter 40 Customization (admin only)

- The email subject will identify the tool name, if the task is a safety hazard, and if the task is defined as a problem or shutdown.
- The email will be from the user reporting or updating the task.
- The email will be addressed to the tool primary owner, backup owners, notification email defined in the tool table, and lab managers if defined in the settings.py file.

Chapter 40 Customization (admin only)

40.5.16 Out of time reservation email

The customization for the out of time reservation email template can be configured using html to render a specific message to users when a user is still logged in an area that requires reservations to access, but their reservation has expired (Figure 40.70). A grace period can be set when configuring the area that will delay the email.

Figure 40.70: Customization out of time reservation email

- To create a custom out of time reservation email template.
- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - reservation – the user’s upcoming reservation object.
- The email subject will always be “Out of time in the area”.
- The email will be from the user office email defined in the email addresses section above.
- The email will be addressed to the user with the reservation and any users defined in the abuse email of the area table.

Chapter 40 Customization (admin only)

40.5.17 Recurring charges reminder email

The customization for the recurring charges reminder email template can be configured using html to render a specific message to users a certain number of days before they are to be charged for recurring consumable charges (Figure 40.71).

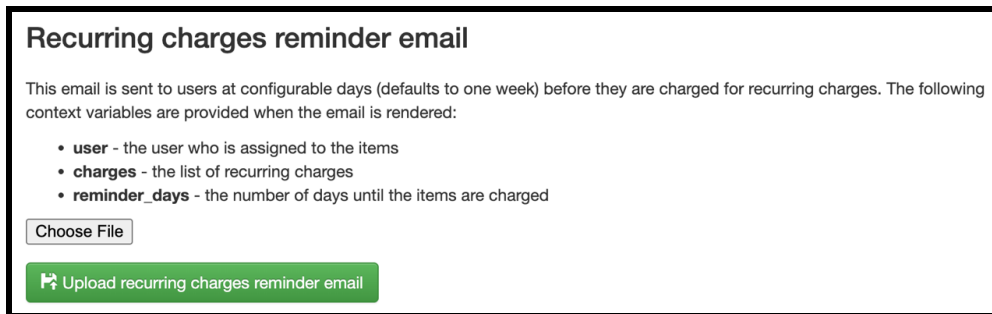

Figure 40.71: Customization recurring charges reminder email

To create a recurring charges reminder email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - user – the user who is about to be charged.
 - charges – a list of recurring charges due on the same date.
 - reminder_days – the number of days until the charges will be billed.
- The email subject will always be “Recurring charges will be charged in reminder_days day(s)”.
- The email will be from the user office email defined in the email addresses section.
- The email will be addressed to the user.

Chapter 40 Customization (admin only)

40.5.18 Reorder supplies reminder email

Reorder supplies reminder The customization for the reorder supplies reminder email template can be configured using html to render a specific message to the supply owner when the supply stock drops below the minimum (Figure 40.72).

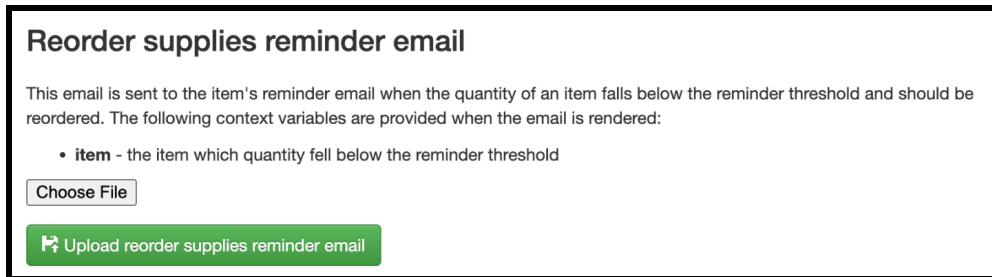

Figure 40.72: Customization reorder supplies reminder email

To create a custom reorder supplies reminder email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - item – the item (consumable) object which quantity fell below the reminder threshold.
- The email subject will always be “Time to order more consumable.name”.
- The email will be from the user office email defined in the email addresses section above.
- The email will be addressed to the email set on the Consumable table.

Chapter 40 Customization (admin only)

40.5.19 Reservation ending reminder email

The customization for the reservation ending reminder email template can be configured using html to render a specific message to users when a user is logged in an area and their reservation in that area is about to end (Figure 40.73). The reservation ending reminder email is optional and will only be sent if the reservation ending reminder email template is configured.

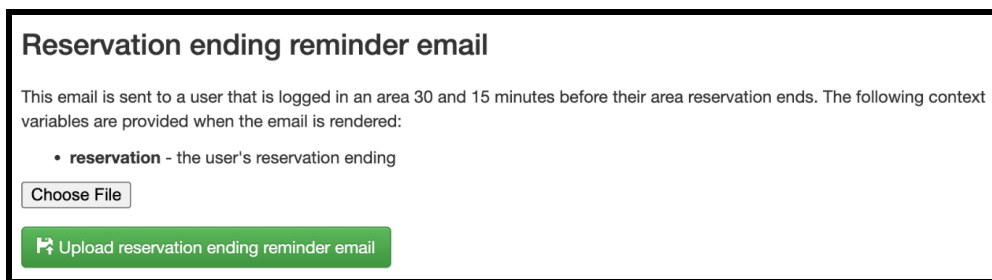

Figure 40.73: Customization reservation ending reminder email

To create a custom reservation ending reminder email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - reservation – the user's ending reservation object.
- The email subject will always be “area name reservation ending soon”.
- The email will be from the user office email defined in the email addresses section above.
- The email will be addressed to the user with the reservation.

Chapter 40 Customization (admin only)

40.5.20 Reservation reminder email

The customization for the reservation reminder email template can be configured using html to render a specific message to users when a reservation is approaching (Figure 40.74). The reservation reminder feature is described in the reservation section 5.4. The reservation reminder email is optional and will only be sent if both the reservation reminder email template and the reservation warning email template are configured. The reservation warning email template is described below.

Reservation reminder email

This email is sent to a user two hours before their tool/area reservation begins. The reservation warning email must also exist for this email to be sent. The following context variables are provided when the email is rendered:

- **reservation** - the user's upcoming reservation

Figure 40.74: Customization reservation reminder email

To create a custom reservation reminder email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - reservation – the user's upcoming reservation object.
- The email subject will always be "tool name reservation reminder".
- The email will be from the user office email defined in the email addresses section above.
- The email will be addressed to the user with the reservation.

Chapter 40 Customization (admin only)

40.5.21 Reservation warning email

The customization for the reservation warning email template can be configured using html to render a specific message to users when a reservation is approaching and there is a problem with the tool they reserved (Figure 40.75). The reservation warning feature is described in the reservation section 5.4. The reservation warning email is optional and will only be sent if both the reservation reminder email template and the reservation warning email template are configured. The reservation reminder email template is described above.

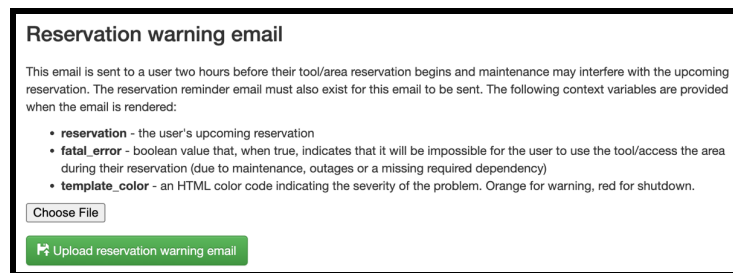

Figure 40.75: Customization reservation warning email

To create a custom reservation warning email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - reservation – the user’s upcoming reservation object.
 - fatal_error – when true, indicates that the tool is shutdown.
- The email subject will always be “tool name reservation problem”.
- The email will be from the user office email defined in the email addresses section above.
- The email will be addressed to the user with the reservation.

Chapter 40 Customization (admin only)

40.5.22 Safety issue email

The customization for the safety email template can be configured using html to render a specific message to users when a safety issue has been created (Figure 40.76). The safety issue feature is described in chapter 11. The safety email is optional and will only be sent if both the safety email template and the safety email address are configured. The safety email address is defined in the email addresses section above.

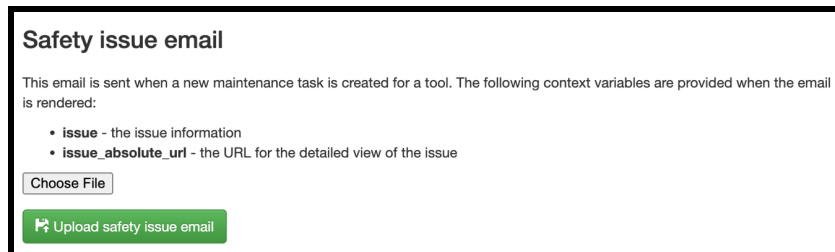

Figure 40.76: Customization safety email

To create a custom safety email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - issue – the issue object.
 - issue_absolute_url – the URL to the detailed view of the issue.
- The email subject will always be “Safety issue”.
- The email will be from the user reporting the safety issue unless the report is anonymous then the email will be from the safety email address defined in the email addresses section above.
- The email will be addressed to the safety email address defined in the email addresses section above.

Chapter 40 Customization (admin only)

40.5.23 Scheduled outage reminder email

The customization for the scheduled outage reminder email template can be configured using html to render a specific message to a set of email addresses before a scheduled outage is set to start. (Figure 40.77).

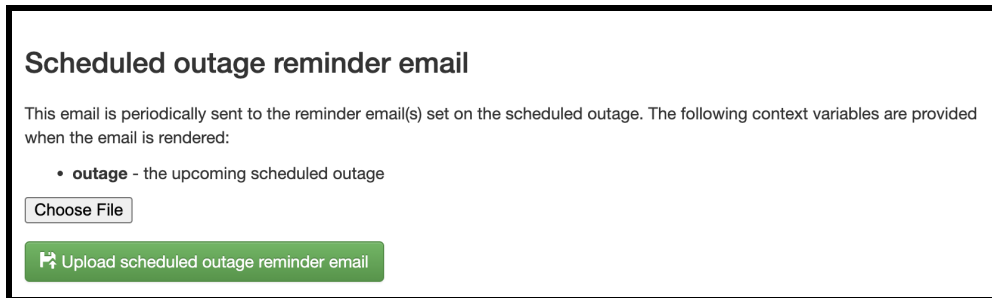

Figure 40.77: Customization scheduled outage reminder email

To create a custom scheduled outage reminder email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - outage – the upcoming scheduled outage.
- The email subject will always be “outage.title reminder”.
- The email will be from the DEFAULT_FROM_EMAIL address set in settings.py.
- The email will be addressed to the list of email addresses set on the outage itself.

Chapter 40 Customization (admin only)

40.5.24 Staff charge reminder email

The customization for the staff charge email template can be configured using html to render a specific message to staff as a reminder they are currently charging a user (Figure 40.78). The staff charge feature is described in the staff charge section 33.1. The staff charge email is optional and will only be sent if the email template is configured.

Staff charge reminder email

This email is periodically sent to remind staff that they are charging a user for staff time. The following context variables are provided when the email is rendered:

- **staff_charge** - the staff charge that is in progress

Figure 40.78: Customization staff charge email

To create a custom staff charge email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - staff_charge – the staff charge object.
- The email subject will always be “Active staff charge since staff_charge.start”.
- The email will be from the user office email address defined in the email addresses section above.
- The email will be addressed to the staff member currently charging.

Chapter 40 Customization (admin only)

40.5.25 Task status notification email

The customization for the task status notification email template can be configured using html to render a specific message to staff when the status of a task is changed (Figure 40.69). The task status feature is described in the tool control chapter 6. The task status email is optional and will only be sent if the email template is configured.

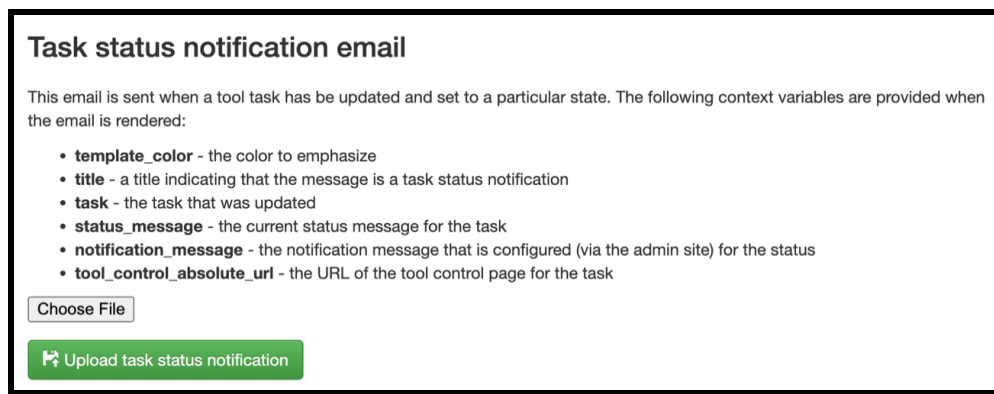

Figure 40.79: Customization new task email

To create a custom task status email template

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - template_color – an HTML color code indicating the title background color.
 - title – a title indicating the message is a task status notification.
 - task – the task object that was updated.
 - status_message – the current status message for the task.

Chapter 40 Customization (admin only)

- notification_message – the notification message that is configured (via the admin site) for the status.
 - tool_control_absolute_url – the URL of the tool control page for the task.
- The email subject will always be “tool.name task notification”.
- The email will be from the user updating the task status.
- The email will be addressed to the tool primary owner, backup owners, and/or notification emails defined in the tool table, if selected in the task status table.

Chapter 40 Customization (admin only)

40.5.26 Tool qualification expiration email

The customization for the tool qualification expiration email template can be configured using html to render a specific message to users when they are about to lose access to a tool (Figure 40.80).

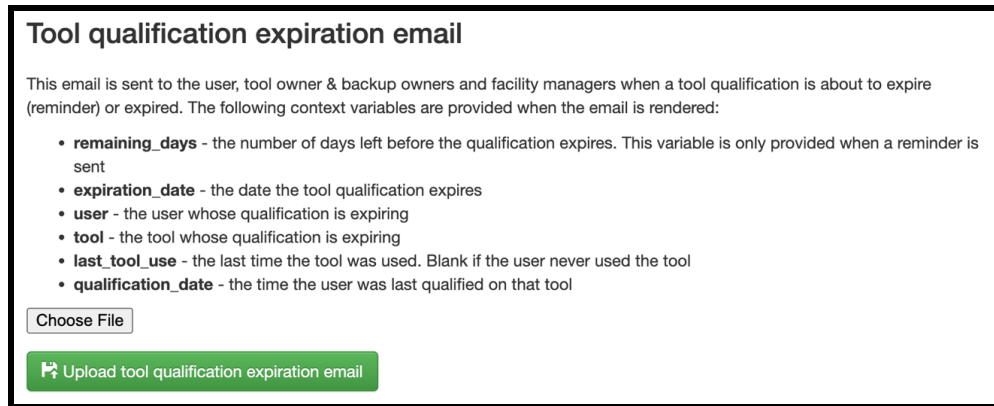

Figure 40.80: Customization tool qualification expiration email

To create a tool qualification expiration email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - remaining_days – the number of days until the tool access expires. Only present if the email is a reminder.
 - expiration_date – the date the tool qualification expires.
 - user – the user whose tool access is expiring.
 - tool – the tool the user is about to lose access to.
 - last_tool_use – the last time the tool was used, or blank if the user never used it.

Chapter 40 Customization (admin only)

- qualification_date – the date the user was last qualified on the tool.
- The email subject will either be “Your tool.name qualification expires in remaining_days days” or “You tool.name qualification has expired”.
- The email will be from the user office email address.
- The email will be addressed to the user and cc’d to any email address set in Customization → Tool qualification.

Chapter 40 Customization (admin only)

40.5.27 Tool wait list notification email

The customization for the tool wait list notification email template can be configured using html to render a specific message to users when it's their turn to use a tool they have been on the waitlist for (Figure 40.81).

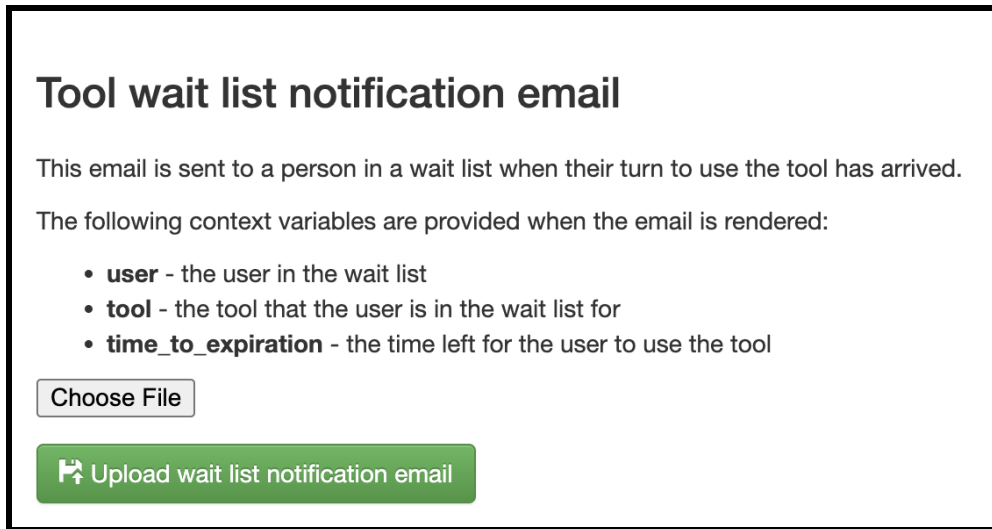

Figure 40.81: Customization tool waitlist notification email

To create a tool waitlist notification email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - user – the user in the wait list.
 - tool – the tool that the user is in the wait list for.
 - time_to_expiration – the time left for the user to use the tool.
- The email subject will either be “Your turn for the tool.name”.

Chapter 40 Customization (admin only)

- The email will be from the DEFAULT_FROM_EMAIL address set in settings.py.
- The email will be addressed to the user whose turn it is to use the tool.

Chapter 40 Customization (admin only)

40.5.28 Unauthorized tool access email

The customization for the unauthorized tool access email template can be configured using html to render a specific message to staff when a user tries to log into a tool that is in an area the user is not currently logged into (Figure 40.82). The unauthorized tool access feature is described in the tool control chapter 6. The unauthorized tool access email is optional and will only be sent if the email template and the abuse email address described is configured.

Unauthorized tool access email

This email is sent when a user tries to access a tool:

- without being logged in to the area in which the tool resides (type 'area').
- without having a current area reservation (type 'reservation')

The following context variables are provided when the email is rendered:

- **operator** - the person who attempted to use the tool
- **tool** - the tool that the user was denied access to
- **type** - the type of abuse ('area' or 'reservation')

Figure 40.82: Customization unauthorized tool access email

To create a custom unauthorized tool access email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - operator – the person who attempted to enable the tool.

Chapter 40 Customization (admin only)

- tool – the tool object of the tool the user was denied access to.
 - type – the type of abuse (“area” or “reservation”).
- The email subject will always be “Area access requirement”.
- The email will be from the abuse email address.
- The email will be addressed to the abuse email address.

Chapter 40 Customization (admin only)

40.5.29 Usage reminder email

The customization for the usage reminder email template can be configured using html to render a specific message to users periodically when they are logged into areas or tools (Figure 40.83). The usage reminder feature is described in the tool control section. The usage reminder email is optional and will only be sent if the email template and the abuse email address is configured.

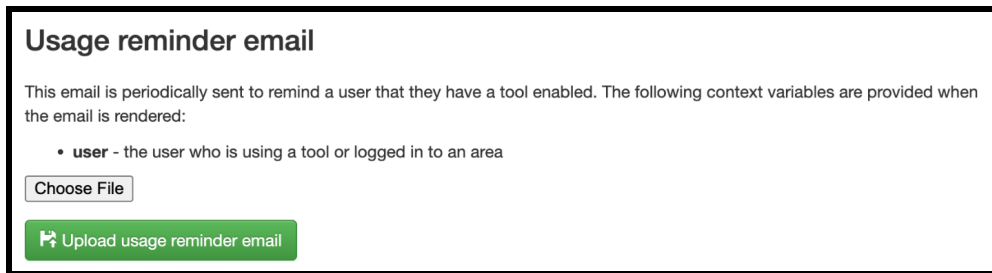

Figure 40.83: Customization usage reminder email

To create a custom usage reminder email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - user – the user object who is using a tool or logged in to an area.
 - user.resources_in_use – a list of resources the user is currently using.
- The email subject will always be “facility name usage”.
- The email will be from the user office email address.
- The email will be addressed to the user.

Chapter 40 Customization (admin only)

40.5.30 User access expiration reminder email

The customization for the user access expiration reminder email template can be configured using html to render a specific message to users a certain number of days before their access expires (Figure 40.84). The user access expiration feature is described in the Customization → User → Access expiration reminder subsection 40.17.2. The user access expiration reminder email is optional and will only be sent if the email template, the number of days and the user office email address are all configured.

Figure 40.84: Customization user access expiration reminder email

To create a custom user access expiration reminder email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - user – the user object whose access is expiring.
 - remaining_days – the remaining days before the user’s access expires.
- The email subject will always be “Your facility_name access expires in remaining_days days (format_datetime(user.access_expiration))”.
- The email will be from the user office email address.
- The email will be addressed to the user.

Chapter 40 Customization (admin only)

40.5.31 User reservation created email

The customization for the user reservation created email template can be configured using html to render a specific message to users when they create a reservation that provides a calendar invite for common mail interfaces such as Outlook or Gmail as an attachment (Figure 40.85). The feature is described in the user preference chapter 19. The user reservation created email is optional and will only be sent if the email template and the user office email address are configured and the user has enabled the feature in their user preferences.

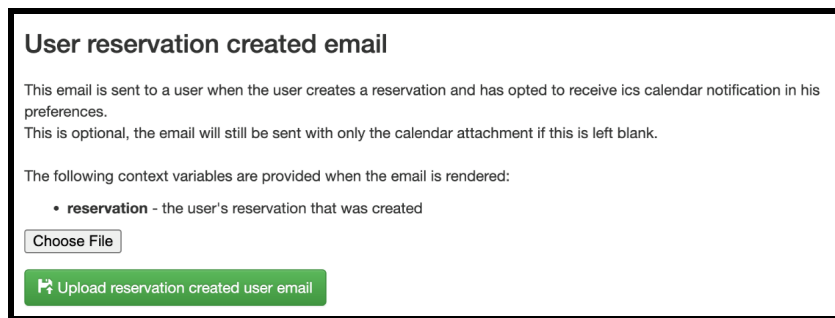

Figure 40.85: Customization user reservation created email

To create a custom user reservation created email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - reservation – the reservation object of the users reservation.
- The email subject will always be “facility_name Reservation for the tool_name”.
- The email will be from the user office email address.
- The email will be addressed to the user.

Chapter 40 Customization (admin only)

40.5.32 User reservation cancelled email

The customization for the user reservation canceled email template can be configured using html to render a specific message to users when they cancel a reservation that provides a calendar invite for common mail interfaces such as Outlook or Gmail as an attachment (Figure 40.86). The feature is described in the user preference section. The user reservation canceled email is optional and will only be sent if the email template and the user office email address described are configured and the user has enabled the feature in their user preferences.

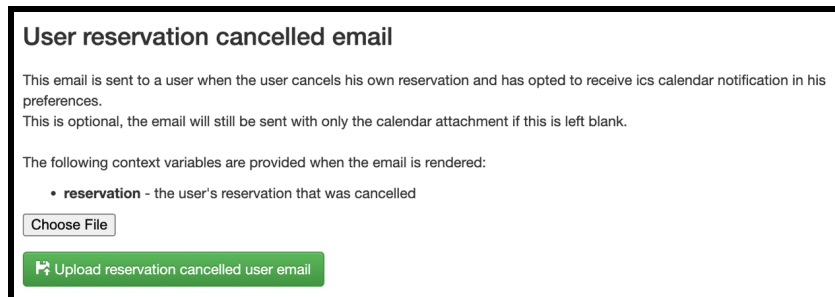

Figure 40.86: Customization user reservation canceled email

To create a custom user reservation cancelled email template:

- Use any html editor to create the desired content.
- Context variables available. The fields of an object can be found in the objects model in the models.py file.
 - reservation – the reservation object of the user's reservation.
- The email subject will always be "facility_name Reservation for the tool_name".
- The email will be from the user office email address.
- The email will be addressed to the user.

Chapter 40 Customization (admin only)

40.5.33 Weekend access notification email

The customization for the weekend access notification email template can be configured using html to render a specific message to be sent to the weekend access emails provided in User request settings. The weekend access notification email is optional and will only be sent if the email template and the user office email address are configured (Figure 40.87).

Weekend access notification email

This email is sent to the [weekend access notification email\(s\)](#) as well as the facility manager(s) when:

- there is at least one approved access request that includes weekend time during the current week. (The email is sent when the first weekend access request is approved).
- there are no approved access requests that include weekend time during the current week. (the email is sent on the [cutoff day](#) at the [cutoff hour](#) provided in the user requests settings above).

The following context variables are provided when the email is rendered:

- **weekend_access** - true/false, whether there are approved weekend access requests for the current week.

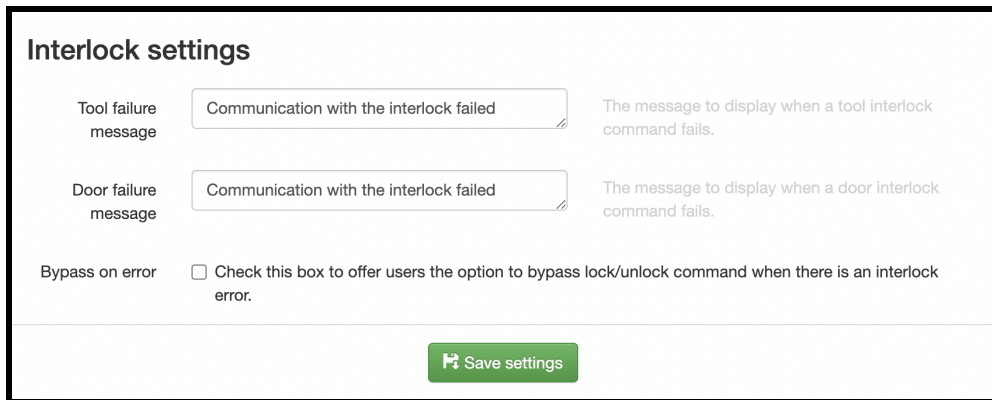

Figure 40.87: Customization weekend access notification email

To create a custom weekend access email template: Use any html editor to create the desired content Context variables available. The fields of an object can be found in the objects model in the models.py file. `weekend_access` – a Boolean (true/false) value representing whether there will be weekend access. The email subject will always be either “Weekend access for the facility_name saturday_date – sunday_date” The email will be from the user office email address The email will be addressed to the email(s) set in User request settings as well and all facility managers.

Chapter 40 Customization (admin only)

40.6 Interlock

The Interlock settings can be used to display a custom message when an interlock command fails. Interlocks can be used for both doors and tools, and you can customize the message for each (Figure 40.88).

The screenshot shows a web interface titled "Interlock settings". It contains three main sections: "Tool failure message", "Door failure message", and "Bypass on error". Each message section has a text input field with the default text "Communication with the interlock failed" and a small edit icon. The "Bypass on error" section has a checkbox and a label: "Check this box to offer users the option to bypass lock/unlock command when there is an interlock error." At the bottom center, there is a green button with a save icon and the text "Save settings".

Figure 40.88: *Interlock settings*

- The default message for tool interlock failure is “Communication with the interlock failed”. To edit, click in the dialog box and enter the desired message (Figure 40.89). Note that carriage returns will be displayed to ease visual organization of information.

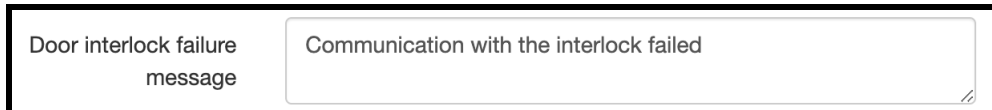

This is a close-up of the "Tool interlock failure message" input field. The text "Communication with the interlock failed" is entered into the field. A small edit icon is visible in the bottom right corner of the input box.

Figure 40.89: *Interlock settings tool failure message*

Chapter 40 Customization (admin only)

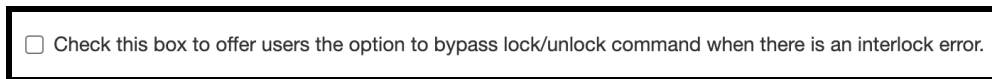

- The default message for door interlock failure is “Communication with the interlock failed”. To edit, click in the dialog box and enter the desired message (Figure 40.90). Note that carriage returns will be displayed to ease visual organization of information.

The screenshot shows a dialog box with a label on the left that reads "Door interlock failure message". To the right of the label is a text input field containing the text "Communication with the interlock failed". The input field has a small icon in the bottom right corner, likely for clearing the text.

Figure 40.90: *Interlock settings door failure message*

- Additionally, you can enable an option for users to bypass the interlock error by clicking the checkbox (Figure 40.91), meaning they can still enable/disable a tool or enter a billable area in NEMO. In reality this means that if interlock commands fail but tools or doors can be manually enabled by staff, the user can select that option to have NEMO keep track of time as it otherwise would.

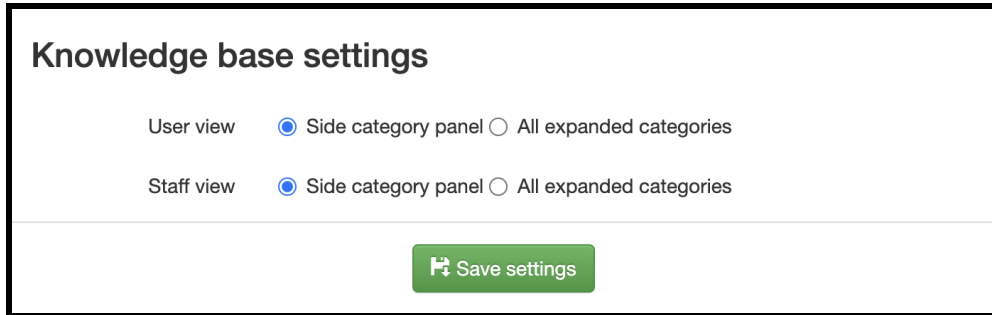

The screenshot shows a single checkbox with the text "Check this box to offer users the option to bypass lock/unlock command when there is an interlock error." to its right.

Figure 40.91: *Interlock settings bypass*

Chapter 40 Customization (admin only)

40.7 Knowledge base

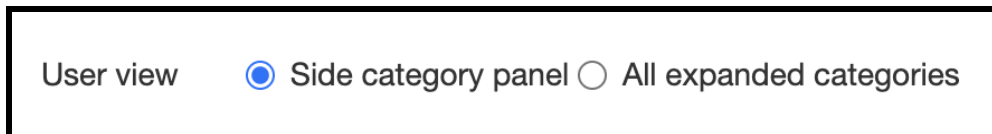

The Knowledge base settings can be used to control the display of the user and staff knowledge base. (Figure 40.92).

The screenshot shows a form titled "Knowledge base settings". It contains two rows of radio button options. The first row is for "User view" and the second row is for "Staff view". Each row has two options: "Side category panel" (which is selected with a blue dot) and "All expanded categories" (which is unselected). At the bottom center of the form is a green button with a white floppy disk icon and the text "Save settings".

Figure 40.92: Customization knowledge base settings

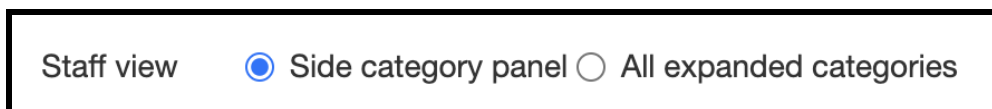

- The user knowledge base item view can be customized between the side category panel (default) and an all-expanded version (Figure 40.93).

The screenshot shows a single row of radio button options for "User view". It has two options: "Side category panel" (selected with a blue dot) and "All expanded categories" (unselected).

Figure 40.93: Knowledge base settings user items view

- The staff knowledge base item view can be customized between the side category panel (default) and an all-expanded version (Figure 40.94).

The screenshot shows a single row of radio button options for "Staff view". It has two options: "Side category panel" (selected with a blue dot) and "All expanded categories" (unselected).

Figure 40.94: Knowledge base settings staff items view

Chapter 40 Customization (admin only)

40.8 Projects and accounts

The Projects and accounts settings can be used to control the display of the account list and project selection, and to enable project document upload (Figure 40.95).

Projects & accounts

Projects/accounts list

Hide inactive accounts
Check this box to only show active accounts in the account list.

Hide inactive projects
Check this box to only show active projects in the project list.

Collapse project list by default
Check this box to collapse account projects by default.

Transfer charges

Allow accounting officers and managers to transfer charges to another project
Check this box to enable the transfer charges feature (available in the Administration menu or [here](#)).

Project PIs

Allow project PIs to manage users
Check this box to allow project PIs to add/remove users to/from projects.

Project identifier name

The name of the project identifier property (Application, ID, Reference, PO etc.).

Project selection template

The django template used for rendering project selection when enabling tools and making reservations. The context variable **project** is provided.

Document upload

Enable project document upload

Figure 40.95: Customization projects and accounts settings

Chapter 40 Customization (admin only)

- By default, inactive accounts are shown in the accounts and projects list. To hide them, check the “Hide inactive accounts” box (Figure 40.96).

Hide inactive accounts
Check this box to only show active accounts in the user list.

Figure 40.96: *Projects and accounts settings hide inactive accounts*

- By default, inactive projects are shown in the accounts and projects list. To hide them, check the “Hide inactive accounts” box (Figure 40.97).

Hide inactive projects
Check this box to only show active projects in the user list.

Figure 40.97: *Projects and accounts settings hide inactive projects*

- By default, the project list is expanded. To have it collapsed instead, check the “Collapse project list by default” box (Figure 40.98).

Collapse project list by default
Check this box to collapse account projects by default.

Figure 40.98: *Projects and accounts settings collapse project list*

Chapter 40 Customization (admin only)

- To allow accounting officers and facility managers to transfer charges from one project to another, check the “Allow accounting officers and managers to transfer charges to another project” box (Figure 40.99). Transfer charges are discussed in chapter refch:TransferChargesAccountingManagersOnly.

Transfer charges Allow accounting officers and managers to transfer charges to another project
Check this box to enable the transfer charges feature (available in the Administration menu or [here](#)).

Figure 40.99: *Projects and accounts settings enable charges transfer*

- To allow project PIs to manage their users (add/remove), check the “Allow project PIs to manager users” box (Figure 40.100).

Project PIs Allow project PIs to manage users
Check this box to allow project PIs to add/remove users to/from projects.

Figure 40.100: *Projects and accounts settings PIs manage users*

- The name of the project identifier field can be customized. This can be useful to keep consistent with your facility’s convention (Project ID, PO, Reference # etc.) (Figure 40.101).

Project identifier name
The name of the project identifier property (Application, ID, Reference, PO etc.).

Figure 40.101: *Projects and accounts settings application number*

Chapter 40 Customization (admin only)

- Customizing the project selection template allows for custom project information to be displayed when users are selecting a project to associate a reservation/usage with.

The default project selection template is “ project.name ”. To edit, click in the dialog box and enter the desired message (Figure 40.102). The syntax follows Django templating engine. Conditions and other tags can be used.

For example, entering “ project.account.name – project.name ” will result in the account name followed by the project name to be displayed when users need to select a project to associate with a reservation, usage etc. Note that carriage returns will be displayed to ease visual organization of information.

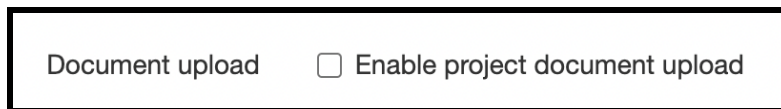

Project selection template

The django template used for rendering project selection when enabling tools and making reservations. The context variable `project` is provided.

Figure 40.102: *Projects and accounts settings project selection template*

- By default, uploading documents to projects is disabled. To enable it, check the “Enable project document upload” box (Figure 40.103).

Document upload Enable project document upload

Figure 40.103: *Projects and accounts settings enable project document upload*

Chapter 40 Customization (admin only)

40.9 Rates

The customization for the tool rates can be configured to display rates for tools and supplies (Figure 40.104). The tool rate configuration is optional, and no rate information will be displayed if not configured. More information about how the tool rates are displayed can be found in the tool control chapter. More information about how supply rates are displayed can be found in the supply chapter 36. NEMO comes with a default rate class defined which can be edited to suit your institution by modifying the rates.py file to create a custom rate class. NOTE: It is beyond the scope of this manual to provide details of programming changes.

Rates settings

Rates table Expand rates table in tool control

[Save settings](#)

Tool Rates

You can upload a json file to display tool rates. An example of a valid rates file can be found on [Github](#).

It should be a JSON array of elements, and the following key/values are supported for each element:

- **item_id** - the id of the tool or supply
- **table_id** - the type of rate, one of "inventory_rate" (for supplies), "primetime_eq_hourly_rate" (for tool), "training_individual_hourly_rate" (for individual training rate), "training_group_hourly_rate" (for group training rate)
- **rate_class** - the class, one of "full cost" or "cost shared"
- **rate** - the rate amount
- **item** - the name of the item (optional)

[Choose File](#) rates.json

[Upload rates](#) [Show current content](#)

Figure 40.104: Configuration tool rates

Chapter 40 Customization (admin only)

To create a custom tool rate file for the default rate class:

- Use any editor to create the desired json array of elements.
- The following key/values are supported for each element:
 - item_id – the id of the tool or supply that corresponds to the id value in the tool table or consumables table.
 - item – the name of the item which is optional but useful to make the json file human readable.
 - table_id – the type of rate:
 - * “inventory_rate” (for consumables/supplies),.
 - * “primetime_eq_hourly_rate” (for tool),.
 - * “training_individual_hourly_rate” (for individual training rate),.
 - * “training_group_hourly_rate” (for group training rate)
 - rate_class – the class,
 - * “full cost” (for tool, consumable/supply, individual and group training)
 - * “cost shared” (for tool)
 - rate – the rate amount.
- NOTE: only the rates defined will be displayed so every tool or supply does not need to be defined and every rate type and class do not need to be defined.
- Examples:
 - Tool and training rates, full cost, cost shared tool rate and individual and group training.
 - * The json code in Figure 40.105.

Chapter 40 Customization (admin only)

Chapter 40 Customization (admin only)

To upload a custom rate json file:

- Click the choose file button to open the file selection dialog.
- Select the desired file and click the open button. The selected file name will be displayed next to the choose file button.
- Click the upload button to load the file.
- The selected file will be renamed 'rates.json' and saved in the media folder of the NEMO website.
- Once a file has been uploaded, an option to view the file will be added (Figure 40.111).

Tool Rates

You can upload a json file to display tool rates. An example of a valid rates file can be found on [Github](#).

It should be a JSON array of elements, and the following key/values are supported for each element:

- **item_id** - the id of the tool or supply
- **table_id** - the type of rate, one of "inventory_rate" (for supplies), "primetime_eq_hourly_rate" (for tool), "training_individual_hourly_rate" (for individual training rate), "training_group_hourly_rate" (for group training rate)
- **rate_class** - the class, one of "full cost" or "cost shared"
- **rate** - the rate amount
- **item** - the name of the item (optional)

rates.json

Figure 40.111: Customization tool rates file loaded

Chapter 40 Customization (admin only)

To delete the currently loaded file:

- Click the upload watermark button without selecting a file to remove the current file from the website media folder.
- A warning dialog will appear.
- Click OK to delete the file or Cancel to leave the file.
- If OK is selected, the filename next to the choose file button will disappear.

To display the contents of the currently loaded file:

- Click the show current content button.
- The current file content will be displayed in a separate window.

Chapter 40 Customization (admin only)

40.10 Recurring charges

The Recurring charges settings can be configured to control the name of the feature itself, and a few parameters for the functionality (Figure 40.112).

Recurring charges settings

Feature name The name to use for this feature throughout the application.

Lock recurring charges Check this box to lock recurring charges, so staff members can only change customer and project fields.

Customer validation Check this box to skip customer validation (inactive or access has expired).

Category [Optional] Select a consumable category to restrict consumable choices to.

Force quantity [Optional] Define a quantity to be automatically set for every recurring charges.

Figure 40.112: Customization recurring charges settings

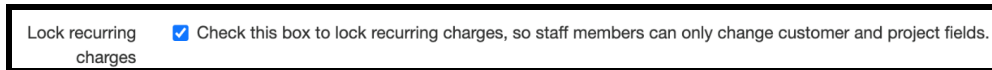

- By default, the recurring charges feature is called “Recurring charges”. Click on the text dialog box to change it (Figure 40.113). The name is used in the Administration menu as well as the Detailed administration part of the application. This can be useful for example if only one type of items is reoccurring, i.e., the feature could be named “User bins” or “Gown rentals”.

Feature name The name to use for this feature throughout the application.

Figure 40.113: Recurring charges settings feature name

Chapter 40 Customization (admin only)

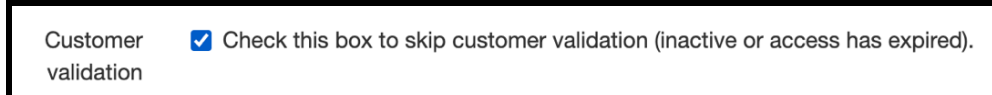

- Recurring charges can be locked to prevent other staff members from changing any parts of it except for the customer it is assigned to and the project. To lock recurring charges, check the corresponding box (Figure 40.114).

Lock recurring charges Check this box to lock recurring charges, so staff members can only change customer and project fields.

Figure 40.114: *Recurring charges settings lock recurring charge items*

- By default, before an item can be charged, the customer is validated to make sure the user is active, and his access hasn't expired. To skip that validation and charge anyway, check the corresponding box (Figure 40.115).

Customer validation Check this box to skip customer validation (inactive or access has expired).

Figure 40.115: *Recurring charges settings skip customer validation*

- By default, all consumable items are available for recurring charges. Here you can select a specific category to limit the choices available for recurring charges (Figure 40.116).

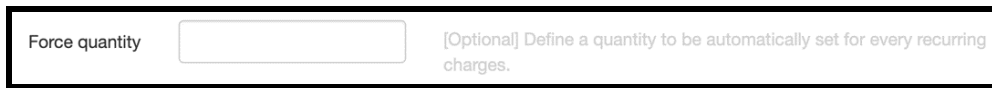

Category [Optional] Select a consumable category to restrict consumable choices to.

Figure 40.116: *Recurring charges settings consumable category*

Chapter 40 Customization (admin only)

- By default, any quantity of consumable can be selected in recurring charges. This allows staff to charge for more than one item at a time, like 5 storage bins at one time for example. To force the quantity to always be set and not offer the choice, enter the number in the dialog box (Figure 40.117). This can be useful if the quantity is always 1 for example.

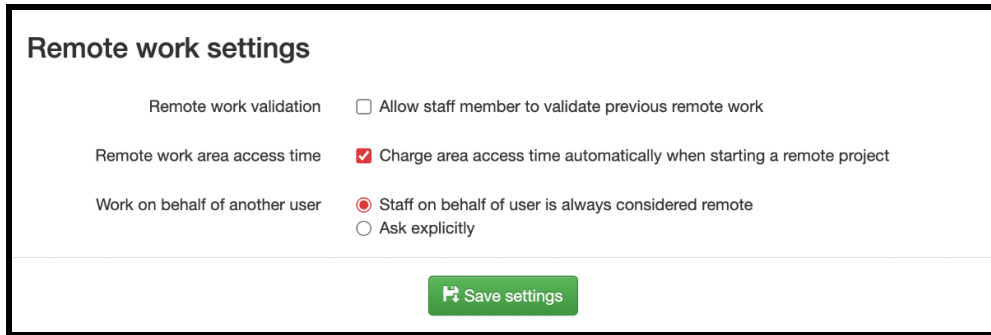

The image shows a dialog box with a label 'Force quantity' on the left, followed by a text input field. To the right of the input field is a greyed-out label that reads '[Optional] Define a quantity to be automatically set for every recurring charges.'

Figure 40.117: *Recurring charges settings force item quantity*

Chapter 40 Customization (admin only)

40.11 Remote work

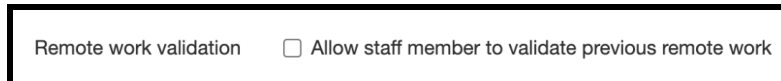

The remote work settings are used to control whether to allow staff to validate previous work, charge area access time automatically when starting a remote project, and how to determine remote work (Figure 40.118).

The screenshot shows a web interface titled "Remote work settings". It contains three rows of settings, each with a label on the left and a checkbox or radio button on the right. The first row is "Remote work validation" with an unchecked checkbox "Allow staff member to validate previous remote work". The second row is "Remote work area access time" with a checked checkbox "Charge area access time automatically when starting a remote project". The third row is "Work on behalf of another user" with two radio buttons: "Staff on behalf of user is always considered remote" (selected) and "Ask explicitly" (unselected). At the bottom center, there is a green button with a save icon and the text "Save settings".

Figure 40.118: Customization remote work settings

- If the “Allow staff member to validate previous remote work” checkbox is checked, staff member will have the ability to validate their remote work in the remote work page. This is a simple check for staff and does not have any link to anything in NEMO (Figure 40.119).

This is a close-up of the "Remote work validation" setting from Figure 40.118. It shows the label "Remote work validation" followed by an unchecked checkbox and the text "Allow staff member to validate previous remote work".

Figure 40.119: Remote work settings previous work validation

Chapter 40 Customization (admin only)

- By default, when a staff member starts using a tool for a remote project and that tool requires area access, that area access time will start at the same time. Uncheck the box to force staff to manually start area access time (Figure 40.120).

Figure 40.120: *Remote work settings automatic area access charge*

- By default, when a staff member starts using a tool on behalf of a user, it is considered remote work. Select “Ask explicitly” to have separate options for remote work or strictly using a tool on behalf of a user without counting as remote (for billing and reporting purposes) (Figure 40.121).

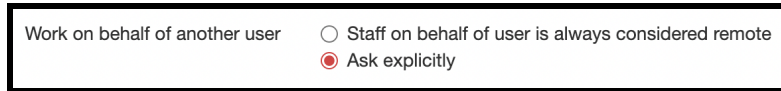

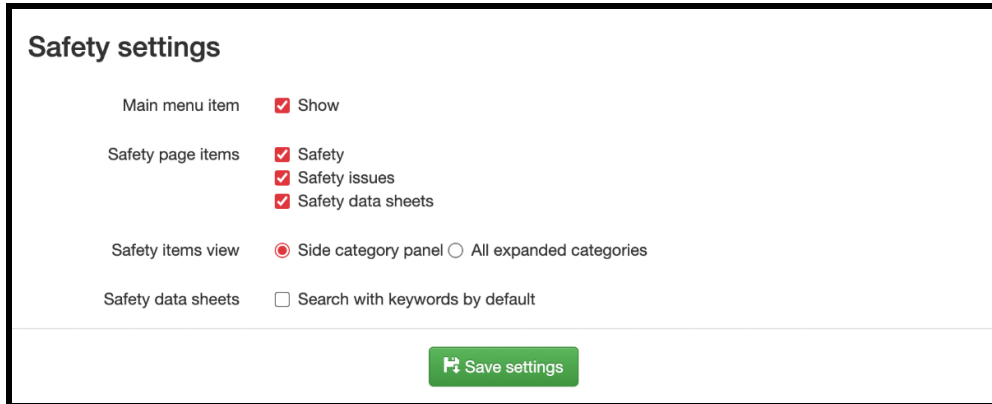

Figure 40.121: *Remote work settings staff on behalf options*

Chapter 40 Customization (admin only)

40.12 Safety

The Safety settings can be configured to display the main menu item and the sub-menu items (Figure 40.122).

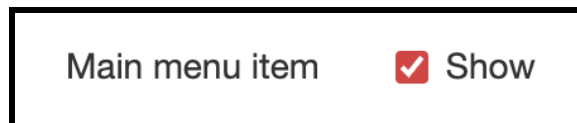

The screenshot shows a 'Safety settings' panel with the following options:

- Main menu item: Show
- Safety page items: Safety, Safety issues, Safety data sheets
- Safety items view: Side category panel, All expanded categories
- Safety data sheets: Search with keywords by default

A green 'Save settings' button is located at the bottom right of the panel.

Figure 40.122: Customization safety settings

- The main menu item can be hidden by unchecking the corresponding checkbox (Figure 40.123).

A close-up of the 'Main menu item' setting, showing the text 'Main menu item' followed by a checked red checkbox and the word 'Show'.

Figure 40.123: Safety settings show/hide main menu item

- The safety items tab can be hidden by unchecking the corresponding checkbox (Figure 40.124).

A close-up of the 'Safety' setting, showing a checked red checkbox followed by the word 'Safety'.

Figure 40.124: Safety settings show/hide safety item tab

Chapter 40 Customization (admin only)

- The safety issues tab can be hidden by unchecking the corresponding checkbox (Figure 40.125).

Figure 40.125: *Safety settings show/hide safety issues*

- The safety data sheets tab can be hidden by unchecking the corresponding checkbox (Figure 40.126).

Figure 40.126: *Safety settings show/hide safety data sheets*

- The safety item view can be customized between the side category panel (default) and an all-expanded version (Figure 40.127).

Figure 40.127: *Safety settings safety items view*

- The safety data sheets search can be set to allow keywords search by default (Figure 40.128).

Figure 40.128: *Safety settings safety data sheets keywords search*

Chapter 40 Customization (admin only)

40.13 Sensor data

The sensor data feature is detailed in the sensor data section [43.6](#) and can be configured to allow a certain number of retries, set a global alert email address, set the default date range, default refresh rate and customize the chart time format.

40.13.1 Sensor data settings

Sensor data settings

Retry reading data time(s)
The number of times to retry reading data from sensors before raising an error. Set to 0 to never retry.

Sensor alert email(s)
The email(s) to notify when a sensor alert is raised or reset. A comma-separated list can be used.

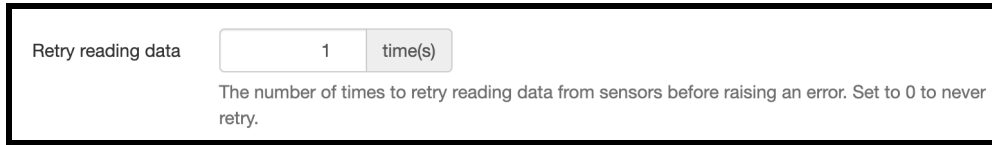

Default daterange Last 24 hrs Last 72 hrs Last week Last month Last year

Default refresh rate:

Figure 40.129: Customization sensor data settings

- When reading data from sensors, a number of retries can be specified to allow for one off connection/network interference without having it trigger an alert (Figure [40.130](#)).

Chapter 40 Customization (admin only)

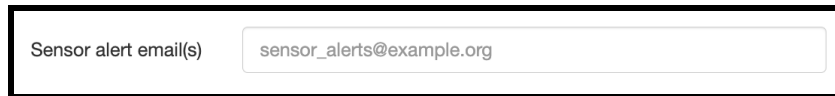

Retry reading data

The number of times to retry reading data from sensors before raising an error. Set to 0 to never retry.

Figure 40.130: *Sensor data settings sensor reading retries*

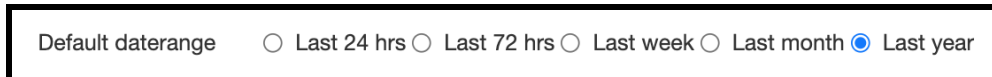

- The sensor alert global email(s) will be notified every time any sensor alert is triggered or reset. A comma separated list can be used (Figure 40.131).

Sensor alert email(s)

Chapter 40 Customization (admin only)

40.15 Tools

Tool customizations are separated in five sub-sections, general tool settings, tool configuration, tool problems (Figure 40.147), tool control (Figure 40.156), tool waitlist (Figure 40.162) and tool qualification expiration (Figure 40.165).

Tool settings

Phone number Not required Required

Location Not required Required

Reservation policy Tool superusers are exempt from reservation policy rules

Tool configuration

Configuration template

The django template used for rendering current configuration setting. The context variable **current_setting** is provided.

Near future

The number of days for the "near future" configuration agenda (Weekend days are automatically included if the "near future" falls on the weekend).

Tool problems

New problems Send new tool problems to all qualified users (but not updates)

Updates Send all tool problem & updates to facility managers
 Send all tool problem & updates to tool superusers

Limit task images size

Figure 40.147: Customization tool settings

Chapter 40 Customization (admin only)

40.15.1 Tool settings

The phone number radio button is used to require the phone number field be filled when creating a tool (Figure 40.148).

Phone number Not required Required

Figure 40.148: *Tool settings phone number required*

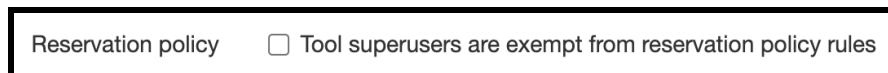

- The location radio button is used to require the location field be filled when creating a tool (Figure 40.149).

Location Not required Required

40.15.4 Tool control

Tool control

Usage data history check to only show usage data history tab for staff members

Qualified users list check to allow everyone to see who is qualified on a tool

Show tool documents to Everyone
 Only qualified users

Email users with upcoming reservation Staff only
 Qualified users
 All

Show task details by default Show task details, such as who created the task and when, by default (click on the task to collapse/hide)

Figure 40.156: Customization tool control settings

- The “Usage data history” checkbox can be checked to only show tool usage data history to staff members (Figure 40.157).

Usage data history check to only show usage data history tab for staff members

Figure 40.157: Tool control settings usage data history

- The “Qualified users list” checkbox can be checked to allow everyone to see the qualified users list (Figure 40.158).

Qualified users list check to allow everyone to see who is qualified on a tool

Figure 40.158: Tool control settings qualified users list

Chapter 40 Customization (admin only)

- The “Show tool documents to” radio buttons can be used to limit who can see tool documents (Figure 40.159).

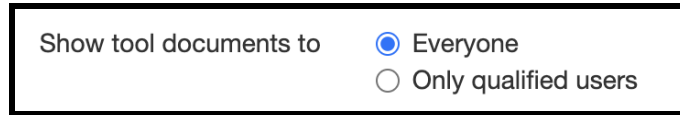

Figure 40.159 shows a settings box with the text "Show tool documents to" followed by two radio button options: "Everyone" (which is selected) and "Only qualified users".

Figure 40.159: *Tool control settings show tool documents*

- The “Email users with upcoming reservation” radio buttons can be used to decide who is allowed to send a broadcast email to other users with an upcoming reservation (Figure 40.160).

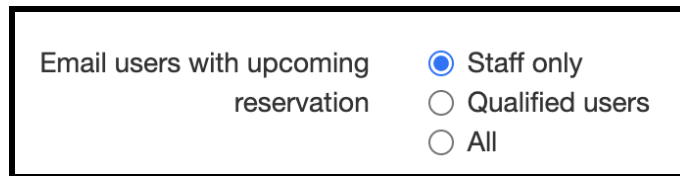

Figure 40.160 shows a settings box with the text "Email users with upcoming reservation" followed by three radio button options: "Staff only" (which is selected), "Qualified users", and "All".

Figure 40.160: *Tool control settings email users with upcoming reservation*

- The “Show task details by default” checkbox can be checked to show information about who reported the issue and when (the task info will be expanded by default) (Figure 40.161).

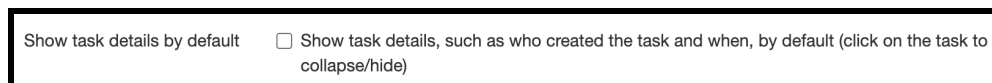

Figure 40.161 shows a settings box with the text "Show task details by default" followed by a checkbox and the text "Show task details, such as who created the task and when, by default (click on the task to collapse/hide)". The checkbox is currently unchecked.

Figure 40.161: *Tool control settings show task details by default*

Chapter 40 Customization (admin only)

40.15.5 Tool waitlist

The following settings can be used to set the expiration time for waitlist slots and the time before a reservation when users from the waitlist won't be notified in hybrid mode. This is discussed in more details in the Tool operation modes section [6.4.8.1](#)

Tool wait list

Time to expiration

Time to expiration for a spot in the wait list. If a user does not claim the spot within this time, the user will be removed from the wait list.

Reservation wait list buffer

For a tool operating in "hybrid" mode, if a reservation is upcoming within this time, the next user in the wait list will not be notified.

Figure 40.162: Customization tool waitlist settings

- Enter the number of minutes for a spot to expire. If the notified user doesn't engage the tool within this time limit, the user will be removed from the waitlist (Figure [40.163](#)).

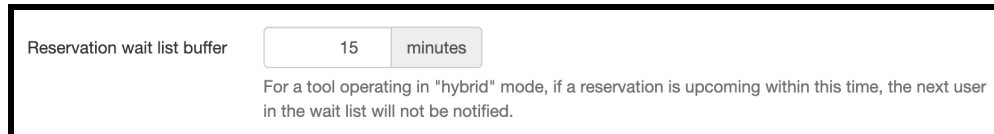

Time to expiration

Time to expiration for a spot in the wait list. If a user does not claim the spot within this time, the user will be removed from the wait list.

Figure 40.163: Tool waitlist expiration time

Chapter 40 Customization (admin only)

- Enter the number of minutes for an upcoming reservation that won't notify the next user on the waitlist. This only applies to hybrid mode. (Figure 40.164).

Reservation wait list buffer

For a tool operating in "hybrid" mode, if a reservation is upcoming within this time, the next user in the wait list will not be notified.

Chapter 40 Customization (admin only)

40.15.6 Tool qualification expiration

The tool qualification expiration feature will notify and remove tool qualification from users if they haven't used that tool after a certain time. To enable the feature the Tool qualification expiration email must be uploaded, see subsection 40.5.26. These settings can be used to control the number of days used to determine when users lose their tool qualification and when reminders are sent.

Tool qualification expiration

If active, this feature will remove tool qualification from a user if the user has not used the tool after a while or never used it since qualified (configured separately).

The user [tool qualification expiration email](#) need to be set to enable this feature.

Reminder days	<input type="text"/>	The (optional) number of days to send a reminder prior to the user's tool qualification expiration (below). A comma-separated list can be used for multiple reminders. This applies to both expiration cases.
Expiration days (previous tool usage)	<input type="text"/>	The number of days before the user's tool qualification expires since the user last used the tool.
Expiration days (no tool usage)	<input type="text"/>	The number of days before the user's tool qualification expires since the user qualified for the first time.
Reminder/expiration CC	<input type="text" value="information@example.org"/>	Extra email address to copy when a user's tool qualification reminder/expiration email is sent. A comma-separated list can be used.

Figure 40.165: Customization tool expiration settings

Chapter 40 Customization (admin only)

- Enter the number of days to remind users prior to their tool qualification expiring. A comma-separated list can be used. For example, to remind users 2 months, one month and one week before they will lose tool access, enter “60,30,7” (Figure 40.166).

Reminder days	<input type="text" value="60,30,7"/>	The (optional) number of days to send a reminder prior to the user's tool qualification expiration (below). A comma-separated list can be used for multiple reminders. This applies to both expiration cases.
---------------	--------------------------------------	---

Figure 40.166: *Tool qualification expiration reminder days*

- Enter the number of days after a user last used a tool which will trigger them to lose access in the dialog box. This will only get triggered if they have used the tool in the past. For example, if you wish users to lose access to a tool if they haven't used it for a year, enter “365” (Figure 40.167).

Expiration days (previous tool usage)	<input type="text" value="365"/>	The number of days before the user's tool qualification expires since the user last used the tool.
---	----------------------------------	--

Figure 40.167: *Tool qualification expiration days previous usage*

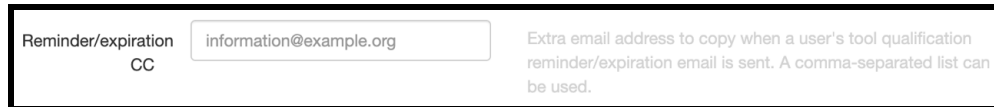

- Enter the number of days a user must use a tool after being trained on it before they lose access in the dialog box. This will only get triggered if they have never used the tool in the past. For example, if you wish users to lose access to a tool if they haven't used it for 2 weeks after being trained on it, enter “14” (Figure 40.168).

Expiration days (no tool usage)	<input type="text" value="14"/>	The number of days before the user's tool qualification expires since the user qualified for the first time.
------------------------------------	---------------------------------	--

Figure 40.168: *Tool qualification expiration days no usage*

Chapter 40 Customization (admin only)

- To cc one or more email addresses on the reminder and expiration email, enter them in the dialog box. A comma-separated list can be used (Figure 40.169).

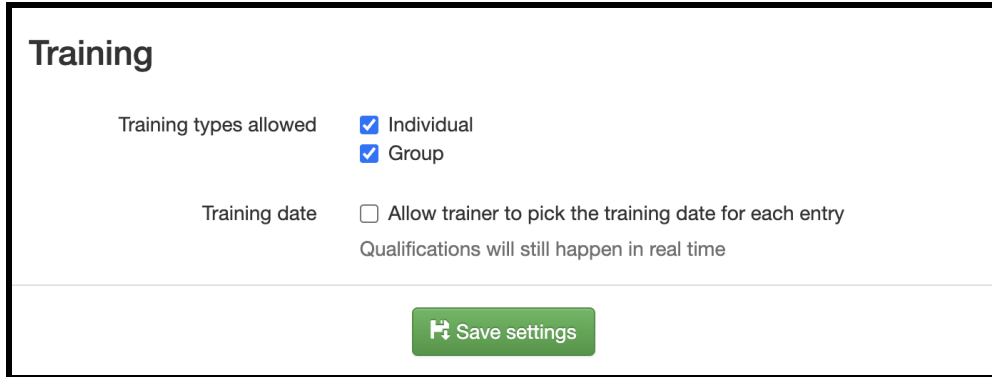

The screenshot shows a dialog box with a label 'Reminder/expiration CC' on the left. To its right is a text input field containing the email address 'information@example.org'. Further to the right is a descriptive text: 'Extra email address to copy when a user's tool qualification reminder/expiration email is sent. A comma-separated list can be used.'

Chapter 40 Customization (admin only)

40.18 User requests

The User requests settings include settings for adjustment requests, access requests and buddy requests features. The title of each tab can be set, as well as a description message for each of the features, to provide users with instructions specific to your facility. The adjustment requests, access requests and buddy board are respectively detailed in sections adjustment requests [8.3](#), access requests [8.2](#), and buddy board [8.1.2.2](#).

Chapter 40 Customization (admin only)

40.18.1 Adjustment requests settings (Figure 40.179)

Adjustment requests settings

Enable adjustment requests Check this box to allow users to request adjustment for charges.
At least one user with the facility manager role needs to exist for approval.

Adjustment request tab title
The title for the adjustment request tab of the user requests page.

Adjustment requests description
The description/instructions to display on the adjustment requests page.

Adjustment requests display maximum
The maximum number of requests to display in each section (approved, denied).
Leave blank for all.

Allowed charges for staff Remote work (Staff charges, Tool usage & Area access)

Allowed charges for users Tool usage
 Area access
 Missed reservation users can adjust reservation times

Restrict number of charges
The number of most recent charges to show in the dropdown menu when creating an adjustment.

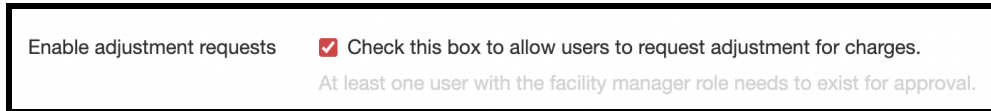

Time limit for adjustments
The timeframe for users to be able to request adjustment on charges.

Approved charges Check this box to show a link to edit the original charge after approval
 Check this box to allow reviewers to apply the change when approving an adjustment
This does not apply to general charges.

Figure 40.179: Customization adjustment requests settings

Chapter 40 Customization (admin only)

- Check the Enable adjustment requests checkbox to enable the feature (Figure 40.180).

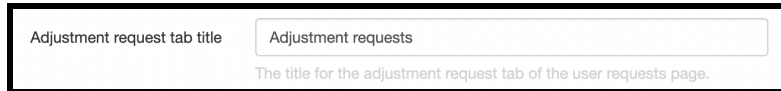

Enable adjustment requests Check this box to allow users to request adjustment for charges.
At least one user with the facility manager role needs to exist for approval.

Figure 40.180: Customization adjustment requests enable

- The default adjustment request tab title is “Adjustment requests” and is displayed in the Request page, on the tab for the adjustment requests (Figure 40.181).

To edit, click on the text field and enter the desired title (Figure 40.182).

Adjustment request tab title
The title for the adjustment request tab of the user requests page.

Figure 40.182: Customization adjustment request tab

Chapter 40 Customization (admin only)

- The default message for Adjustment requests description is blank. To edit, click in the dialog box and enter the desired message (Figure 40.183). Note that carriage returns will be displayed to ease visual organization of information.

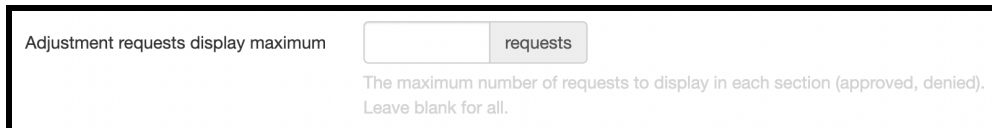

Adjustment requests description

The description/instructions to display on the adjustment requests page.

Figure 40.183: Customization adjustment requests description

- The default number of adjustment requests to display is blank, which means all the requests will be displayed for users in Approved, Denied and Expired sections. The optional limit does not apply to pending requests. To edit, click in the dialog box and enter the desired number (Figure 40.184).

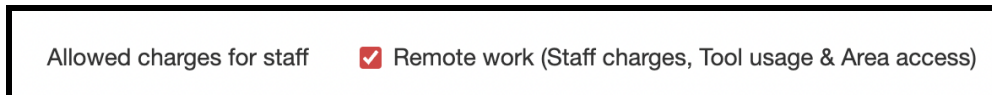

Adjustment requests display maximum requests

The maximum number of requests to display in each section (approved, denied).
Leave blank for all.

Figure 40.184: Customization adjustment requests display maximum

- Check the remote work checkbox to allow staff members to request adjustments on the remote work they do (Figure 40.185).

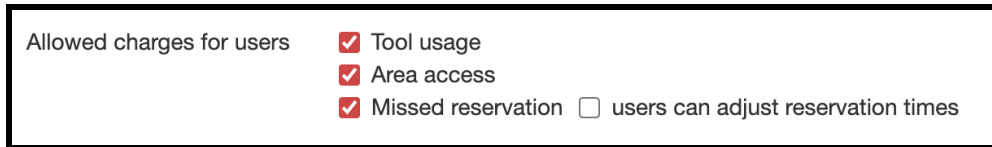

Allowed charges for staff Remote work (Staff charges, Tool usage & Area access)

Figure 40.185: Customization adjustment requests allowed staff charges

Chapter 40 Customization (admin only)

- Check the allowed charges checkboxes to allow users to request adjustments on for tools usage, area access and/or missed reservations. Check the “user can adjust reservation times” checkbox to allow users to submit new times for the missed reservation they are requesting an adjustment for (Figure 40.186).

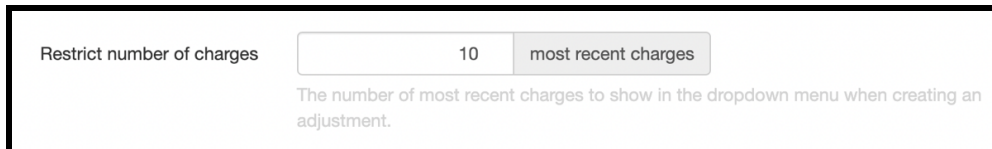

Allowed charges for users

- Tool usage
- Area access
- Missed reservation
- users can adjust reservation times

Figure 40.186: Customization adjustment requests allowed user charges

- Click the “Restrict number of charges” text box and enter a number to limit the charges to show in the dropdown box when creating a request from the request menu. (Figure 40.187).

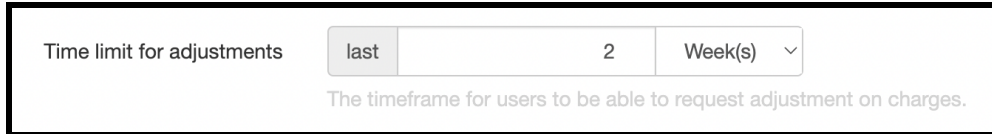

Restrict number of charges

The number of most recent charges to show in the dropdown menu when creating an adjustment.

Figure 40.187: Customization adjustment requests most recent charges allowed

Chapter 40 Customization (admin only)

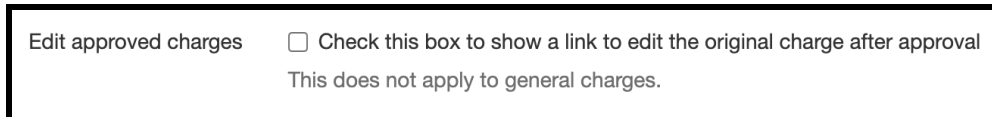

- Click the “Time limit for adjustments” text box and enter a number to limit the timeframe after which charges cannot be contested anymore. Click the dropdown menu to select the frequency (Days, Weeks, or Months) (Figure 40.188).

Time limit for adjustments last 2 Week(s) ▾
The timeframe for users to be able to request adjustment on charges.

Figure 40.188: Customization adjustment requests timeframe allowed for charges

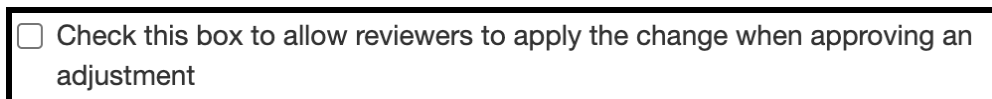

- The “show a link to edit the original charge after approval” checkbox is used to show a link to edit the charge directly in Detailed administration, after the adjustment has been approved and as long as the current user has the proper permission (for each charge type). (Figure 40.189).

Edit approved charges Check this box to show a link to edit the original charge after approval
This does not apply to general charges.

Figure 40.189: Customization adjustment requests edit approved charges

- The “allow reviewers to apply the change when approving an adjustment” checkbox is used to show a button to apply the changes to the charge itself (the usage event or area access record will be changed), when applicable. If it’s a general charge there is nothing to apply. (Figure 40.190).

Check this box to allow reviewers to apply the change when approving an adjustment

Figure 40.190: Customization adjustment requests apply change

Chapter 40 Customization (admin only)

40.18.2 Access requests settings (Figure 40.191)

Access requests settings

Access request tab title
The title for the access request tab of the user requests page.

Access requests description
The description/instructions to display on the access requests page.

Access requests minimum users users
The minimum number of users (creator included) needed for an access request to be valid.

Access requests display maximum requests
The maximum number of requests to display in each section (approved, denied, expired). Leave blank for all.

Weekend access notification email(s)
The email(s) to notify for weekend access. A comma-separated list can be used.

Weekend access notification cutoff at
The cutoff day and hour after which an email is sent if there is no approved weekend access for the week (in 24hrs format). If left blank the "no weekend access" will NOT be sent.

Figure 40.191: Customization access requests settings

Chapter 40 Customization (admin only)

- The default access request tab title is “Access requests” and is displayed in the Request page, on the tab for the access requests (Figure 40.192). To edit, click on the text field and enter the desired title (Figure 40.193).

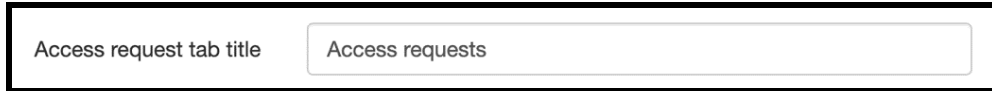

A screenshot of a settings field. On the left, the text "Access request tab title" is displayed. To its right is a text input field containing the text "Access requests". The entire field is enclosed in a black rectangular border.

Chapter 40 Customization (admin only)

- The default message for Buddy board description is blank. To edit, click in the dialog box and enter the desired message (Figure 40.202). Note that carriage returns will be displayed to ease visual organization of information.

A screenshot of a dialog box with a black border. On the left side, the text "Buddy board description" is displayed in two lines. To the right of this text is a large, empty rectangular text input field with a thin gray border. A small cursor icon is visible at the bottom right corner of the input field.

Figure 40.202: *User requests settings buddy board description*

CHAPTER 41

Detailed administration

The detailed administration page provides database table access to NEMO data where features can be configured, and usage data can be viewed (Figure [41.1](#)).

Chapter 41 Detailed administration

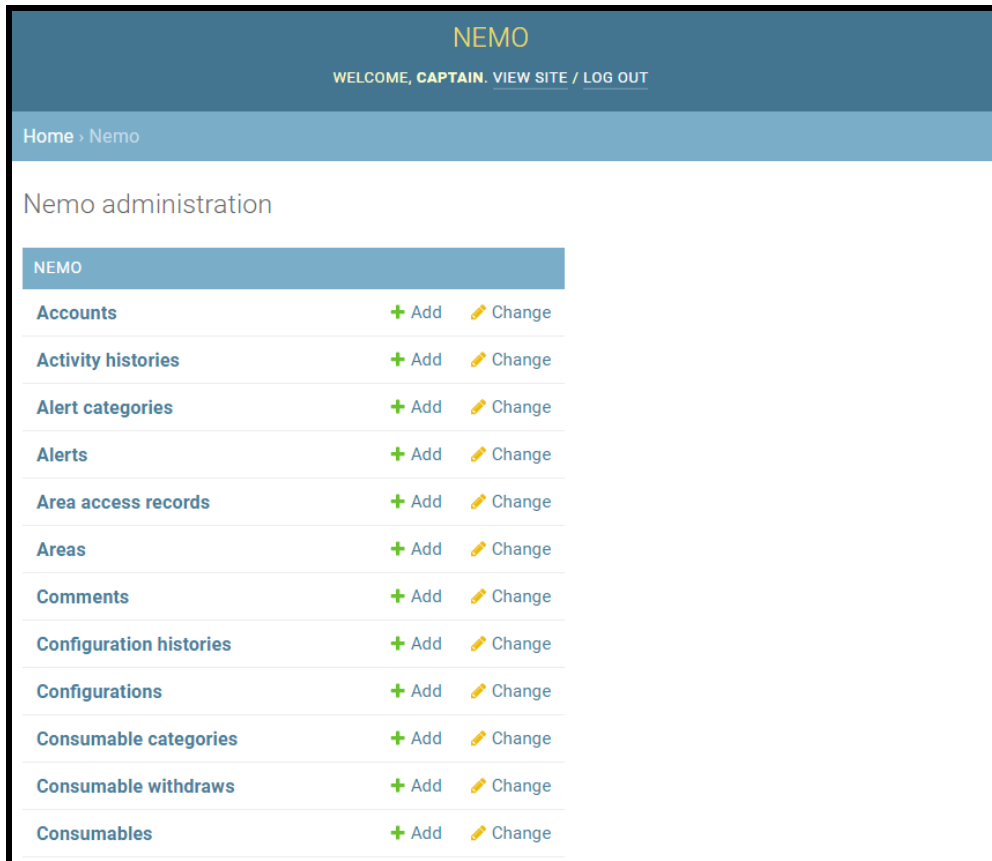

Figure 41.1: Detailed administration start of table list

Access to the detailed administration pages requires admin status or individual special permissions. A super user can give access to any user on a table-by-table basis from the users table of the database. The users table of the database discussed in the Detailed administration → Users section [42.68](#).

Chapter 41 Detailed administration

Users can return to the NEMO home page by clicking the “view site” link at the top of the page (Figure 41.2).

Figure 41.2: *Detailed administration view site link*

Users can log out of NEMO by clicking the “log out” link at the top of the page (Figure 41.3).

Figure 41.3: *Detailed administration log out link*

Each table can be accessed through the detailed administration page. There are several features that are common across all tables for adding and editing data. Features and details that are unique to a particular table will be discussed in the section specific to the table.

41.1 Adding data

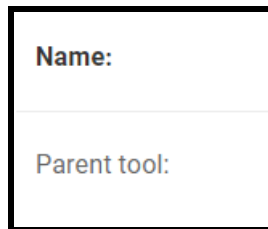

Clicking the Add icon (Figure 41.4) on any table will open a dialog to input data that can be saved into the database.

Figure 41.4: *Detailed administration add data icon*

Chapter 41 Detailed administration

- The specific fields, their function, and usage will be detailed in each specific table section below. If the fields origin is data from another table in the database, the table name will be listed in italics. For example, Accounts table.
- Required fields are displayed in bold (Figure 41.5)

A rectangular form with a black border. The top section contains the text "Name:" in a bold, black font. Below this is a horizontal line. The bottom section contains the text "Parent tool:" in a regular, black font.

Figure 41.5: *Detailed administration bold and non-bold fields*

- Saving records can be accomplished in three ways (Figure 41.6)
 - Click “save and add another” to save the current record and create another blank record.
 - Click “save and continue editing” to save the current record and stay on the current record for additional changes.
 - Click “save” to save the current record and return to the summary page for the table.

Figure 41.6: *Detailed administration save buttons*

Chapter 41 Detailed administration

41.2 Changing data

Clicking the Change icon (Figure 41.7) on any table will open a summary of the table rows that can be selected for editing (Figure 41.8). Clicking the table name will also open a summary.

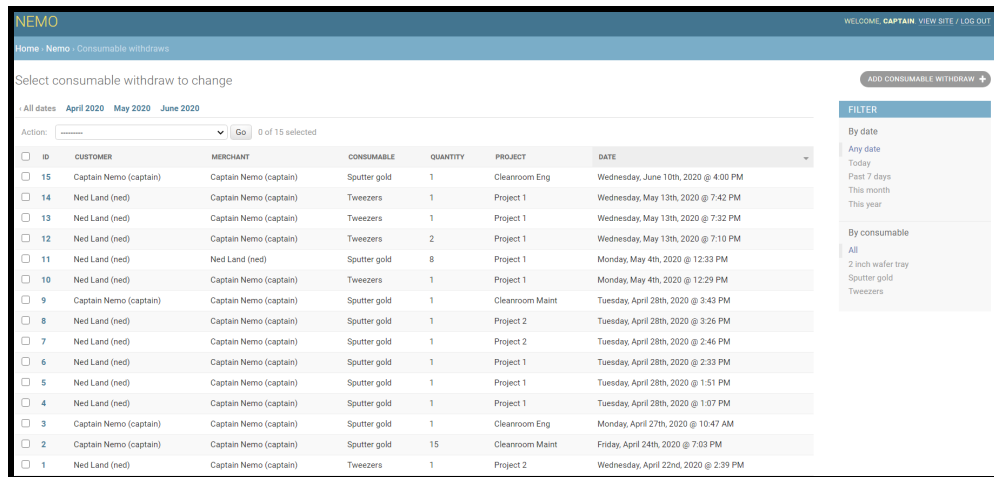

Figure 41.7: Detailed administration change data icon

DATE/TIME	USER	ACTION
Monday, April 13th, 2020 @ 2:01 PM	captain (Captain Nemo (captain))	Changed name.
Monday, April 13th, 2020 @ 2:03 PM	captain (Captain Nemo (captain))	Changed visible and _operational.
Monday, April 13th, 2020 @ 2:30 PM	captain (Captain Nemo (captain))	Changed _description, _serial and _image.
Monday, April 20th, 2020 @ 1:01 PM	captain (Captain Nemo (captain))	Changed _category.
Tuesday, April 21st, 2020 @ 12:09 PM	captain (Captain Nemo (captain))	Changed _missed_reservation_threshold.

Figure 41.12: Detailed administration record history

Chapter 41 Detailed administration

- * A view on site button may be displayed at the top right of the page (Figure 41.13). Clicking the view on page button will redirect to the feature page defined for that table.

Figure 41.13: Detailed administration view on site button

- * A delete button will be displayed at the bottom of the page (Figure 41.14).

Figure 41.14: Detailed administration delete button

- Add record button – the top right side of the summary page will have a button to add new records (Figure 41.15).

Figure 41.15: Detailed administration add record button

Chapter 41 Detailed administration

- Search – some summary pages have a search dialog at the top of the page that can be used to quickly narrow results to records of interest (Figure 41.16). Enter a search term in the dialog box and click the search button. Partial names and wildcards can be used. Any matching results will be returned.

Figure 41.16: *Detailed administration search dialog*

- Filters can be used to narrow down the record list.
 - Filters may include a date range above the record list that can be clicked to filter results. A date range filter will start at a coarse range and continue to a narrower range. Anytime the date has been filtered, the first filter selection will be to unfilter to the previous filter level.
 - * If there is multi-year data, the years with data will be displayed in the filter selection (Figure 41.17).

Figure 41.17: *Detailed administration year filter*

- * Clicking a year filter will show data from that year and change the filter selection to the months with data (Figure 41.18).

Figure 41.18: *Detailed administration month filter*

Chapter 41 Detailed administration

- * Clicking a month filter will show data from that month and change the filter selection to the days of the month with data (Figure 41.19).

Figure 41.19: *Detailed administration day filter*

- * Clicking a day filter will show data from the date selected (Figure 41.20).

Figure 41.20: *Detailed administration date filter*

Chapter 41 Detailed administration

- Other filters may be included on the right sidebar of the page and can change from page to page (Figure 41.21). However, their function is the same. Click on the filter level desired to narrow down the number of records displayed in the summary page until the records of interest are displayed.

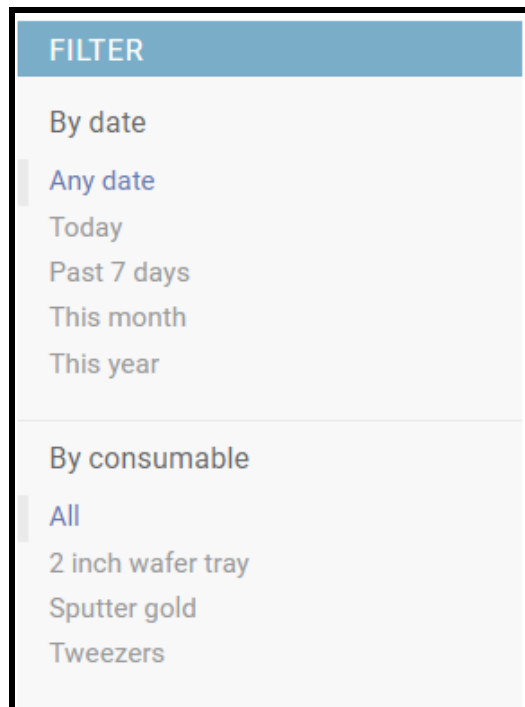

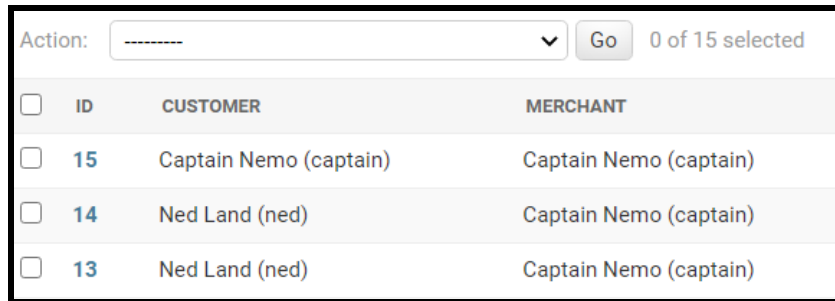

Figure 41.21: *Detailed administration side bar filters*

Chapter 41 Detailed administration

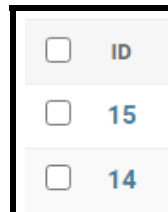

- Actions can be used to execute a function on one or more records (Figure 41.22).

<input type="checkbox"/>	ID	CUSTOMER	MERCHANT
<input type="checkbox"/>	15	Captain Nemo (captain)	Captain Nemo (captain)
<input type="checkbox"/>	14	Ned Land (ned)	Captain Nemo (captain)
<input type="checkbox"/>	13	Ned Land (ned)	Captain Nemo (captain)

Figure 41.22: Detailed administration action menu

- Every table has a delete record action.
- To execute a function on one or more records:
 - * Select the records of interest by checking the checkbox on the left of the record. Checking the checkbox in the title bar will select all records (Figure 41.23).

<input type="checkbox"/>	ID
<input type="checkbox"/>	15
<input type="checkbox"/>	14

Figure 41.23: Detailed administration select records

Chapter 41 Detailed administration

- * Select the action to execute from the drop-down list (Figure 41.24).

Figure 41.24: Detailed administration select action

- * Click “go” (Figure 41.25).

Figure 41.25: Detailed administration action go button

Chapter 41 Detailed administration

- * When deleting records, a list of impacts and related items will be displayed with a prompt to confirm or cancel the action (Figure 41.26).

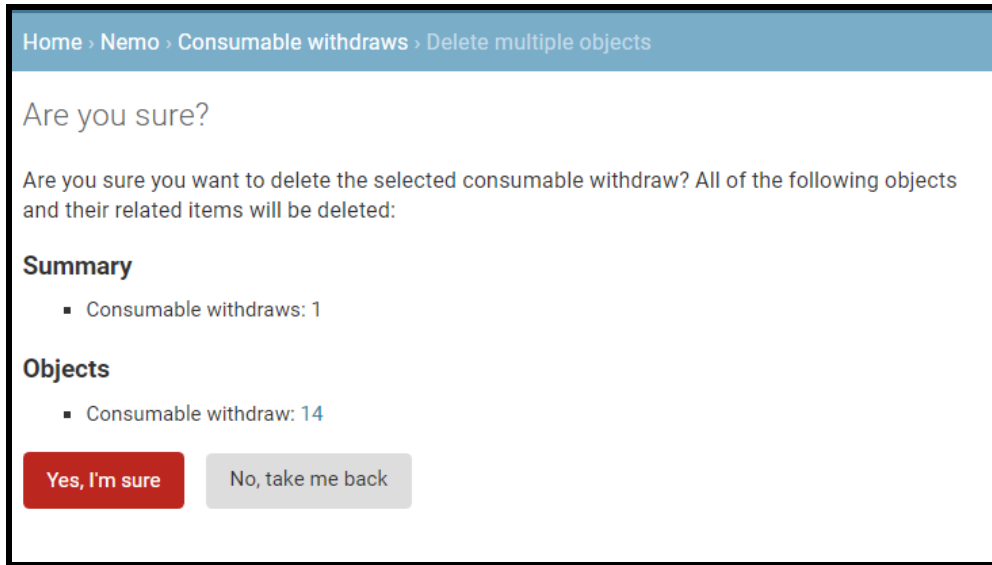

Figure 41.26: Detailed administration delete confirmation dialog

- * Click the yes button to continue or the no button to cancel (Figure 41.27).

Figure 41.27: Detailed administration delete confirmation buttons

Chapter 41 Detailed administration

- Sort – the summary list of records can be sorted by clicking on the column title (Figure 41.28).

Figure 41.28: *Detailed administration sort indicators*

- An arrow next to the column title indicates sort direction. Down arrow indicates descending and up arrow indicates ascending.
- If multiple columns are clicked, then records are sorted in order of precedence with the last clicked column having the highest precedence. Lower numbers have higher precedence. Hovering over a sorted field heading will show an icon (🗑️) to remove sorting from that column (Figure 41.29). Click the icon to remove sorting.

Figure 41.29: *Detailed administration remove sorting*

CHAPTER 42

Detailed administration – NEMO (admin or authorized users)

42.1 Account types

42.1.1 Usage

Account types are optional but can be useful for binning accounts aiding in future analysis and trending. Account types, if used, must be created in this table view and can be any text name. Any number can be defined. If no account types are defined, they are not displayed on the account page. Account types are discussed in the account page chapter [22](#).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.1.2 Summary Page

The summary page provides a listing of account types (Figure 42.1). Click the name field in the row of interest to edit.

42.1.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.2).

Home > Nemo > Account types > Add account type

Add account type

Name:

Figure 42.2: *Account types add/edit page*

- Name – the name can be up to 200 characters (required).

42.1.4 User access page

There is no user access page to create account types however, account types are discussed in the account page chapter 22.

42.2 Accounts

42.2.1 Usage

An account is at the top of the billing hierarchy. This is where you send the bill. An account can have many projects. Users make charges to projects which are carried to accounts. A detailed discussion of accounts can be found in the Accounts and projects chapter [22](#).

42.2.2 Summary Page

The summary page provides a search dialog and filtering of the active field (Figure [42.3](#)). Click the name field in the row of interest to edit.

42.2.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.4).

The screenshot shows the 'Add account' page in the NEMO system. The breadcrumb trail at the top reads 'Home > Nemo > Accounts > Add account'. The main heading is 'Add account'. The form contains the following fields:

- Name:** A text input field.
- Type:** A dropdown menu with a pencil icon, a plus sign, and a minus sign.
- Start date:** A date input field with a 'Today' button and a calendar icon.
- Active:** A checked checkbox with the label 'Active'. Below it, a note states: 'Users may only charge to an account if it is active. Deactivate the account to block future billable activity (such as tool usage and consumable check-outs) of all the projects that belong to it.'

At the bottom of the form, there are three buttons: 'Save and add another', 'Save and continue editing', and 'SAVE'.

Figure 42.4: Accounts add/edit page

- Name – this is the name referred to for the account. It can be a maximum of 100 characters and must be unique (required).
- Type – this is the type for the account. Account types are discussed in Account types section 42.1.
- Start date – the account start date.
- Active – this indicates if the account is available to be used. Users may only charge to an account if it is active. Deactivate the account to block future billable activity (such as tool usage, etc.) of all the projects that belong to it.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.2.4 User access page

Accounts are created and managed on the accounts and projects page detailed in the Accounts and projects chapter [22](#).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

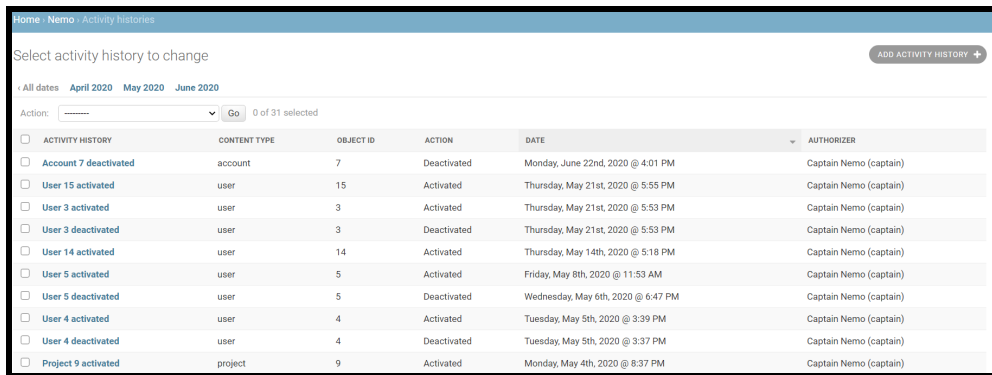

42.3 Activity histories

42.3.1 Usage

The activity histories table maintains a record of changes made to the active status of users, projects, and accounts. Records are written automatically, and manual entry or editing should not be necessary.

42.3.2 Summary Page

The summary page provides date filtering (Figure 42.5). Click the activity history field in the row of interest to edit.

Figure 42.5: Activity histories summary page

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.3.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.6). In addition, the history button will show any manual changes that were made to the record.

The screenshot shows a web interface for editing activity history. At the top, there is a breadcrumb trail: Home > Nemo > Activity histories > Account 7 deactivated. Below this is a title bar with 'Change activity history' and a 'HISTORY' button. The form contains several fields: 'Content type' is a dropdown menu with 'account' selected; 'Object id' is a text input with '7'; 'Action' is a dropdown menu with 'Deactivated' selected, with a note below it: 'The target state (activated or deactivated)'; 'Date' and 'Time' are separate input fields with '06/22/2020' and '04:01 PM' respectively, and 'Today' and 'Now' buttons; 'Authorizer' is a dropdown menu with 'Captain Nemo (captain)' selected, with a note below it: 'The staff member who changed the active state of the account, project, or user in question.' At the bottom, there are four buttons: 'Delete' (red), 'Save and add another' (blue), 'Save and continue editing' (blue), and 'SAVE' (blue).

Figure 42.6: Activity histories add/edit page

- Content type – a large selection is available under the dropdown however, NEMO only uses accounts, projects, and users (required).
- Object id – this field is the id number of the account, project, or user (required).
- Action – this field is either activated or deactivated (required).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Date – date and time the action was taken (required).
- Authorizer – user that initiated the action (required). User table

42.3.4 User access page

Activity histories are automatically recorded through actions initiated on accounts, projects, and users. Accounts and projects are detailed in the Accounts and projects chapter [22](#). Users are detailed in the users section [42.68](#).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.4 Adjustment requests

42.4.1 Usage

The adjustment requests table stores the requests entered on the Adjustment requests feature, see section [42.4](#).

42.4.2 Summary Page

The summary page provides a listing of adjustment requests (Figure [42.7](#)). Click the creator field in the row of interest to edit.

<input type="checkbox"/>	CREATOR	LAST UPDATED	ITEM	DIFF	METHOD	REPLIES	DELETED

- Creator – select user submitting the request from the drop-down (required).

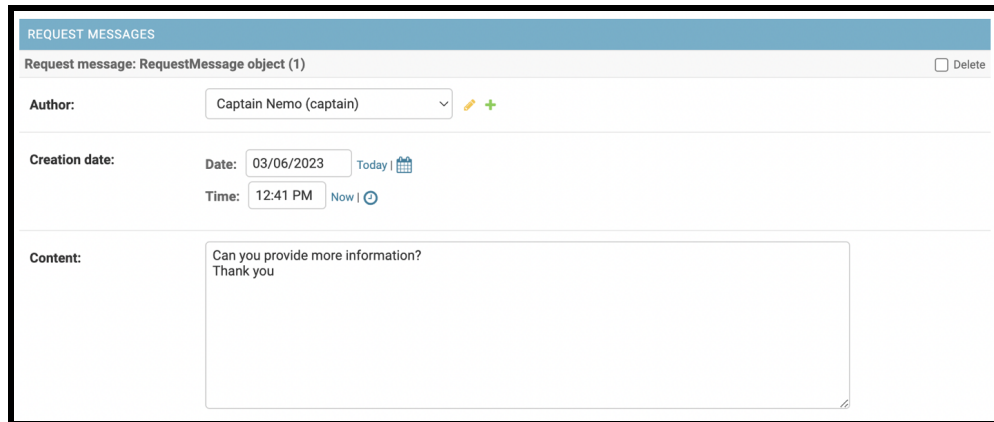

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Last updated by – select user who last updated the request from the drop-down.
- Item type – select type of charge from the drop-down.
- Item id – text box to enter the id of the charge.
- Description – text box to enter description of the adjustment request (required).
- Manager note – text box to enter the manager note sent to either the user if the request is denied or to the User Office if the request is approved.
- New start – use the dialog box or calendar to select the new start date for the charge.
- New end – use the dialog box or calendar to select the new end date for the charge.
- Status – select the status of this request from the drop-down (required)
- Reviewer – select the user who approved or denied this request.
- Applied – check box indicates if request was applied by a reviewer (for example applied outside of NEMO).
- Applied by – select the user who applied this adjustment.
- Deleted – check box indicates if request was deleted by user and won't be displayed any longer.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.4.4 Adjustment request message fields

The adjustment request messages can be edited directly at the bottom of the adjustment request form (Figure 42.9).

The screenshot shows a web interface titled "REQUEST MESSAGES". Below the title, it says "Request message: RequestMessage object (1)" with a "Delete" button on the right. The form has three main sections: "Author" with a dropdown menu showing "Captain Nemo (captain)" and edit icons; "Creation date" with "Date" and "Time" fields, each with a calendar/clock icon; and "Content" with a large text area containing the text "Can you provide more information? Thank you".

Figure 42.9: Adjustment request messages add/edit page

- Author – select user submitting request from the drop-down box (required) (Users Table).
- Creation date – use the dialog box or calendar/clock to select the creation date/time (required).
- Content – dialog box to enter description of the buddy request (required).

42.4.5 User access page

Records are typically not edited or created directly in this view. There is an Adjustment requests page for managing adjustment requests, discussed in section 8.3.

42.5 Alert categories

42.5.1 Usage

Alert categories are optional but can be useful for binning alerts aiding in future analysis and trending. Alert categories, if used, must be created in this table view and can be any text name. Any number can be defined. If no alert categories are defined, they are not displayed on the alerts page. Alert categories are discussed in the Alerts section [42.6](#).

42.5.2 Summary Page

The summary page provides a listing of alert categories (Figure [42.10](#)). Click the name field in the row of interest to edit.

Add alert

Title:

Category:
A category/type for this alert.

Contents:

Creation time: Date: Today
Time: Now

Creator:

Debut time: Date: Today
Time: Now
The alert will not be displayed to users until the debut time is reached.

Expiration time: Date: Today
Time: Now
The alert can be deleted after the expiration time is reached.

User:
The alert will be visible for this user. The alert is visible to all users when this is empty.

Dismissible
Allows the user to delete the alert. This is only valid when the 'user' field is set.

Expired
Indicates the alert has expired and won't be shown anymore

Deleted
Indicates the alert has been deleted and won't be shown anymore

Figure 42.13: Alerts add/edit page

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Title – title to be displayed for the alert, maximum of 100 characters.
- Category – category of the alert selected from alert categories. Alert categories table
- Contents – message to describe the alert, maximum of 500 characters (required).
- Creation Time – the date/time the alert was created (required).
- Creator – the user that created the alert. Users table
- Debut time – the time the alert will start displaying on the landing page (required).
- Expiration time – the time the alert will expire and stop being displayed on the landing page.
- User – the user targeted for the alert, this will be blank for all users. Users table
- Dismissible – only valid when a user is selected, allows user to delete the alert.
- Expired – indicates the alert has expired and will not be displayed any longer.
- Deleted – indicates the alert was deleted and will not be displayed any longer.

42.6.4 User access page

Alerts are discussed in the Alerts section [42.6](#).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.7 Area access records

42.7.1 Usage

The area access records table maintains the list of users that have accessed an area. Records are written automatically when a user enters/exits an area. Manual editing may be necessary to correct an access record if for example a user forgets to log out of an area.

42.7.2 Summary Page

The summary page provides date filtering, filtering by area, and by start date (Figure 42.14). Click the id field in the row of interest to edit.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Start – the start date and time (required).
- End – the end date and time.
- Staff charge – the staff charge record id the area access record is associated with.

42.7.4 User access page

Area access records are automatically recorded when a user accesses a controlled area. Access is provided via the landing page by a user, the area access page by staff, or through a controlled door tablet. Areas are discussed in the next section.

42.8 Areas

42.8.1 Usage

The areas table contains the list of areas defined for a facility. Areas are optional and can be used to define spaces and group tools in common places. In addition, areas can optionally have occupancy limits set as well as require a reservation for access.

The times a user has access to an area are defined as physical access levels. Physical access levels are used to associate areas with time schedules and are discussed in the Detailed administration → Physical access level section [42.33](#).

An area can optionally have doors associated with it that NEMO controls through interlocks. Doors are discussed in the section [42.23](#).

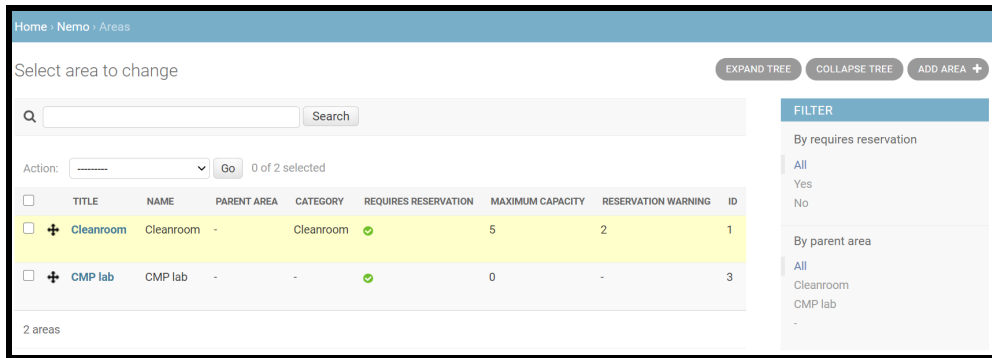

User area access permissions are permissions to physical access levels and are discussed in the Users chapter [38](#).

Areas must be created and edited through accessing this table directly.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.8.2 Summary Page

The summary page provides a list of areas (Figure 42.16). Click the area field in the row of interest to edit. If parent/child areas are used, clicking the expand tree button will list all children under a parent and clicking collapse tree will hide all children under a parent.

42.8.3 Fields

The add/change page for this table lists the fields that can be edited. In addition, the history button will show any manual changes that were made to the record. The area table is listed in five sections that will be detailed below.

Change area HISTORY

Name:
What is the name of this area? The name will be displayed on the tablet login and logout pages.

Parent area:
Select a parent area, (building, floor etc.)

Category:
Create sub-categories using slashes. For example "Category 1/Sub-category 1".

Reservation email:

An email will be sent to this address when users create or cancel reservations in the area or in children areas. A comma-separated list can be used.

Abuse email:

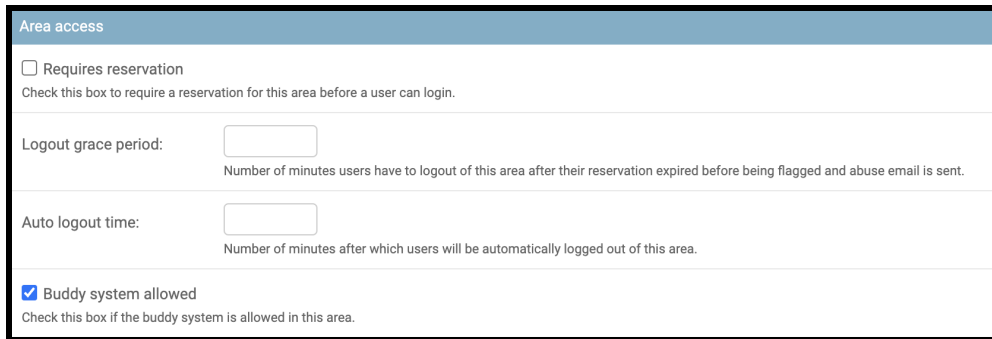

An email will be sent to this address when users overstay in the area or in children areas (logged in with expired reservation). A comma-separated list can be used.

Figure 42.17: Area general information

- General Information (Figure 42.17)
 - Name – the name of the area, maximum 200 characters (required)
 - Parent area – if parent/child relationships are desired, select the parent area from the drop-down list.
 - Category – to organize areas on the calendar sidebar, categories can be created to group by. Optional
 - Reservation email – An email will be sent to this address when users create or cancel reservations in the area or in children areas. A comma-separated list can be used. Optional

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Abuse email – An email will be sent to this address when users overstay their reservation in the area or in children areas (logged in with expired reservation). A comma-separated list can be used.
Optional

The screenshot shows a web form titled "Area access" with a light blue header. It contains the following elements:

- A checkbox labeled "Requires reservation" with the instruction "Check this box to require a reservation for this area before a user can login."
- A text input field for "Logout grace period:" with the instruction "Number of minutes users have to logout of this area after their reservation expired before being flagged and abuse email is sent."
- A text input field for "Auto logout time:" with the instruction "Number of minutes after which users will be automatically logged out of this area."
- A checked checkbox labeled "Buddy system allowed" with the instruction "Check this box if the buddy system is allowed in this area."

Figure 42.18: *Area access*

- Area access (Figure 42.18)
 - Requires reservation – check this box to require a reservation for this area before a user can login. Checking this box will cause this area to display on the calendar sidebar so it is accessible for reservations.
 - Logout grace period – number of minutes users have to logout of this area after their reservation expired before being flagged and abuse email is sent.
 - Auto logout time – number of minutes after which users will be automatically logged out of this area. This requires the timed service “Auto logout users” to be setup (see Section 48.3).
 - Buddy system allowed – this checkbox enables the buddy board for this area. The buddy board appears on the navigation bar and is described in the buddy board section.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Occupancy

Maximum capacity:
The maximum number of people allowed in this area at any given time. Set to 0 for unlimited.

Count staff in occupancy
Indicates that staff users will count towards maximum capacity.

Count service personnel in occupancy
Indicates that service personnel will count towards maximum capacity.

Reservation warning:
The number of simultaneous users (with at least one reservation in this area) allowed before a warning is displayed when creating a reservation.

Figure 42.19: Area occupancy

- Occupancy (Figure 42.19)
 - Maximum capacity – The maximum number of people allowed in this area at any given time. Set to 0 for unlimited. (required)
 - Count staff in occupancy – Indicates that staff users will count towards maximum capacity. If not checked, staff occupancy will be listed separately on the status dashboard and jumbotron pages.
 - Count service personnel in occupancy – Indicates that service personnel will count towards maximum capacity. If not checked, service personnel occupancy will be listed separately on the status dashboard and jumbotron pages.
 - Reservation warning – The number of simultaneous users (with at least one reservation in this area) allowed before a warning is displayed when creating a reservation.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

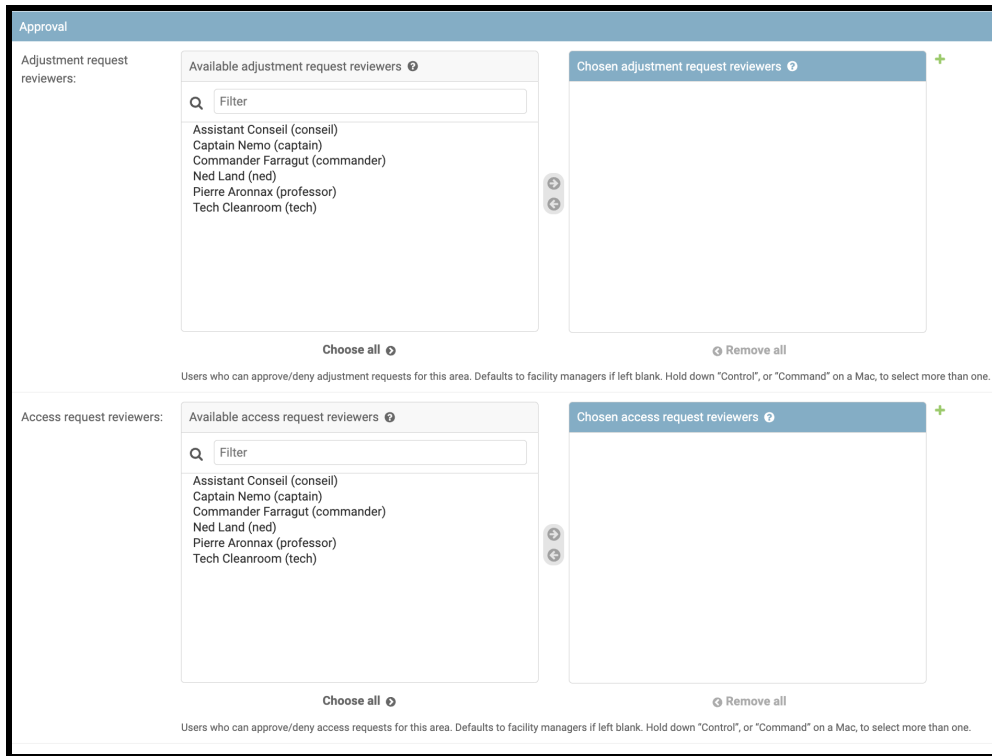

Figure 42.20: Area requests approval

- Approval (Figure 42.20):
 - Adjustment request reviewers – Select the list of users who can approve/deny adjustment requests for this area. If left blank, all users with the facility manager role can review adjustment requests for this area.
 - Access request reviewers – Select the list of users who can approve/deny access requests for this area. If left blank, all users with the facility manager role can review access requests for this area.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Reservation

Reservation horizon:
Users may create reservations this many days in advance. Leave this field blank to indicate that no reservation horizon exists for this area.

Missed reservation threshold:
The amount of time (in minutes) that a area reservation may go unused before it is automatically marked as "missed" and hidden from the calendar. Usage can be from any user, regardless of who the reservation was originally created for. The cancellation process is triggered by a timed job on the web server.

Figure 42.21: Area reservation

- Reservation (Figure 42.21) – these parameters are only applicable if the ‘requires reservation’ check box is checked
 - Reservation horizon – Users may create reservations this many days in advance. Leave this field blank to indicate that no reservation horizon exists for this area.
 - Missed reservation threshold – The amount of time (in minutes) that an area reservation may go unused before it is automatically marked as “missed” and hidden from the calendar. The cancellation process is triggered by a timed job on the web server.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Policy

Policy off between times
Check this box to disable policy rules every day between the given times

Policy off start time: Now | ⌚
The start time when policy rules should NOT be enforced

Policy off end time: Now | ⌚
The end time when policy rules should NOT be enforced

Policy off weekend
Whether or not policy rules should be enforced on weekends

Minimum usage block time:
The minimum amount of time (in minutes) that a user must reserve this area for a single reservation. Leave this field blank to indicate that no minimum usage block time exists for this area.

Maximum usage block time:
The maximum amount of time (in minutes) that a user may reserve this area for a single reservation. Leave this field blank to indicate that no maximum usage block time exists for this area.

Maximum reservations per day:
The maximum number of reservations a user may make per day for this area.

Minimum time between reservations:
The minimum amount of time (in minutes) that the same user must have between any two reservations for this area.

Maximum future reservation time:
The maximum amount of time (in minutes) that a user may reserve from the current time onwards.

Figure 42.22: Area policy

- Policy (Figure 42.22) – these parameters are only applicable if the ‘requires reservation’ check box is checked.
 - Policy off between times – Check this box to disable policy rules every day between the given times
 - Policy off start time – The start time when policy rules should NOT be enforced

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Policy off end time – The end time when policy rules should NOT be enforced
- Policy off weekend – Whether or not policy rules should be enforced on weekends
- Minimum usage block time – The minimum amount of time (in minutes) that a user must reserve this area for a single reservation. Leave this field blank to indicate that no minimum usage block time exists for this area.
- Maximum usage block time – The maximum amount of time (in minutes) that a user may reserve this area for a single reservation. Leave this field blank to indicate that no maximum usage block time exists for this area.
- Maximum reservations per day – The maximum number of reservations a user may make per day for this area.
- Minimum time between reservations – The minimum amount of time (in minutes) that the same user must have between any two reservations for this area.
- Maximum future reservation time – The maximum amount of time (in minutes) that a user may reserve from the current time onwards.

42.8.4 User access page

There are no user pages for creating areas. Accessing areas can be performed from the landing page if enabled, the area access page by staff, and the entrance tablets if used.

42.9 Badge readers

42.9.1 Usage

The badge reader table can be used to create custom badge reader behavior. The default behavior of NEMO is to expect the F2 character as the send key and the record key. It does not need to be explicitly defined but has been here to provide an example of how to record a new badge reader. When using the Kiosk or Area Access, add `?reader_id=<reader_id>` to the URL to select a badge reader configuration.

42.9.2 Summary Page

The summary page provides a listing of badge readers (Figure 42.23). Click the id field in the row of interest to edit.

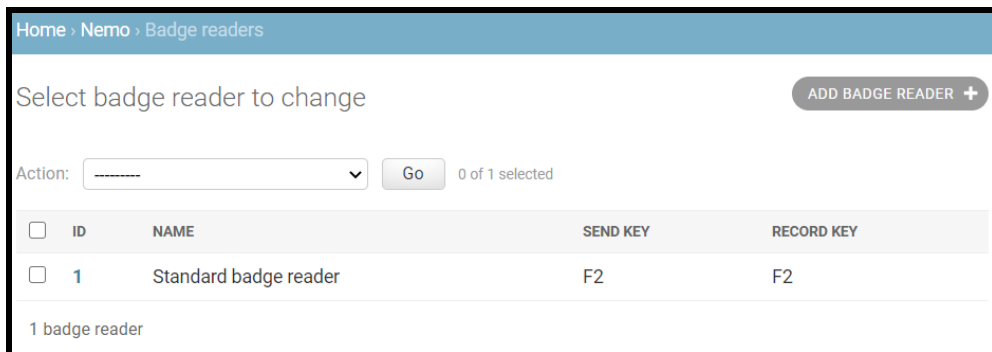

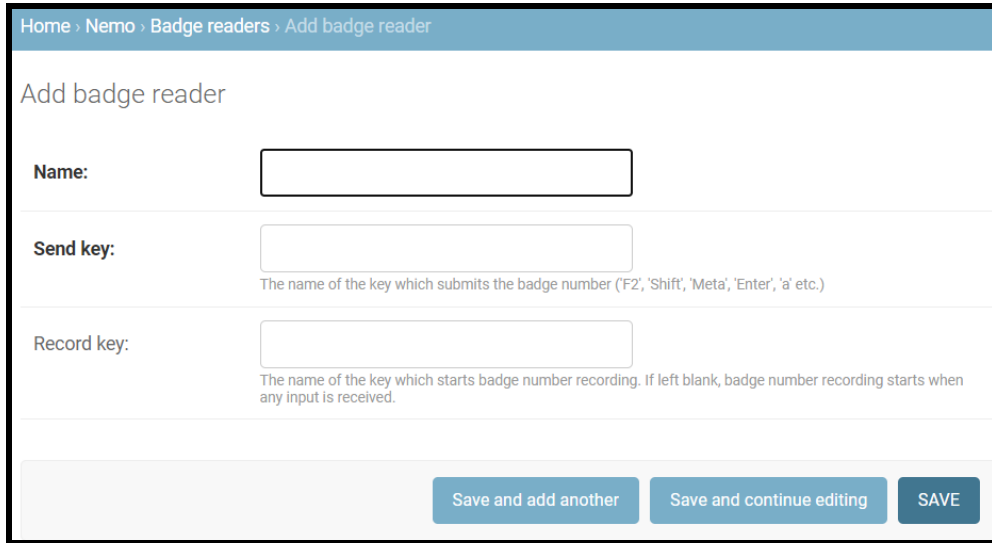

Figure 42.23: Badge reader summary page

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.9.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.24).

The screenshot shows a web form titled "Add badge reader" within a navigation breadcrumb "Home > Nemo > Badge readers > Add badge reader". The form contains three input fields: "Name:", "Send key:", and "Record key:". Each field has a text input box and a descriptive tooltip. The "Send key:" tooltip reads: "The name of the key which submits the badge number ('F2', 'Shift', 'Meta', 'Enter', 'a' etc.)". The "Record key:" tooltip reads: "The name of the key which starts badge number recording. If left blank, badge number recording starts when any input is received." At the bottom of the form are three buttons: "Save and add another", "Save and continue editing", and "SAVE".

Figure 42.24: *Badge reader add/edit page*

- Name – the name can be up to 200 characters (required).
- Send key – The name of the key which submits the badge number ('F2', 'Shift', 'Meta', 'Enter', 'a' etc.) (required)
- Record key – The name of the key which starts badge number recording. If left blank, badge number recording starts when any input is received.

42.9.4 User access page

There are no user access pages associated with badge readers. When using the Kiosk or Area Access, add ?reader_id=<reader_id> to the URL to select a badge reader configuration.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

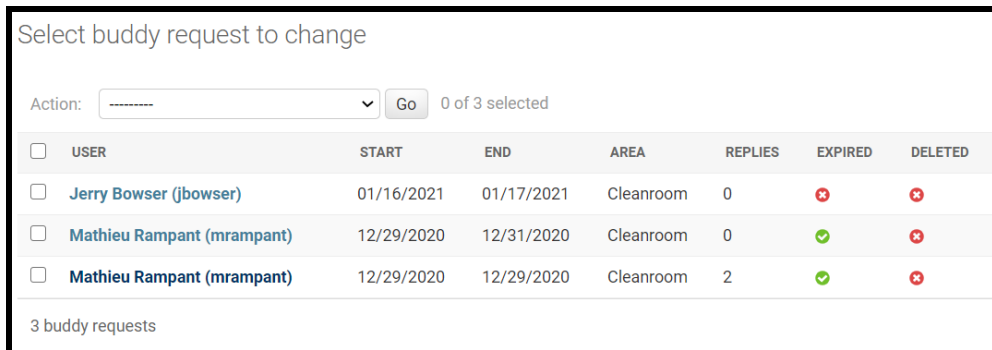

42.10 Buddy requests

42.10.1 Usage

The buddy requests table stores the requests entered on the buddy board feature, see section [8.1](#).

42.10.2 Summary Page

The summary page provides a listing of buddy requests (Figure [42.25](#)). Click the user field in the row of interest to edit.

Select buddy request to change

Action: 0 of 3 selected

Figure 42.25: *Buddy request summary page*

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.10.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.26).

Change buddy request

Creation time: Date: 12/29/2020 Today | 📅
Time: 11:53 AM Now | 🕒
The date and time when the request was created.

Start: 12/29/2020 Today | 📅
The start date the user is requesting a buddy.

End: 12/29/2020 Today | 📅
The end date the user is requesting a buddy.

Description: I need a buddy today
The description of the request.

Area: Cleanroom ▼ ✎ +

User: Mathieu Rampant (mrampant) ▼ ✎ +
The user who is submitting the request.

Expired
Indicates the request has expired and won't be shown anymore.

Deleted
Indicates the request has been deleted and won't be shown anymore.

Figure 42.26: Buddy request add/edit page

- Creation time – use the dialog box or calendar/clock to select the creation date/time (required).
- Start – use the dialog box or calendar to select the start date (required).
- End – use the dialog box or calendar to select the end date (required).

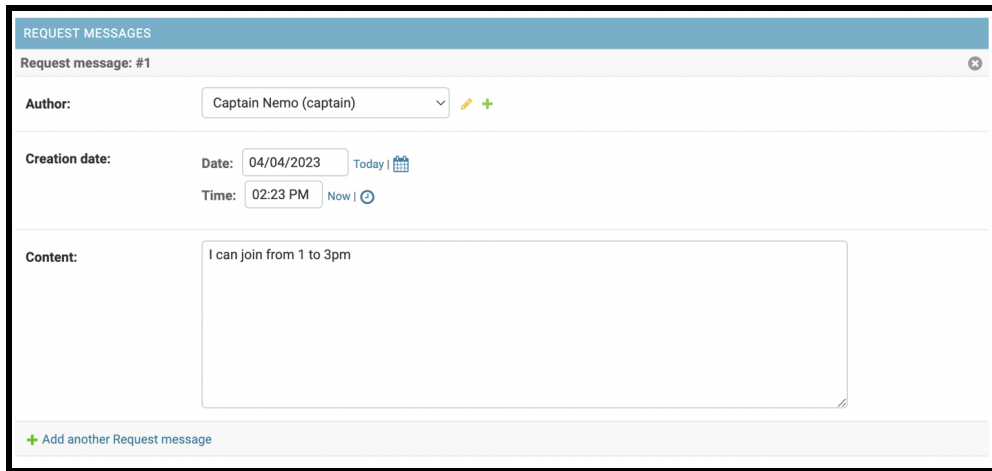

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Description – dialog box to enter description of the buddy request (required).
- Area – select area from the drop down (required) (Areas Table).
- User – select user submitting request from the drop-down box (required) (Users Table).
- Expired – check box indicates if request has past end date and won't be displayed any longer.
- Deleted – check box indicates if request was deleted by user and won't be displayed any longer.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.10.4 Buddy request message fields

The buddy request messages can be edited directly at the bottom of the buddy request form (Figure 42.27).

The screenshot shows a web interface titled "REQUEST MESSAGES". Below the title is a header "Request message: #1" with a close button. The form contains three main sections: "Author:" with a dropdown menu showing "Captain Nemo (captain)" and a plus icon; "Creation date:" with "Date:" set to "04/04/2023" (Today) and "Time:" set to "02:23 PM" (Now); and "Content:" with a text area containing "I can join from 1 to 3pm". At the bottom, there is a link "+ Add another Request message".

Figure 42.27: Buddy request messages add/edit page

- Author – select user submitting request from the drop-down box (required) (Users Table).
- Creation date – use the dialog box or calendar/clock to select the creation date/time (required).
- Content – dialog box to enter description of the buddy request (required).

42.10.5 User access page

Records are typically not edited or created directly in this view. There is a buddy board page for managing buddy requests, see section 8.1.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

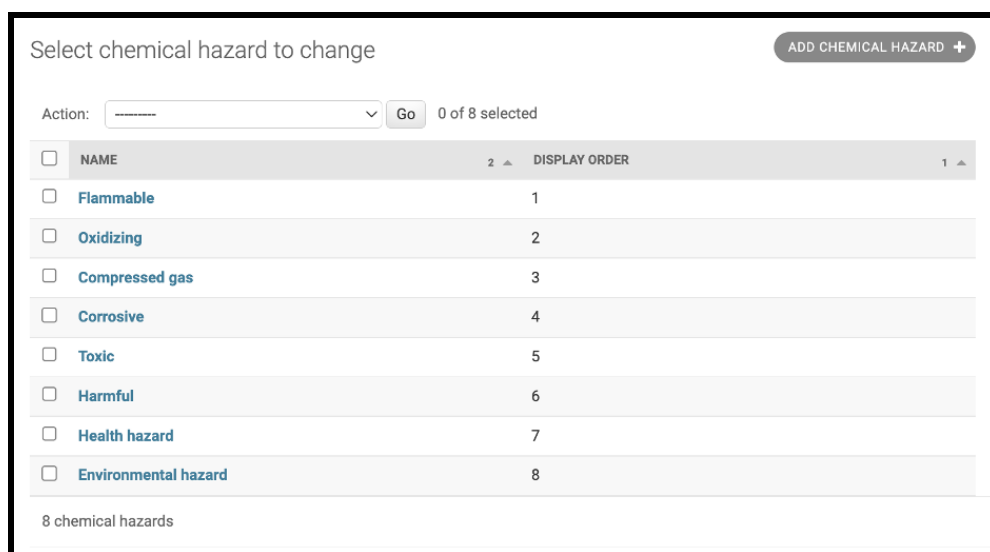

42.11 Chemical hazards

42.11.1 Usage

The chemical hazards table stores the chemical hazards used for the safety data sheets feature, see chapter 12.

42.11.2 Summary Page

The summary page provides a listing of chemical hazards (Figure 42.28). Click the name field in the row of interest to edit.

Select chemical hazard to change ADD CHEMICAL HAZARD +

Action: Go 0 of 8 selected

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.11.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.29).

The screenshot shows a web interface for editing a chemical hazard. The title is "Change chemical hazard" with a "HISTORY" button in the top right. The main heading is "Flammable".

Fields include:

- Name:** An input field containing the text "Flammable".
- Display order:** An input field containing the number "1". Below it is a note: "Chemical hazards are sorted according to display order. The lowest value category is displayed first in the 'Safety data sheet' page."
- Logo:** A section showing the current logo as "chemical_hazard_logos/flammable.png" with a "Clear" checkbox. Below it is a "Change:" label, a "Choose File" button, and the text "No file chosen". A note below says "The logo for this hazard".
- Chemicals:** Two panels for selecting chemicals. The left panel, "Available Chemicals", has a search filter and lists: Acetylene, Boron trifluoride, Carbon tetrafluoride, Formaldehyde, and Glycolic acid. The right panel, "Chosen Chemicals", is currently empty. Navigation arrows are between the panels, and "Choose all" and "Remove all" buttons are at the bottom.

Figure 42.29: Chemical hazard add/edit page

- Name – use the input field to enter the name of the chemical hazard (required).
- Display order – use the dialog box or calendar to select the start date (required).
- Logo – use the “Choose File” button to upload a logo for this hazard.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Standard hazards logos can be found on the [NEMO GitHub repository](#).

- Chemicals – use the multi selector to select chemicals that this hazard applies to. This can also be done from the Chemicals admin page, see section [42.12](#).

42.11.4 User access page

Chemical hazards are displayed in the Safety data sheets chapter [12](#).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

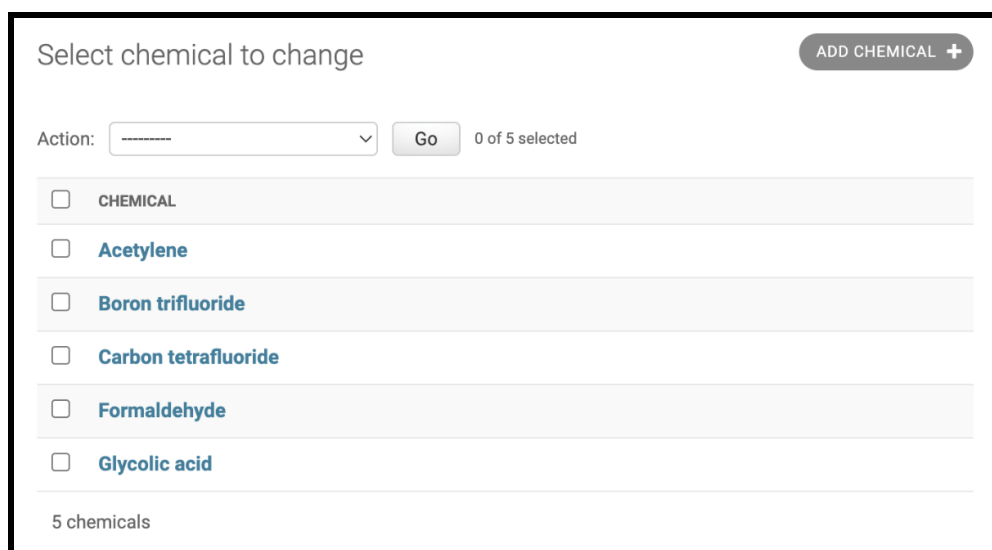

42.12 Chemicals

42.12.1 Usage

The chemicals table stores the chemical used in the safety data sheets feature, see chapter 12.

42.12.2 Summary Page

The summary page provides a listing of chemicals (Figure 42.30). Click the name field in the row of interest to edit.

The screenshot shows a web interface for managing chemicals. At the top, there is a header "Select chemical to change" and a button labeled "ADD CHEMICAL +". Below this, there is an "Action:" dropdown menu with a "Go" button and a status indicator "0 of 5 selected". The main content area is a list of chemical entries, each with a checkbox and a name: "CHEMICAL", "Acetylene", "Boron trifluoride", "Carbon tetrafluoride", "Formaldehyde", and "Glycolic acid". At the bottom of the list, it says "5 chemicals".

Figure 42.30: Chemical summary page

42.13.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.33, Figure 42.35).

Home › Nemo › Closures › President's day - Lab closed

Change closure

President's day - Lab closed HISTORY

Name: 📄
The name of this closure, that will be displayed as the policy problem and alert (if applicable).

Alert days before:
Enter the number of days before the closure when an alert should automatically be created. Leave blank for no alert.

Alert template:

The lab will be closed for President's day from {{ start_time }} to {{ end_time }}.
The buddy system will be in effect.

The template to create the alert with. The following variables are provided (when applicable): name, start_time, end_time, areas.

Alert preview:

President's day - Lab closed
The lab will be closed for President's day from Friday, February 18th, 2022 @ 12:00 AM to Sunday, February 20th, 2022 @ 11:59 PM.
The buddy system will be in effect.

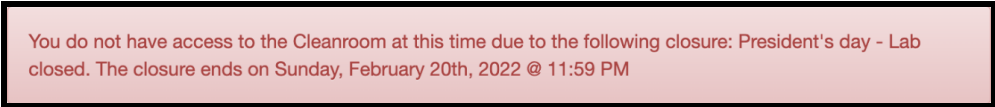

Notify managers last occurrence
Check this box to notify facility managers on the last occurrence of this closure.

Staff absent
Check this box and all staff members will be marked absent during this closure in staff status.

Figure 42.33: Closures add/edit page 1

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Name – descriptive name of the closure. This field is displayed in the message to users if someone tries to enter the area during the selected time (Figure 42.34) (required)

You do not have access to the Cleanroom at this time due to the following closure: President's day - Lab closed. The closure ends on Sunday, February 20th, 2022 @ 11:59 PM

Figure 42.34: *Closures message*

- Alert days before – number of days before the closure that the automatic alert should be shown. Setting this field to any value other than blank will trigger the automatic alert creation, if the “Create closure alerts” timed service is set. See NEMO Timed Services section 48.3 for more information.
- Alert template – template message used for the alert. 4 variables can be used in the template: name, start_time, end_time and areas (unique areas from physical access levels). This field is required if “Alert days before” is set.
- Alert preview – preview of the alert if an alert template is provided. To display the preview, after providing an alert template click on “Save and continue editing”.
- Notify managers last occurrence – check this box to make sure facility managers get a reminder email on the last occurrence of this closure. This feature is particularly useful when setting multiple dates in advance, for example Christmas dates for the next 5 years, managers will be notified on the last one 5 years from now, so they can remember to go add more dates. The “Create closure alerts” timed service need to be set for this to work. See NEMO Timed Services section 48.3 for more information.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Staff absent – check this box and all staff will be marked absent on the staff status page and the status will show “Closed”. See Staff status section 7.4.

The screenshot displays the 'Physical access levels' section of the NEMO administration interface. It features two columns: 'Available physical access levels' and 'Chosen physical access levels'. The 'Available' column contains a search filter, a list of 'Cleanroom access' and 'Grey room access', and a 'Choose all' button. The 'Chosen' column contains 'Cleanroom access weekdays' and a 'Remove all' button. Below these columns is a note: 'Select access levels this closure applies to. Hold down "Control", or "Command" on a Mac, to select more than one.' Below this is a 'CLOSURE TIMES' section with a table of closure entries.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.14.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.37).

The screenshot shows the 'Add comment' page in NEMO. The breadcrumb trail is 'Home > Nemo > Comments > Add comment'. The page title is 'Add comment'. The form contains the following fields:

- Tool:** A drop-down menu with a pencil and plus icon. Below it is the text: 'The tool that this comment relates to.'
- Author:** A drop-down menu with a pencil and plus icon.
- Creation date:** Two input fields: 'Date: 09/22/2020' with a calendar icon and 'Today' link, and 'Time: 02:50 PM' with a clock icon and 'Now' link.
- Expiration date:** Two input fields: 'Date:' with a calendar icon and 'Today' link, and 'Time:' with a clock icon and 'Now' link. Below it is the text: 'The comment will only be visible until this date.'
- Visible:** A checked checkbox.
- Hide date:** Two input fields: 'Date:' with a calendar icon and 'Today' link, and 'Time:' with a clock icon and 'Now' link. Below it is the text: 'The date when this comment was hidden. If it is still visible or has expired then this date should be empty.'
- Hidden by:** A drop-down menu with a pencil, plus, and minus icon.
- Content:** A large text area with a small icon in the bottom right corner.
- Staff only:** An unchecked checkbox.

Figure 42.37: Comments add/edit page

- Tool – select the tool this comment relates to from the drop-down list (required). Tools table.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Author – select the user name from the drop-down list (required). Users table.
- Creation date – use the dialog box or calendar/clock to select the creation date/time (required).
- Expiration date – use the dialog box or calendar/clock to select the expiration date/time for the comment. After the expiration date/time, the comment will no longer be visible.
- Visible – check box to indicate if the comment is visible on the tool summary page it pertains to.
- Hide date – use the dialog box or calendar/clock to select the expiration date/time for the comment. After the hide date/time, the comment will no longer be visible.
- Hidden by – select the user name from the drop-down list. Users table.
- Staff only – check box to indicate that comment will only be visible to staff. This is useful for listing restart procedures or other information that users should not have access to.

42.14.4 User access page

Comments are entered on the post a comment tab of the tool control page, see section 6.9. The comment history for a tool can be viewed on the details tab of the tool control page, see section 6.7.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.15 Configuration histories

42.15.1 Usage

The configurations histories table is used to store tool configurations for each configurable tool. The configuration can be selected when a reservation is made, staff update the configuration when the tool is setup for the user, and the history can be viewed from the config history tab of the tool control page, see subsection 6.5.6.

42.15.2 Summary Page

The summary page provides a listing of configuration histories (Figure 42.38). Click the id field in the row of interest to edit.

<input type="checkbox"/>	ID	CONFIGURATION	USER	MODIFICATION TIME	SLOT

Home › Nemo › Configurations › Dicing saw: Blade type

Change configuration

HISTORY

Dicing saw: Blade type

Name:
The name of this overall configuration. This text is displayed as a label on the tool control page.

Tool:  
The tool that this configuration option applies to.

Configurable item name:
The name of the tool part being configured. This text is displayed as a label on the tool control page. Leave this field blank if there is only one configuration slot.

Advance notice limit:
Configuration changes must be made this many hours in advance.

Display order:
The order in which this configuration will be displayed beside others when making a reservation and controlling a tool. Can be any positive integer including 0. Lower values are displayed first.

Prompt:
The textual description the user will see when making a configuration choice.

Current settings:
The current configuration settings for a tool. Multiple values are separated by commas.

Figure 42.41: Configurations add/edit page part 1

Chapter 42 Detailed administration – NEMO (admin or authorized users)

The screenshot displays a configuration interface with the following sections:

- Available settings:** A text input field containing "Metal Blade, Resin Blade, SIC Blade". Below it, a note states: "The available choices to select for this configuration option. Multiple values are separated by commas."
- Calendar colors:** A text input field containing "#670862, #075e21, #878014". Below it, a note states: "Comma separated list of html colors for each available setting. E.g. #ffffff, #e0e0e0".
- Absence string:** An empty text input field. Below it, a note states: "The text that appears to indicate absence of a choice."
- Maintainers:** A complex section with two columns:
 - Available maintainers:** A list with a search filter. The list contains: "Assistant Conseil (consell)", "Commander Farragut (commander)", and "Tech Cleanroom (tech)". Below the list is a "Choose all" button.
 - Chosen maintainers:** A list containing: "Captain Nemo (captain)", "Ned Land (ned)", and "Pierre Aronnax (professor)". Below the list is a "Remove all" button.

Below the maintainers section, there are three checkboxes with explanatory text:

- Qualified users are maintainers**
Any user that is qualified to use the tool that this configuration applies to may also change this configuration. Checking this box implicitly adds qualified users to the maintainers list.
- Exclude from configuration agenda**
Reservations containing this configuration will be excluded from the Configuration Agenda page.
- Enabled**
Only active configurations will show up for the selected tool

Figure 42.42: Configurations add/edit page part 2

- **Name** – The name of this overall configuration. This text is displayed as a label on the tool control page. (required).
- **Tool** – The tool that this configuration option applies to selected from the drop-down list. (required) Tools table.
- **Configurable item name** – The name of the tool part being configured. This text is displayed as a label on the tool control page. Leave this field

Chapter 42 Detailed administration – NEMO (admin or authorized users)

blank if there is only one configuration slot.

- Advance notice limit – Configuration changes must be made this many hours in advance or the user will be prompted that the configuration may not be done in time. (required).
- Display order – The order in which this configuration will be displayed beside others when making a reservation and controlling a tool. Can be any positive integer including 0. Lower values are displayed first. (required).
- Prompt – The textual description the user will see when making a configuration choice.
- Current settings – The current configuration settings for a tool. Multiple values are separated by commas.
- Available settings – The available choices to select for this configuration option. Multiple values are separated by commas.
- Calendar colors – Comma separated list of HTML colors for each available setting. E.g. #ffffff, #eeeeee.
- Absence string – The text that appears to indicate absence of a choice.
- Maintainers – Select the users that are allowed to change this configuration. Hold down “Control”, or “Command” on a Mac, to select more than one. Users table.
- Qualified users are maintainers – Any user that is qualified to use the tool that this configuration applies to may also change this configuration. Checking this box implicitly adds qualified users to the maintainers list.
- Exclude from configuration agenda – Reservations containing this configuration will be excluded from the Configuration Agenda page.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Enabled – Enable/disable the configuration. If disabled, it will not show up in the tool control or in the Configuration Agenda page.

42.16.4 User access page

The configuration of a tool can be changed, updated, and viewed on several pages of NEMO. The configuration can be selected when a reservation is made, staff update the configuration when the tool is setup for the user, and the history can be viewed from the config history tab of the tool control page, see subsection [6.5.6](#).

42.17 Consumable categories

42.17.1 Usage

Consumable categories are optional but can be useful for binning consumables so they can be displayed in logical groups. Consumable categories, if used, must be created in this table view and can be any text name. Any number can be defined. If no consumable categories are defined, all consumables will be listed in alphabetical order. Consumable categories are discussed in the Supplies chapter [36](#).

42.17.2 Summary Page

The summary page provides a listing of consumable supply categories (Figure [42.43](#)). Click the name field in the row of interest to edit.

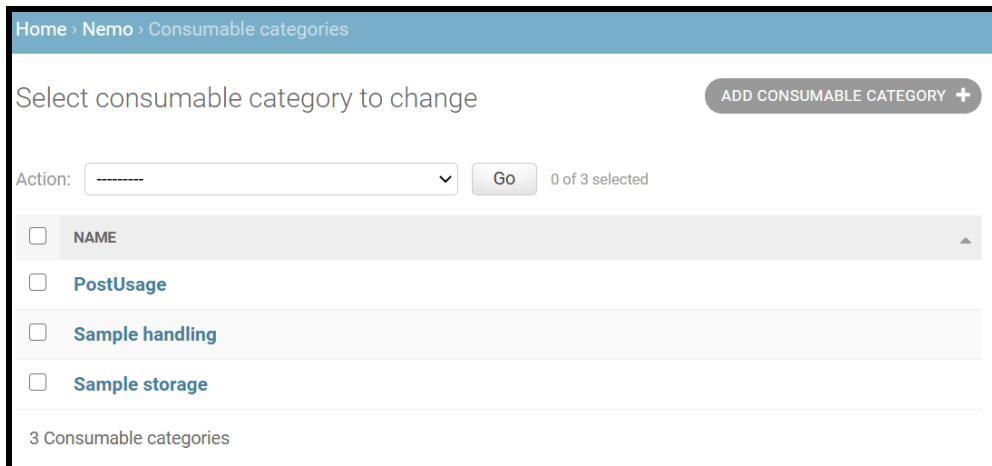

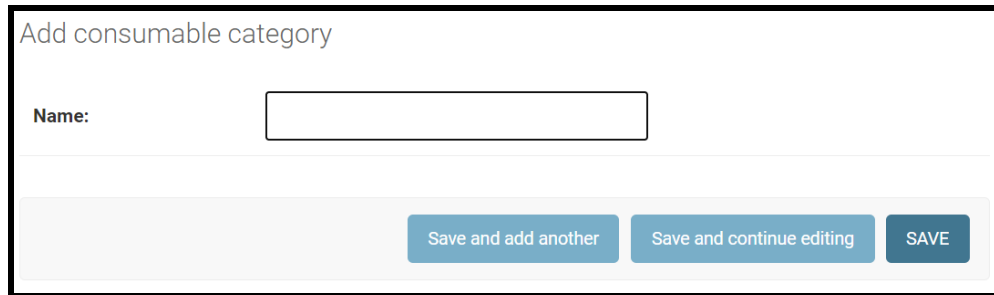

Figure 42.43: *Consumable category summary page*

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.17.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.44).

The screenshot shows a web form titled "Add consumable category". Below the title, there is a label "Name:" followed by a rectangular text input field. At the bottom of the form, there are three buttons: "Save and add another", "Save and continue editing", and "SAVE".

Figure 42.44: *Consumable category add/edit page*

- Name – the name can be up to 200 characters (required).

42.17.4 User access page

Consumable categories are discussed in the Supplies chapter 36.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

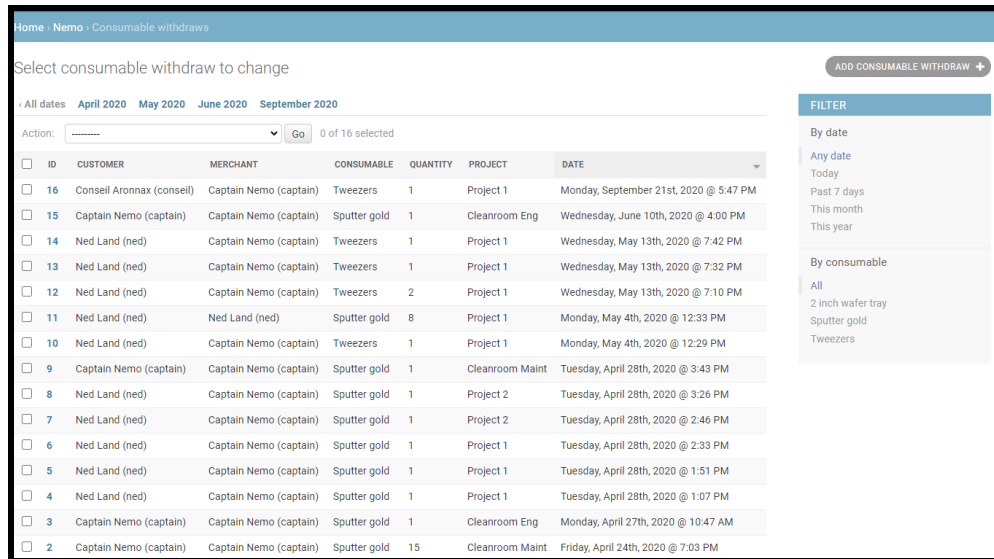

42.18 Consumable withdraws

42.18.1 Usage

The consumable withdraws records table maintains the list of consumable or supply items that have been distributed to users either manually by staff or automatically by tool usage. Records are written automatically when a staff member checks out a supply, or a consumable withdraw is initiated by a tool pre/post usage question. Normally, this table will not require manual editing unless an incorrect quantity is entered.

42.18.2 Summary Page

The summary page provides date filtering, filtering by consumable, and by start date (Figure 42.45). Click the id field in the row of interest to edit.

42.19.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.48). In addition, the history button will show any manual changes that were made to the record.

The screenshot shows the 'Change consumable' interface for 'Tweezers'. At the top right is a 'HISTORY' button. The form contains the following fields and options:

- Name:** Tweezers
- Category:** A dropdown menu with a pencil icon and a plus sign.
- Quantity:** 10. Below it, the text reads: 'The number of items currently in stock.'
- Reusable: Check this box if this item is reusable. The quantity of reusable items will not decrease when orders are made (storage bins for example).
- Visible
- Allow self checkout: Allow users to self checkout this consumable, only applicable when self checkout customization is enabled.
- Self checkout only users:** Two panels are shown. The left panel, 'Available self checkout only users', contains a search filter and a list of users: Assistant Conseil (conseil), Captain Nemo (captain), Commander Farragut (commander), Ned Land (ned), Pierre Aronnax (professor), and Tech Cleanroom (tech). Below this list is a 'Choose all' button. The right panel, 'Chosen self checkout only users', is currently empty and has a 'Remove all' button.
- Notes:** A large text area for 'Notes about the consumable.'
- Reminder threshold:** 5. Below it, the text reads: 'More of this item should be ordered when the quantity falls below this threshold.'
- Reminder email:** service@nautilus.com. Below it, the text reads: 'An email will be sent to this address when the quantity of this item falls below the reminder threshold.'
- Reminder threshold reached:** A red status indicator.

Figure 42.48: Consumables add/edit page

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Name – Name of the consumable (required).
- Category – Select a category from the drop-down list.
- Quantity – The integer number of items currently in stock (required).
- Reusable – Checkbox to indicate if then item is reusable. Reusable items quantity never decreases.
- Visible – Checkbox to indicate if the item is on the supply list. This is usually unchecked for items automatically distributed based on tool usage.
- Allow self checkout – Checkbox to indicate if regular users can self-checkout this item. Only applies when the self-checkout feature is enabled.
- Self checkout only users - Limit which users are allowed to self checkout this consumable.
- Notes – Additional notes to display about this consumable.
- Reminder threshold – The quantity at which a restock reminder email should be sent.
- Reminder email – The email address of the person responsible for ordering additional stock.
- Reminder threshold reached – Indicator if stock is below reminder threshold (not user settable).

42.19.4 User access page

There is no page for creating or maintaining consumables, it must be done on this page. However, quantity records are updated automatically when a staff

Chapter 42 Detailed administration – NEMO (admin or authorized users)

member checks out a supply to a user, or a consumable withdraw is initiated by a tool pre/post usage question.

42.20 Contact information

42.20.1 Usage

Contact information can provide users information about how to find a staff member when needed. Contact information, if used, must be created in this table view. Any number can be defined. In addition, contacts can be associated with NEMO users to provide additional contact information on the tool detail pages. Contact information is discussed in the contact staff section 15.

42.20.2 Summary Page

The summary page provides a listing of contacts (Figure 42.49). Click the name field in the row of interest to edit.

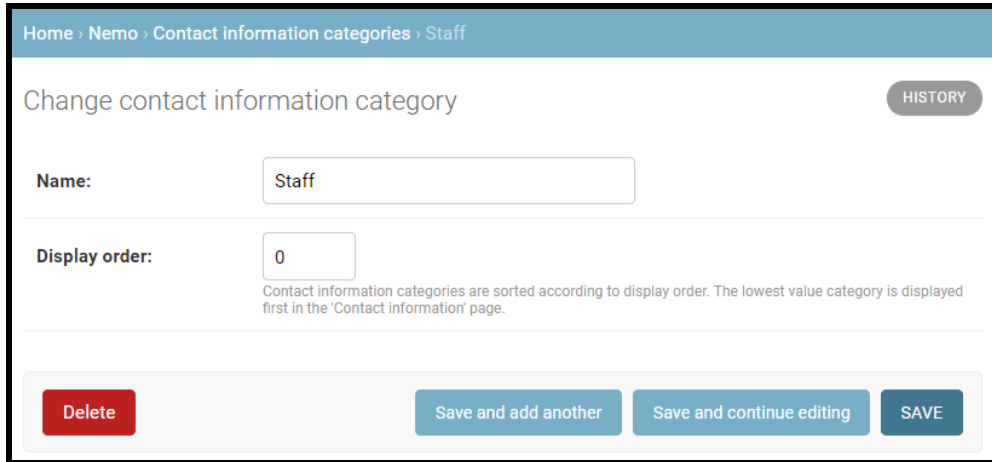

Figure 42.52: *Contact information categories add/edit page*

- Name – the name can be up to 200 characters (required).
- Display order – Contact information categories are sorted according to display order. The lowest value category is displayed first in the ‘Contact information’ page. (required).

42.21.4 User access page

Contact information categories, if used, must be created in this table view and can be any text name. Contact information categories are discussed in the contact staff section [42.20](#).

42.22 Project disciplines

42.22.1 Usage

Project disciplines are optional but are useful to group projects based on their main discipline, for example Chemistry, Physics etc. Disciplines won't appear as an option for projects unless at least one discipline has been added.

42.22.2 Summary Page

The summary page provides a listing of disciplines (Figure 42.53). Click the name field in the row of interest to edit.

The screenshot shows a web interface for managing disciplines. At the top, it says "Select discipline to change" and has an "ADD DISCIPLINE +" button. Below that is an "Action:" dropdown menu with a "Go" button and a selection count "0 of 4 selected". The main content is a list of disciplines, each with a checkbox and a name field:

<input type="checkbox"/>	DISCIPLINE
<input type="checkbox"/>	Biology
<input type="checkbox"/>	Chemistry
<input type="checkbox"/>	Electronics
<input type="checkbox"/>	Physics

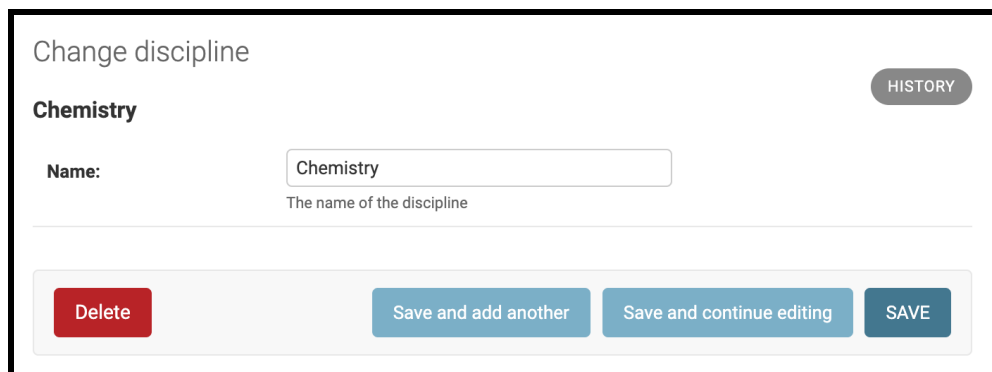

At the bottom of the list, it says "4 disciplines".

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.23 Doors

42.23.1 Usage

NEMO has the capability to control access to lab doors using a display with card reader and relay to actuate a door lock solenoid. Doors are optional but can be useful for ensuring lab occupancy is tracked. Doors are discussed in more detail in the entrance tablet chapter 47.

42.23.2 Summary Page

The summary page provides a listing of doors (Figure 42.55). Click the name field in the row of interest to edit. Once doors are defined, a URL is automatically available to access the door based on the row id number. In the doors summary page figure below, accessing `<site_address>/www.nemo.com/welcome_screen/1/` will display the door access screen for the lab entrance door.

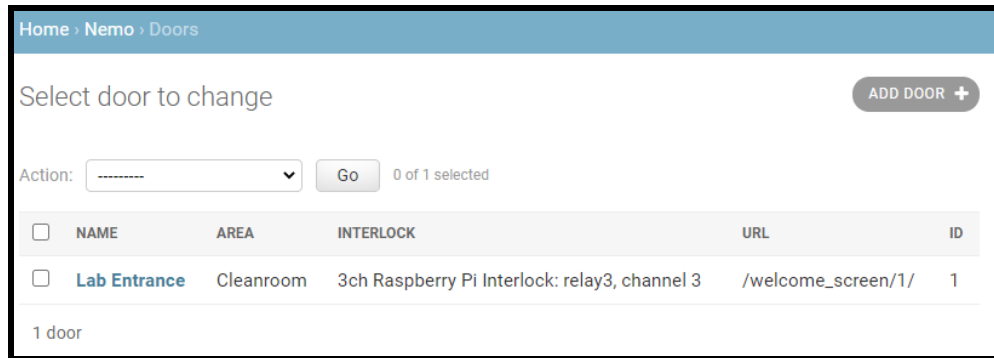

Figure 42.55: Doors summary page

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.23.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.56).

The screenshot shows a web form titled "Change door" for a "Cleanroom door". At the top right, there are buttons for "HISTORY" and "VIEW ON SITE". The form includes the following fields:

- Name:** A text input field containing "Cleanroom door".
- Welcome message:** A rich text editor containing the HTML code: `<h2><center>Welcome to the cleanroom!</center></h2>`. Below the editor is a note: "The welcome message will be displayed on the tablet login page. You can use HTML and JavaScript."
- Areas:** A selection interface with two panels: "Available areas" and "Chosen areas".
 - Available areas:** Contains a search filter labeled "Filter" and a list with "Campus". Below the list are "Choose all" and "Remove all" buttons.
 - Chosen areas:** Contains a list with "Cleanroom" and "CPM Lab".
- Interlock:** A dropdown menu showing "Interlock card: localhost, channel 3" with edit (+), delete (x), and add (pencil) icons.

Figure 42.56: Doors add/edit page

- Name – the name can be up to 200 characters (required).
- Welcome message – the welcome message will be displayed on the tablet login page. You can use HTML and JavaScript. Only required for tablet door access control.
- Areas – select the area(s) from the list. A user accessing this door will automatically be logged into this area if there is only one, and if there are more than one the user will be offered a choice. (required).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Interlock – select the interlock from the dropdown list. This interlock relay will be actuated to unlock the door.

42.23.4 User access page

There is no user access page available for doors, outside of the area access pages who use the door id.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

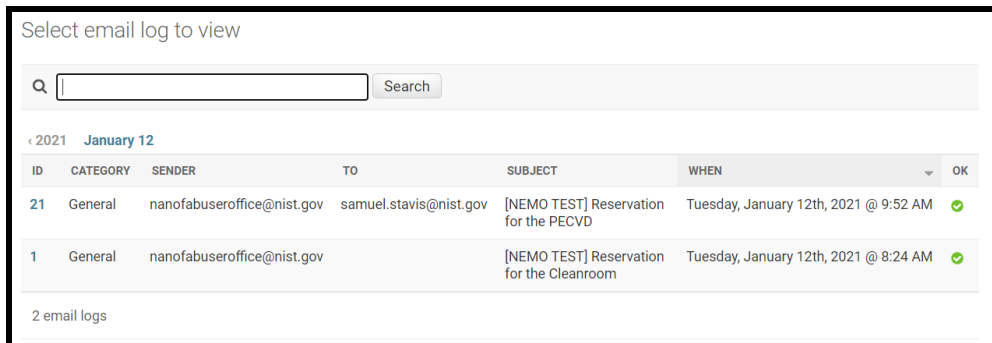

42.24 Email logs

42.24.1 Usage

All emails sent by NEMO are logged for audit purposes and accessible in the detailed administration. Use the `send_email` function available in `utilities.py` to automatically log emails.

42.24.2 Summary Page

The summary page provides a listing of emails sent by NEMO (Figure 42.57). Click the ID field in the row of interest to view. Email log records cannot be edited or deleted.

Select email log to view

Attachments:	reservation.ics
Content preview:	

Figure 42.58: *Email logs view page*

- Category – the type of email NEMO sent.
- Sender – the name of the sender, typically the User office email defined in the customization page.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- To – the user the email was sent to.
- Subject – the subject of the email.
- Content – the body of the email.
- Ok – indicated if the message was sent without error.
- Attachments – list of files attached.
- Content preview – a preview of the email if available.

42.24.4 User access page

There is no user access page available for email logs. They are generated internally and cannot be modified or deleted.

42.25 Interlock card categories

42.25.1 Usage

Interlock card categories are used to link an interlock class in interlocks.py to interlock cards so NEMO knows how to talk to the interlock. An interlock card category should be created for each interlock class in interlocks.py that will be used to control tool access or door access.

42.25.2 Summary Page

The summary page provides a listing of interlock card categories (Figure 42.59). Click the name field in the row of interest to edit.

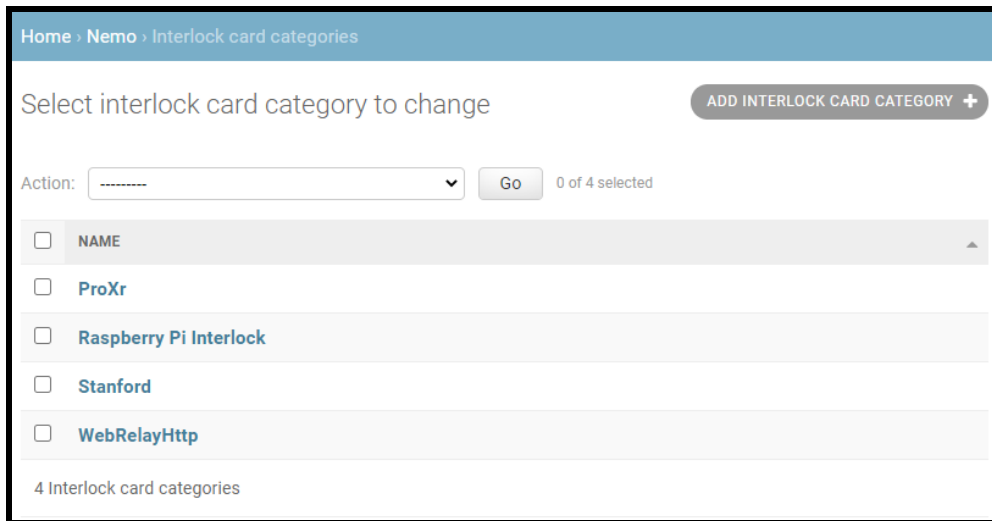

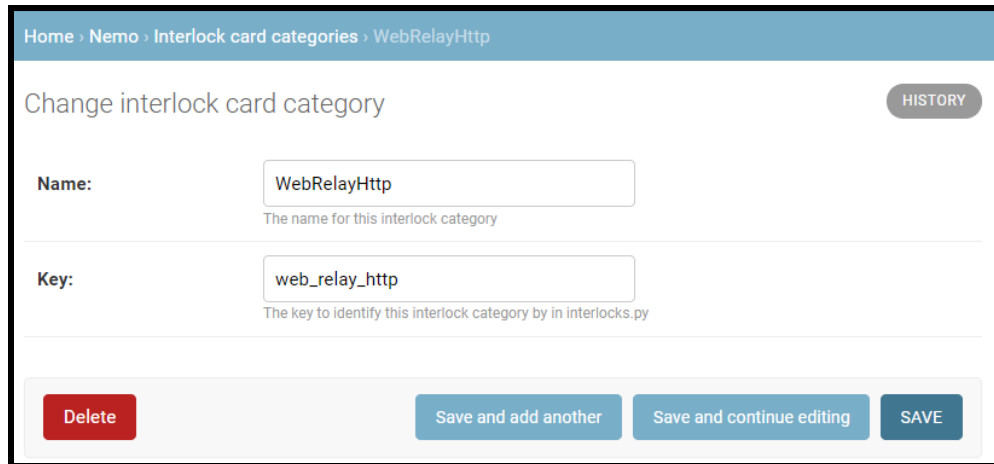

Figure 42.59: *Interlock card categories summary page*

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.25.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.60).

Home > Nemo > Interlock card categories > WebRelayHttp

Change interlock card category HISTORY

Name:
The name for this interlock category

Key:
The key to identify this interlock category by in interlocks.py

Delete Save and add another Save and continue editing SAVE

Figure 42.60: *Interlock card categories add/edit page*

- Name – name can be up to 200 characters (required).
- Key – The key to identify this interlock category in interlocks.py (required).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

The `interlocks.py` file has a dictionary that links this key name to each interlock class in `interlocks.py`. Users can create their own interlock class and access it in NEMO by updating the dictionary to include their custom class (Figure 42.61).

```
interlocks: Dict[str, Interlock] = {
    'stanford': StanfordInterlock(),
    'web_relay_http': WebRelayHttpInterlock(),
    'proxr': ProXrInterlock(),
    'rpi_interlock': RPiInterlock(),
}
```

Figure 42.61: *Interlock card categories example dictionary in `interlocks.py`*

42.25.4 User access page

Interlock card categories, if used, must be created in this table view and can be any text name. Interlock card categories are used in the interlock cards table to define how NEMO should communicate with the interlock.

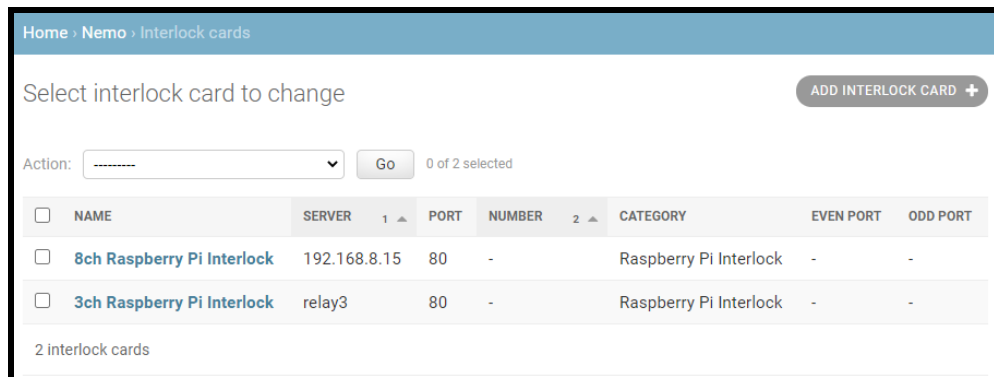

42.26 Interlock cards

42.26.1 Usage

Interlock cards define the communication parameters with an interlock device. Regardless if single relay interlock devices are used or multi-relay interlock devices are used, each device will require definition as an interlock card. Information such as IP address, port number and interlock category define how NEMO will communicate with the device.

42.26.2 Summary Page

The summary page provides a listing of interlock cards (Figure 42.62). Click the name field in the row of interest to edit.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.26.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.63).

The screenshot shows a web interface for editing an interlock card. The breadcrumb trail at the top reads: Home > Nemo > Interlock cards > 8ch Raspberry Pi Interlock: 192.168.8.15. The main heading is 'Change interlock card' with a 'HISTORY' button to its right. The form contains the following fields:

- Name:** 8ch Raspberry Pi Interlock
- Server:** 192.168.8.15
- Port:** 80
- Number:** (empty)
- Even port:** (empty)
- Odd port:** (empty)
- Category:** Raspberry Pi Interlock (dropdown menu with edit and add icons)
- Username:** NEMO_Interlock
- Password:** (masked with dots)
- Enabled

At the bottom, there are four buttons: 'Delete' (red), 'Save and add another' (light blue), 'Save and continue editing' (light blue), and 'SAVE' (dark blue).

Figure 42.63: *Interlock cards add/edit page*

- Name – name can be up to 200 characters (required).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Server – IP address or FQDN of interlock device (required).
- Port – port number to access device through (required).
- Number – Card number (required for Stanford interlocks).
- Even port – even port number (required for Stanford interlocks).
- Odd port – odd port number (required for Stanford interlocks).
- Category – interlock card category selectable from drop down list (required). See Interlock card categories.
- Username – if a username and password is required to access the interlock device, enter the username.
- Password – if a username and password is required to access the interlock device, enter the password.
- Enabled – check box to set the status of the device, normally checked.

42.26.4 User access page

Interlock cards, if used, must be created in this table view and can be any text name. Interlock cards are used in the interlocks table to define which interlock device to talk to.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

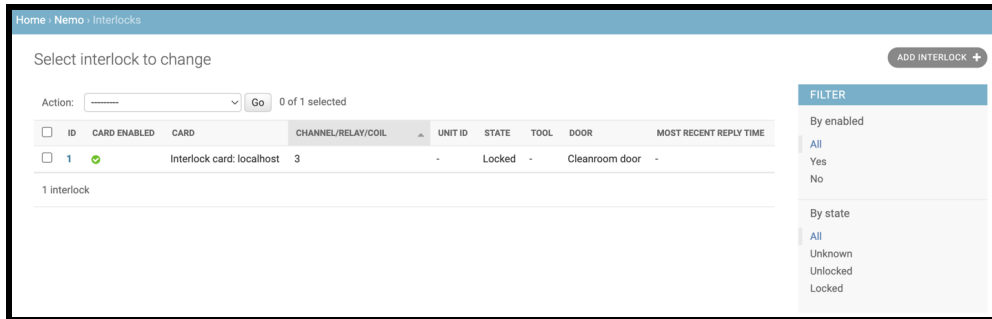

42.27 Interlocks

42.27.1 Usage

The interlocks table defines each relay on an interlock card. An entry is required for each relay on the card that will be used. NEMO areas and tools access the interlocks to control lab door and tool access.

42.27.2 Summary Page

The summary page provides a listing of interlocks (Figure 42.64). Click the id field in the row of interest to edit.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.28.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.67).

The screenshot shows a web form titled "Change landing page choice" with a "HISTORY" button in the top right. The form contains the following sections:

- Image:** Currently: tools.png. Change: No file chosen. Below this is a note: "An image that symbolizes the choice. It is automatically resized to 128x128 pixels when displayed, so set the image to this size before uploading to optimize bandwidth usage and landing page load time."
- Name:** . Below this is a note: "The textual name that will be displayed underneath the image"
- URL:** . Below this is a note: "The URL that the choice leads to when clicked. Relative paths such as /calendar/ are used when linking within the site. Use fully qualified URL paths such as https://www.google.com/ to link to external sites."
- Display order:** . Below this is a note: "The order in which choices are displayed on the landing page, from left to right, top to bottom. Lower values are displayed first."
- Open in new tab
Open the URL in a new browser tab when it's clicked
- Secure referral
Improves security by blocking HTTP referer [sic] information from the targeted page. Enabling this prevents the target page from manipulating the calling page's DOM with JavaScript. This should always be used for external links. It is safe to uncheck this when linking within the site. Leave this box checked if you don't know what this means
- Hide from mobile devices
Hides this choice when the landing page is viewed from a mobile device
- Hide from desktop computers
Hides this choice when the landing page is viewed from a desktop computer
- Hide from users
Hides this choice from normal users. When checked, only staff, technicians, facility managers and super-users can see the choice
- Hide from staff
Hides this choice from staff and technicians. When checked, only normal users, facility managers and super-users can see the choice
- Notifications:**
Displays a the number of new notifications for the user. For example, if the user has two unread news notifications then the number '2' would appear for the news icon on the landing page.

Figure 42.67: Landing page choices add/edit page

- Image – click the choose file button to select the icon image of interest. It is automatically resized to 128 x 128 pixels when displayed, so set the image to this size before uploading to optimize bandwidth usage and landing page load time. (required).
- Name – the textural name that will be displayed below the image. (required).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- URL – The URL that the choice leads to when clicked. Relative paths such as /calendar/ are used when linking within the site. Use fully qualified URL paths such as <https://www.google.com/> to link to external sites. (required).
- Display order – The order in which choices are displayed on the landing page, from left to right, top to bottom. Lower values are displayed first. (required).
- Open in new tab – check the checkbox to open the URL in a new browser tab when it's clicked.
- Secure referral – Improves security by blocking HTTP referrer [sic] information from the targeted page. Enabling this prevents the target page from manipulating the calling page's DOM with JavaScript. This should always be used for external links. It is safe to uncheck this when linking within the site. Leave this box checked if you don't know what this means.
- Hide from mobile devices – Hides this choice when the landing page is viewed from a mobile device.
- Hide from desktop computers – Hides this choice when the landing page is viewed from a desktop computer.

- Hide from staff – Hides this choice from staff and technicians. When checked, only normal users, facility managers and admins can see the choice.
- Notifications – Displays the number of new notifications for the user. For example, if the user has two unread news notifications then the number '2' would appear for the news icon on the landing page. Notifications table.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.28.4 User access page

Landing page choices, if used, must be created in this table view. Once created, they appear on the landing page displaying the uploaded icon and description. The landing page is fully described in the landing page section [42.28](#).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.29 Membership histories

42.29.1 Usage

The membership histories table automatically tracks several user actions, who took them, and when.

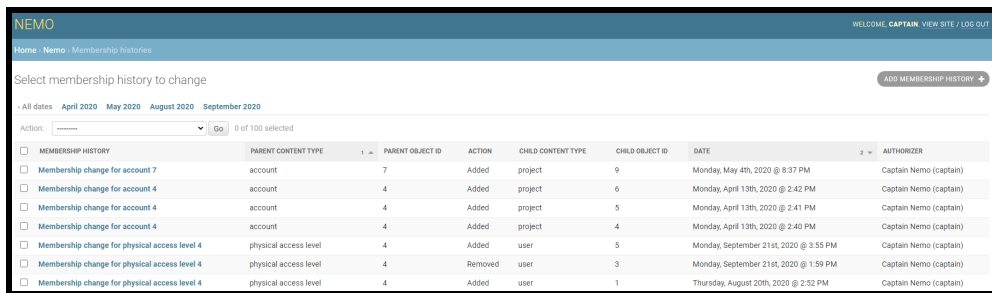

Actions tracked:

- Project joined or removed from an account.
- User joined or removed from a project.
- User joined or removed from a tool qualification.
- User joined or removed from a physical access level.

Normally, this table does not require direct editing. User permissions and permission history can be accessed on the users page. Account and project changes are in the account and project page.

42.29.2 Summary Page

The summary page provides a listing of membership histories (Figure 42.68). Click the membership history field in the row of interest to edit.

<input type="checkbox"/>	MEMBERSHIP HISTORY	PARENT CONTENT TYPE	PARENT OBJECT ID	ACTION	CHILD CONTENT TYPE	CHILD OBJECT ID	DATE	AUTHORIZER

42.29.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.69).

Home > Nemo > Membership histories > Membership change for account 7

Change membership history HISTORY

Parent content type: account

Parent object id: 7

Child content type: project

Child object id: 9

Date: 05/04/2020 Today | 📅
Time: 08:37 PM Now | 🕒
The time at which the membership status was changed.

Authorizer: Captain Nemo (captain) ✎ +
The staff member who changed the membership status of the account, project, or user in question.

Action: Added

Figure 42.69: Membership histories add/edit page

- Parent content type – select from drop down list either account, physical access level, project or tool. Selection corresponds to a record in Accounts table, Physical access levels table, Projects table, or Tools table.
- Parent object id – the table row id number of the content type. For example, if the content type is account, an id of 10 would correspond to the account table where id=10.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Child object type – select from the drop-down list either user or project. Selection corresponds to a record in Users table or Projects table.
- Child object id – the table row id number of the object type.
- Date – date and time action was taken.
- Authorizer – the user that made the change (required) Users table.
- Action – select from drop down list either added or removed.

42.29.4 User access page

Normally, this table does not require direct editing. User permissions and permission history can be accessed on the users page, see chapter [38](#). Account and project changes are detailed in the account and project chapter [22](#).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.30 News

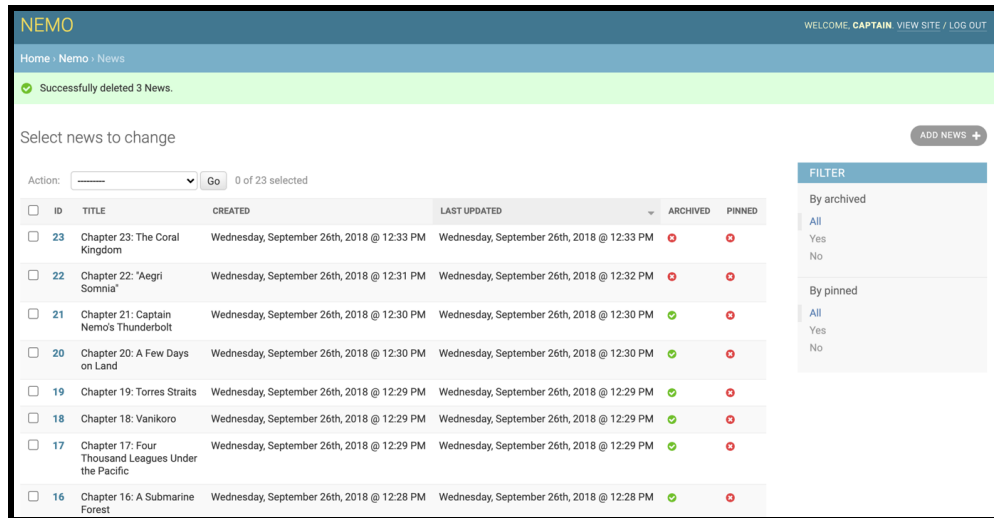

42.30.1 Usage

The news table stores the story information for the news and events page. This table normally does not require direct editing however story content mistakes can be corrected here. The news and events page is detailed in the news and events page, see chapter 17.

Normally, this table does not require direct editing. User permissions and permission history can be accessed on the users page, see chapter 38. Account and project changes are detailed in the account and project chapter 22.

42.30.2 Summary Page

The summary page provides a listing of news stories (Figure 42.70). Click the id field in the row of interest to edit.

The screenshot shows the NEMO News summary page. At the top, there is a navigation bar with 'NEMO' and 'WELCOME, CAPTAIN VIEW SITE / LOG OUT'. Below the navigation bar, there is a breadcrumb trail 'Home > Nemo > News' and a green notification banner that says 'Successfully deleted 3 News.'. The main content area is titled 'Select news to change' and features a table of news items. The table has columns for 'ID', 'TITLE', 'CREATED', 'LAST UPDATED', 'ARCHIVED', and 'PINNED'. There are 8 rows of news items, each with a checkbox in the 'ID' column. To the right of the table is a 'FILTER' sidebar with sections for 'By archived' and 'By pinned', each with 'All', 'Yes', and 'No' options. At the top right of the table area, there is an 'ADD NEWS +' button. Below the table, there is an 'Action:' dropdown menu and a 'Go' button, with '0 of 23 selected' displayed next to it.

42.30.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.71).

The screenshot shows the 'Change news' page for a news object. The breadcrumb trail is 'Home > Nemo > News > News object (23)'. The page title is 'Change news' with a 'HISTORY' button. The form includes the following fields:

- Title:** Chapter 23: The Coral Kingdom
- Pinned:** Pinned. Check this box to keep this story at the top of the news feed.
- Created:** Date: 09/26/2018 (Today), Time: 12:33 PM (Now). The date and time this story was first published.
- Original content:** Originally published on Wednesday, September 26th, 2018 @ 12:33 PM by Captain Nemo (captain): The next day I woke with my head singularly clear. To my great surprise, I was in my own room. My... The content of the story when it was first published, useful for visually hiding updates 'in the middle' of the story.
- All content:** Originally published on Wednesday, September 26th, 2018 @ 12:33 PM by Captain Nemo (captain): The next day I woke with my head singularly clear. To my great surprise, I was in my own room. My... The entire content of the story.
- Last updated:** Date: 09/26/2018 (Today), Time: 12:33 PM (Now). The date and time this story was last updated.
- Last update content:** Updated on Wednesday, September 26th, 2018 @ 12:33 PM by Captain Nemo (captain): About two o'clock, I was in the drawing-room, busied in arranging my notes, when the Captain opened the door and appeared. I bowed. He made a slight inclination in return, without speaking. I resumed my work... The most recent update to the story, useful for visually hiding updates 'in the middle' of the story.
- Archived:** Archived. A story is removed from the 'Recent News' page when it is archived.
- Update count:** 5. The number of times this story has been updated. When the number of updates is greater than 2, then only the original story and the latest update are displayed in the 'Recent News' page.

Figure 42.71: News add/edit page

- Title – this is the top-level title given to the news story.
- Pinned – checkbox to indicate whether or not this news story should stay at the top.
- Created – date and time story was initially posted.
- Original content - the content of the story when it was first published, useful for visually hiding updates 'in the middle' of the story.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- All content – the entire content of the story including all updates.
- Last updated – date and time the story was last updated.
- Last update content – the most recent update to the story useful for visually hiding updates ‘in the middle’ of the story.
- Archived – checkbox to indicate that the story has been removed from the Recent News page.
- Update count – integer number to indicate the number of times the story has been updated. When the number of updates is great than 2, only the original story and the latest update are displayed in the recent news page to save space. A reader would need to expand the story to see all of the content.

42.30.4 User access page

Normally, this table does not require direct editing. Adding and updating news stories is done on the news and events page, see chapter 17.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

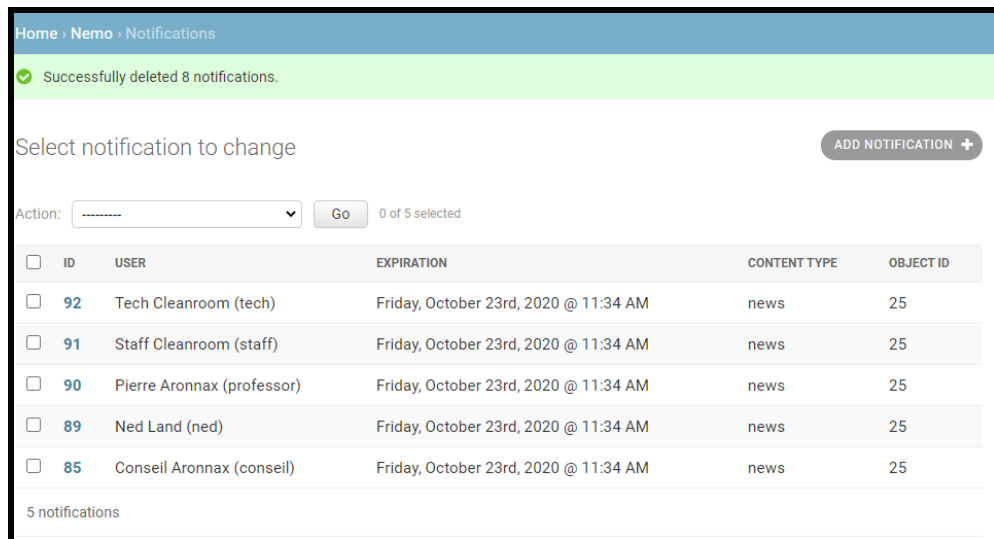

42.31 Notifications

42.31.1 Usage

The notifications table stores updates to news and safety events so notification alerts can be provided on a user-by-user basis on the landing page icons if used. If a new safety event or new news event is updated or published, the notifications will be triggered and stored in this table. Once a user visits the safety or news page, the notification is deleted from the table. Notifications are displayed as a number at the bottom right of the safety or new icon on the landing page. Safety notifications are discussed in the safety section [11.6](#). News notifications are discussed in the news and events chapter [17](#).

42.31.2 Summary Page

The summary page provides a listing of notifications (Figure [42.72](#)). Click the id field in the row of interest to edit.

5 notifications

Figure 42.72: Notifications summary page

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.31.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.73).

The screenshot shows a web interface for editing a notification. At the top, there is a breadcrumb trail: Home > Nemo > Notifications > Notification object (91). The main heading is "Change notification" with a "HISTORY" button on the right. The form contains the following fields:

- User:** A dropdown menu showing "Staff Cleanroom (staff)" with a pencil icon and a plus sign to its right.
- Expiration:** Two sub-fields: "Date" with a value of "10/23/2020" and a calendar icon, and "Time" with a value of "11:34 AM" and a clock icon. There are also "Today" and "Now" buttons.
- Content type:** A dropdown menu showing "news".
- Object id:** A text input field containing the number "25".

At the bottom of the form, there are four buttons: a red "Delete" button, and three blue buttons: "Save and add another", "Save and continue editing", and "SAVE".

Figure 42.73: Notifications add/edit page

- User – the person the notification is for. (required).
- Expiration – date and time notification will expire. Currently all notifications post for 30 days. (required).
- Content type – select from drop down list. Only news and safety issue have been implemented. (required).
- Object id – the ID of the news or safety issue record in their respective tables. (required).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.31.4 User access page

Normally, this table does not require direct editing. Safety notifications are discussed in the safety section [11.6](#). News notifications are discussed in the news and events chapter [17](#).

42.32 Onboarding phases

42.32.1 Usage

Onboarding phases are optional and provide a way to keep track of user onboarding for staff users. They are meant to be used as a checklist.

42.32.2 Summary Page

The summary page provides a listing of onboarding phases (Figure 42.74). Click the name field in the row of interest to edit.

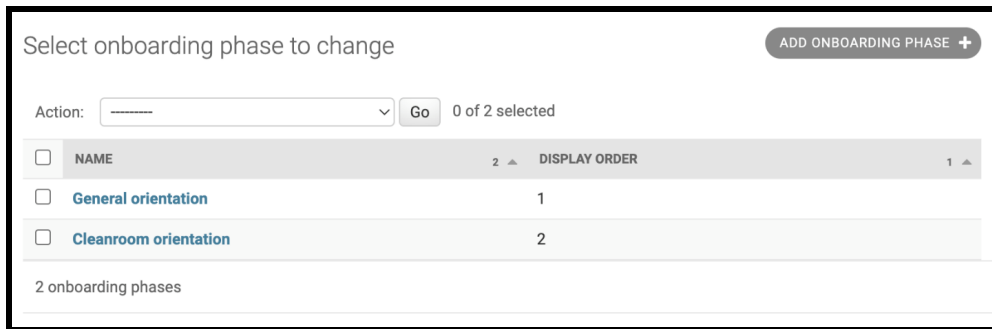

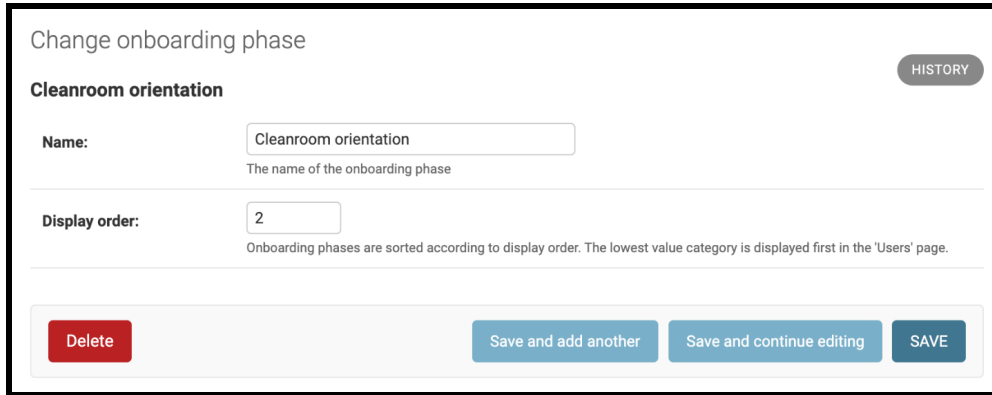

Figure 42.74: Onboarding phases summary page

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.32.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.75).

Change onboarding phase

Cleanroom orientation HISTORY

Name:
The name of the onboarding phase

Display order:
Onboarding phases are sorted according to display order. The lowest value category is displayed first in the 'Users' page.

Delete Save and add another Save and continue editing SAVE

Figure 42.75: *Onboarding phases add/edit page*

- Name – the name of the onboarding phase. (required).
- Display order – the order to display this onboarding phase in. (required).

42.32.4 User access page

There is no user access page available for onboarding phases. However, they are displayed as a checklist when creating/editing Users, see chapter 38.

42.33 Physical access levels

42.33.1 Usage

The physical access levels table associates areas with schedules. Schedules can be set for always, weekends, or weekdays between a set start and end time. User permissions to access areas are given as physical access levels to have the ability to limit the days and times users have access. Exceptions to a physical access level can be made using the physical access exception table detailed above. Exceptions could be a holiday schedule or other expected closures. User permissions are discussed on the users page, see chapter 38.

42.33.2 Summary Page

The summary page provides a listing of physical access levels (Figure 42.76). Click the name field in the row of interest to edit.

42.33.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.77, Figure 42.78).

The screenshot shows a web interface for editing a physical access level. The breadcrumb trail is 'Home > Nemo > Physical access levels > Cleanroom access weekdays'. The title is 'Change physical access level' with a 'HISTORY' button. The form fields are:

- Name:** Cleanroom access weekdays
- Area:** -- Cleanroom (with edit and add icons)
- Schedule:** Weekdays
- Weekdays start time:** 07:00 AM (with 'Now' and refresh icons, and a tooltip: 'The weekday access start time')
- Weekdays end time:** 06:00 PM (with 'Now' and refresh icons, and a tooltip: 'The weekday access end time')
- Allow staff access
Check this box to allow access to Staff users without explicitly granting them access
- Allow user request
Check this box to allow users to request this access temporarily in "Access requests"

Figure 42.77: Physical access levels add/edit page 1

- Name – descriptive name of physical access level (required).
- Area – select from drop down list the area this access level is associated with. (required) Areas table.
- Schedule – select from drop down list. Available options are Always, Weekdays, or Weekends. (required).
- Weekdays start time – the time weekday access will start. (required if weekdays schedule is selected).
- Weekdays end time – the time weekday access will end. (required if weekdays schedule is selected).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Allow staff access – checking this box will give staff users access even if not explicitly granted in the user dialog.
- Allow user request – checking this box will allow users to request this access in Access requests, see section 8.2.

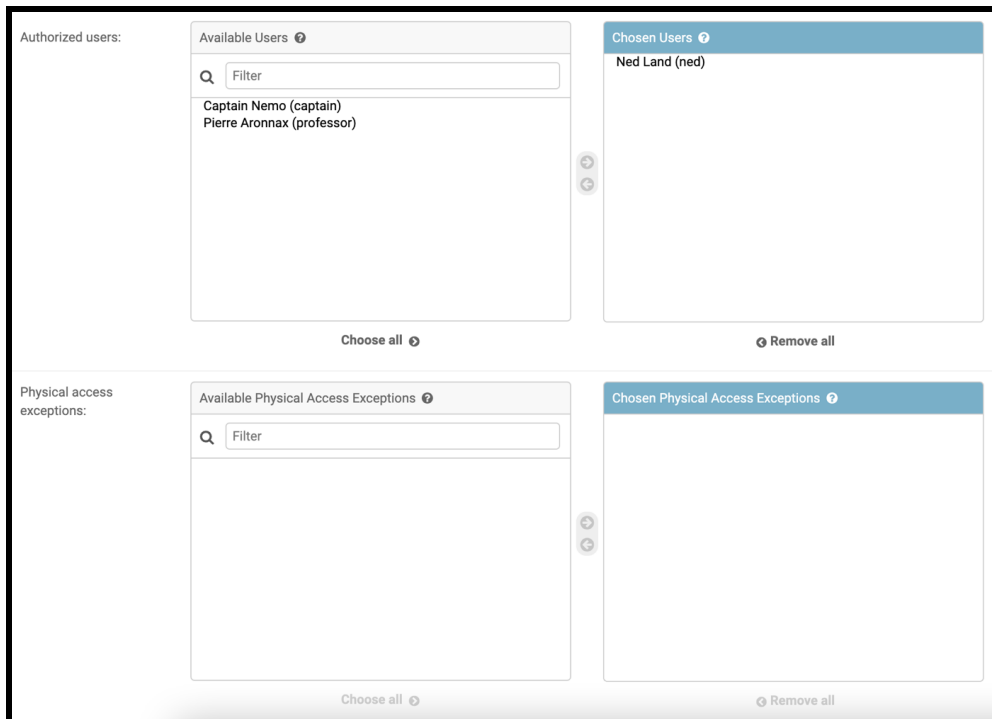

Figure 42.78: *Physical access levels add/edit page 2*

- Authorized users – select available users and use the right arrow to add to the chosen users list. Multiple users can be selected using the control or shift keys.
- Physical access exceptions – select available exceptions and use the right arrow to add to the chosen list. Multiple exceptions can be selected using the control or shift keys. More details about exceptions can be found in Detailed administration - Physical access exceptions, see section 42.33.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.33.4 User access page

There is no user page available to create physical access levels. Once created, permissions to access physical levels are given to users on the users page, see chapter [38](#).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.34 Physical access logs

42.34.1 Usage

The physical access logs automatically record each time a door is accessed by a user at an entrance tablet and the access result. Doors are discussed in more detail in the entrance tablet chapter [47](#).

42.34.2 Summary Page

The summary page provides a listing of physical access logs (Figure [42.79](#)). Click the user field in the row of interest to edit.

Figure 42.82: Projects add/edit page

Chapter 42 Detailed administration – NEMO (admin or authorized users)

The screenshot displays the 'Members' and 'Principal investigators' sections of the NEMO administration interface. Each section contains an 'Available' list and a 'Chosen' list, with 'Choose all' and 'Remove all' buttons below them. The 'Members' section shows 'Available Users' with a search filter and one user, 'Tech Cleanroom (tech)'. The 'Chosen Users' list includes 'Assistant Conseil (conseil)', 'Captain Nemo (captain)', 'Commander Farragut (commander)', 'Ned Land (ned)', and 'Pierre Aronnax (professor)'. The 'Principal investigators' section shows 'Available Principal investigators' with a search filter and five users: 'Assistant Conseil (conseil)', 'Captain Nemo (captain)', 'Commander Farragut (commander)', 'Ned Land (ned)', and 'Pierre Aronnax (professor)'. The 'Chosen Principal investigators' list is currently empty. Below these sections is a 'PROJECT DOCUMENTS' section with a table header: 'DOCUMENT', 'URL', 'NAME', and 'DELETE?'. The table contains one row with a 'Choose File' button, the text 'No file chosen', and empty input fields for 'URL' and 'NAME'. A 'DELETE?' column with a trash icon is also present. A link '+ Add another Project documents' is located at the bottom left of the table.

Figure 42.83: *Projects add/edit page (continued)*

- Name – descriptive name of project (required).
- Application identifier – the application identifier is not used by NEMO but is a convenient way to associate the project with external project tracking systems. (required).
- Start date – the start date for this project.
- Account – select from drop down list. All charges for this project will be billed to the selected account. (required).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Discipline – the discipline for this project.
- Active – users may only charge to a project if it is active. Deactivate the project to block billable activity (such as tool usage and consumable check-outs).
- Only allow tools – select available tools to limit billing options for this project. Users belonging to this project will only be able to reserve and enable those specific tools, and areas that this tool requires access to. Staff charges will only be available for those tools and areas they require. Training will also be limited to the tools as well.
- Allow consumable withdrawals – unselect to prevent consumable/supplies withdrawals for this project. Default is enabled.
- Allow staff charges – unselect to prevent staff charges for this project. Default is enabled.
- Members – select available users and use the right arrow to add to the chosen users list. Multiple users can be selected using the control or shift keys.
- Principal Investigators – select available users and use the right arrow to add to the chosen users list. Multiple users can be selected using the control or shift keys.
- Project documents – the list of documents for this project. Documents can be links or files to be uploaded in NEMO. Optionally, a name can also be entered. If a name is not provided, it will default to the file name.

42.35.4 User access page

Projects are administered in the Accounts and projects chapter [22](#).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

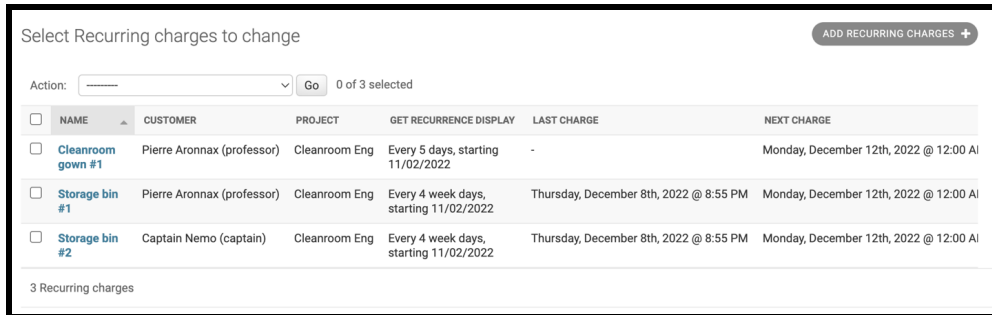

42.36 Recurring charges

42.36.1 Usage

Recurring charges are used to charge customers for consumables at regular intervals. For example, a yearly or monthly fee for renting storage bins or cleanroom gowns.

42.36.2 Summary Page

The summary page provides a listing of recurring charges (Figure 42.84). Click the name field in the row of interest to edit.

3 Recurring charges

Figure 42.84: Recurring charges summary page

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.36.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.85).

Change Recurring charges HISTORY

Storage bin #1

Name: 📄
The name/identifier for this recurring charge.

Customer: ✎ +
The user who will be charged.

Consumable: ✎ +

Quantity:
The number of consumables to charge.

Project: ✎ +
The project to bill.

Start: Today | 📅
Start date of the recurring charge.

Frequency: ▼
The charge frequency.

Interval:
Recurring interval, i.e. every 5 days.

Until: Today | 📅
End date of the recurring charge.

Count:
The number of recurrences to charge for.

Last charge: Thursday, December 8th, 2022 @ 8:55 PM
The date and time when the user was last charged.

Last updated: Tuesday, November 1st, 2022 @ 4:10 PM
The time this charge was last modified.

Last updated by: Captain Nemo (captain)
The user who last modified this charge (and will be used as merchant on the charge).

Figure 42.85: *Recurring charges add/edit page*

- Name – descriptive name of the recurring charge (required).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Customer – select from drop down list. The user to charge.
- Consumable – select from drop down list. The consumable to charge (required).
- Quantity – the quantity of consumable to start (required).
- Project – select from drop down list. The project to charge.
- Start – the date to start charging. This is used as the starting point for the frequency.
- Frequency – select from drop down list. The frequency at which to charge.
- Interval – the interval of the frequency. For example, every 2 days.
- Until – the date to stop charging. If left blank the consumable will be charged at the frequency indefinitely.
- Count – the number of times to charge before stopping. For example, charge every 2 days 5 times. If left blank the consumable will be charged at the frequency indefinitely.
- Last charge – read-only field showing the last time this item was charged.
- Last updated – read-only field showing when this item was updated last.
- Last updated by – read-only field showing the user who last updated this item.

42.36.4 User access page

Recurring charges are made and managed on the **recurring charges** page, see section [42.36](#).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.37 Reservation Questions

42.37.1 Usage

The reservation questions table provides a way to ask users questions when they are making a reservation.

42.37.2 Summary Page

The summary page provides a listing of reservation questions (Figure 42.86). Click the id field in the row of interest to edit.

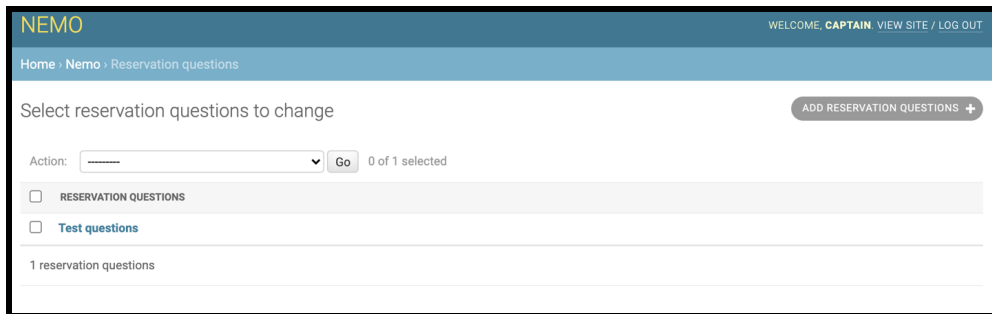

Figure 42.86: *Reservation questions summary page*

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.37.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.87 and Figure 42.88).

The screenshot shows the NEMO interface for editing reservation questions. At the top, there's a navigation bar with 'NEMO' and 'WELCOME, CAPTAIN VIEW SITE / LOG OUT'. Below that, a breadcrumb trail reads 'Home > Nemo > Reservation questions > Test questions'. A green success message states: 'The reservation questions "Test questions" was changed successfully. You may edit it again below.' The main heading is 'Change reservation questions' with a 'HISTORY' button. The 'Name' field contains 'Test questions'. The 'Questions' field contains a JSON array:

```
[
  {
    "type": "textbox",
    "name": "project_id",
    "title": "Project ID",
    "max-width": "350"
  },
  {
    "type": "textbox",
    "name": "experiment_title",
    "title": "Title of Experiment"
  }
]
```

 Below the JSON field is a note: 'Upon making a reservation, the user will be asked these questions. This field will only accept JSON format'. The 'Questions Preview' section shows two text boxes: 'Project ID' and 'Title of Experiment*'. A red error message 'The form is invalid' is displayed below the preview. At the bottom, there is a link: 'Save form to preview reservation questions'.

Figure 42.87: *Reservation questions add/edit page part 1*

- Name – descriptive name of reservation questions (required).
- Questions – json formatted list of questions to ask users for input when making reservations. The specific format of those questions is the same as discussed in Tool pre/post usage questions.
- Questions preview – displays the preview of what the questions would look like.

Change reservation

HISTORY

User: Ned Land (ned) [edit] [add]

Creator: Ned Land (ned) [edit] [add]

Creation time: Date: 09/21/2020 Today [calendar] Time: 02:26 PM Now [clock]

Tool: ----- [edit] [add]

Area: Cleanroom [edit] [add]

Project: Project 2 [edit] [add]
Indicates the intended project for this reservation. A missed reservation would be billed to this project.

Start: Date: 09/22/2020 Today [calendar] Time: 06:00 PM Now [clock]

End: Date: 09/22/2020 Today [calendar] Time: 08:00 PM Now [clock]

Figure 42.90: Reservations add/edit page part 1

- User – select from drop down name of user the reservation is for (required) Users table.
- Creator – select from drop down name of user that created the reservation. (required) Users table.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Creation time – date/time the reservation was created. (required).
- Tool – select from drop down name of tool reserved. (either a tool or an area must be selected) Tools table.
- Area – select from drop down name of area reserved. (either a tool or an area must be selected) Area table.
- Project – select from drop down name of project to bill reservation to. A missed reservation would be billed to this project.
- Start – date/time the reservation starts. (required).
- End – date/time the reservation ends. (required).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Short notice
Indicates that the reservation was made after the configuration deadline for a tool. Staff may not have enough time to properly configure the tool before the user is scheduled to use it.

Cancelled
Indicates that the reservation has been cancelled, moved, or resized.

Cancellation time: Date: Today | 📅
 Time: Now | 🕒

Cancelled by: ----- ✎ + ✖

Missed
Indicates that the tool was not enabled by anyone before the tool's "missed reservation threshold" passed.

Shortened
Indicates that the user finished using the tool and relinquished the remaining time on their reservation. The reservation will no longer be visible on the calendar and a descendant reservation will be created in place of the existing one.

Descendant: ----- ✎ + ✖
Any time a reservation is moved or resized, the old reservation is cancelled and a new reservation with updated information takes its place. This field links the old reservation to the new one, so the history of reservation moves & changes can be easily tracked.

Additional information:

Self configuration
When checked, indicates that the user will perform their own tool configuration (instead of requesting that the staff configure it for them).

Title:
Shows a custom title for this reservation on the calendar. Leave this field blank to display the reservation's user name as the title (which is the default behaviour).

Figure 42.91: Reservations add/edit page part 2

- Short notice – indicates that the reservation was made after the configuration deadline for a tool. Staff may not have enough time to properly configure the tool before the user is scheduled to use it.
- Cancelled – indicates that the reservation has been cancelled, moved, or resized.
- Cancellation time – date/time the reservation was changed.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Cancelled by – select from drop down name of user that changed the reservation Users table.
- Missed – indicates that the tool was not enabled by anyone before the tool’s “missed reservation threshold” passed. Missed reservations require a threshold set in the tool table and a timed job to check for missed reservations periodically. Missed reservations are discussed in the reservations section [42.38](#).
- Shortened – indicates that the user finished using the tool and relinquished the remaining time on their reservation. The reservation will no longer be visible on the calendar and a descendant reservation will be created in place of the existing one.
- Descendant – any time a reservation is moved or resized, the old reservation is cancelled and a new reservation with updated information takes its place. This field links the old reservation to the new one, so the history of reservation moves & changes can be easily tracked.
- Additional information – text that can be provided by a user when making a reservation on a configurable tool.
- Self-configuration – when checked, indicates that the user will perform their own tool configuration (instead of requesting that the staff configure it for them).
- Title – Shows a custom title for this reservation on the calendar. Leave this field blank to display the reservation’s username as the title (which is the default behavior).

42.38.4 User access page

Reservations are made and maintained on the **calendar** page, see chapter [5](#).

42.39 Resource categories

42.39.1 Usage

Resource categories are optional but can be useful for grouping similar resources to make visualization easier. Resource categories, if used, must be created in this table view and can be any text name. Any number can be defined. If no resource categories are defined, they are not displayed on the resources page. Resource categories are discussed in the Resources chapter [34](#).

42.39.2 Summary Page

The summary page provides a listing of resource categories (Figure [42.92](#)). Click the name field in the row of interest to edit.

Resource categories must be setup in this table view but are discussed in the Resources chapter 34.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

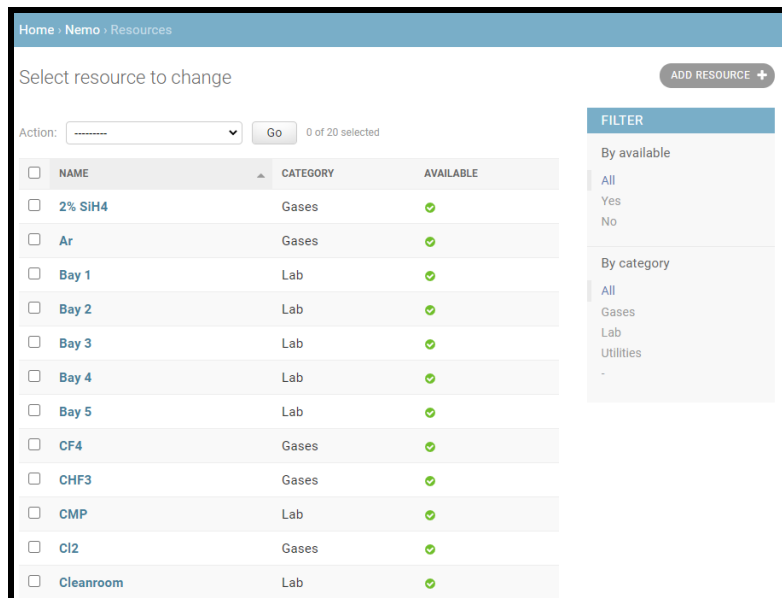

42.40 Resources

42.40.1 Usage

Resources provide a method to define tool dependencies such as gases, facility spaces, and utilities that can be associated with tools are either required or non-required resources. When a resource is unavailable, users are blocked from using tools or areas that require the resource and notified on tools that with a non-required association. Resources are discussed in the Resources chapter 34.

42.40.2 Summary Page

The summary page provides a listing of resources (Figure 42.94). Click the name field in the row of interest to edit.

42.41 Safety categories

42.41.1 Usage

Safety categories are used to organize Safety items. Safety items are discussed in the Safety items chapter [10](#).

42.41.2 Summary Page

The summary page provides a listing of safety categories (Figure [42.97](#)). Click the name field in the row of interest to edit.

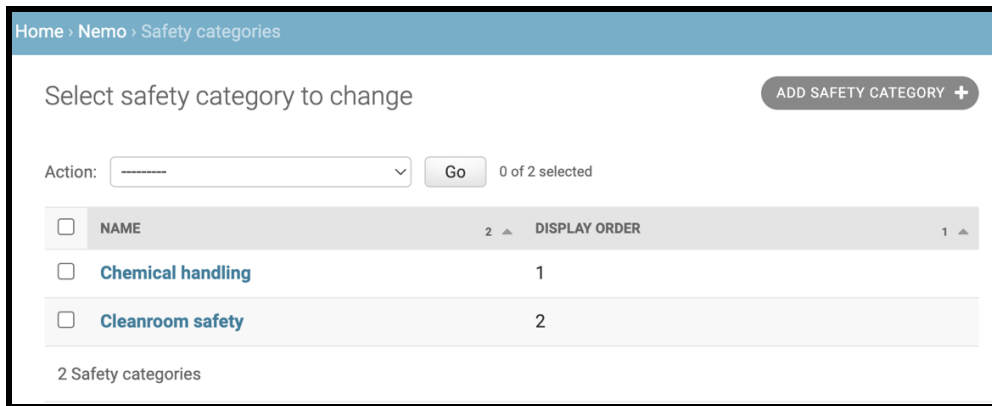

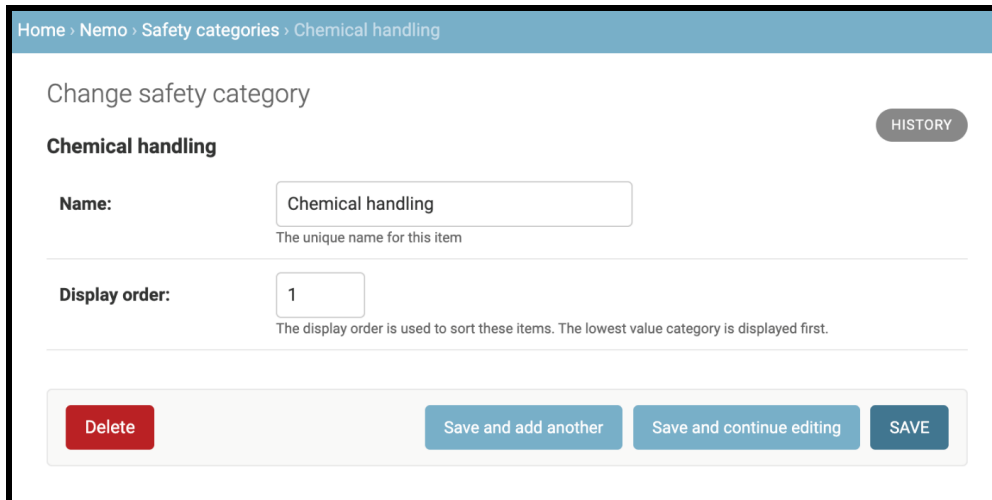

Figure 42.97: *Safety categories summary page*

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.41.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.98).

The screenshot shows a web interface for editing a safety category. The breadcrumb trail at the top reads 'Home > Nemo > Safety categories > Chemical handling'. The main heading is 'Change safety category'. Below this, the category name 'Chemical handling' is displayed, with a 'HISTORY' button to its right. The 'Name' field contains 'Chemical handling' and has a tooltip that says 'The unique name for this item'. The 'Display order' field contains '1' and has a tooltip that says 'The display order is used to sort these items. The lowest value category is displayed first.' At the bottom, there are four buttons: 'Delete' (red), 'Save and add another' (blue), 'Save and continue editing' (blue), and 'SAVE' (blue).

Figure 42.98: *Safety categories add/edit page*

- Name – the name of the safety category. (required).
- Display order – the order in which to display the category. The lowest value is displayed first.

42.41.4 User access page

Safety categories are discussed in Safety items chapter 10.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

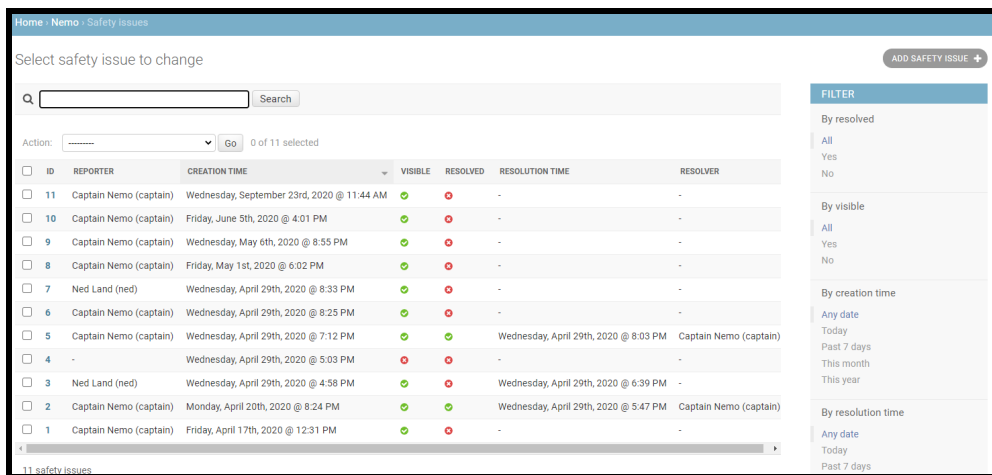

42.42 Safety issues

42.42.1 Usage

The safety issues table maintains a list and status of all safety issues reported through the safety page. Normally this table will not need to be edited directly.

42.42.2 Summary Page

The summary page provides a listing of safety issues (Figure 42.99). Click the ID field in the row of interest to edit.

The screenshot shows the 'Safety Issues' summary page in the NEMO application. At the top, there is a breadcrumb trail: 'Home > Nemo > Safety Issues'. Below this is a search bar with the text 'Select safety issue to change' and a search button. To the right of the search bar is a button labeled 'ADD SAFETY ISSUE +'. Below the search bar is an 'Action:' dropdown menu and a 'Go' button, with the text '0 of 11 selected' next to it. The main content is a table with the following columns: ID, REPORTER, CREATION TIME, VISIBLE, RESOLVED, RESOLUTION TIME, and RESOLVER. The table contains 11 rows of data. To the right of the table is a 'FILTER' sidebar with three sections: 'By resolved', 'By visible', and 'By creation time'. Each section has radio buttons for 'All', 'Yes', and 'No'. The 'By creation time' section has radio buttons for 'Any date', 'Today', 'Past 7 days', 'This month', and 'This year'. The 'By resolution time' section has radio buttons for 'Any date', 'Today', and 'Past 7 days'. At the bottom left of the table, there is a small text label '11 safety issues'.

42.44.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.104).

The screenshot shows a web form titled "Change safety training" for a category named "Cleanroom training". In the top right corner, there is a "HISTORY" button. The form contains two main input fields: "Name:" with a text box containing "Cleanroom training" and a tooltip that reads "The name of the training"; and "Display order:" with a text box containing "1" and a tooltip that reads "Safety trainings are sorted according to display order. The lowest value category is displayed first in the 'Users' page." At the bottom of the form, there are four buttons: a red "Delete" button, and three blue buttons labeled "Save and add another", "Save and continue editing", and "SAVE".

Figure 42.104: Safety trainings add/edit page

- Name – the name of the safety training. (required)
- Display order – the order to display this safety training in. (required)

42.44.4 User access page

There is no user access page available for onboarding phases. However, they are displayed as a checklist when creating/editing Users, see chapter 38.

42.45 Scheduled outage categories

42.45.1 Usage

Scheduled outage categories are optional but can be useful for binning outages aiding in future analysis and trending. Scheduled outage categories, if used, must be created in this table view and can be any text name. Any number can be defined. If no scheduled outage categories are defined, they are not displayed on the scheduled outages page. Scheduled outage categories are discussed in the scheduled outages table, see subsection [5.4.13](#).

42.45.2 Summary Page

The summary page provides a listing of scheduled outage categories (Figure [42.105](#)). Click the name field in the row of interest to edit.

There is no user access page for scheduled outage categories however, scheduled outage categories usage are discussed in the scheduled outages table section.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.46 Scheduled outages

42.46.1 Usage

Scheduled outages table records outages for tools, areas, and resources. A scheduled outage is a planned shutdown that triggers automatically at the designated time and will clear automatically at the designated end time. Scheduled outages are useful for planned activities such as gas bottle changes or tool maintenance that happens in a predictable way. Scheduled outages are created and maintained on the calendar and the resource pages.

42.46.2 Summary Page

The summary page provides a listing of scheduled outages (Figure 42.107). Click the id field in the row of interest to edit.

42.46.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.108).

Change scheduled outage HISTORY

Start: Date: 06/21/2022 Today Time: 04:10 PM Now

End: Date: 06/23/2022 Today Time: 04:10 PM Now

Creator: Captain Nemo (captain)

Title:
A brief description to quickly inform users about the outage

Details:
A detailed description of why there is a scheduled outage, and what users can expect during the outage

Category:
A categorical reason for why this outage is scheduled. Useful for trend analytics.

Tool: Sinter

Area:

Resource:

Reminder days:
The number of days to send a reminder before a scheduled outage. A comma-separated list can be used for multiple reminders.

Reminder emails:
The reminder email(s) will be sent to this address. A comma-separated list can be used.

Figure 42.108: Scheduled outages add/edit page

- Start – date/time scheduled outage will start. (required).
- End – date/time scheduled outage will end. (required).
- Creator – drop down list select user that created the scheduled outage. (required) Users table.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Title – a brief description to quickly inform users about the outage. (required).
- Details – a detailed description of why there is a scheduled outage, and what users can expect during the outage.
- Category – grouping similar outages for future analysis. Scheduled outage categories table.
- Tool – drop down list select tool. (required to have one tool, area, or resource selected) Tools table.
- Area – drop down list select tool. (required to have one tool, area, or resource selected) Areas table.
- Resource – drop down list select tool. (required to have one tool, area, or resource selected) Resources table.
- Reminder days – comma separated list of days prior to the start of the outage to send reminders.
- Reminder emails – comma separated list of email addresses to sent the reminders to.

42.46.4 User access page

Scheduled outages are created and maintained on the calendar and the resource pages.

42.47 Staff absence types

42.47.1 Usage

Staff absence types are used to represent the different types of absences for staff members. Examples would be Annual leave, Sick leave etc. Absence types are used to create absences in Detailed administration → Staff absences section [42.48](#) and in the Staff status section [7.4](#).

42.47.2 Summary Page

The summary page provides a listing of staff absence types (Figure [42.109](#)). Click the name field in the row of interest to edit.

- Staff member – the staff member to appear in the staff status list.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Visible – uncheck this box to hide the availability of this staff from the staff status page.
- Category – the staff category that will be displayed on the staff status.
- Start time – the typical daily start time of the staff member (optional).
- End time – the typical daily end time of the staff member (optional).
- Monday – whether the staff member typically works on Mondays.
- Tuesday – whether the staff member typically works on Tuesdays.
- Wednesday – whether the staff member typically works on Wednesdays.
- Thursday – whether the staff member typically works on Thursdays.
- Friday – whether the staff member typically works on Fridays.
- Saturday – whether the staff member typically works on Saturdays.
- Sunday – whether the staff member typically works on Sundays.

42.49.4 User access page

There is no user access page to create staff availabilities. However, staff availabilities are used on the staff member dropdown of the Create a new absence page.

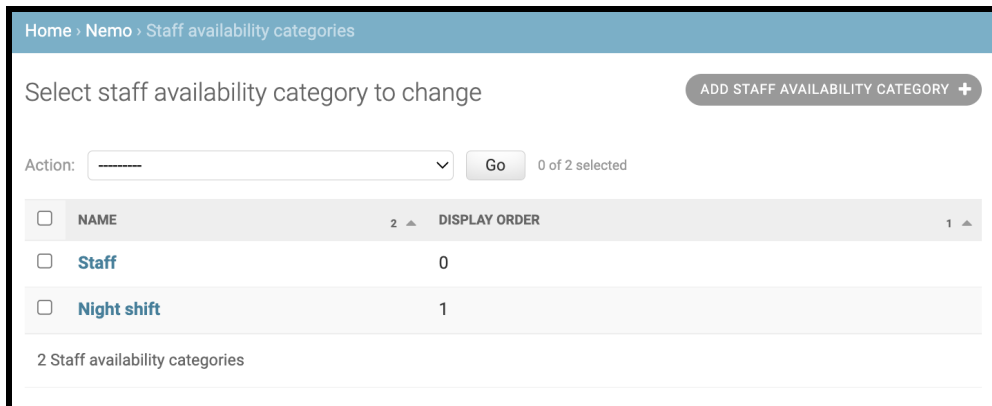

42.50 Staff availability categories

42.50.1 Usage

Staff availability categories are optional but can be useful for grouping types of staff on the Staff Status page, see section 7.4. Staff availability categories, if used, must be created in this table view and can be any text name. Any number can be defined. If no categories are defined, all staff will be listed in alphabetical order.

42.50.2 Summary Page

The summary page provides a listing of staff availability categories (Figure 42.115). Click the name field in the row of interest to edit.

42.51.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.118).

The screenshot shows a web interface for editing a staff charge. At the top, there is a breadcrumb trail: Home > Nemo > Staff charges > 1. Below this is the title 'Change staff charge'. The form consists of several sections:

- Staff member:** A dropdown menu with 'Captain Nemo (captain)' selected, accompanied by a pencil icon and a plus sign.
- Customer:** A dropdown menu with 'Ned Land (ned)' selected, accompanied by a pencil icon and a plus sign.
- Project:** A dropdown menu with 'Cleanroom Training' selected, accompanied by a pencil icon and a plus sign.
- Start:** Two input fields: 'Date: 01/28/2022' with a calendar icon and 'Today' text, and 'Time: 03:26 PM' with 'Now' text and a clock icon.
- End:** Two input fields: 'Date: 01/28/2022' with a calendar icon and 'Today' text, and 'Time: 04:08 PM' with 'Now' text and a clock icon.
- Note:** A large, empty text area for entering a note.
- Validated:** A checkbox labeled 'Validated' at the bottom left.

Figure 42.118: Staff charges add/edit page

- Staff member – drop down list select staff user that will perform the work. (required) Users table.
- Customer – drop down list select user that work will be billed to. (required) Users table.
- Project – drop down list select project to charge against. (required) Projects table.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Start – date/time scheduled outage will start. (required).
- End – date/time scheduled outage will end.
- Note – text description of the charge.
- Validated – checkbox to indicate if a staff member has confirmed the charge is valid and correct.

42.51.4 User access page

Staff charges are created and managed on the staff charges page, see section [33.1](#).

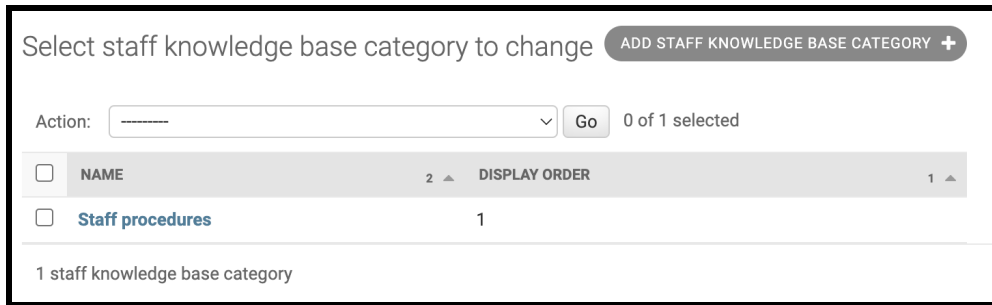

42.52 Staff knowledge base categories

42.52.1 Usage

Staff knowledge base categories are used to organize knowledge base items. Knowledge base items are discussed in the Knowledge base chapter 13.

42.52.2 Summary Page

The summary page provides a listing of staff knowledge base categories (Figure 42.119). Click the name field in the row of interest to edit.

There is no user access page to create task statuses however, task statuses are discussed in the Report a problem tab of the Tool control page, see section 6.8.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

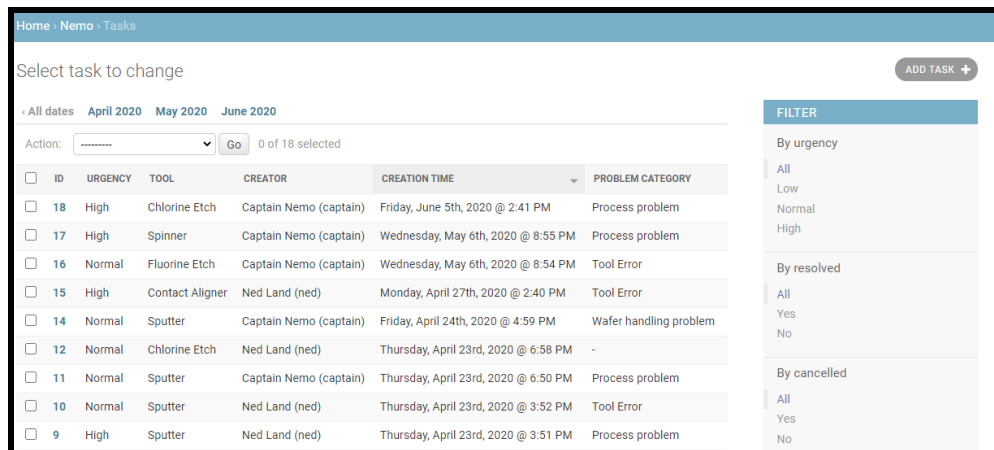

42.56 Tasks

42.56.1 Usage

Tasks are used to track problems with tools statuses are optional but can be used to update various staff as a problem progresses to resolution. For example, once the maintenance team has finished a repair, they can change the status to qualification which notifies the process engineer that the tool is ready to requalify. Task statuses, if used, must be created in this table view and number can be defined. If no task statuses are defined, they are not displayed on the tasks page. Task statuses are discussed in the Report a problem tab of the Tool control page, see section 6.8.

42.56.2 Summary Page

The summary page provides a listing of tasks (Figure 42.127). Click the id field in the row of interest to edit.

The screenshot shows the 'Tasks' summary page in the NEMO system. The page title is 'Home · Nemo · Tasks'. Below the title, there is a search bar and a date filter set to 'April 2020'. The main content is a table of tasks with the following columns: ID, Urgency, Tool, Creator, Creation Time, and Problem Category. The table contains 9 rows of task data. On the right side, there is a 'FILTER' sidebar with three sections: 'By urgency' (All, Low, Normal, High), 'By resolved' (All, Yes, No), and 'By cancelled' (All, Yes, No). An 'ADD TASK +' button is located in the top right corner.

ID	URGENCY	TOOL	CREATOR	CREATION TIME	PROBLEM CATEGORY
18	High	Chlorine Etch	Captain Nemo (captain)	Friday, June 5th, 2020 @ 2:41 PM	Process problem
17	High	Spinner	Captain Nemo (captain)	Wednesday, May 6th, 2020 @ 8:55 PM	Process problem
16	Normal	Fluorine Etch	Captain Nemo (captain)	Wednesday, May 6th, 2020 @ 8:54 PM	Tool Error
15	High	Contact Aligner	Ned Land (ned)	Monday, April 27th, 2020 @ 2:40 PM	Tool Error
14	Normal	Sputter	Captain Nemo (captain)	Friday, April 24th, 2020 @ 4:59 PM	Wafer handling problem
12	Normal	Chlorine Etch	Ned Land (ned)	Thursday, April 23rd, 2020 @ 6:58 PM	-
11	Normal	Sputter	Captain Nemo (captain)	Thursday, April 23rd, 2020 @ 6:50 PM	Process problem
10	Normal	Sputter	Ned Land (ned)	Thursday, April 23rd, 2020 @ 3:52 PM	Tool Error
9	High	Sputter	Ned Land (ned)	Thursday, April 23rd, 2020 @ 3:51 PM	Process problem

42.56.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.128, Figure 42.129).

Home > Nemo > Tasks > 18

Change task HISTORY

Urgency: High

Tool: Chlorine Etch
The tool that this task relates to.

Force shutdown
Indicates that the tool this task relates to will be shutdown until the task is resolved.

Safety hazard
Indicates that this task represents a safety hazard.

Creator: Captain Nemo (captain)
The user who created the task.

Creation time:
Date: 06/05/2020 Today | 📅
Time: 02:41 PM Now | 🕒
The date and time when the task was created.

Problem category: Process problem

Problem description: The etch rate is nearly zero. Tried a conditioning run and the etch rate did not improve. No errors were noted during the runs.

Progress description: On Friday, June 5th, 2020 @ 5:44 PM Captain Nemo (captain) updated this task:
Chamber clean completed. Found etch buildup in chamber that was likely suppressing the etch rate. Ready for testing.

- Resolution category – drop down list select category if used. Task categories table.

42.56.4 User access page

Tasks are created and maintained in the Report a problem tab of the Tool control page, see section [6.8](#).

42.57 Temporary physical access requests

42.57.1 Usage

Temporary physical access requests are used so users can submit a request to obtain a physical access temporarily. For example, a user could request temporary access to the Cleanroom on a weekend when they don't otherwise have access. Access requests are discussed in the access requests page, see section 8.2.

42.57.2 Summary Page

The summary page provides a listing of temporary physical access requests (Figure 42.130). Click the creator field in the row of interest to edit.

CREATOR	OTHER USERS	CREATION TIME	START TIME	END TIME	PHYSICAL ACCESS LOCATION
Ned Land (ned)	Pierre Anonax (professor)	Friday, January 28th, 2022 @ 3:42 PM	Saturday, January 29th, 2022 @ 3:42 PM	Sunday, January 30th, 2022 @ 3:43 PM	Cleanroom access

Figure 42.130: Temporary physical access requests summary page

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.57.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.131, Figure 42.132).

The screenshot shows a web interface for editing a temporary physical access request. The breadcrumb trail at the top reads: Home > Nemo > Temporary physical access requests > TemporaryPhysicalAccessRequest object (1). The main heading is 'Change temporary physical access request'. The form contains the following fields:

- Creator:** A dropdown menu with 'Ned Land (ned)' selected. To the right are edit (pencil) and add (+) icons.
- Last updated by:** A dropdown menu with 'Ned Land (ned)' selected. To the right are edit (pencil), add (+), and delete (x) icons. Below the dropdown is the text: 'The last user who modified this request.'
- Physical access level:** A dropdown menu with 'Cleanroom access' selected. To the right are edit (pencil) and add (+) icons.
- Description:** A large text area for entering the request details. Below the text area is the text: 'The description of the request.'
- Start time:** A section with two sub-fields: 'Date' (01/29/2022) with a calendar icon and 'Today' link, and 'Time' (03:42 PM) with a 'Now' link and a refresh icon. Below is the text: 'The requested time for the access to start.'
- End time:** A section with two sub-fields: 'Date' (01/30/2022) with a calendar icon and 'Today' link, and 'Time' (03:43 PM) with a 'Now' link and a refresh icon. Below is the text: 'The requested time for the access to end.'

Figure 42.131: *Temporary physical access requests add/edit page part 1*

- Creator – drop down list select user who created the request (required).
- Last updated by – drop down list select the user who last updated the record.
- Physical access level – drop down list select the physical access level that the user is requesting (required).
- Description – text description of the request.
- Start time – date/time the requested access should start (required).

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- End time – date/time the requested access should end (required).

The screenshot displays a web interface for managing access requests. It features two main panels: 'Available other users' and 'Chosen other users'. The 'Available other users' panel includes a search filter and lists 'Captain Nemo (captain)' and 'Ned Land (ned)'. The 'Chosen other users' panel lists 'Pierre Aronnax (professor)'. Below these panels are 'Choose all' and 'Remove all' buttons. A status dropdown is set to 'Pending', and a reviewer dropdown is empty. A 'Deleted' checkbox is present at the bottom left.

Figure 42.132: *Temporary physical access requests add/edit page part 2*

- Other users – select from available users and click the right arrow to add to chosen users. Multiple users can be selected at the same time using shift or control keys.
- Status – drop down list select the status of the request (required).
- Reviewer – drop down list select user who reviewed the request.
- Deleted – checkbox indicates that this request was deleted.

42.57.4 User access page

Access requests are created and maintained in the access requests page, see section [8.2](#).

42.58 Temporary physical access

42.58.1 Usage

Temporary physical access are used to temporarily give users access to an area.

42.58.2 Summary Page

The summary page provides a listing of temporary physical access (Figure 42.133). Click the id field in the row of interest to edit.

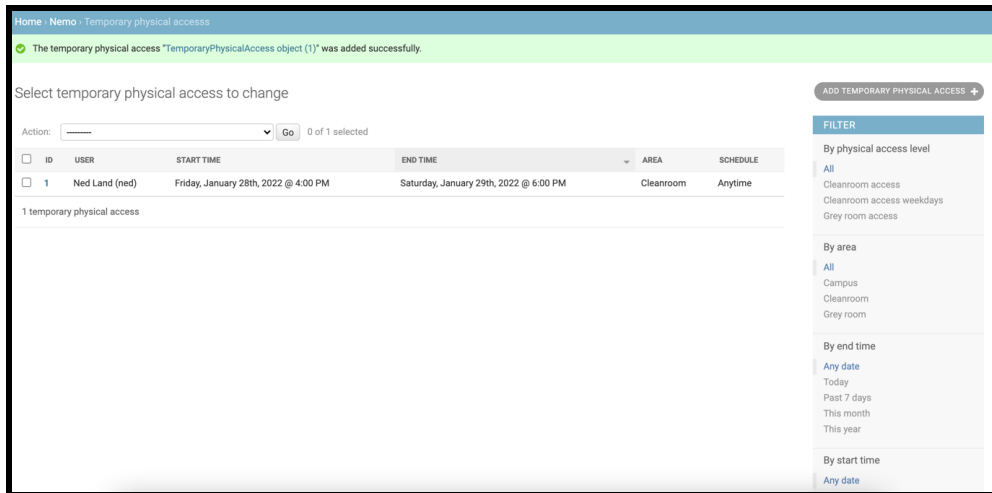

Figure 42.133: Temporary physical access summary page

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.58.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.134).

2 tool qualification groups

Figure 42.135: *Tool qualification group summary page*

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.59.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.136).

Figure 42.136: Tool qualification group add/edit page

- Name – the name for this group (required).
- Tools – list of tools to include in the group (required).

42.59.4 User access page

There is no user access page for Tool qualification groups. However, they are used in the Qualifications and Training feature.

42.60 Tool usage counters

Tool usage counters are linked to numeric or float pre/post usage questions and accumulate value with each tool logout based on the answer to the pre/post usage question. This feature is useful for displaying how much a tool has been used, to track material usage, or to trigger preventative maintenance. Tool usage counters are displayed on the tool control summary page.

42.60.1 Usage

The tool usage counters table lists each counter, the associated tool, the post usage question field, the current value, and last reset information. The tool usage counter must be created from this view.

- Tool usage counter setup
 - Prerequisites: the tool and a pre/post usage question for that tool must exist.
 - Create tools and pre/post usage questions for tools of interest in the Detailed administration → Tools table, see section [42.61](#).
 - * For example, if we used the following post usage question on the “790 RIE Right” tool (Figure [42.137](#)).
 - Add a tool usage counter in the Detailed administration → Tool usage counter table in this section and save.
 - * For example, if we create a tool usage counter based on the post usage question above:
 - **Name:** “Etch Time”
 - **Description:** “This is for the etch time in minutes. PMs are performed every 100 minutes of use.”
- NOTE: line breaks will be displayed on the tool summary

Chapter 42 Detailed administration – NEMO (admin or authorized users)

page so limited formatting can be used to keep the page readable.

- **Tool:** 790 RIE Right

NOTE: selected from dropdown box.

- **Tool usage question:** “etch_time”

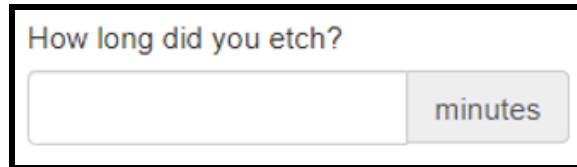

NOTE: “etch_time” is the name we gave the post usage question in the previous step. When saving, the post usage question name must be present, or an error will occur.

```
[
  {
    "type": "number",
    "title": "How long did you etch?",
    "max-width": 250,
    "suffix": "minutes",
    "required": true,
    "default_choice": null,
    "placeholder": 0,
    "name": "etch_time"
  }
]
```

Figure 42.137: Tool usage counter example post usage question

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- When we log out of the 790 RIE Right tool, the following post usage question is displayed on the tool summary page before logout (Figure 42.138). The tool control summary page is fully described in chapter 6.

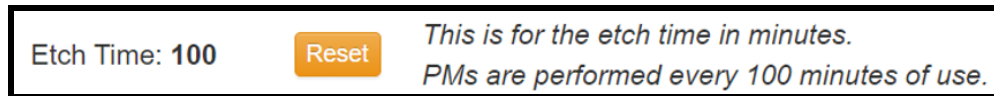

A screenshot of a web form with a black border. The text "How long did you etch?" is displayed in a grey font above a white input field. To the right of the input field is a grey button with the text "minutes" in a lighter grey font.

Figure 42.138: Tool usage counter post usage input

- The counter is updated and displayed (Figure 42.139) on the Tool control → Summary page.

If a warning threshold is set, the value will be green when it is less than the threshold, orange when it is equal to the threshold and red when the value is greater than the threshold.

* NOTE: the reset button is only visible to staff.

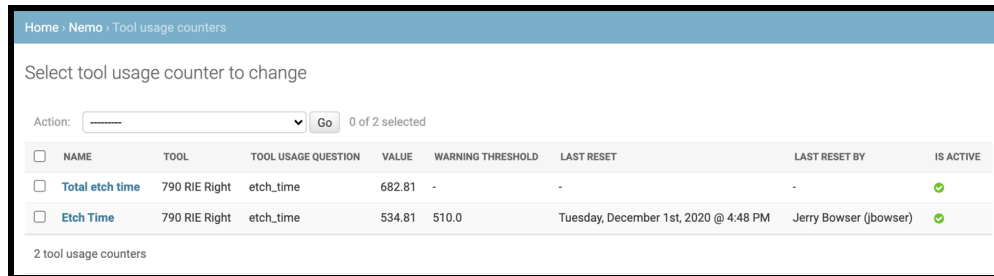

A screenshot of a web display with a black border. On the left, the text "Etch Time: 100" is shown. In the center is an orange button with the text "Reset" in white. On the right, there is explanatory text: "This is for the etch time in minutes. PMs are performed every 100 minutes of use."

42.60.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.141).

Change tool usage counter

Name:

The name of this counter

Description:

The counter description to be displayed next to it on the tool control page

Value:

The current value of this counter

Tool:

The tool this counter is for.

Tool usage question:

The name of the tool's post usage question which should be used to increment this counter

Last reset value:

The last value before the counter was reset

Last reset: **Date:** Today
Time: Now

The date and time this counter was last reset

Last reset by:

The user who last reset this counter

Warning threshold:

When set in combination with the email address, a warning email will be sent when the counter reaches this value.

Warning email:

The address to send the warning email to. A comma-separated list can be used.

Is active
The state of the counter

Warning threshold reached:

Figure 42.141: *Tool usage counters add/edit page*

- **Name** – the name of the counter. This name will be displayed on the tool summary page.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- **Description** – the counter description to be displayed next to the counter on the tool summary page.
- **Value** – the current value of the counter.
- **Tool** – the tool the counter is for. Tools table.
- **Tool usage question** – the name of the pre/post usage question used to increment the counter.
- **Last reset value** – the last value before the counter was last reset. When a counter is reset, a comment is also written for the associated tool that captures the last reset value, date, and who reset.
- **Last reset** – the date/time the counter was last reset.
- **Last reset by** – the user who last reset the counter.
- **Warning threshold** – the value which once reached will trigger an email to be sent to the warning email.
- **Warning email** – email address to send the tool usage counter threshold reached email to. For this feature to work, the `counter_threshold_reached_email` needs to be set in Customization → Counter threshold reached email, see subsection [40.5.10](#).
- **Is active** – checked indicates the counter is active and will be displayed on the tool summary page. Unchecked hides the counter.

42.61.3 Fields

The add/change page for this table lists the fields that can be edited.

The screenshot shows a web form titled "Change tool" for the tool "A104 EBL Spinner Left". The form includes the following fields and options:

- Name:** A text input field containing "A104 EBL Spinner Left".
- Parent Tool:** A dropdown menu with a plus icon and a pencil icon. Below it, the text reads "Select a parent tool to allow alternate usage".
- Category:** A text input field containing "Lithography/Spin-Develop". Below it, the text reads "Create sub-categories using slashes. For example 'Category 1/Sub-category 1'".
- Operation Mode:** A dropdown menu set to "Regular". Below it, the text reads "The operation mode of the tool, which determines if reservations and wait list are allowed".
- Qualified Users:** A section with two panels: "Available Users" and "Chosen Users".
 - Available Users:** Contains a search filter and a list of users: Albert Einstein (einstein), Assistant Conseil (conseil), Captain Nemo (captain), Commander Farragut (commander), Ned Land (ned), Pierre Aronnax (professor), and Rob Illic (br). Below the list is a "Choose all" button.
 - Chosen Users:** An empty panel with a "Remove all" button.
- Qualifications Never Expire:** A checkbox that is currently unchecked. Below it, the text reads "Check this box if qualifications for this tool should never expire (even if the tool qualification expiration feature is enabled)".

Figure 42.143: Tools general information

General Information (Figure 42.143):

- Name – text field of what the tool will be called throughout NEMO. (required).
- Parent tool – Select the parent tool from the dropdown list. If parent/child tools will be used, the child tools must identify which tool is the parent tool. If a parent tool is selected, the child tool will use all of the attributes of the parent tool except for the name. The parent/child tool relationship is useful when a single tool is used for multiple purposes that may be

Chapter 42 Detailed administration – NEMO (admin or authorized users)

billed at different rates. For example, a dual beam focused ion beam tool may have one rate to use in SEM mode and another rate when used in FIB mode. Tools table.

- **Category** – tools can be grouped together by location, type, or other grouping. These categories will be used to group tool in the calendar and tool control sidebars. Create sub-categories using slashes. For example, “Category 1/Sub-category 1”. (required).
- **Operation mode** – select this tool’s mode of operation: Regular, Waitlist or Hybrid (required). The different modes of operation are explained in the Tool control → Tool operation modes section [6.4.8.1](#)
- **Qualified users** – select from available users and click the right arrow to add to chosen users. Multiple users can be selected at the same time using shift or control keys. Qualified users are managed on the users page, training page, or qualifications page. Users table.
- **Qualifications Never Expire** – check this box to prevent qualifications for this tool from expiring.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

post usage questions:

```
[
  {
    "type": "number",
    "title": "How much gold was deposited?",
    "max-width": 250,
    "suffix": "nm",
    "required": true,
    "placeholder": "0",
    "name": "gold_used",
    "consumable": "Sputter gold"
  },
  {
    "type": "radio",
    "title": "Please rate your experience.",
    "choices": ["Great", "As expected", "Not terrible", "Disaster"],
    "name": "user_rating",
    "required": true,
    "default_choice": null
  },
  {
    "type": "textbox",
    "title": "Tell us about your run?",
    "name": "feedback",
    "max-width": 250,
    "required": true
  }
]
```

Upon logging off a tool, questions can be asked such as how much consumables were used by the user. This field will only accept JSON format

post usage preview:

How much gold was deposited?

nm

Please rate your experience.

Great

As expected

Not terrible

Disaster

Tell us about your run?

The form is valid!

Save form to preview post usage questions

Figure 42.144: Tools pre/post usage questions

Pre/Post usage questions (Figure 42.144):

- Pre/Post usage questions – json formatted list can ask users for input at the beginning or end of their processes as either optional or required input using a radio button list, checkbox list, dropdown list, text entry (textbox or textarea), or numeric input (number or float). Only number inputs can trigger consumable purchases. The json script is validated when

Chapter 42 Detailed administration – NEMO (admin or authorized users)

saving the tool record and error messages indicating format or missing required fields will be displayed. Responses to pre/post usage questions are entered on the summary tab of the tool control page and stored in the run data field of the usage events table as json formatted data. In addition, responses are displayed on the tool control page under usage data history. Pre/Post usage questions can be configured so responses are either required or optional. In addition, questions can be grouped and repeated a configurable number of times to capture multiple processes in a single tool usage.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Figure 42.152: *Tools post usage group example*

- Group, allows creation of a group of questions that can be repeated. For example, when a user uses multiple processes on a tool, and

Chapter 42 Detailed administration – NEMO (admin or authorized users)

we want to collect information about each one (Figure 42.152).

- * **“type”**: “group”.
- * **“title”**: title of the group (label), use “\n” to force line breaks.
- * **“name”**: name of the group for submit (unique).
- * **“max-number”**: maximum number of times the group of inputs can be repeated.
- * **“questions”**: list of questions, enclosed in brackets, to group together.
- * **“title_html”**: html code to display instead of title.
- * **“group_add_button_name”**: name of “Add” button to display.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Chapter 42 Detailed administration – NEMO (admin or authorized users)

```
[
  {
    "type":"group",
    "name":"group1",
    "title":"Add up to 3 processes:",
    "max_number":3,
    "group_add_button_name": "Add another process",
    "questions":[
      {
        "type":"number",
        "precision": 5,
        "title":"How much gold was deposited (nl)?",
        "max-width":250,
        "suffix":"nl",
        "required":true,
        "placeholder":"0",
        "name":"gold_used_nl"
      },
      {
        "type":"number",
        "precision": 5,
        "title":"How much gold was deposited (ul)?",
        "max-width":250,
        "suffix":"ul",
        "required":true,
        "placeholder":"0",
        "name":"gold_used_ul"
      }
    ]
  },
  {
    "type":"formula",
    "title": "Total gold used",
    "formula": "sum(gold_used_nl) + sum(gold_used_ul)*1000",
    "name":"total_gold_used_nl",
    "consumable": "Sputter gold"
  }
]
```

Figure 42.153: Tools post usage formula example

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Formula, allows to do basic math and data manipulation with the results of other questions. For example, one could ask the user for how much they used a consumable in different units and convert them, or use it on a group to sum the total use of a consumable for each of the processes the user ran. (Figure 42.153).

- * **“type”**: “formula”.
- * **“title”**: title of the formula (label), use “\n” to force line breaks.
- * **“name”**: name of the formula for submit (unique).
- * **“formula”**: actual formula to execute. The other question names are used to identify them. If using a question_name that is within a group and the formula is located within the same group, the question_name will refer to the value of the question within the same group item. If the formula is located outside of the group, the question_name variable will refer to the list of values the user entered for all group items. Other formula results can also be used within a formula.
- * **“consumable_id”**: id of the supply. This id must correspond to a valid entry in the consumables table, or an error will be triggered on saving. A consumable charge record will be created in the consumable withdraws table for the supply listed for the quantity entered. Consumables are detailed in the Detailed administration → Consumables table, see section 42.19.
- * **“consumable”** (deprecated): supply name. use consumable_id instead.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Pre/Post usage preview – after saving the tool record with pre/post usage question json information, the pre/post usage preview will display what users will see (Figure 42.154). This feature is useful for verifying the json input is correct and previewing the output. If there are errors in the json script, they will be indicated and suggestions to fix the issue will be given. The preview will show not valid if the required fields are not entered or in the specified range.

Additional Information (Figure 42.160):

- Description – html description that will be displayed near the bottom of the tool summary page.
- Serial – alphanumeric field that will display at the top right of the tool summary page.
- Image – 500 pixel × 500 pixel maximum image that will display on the tool summary page next to the description.
- Tool calendar color – color used to display the tool in the calendar.

The screenshot shows a form titled "Additional Information" with four sections:

- Description:** A large text area for entering HTML descriptions. Below the text area, it says "HTML syntax could be used".
- Serial:** A text input field for the serial number, with the label "Serial Number" below it.
- Image:** A file selection interface with a "Choose File" button and the text "No file chosen". Below it, a note states: "An image that represent the tool. Maximum width and height are 500px".
- Tool Calendar Color:** A color selection box currently showing a green color.

Figure 42.160: *Tools additional information*

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Current state (Figure 42.161):

- Visible – checkbox to indicate whether the tool is visible to users. If not checked, the tool will not be displayed on the calendar or tool control sidebars.
- Operational – checkbox to indicate whether the tool is available to users. The operational status is managed by the report a problem tab on the tool control page.

The screenshot shows a configuration panel titled "Current state". It contains two settings:

- Visible**
Specifies whether this tool is visible to users.
- operational**
Marking the tool non-operational will prevent users from using the tool.

Figure 42.161: *Tools current state*

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Contact Information (Figure 42.162):

- Primary owner – select from the drop down list the staff member who is responsible for the administration of the tool. The primary owner is listed on the details tab of the tool control page. (required).
- Backup owners - select from available users and click the right arrow to add to chosen users. Multiple users can be selected at the same time using shift or control keys. The backup owners are listed on the details tab of the tool control page.
- Superusers – select from available users and click the right arrow to add to chosen superusers. Multiple users can be selected at the same time using shift or control keys. The superusers are listed on the details tab of the tool control page and have the ability to train users on tools they are listed as superusers for.
- Notification email address – in addition to the primary and backup tool owners, comments, problems, and shutdown notices will be forwarded to this email address.
- Location – a text descriptor to identify the tools location. The location is displayed on the details tab of the tool control page. In addition, the kiosk uses the location to group nearby tools. Since this is a free form text input, make sure locations across tools are consistently listed. (required if set in Customization - Tool settings).
- Phone number – a text listing of the phone number. No phone number formatting is performed so extensions can be used as well as full phone numbers. The phone number is displayed on the details tab of the tool control page. (required if set in Customization - Tool settings).

Approval (Figure 42.163):

- Adjustment request reviewers – Select the list of users who can approve/deny adjustment requests for this tool. If left blank, all users with the facility manager role can review adjustment requests for this tool.

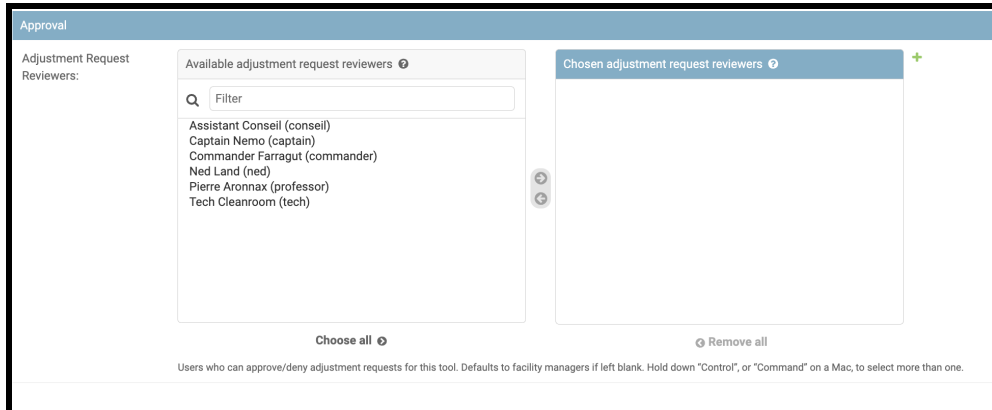

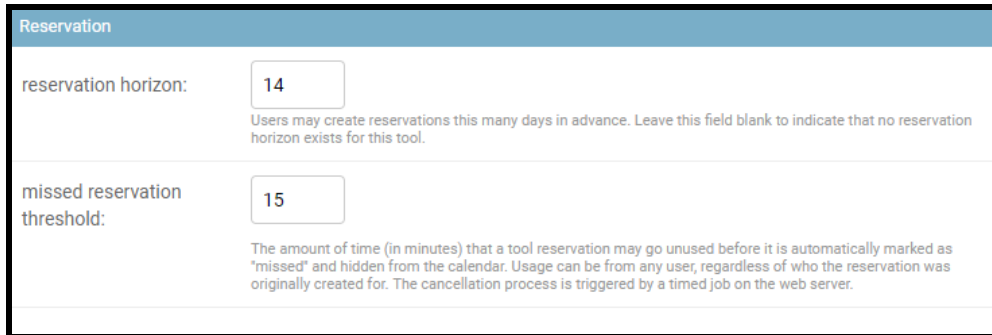

Figure 42.163: *Tools adjustment requests approval*

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Reservation (Figure 42.164):

- Reservation horizon – Users may create reservations this many days in advance. Leave this field blank to indicate that no reservation horizon exists for this area.
- Missed reservation threshold – The amount of time (in minutes) that an area reservation may go unused before it is automatically marked as “missed” and hidden from the calendar. The cancellation process is triggered by a timed job on the web server.

The screenshot shows a web interface titled "Reservation" with a blue header. It contains two configuration sections. The first section, "reservation horizon:", has a text input field containing the number "14". Below the field is a descriptive paragraph: "Users may create reservations this many days in advance. Leave this field blank to indicate that no reservation horizon exists for this tool." The second section, "missed reservation threshold:", has a text input field containing the number "15". Below this field is another descriptive paragraph: "The amount of time (in minutes) that a tool reservation may go unused before it is automatically marked as 'missed' and hidden from the calendar. Usage can be from any user, regardless of who the reservation was originally created for. The cancellation process is triggered by a timed job on the web server."

Figure 42.164: *Tools reservation*

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Usage policy (Figure 42.165)

- Policy off between times – Check this box to disable policy rules every day between the given times.
- Policy off start time – The start time when policy rules should NOT be enforced.
- Policy off end time – The end time when policy rules should NOT be enforced.
- Policy off weekend – Whether or not policy rules should be enforced on weekends.
- Minimum usage block time – The minimum amount of time (in minutes) that a user must reserve this tool for a single reservation. Leave this field blank to indicate that no minimum usage block time exists for this tool.
- Maximum usage block time – The maximum amount of time (in minutes) that a user may reserve this tool for a single reservation. Leave this field blank to indicate that no maximum usage block time exists for this tool.
- Maximum reservations per day – The maximum number of reservations a user may make per day for this tool.
- Minimum time between reservations – The minimum amount of time (in minutes) that the same user must have between any two reservations for this tool.
- Maximum future reservation time – The maximum amount of time (in minutes) that a user may reserve from the current time onwards.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Usage policy

policy off between times
Check this box to disable policy rules every day between the given times

policy off start time: Now | 🕒
The start time when policy rules should NOT be enforced

policy off end time: Now | 🕒
The end time when policy rules should NOT be enforced

policy off weekend
Whether or not policy rules should be enforced on weekends

minimum usage block time:
The minimum amount of time (in minutes) that a user must reserve this tool for a single reservation. Leave this field blank to indicate that no minimum usage block time exists for this tool.

maximum usage block time:
The maximum amount of time (in minutes) that a user may reserve this tool for a single reservation. Leave this field blank to indicate that no maximum usage block time exists for this tool.

maximum reservations per day:
The maximum number of reservations a user may make per day for this tool.

minimum time between reservations:
The minimum amount of time (in minutes) that the same user must have between any two reservations for this tool.

maximum future reservation time:
The maximum amount of time (in minutes) that a user may reserve from the current time onwards.

Area access (Figure 42.166)

- Requires area access – drop down list select area. Indicates that this tool is physically located in a billable area and requires an active area access record in order to be operated. Areas table.
- Grant physical access level upon qualification – drop down list select physical access level. The designated physical access level is granted to the user upon qualification for this tool. Physical access levels table.
- Grant badge reader access upon qualification – text that corresponds to a door name setup through the external identity service. Badge reader access is granted to the user upon qualification for this tool.
- Interlock – drop down list select interlock channel to associate with this tool. Interlocks table.
- Allow delayed logoff - Upon logging off users may enter a delay before another user may use the tool. Some tools require “spin-down” or cleaning time after use.
- Ask to leave area when done using - Check this box to ask the user if they also want to log out of an area when they disengage this tool.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Area Access

Requires Area Access:

Indicates that this tool is physically located in a billable area and requires an active area access record in order to be operated.

Grant Physical Access Level Upon Qualification:

The designated physical access level is granted to the user upon qualification for this tool.

Grant Badge Reader Access Upon Qualification:

Badge reader access is granted to the user upon qualification for this tool.

Interlock:

Allow Delayed Logoff
Upon logging off users may enter a delay before another user may use the tool. Some tools require "spin-down" or cleaning time after use.

Ask To Leave Area When Done Using
Check this box to ask the user if they want to log out of the area when they are done using the tool.

Figure 42.166: *Tools area access*

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Dependencies (Figure [42.167](#))

- Required resources – select from available resources and click the right arrow to add to chosen required resources. Multiple resources can be selected at the same time using shift or control keys. If a required resource is shutdown, this tool will not be available to users. Resource status is displayed on the tool control page. Resources are managed through the resources page. Resources table.
- Nonrequired resources – select from available resources and click the right arrow to add to chosen nonrequired resources. Multiple resources can be selected at the same time using shift or control keys. If a nonrequired resource is shutdown, this tool will be available to users but will notify them of a potential problem. Resource status is displayed on the tool control page. Resources are managed through the resources page. Resources table.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

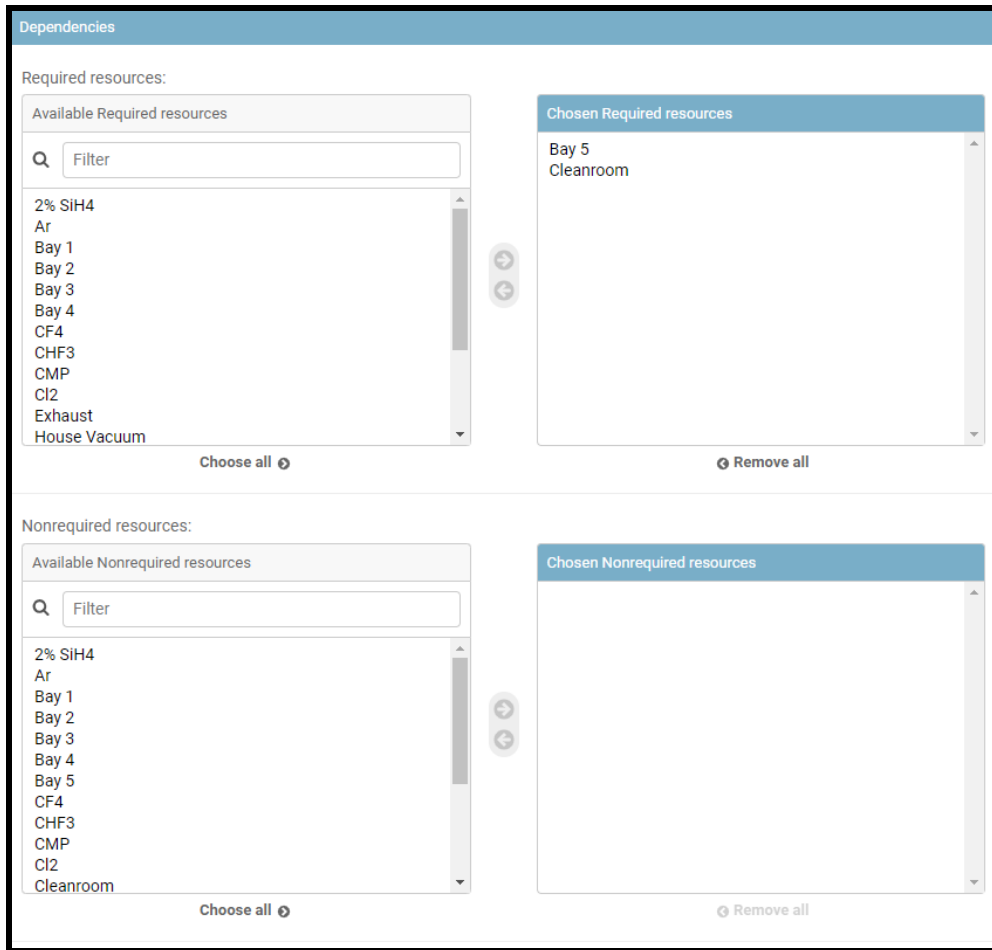

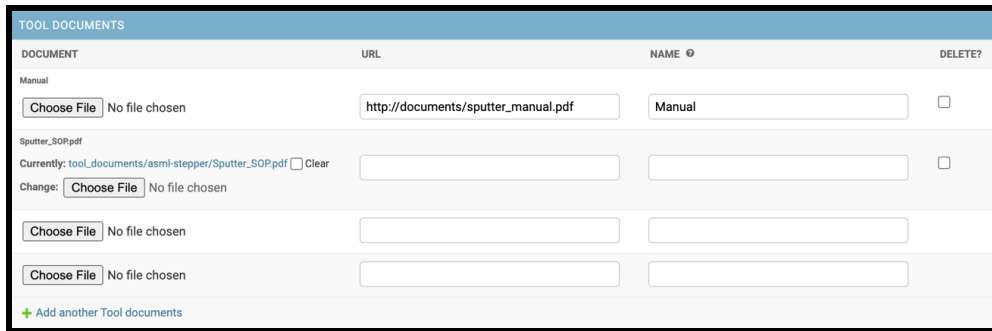

Figure 42.167: Tools dependencies

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Tool Documents (Figure 42.168)

- Tool documents can be uploaded and will be displayed on the tool control page near the bottom of the tool summary page.
- You can either click “Choose File” to upload a file or enter a URL to a file.
- Optionally a name can be set for the document. If not provided, the document filename will be used.
- To delete a file, either replace it or click the “DELETE?” checkbox for that file, then save.
- Tool documents are sorted in reverse order of date uploaded.

The screenshot shows a web interface titled "TOOL DOCUMENTS". It features a table with four columns: "DOCUMENT", "URL", "NAME", and "DELETE?".

DOCUMENT	URL	NAME	DELETE?
Manual Choose File No file chosen	http://documents/sputter_manual.pdf	Manual	<input type="checkbox"/>
Sputter_SOP.pdf Currently: tool_documents/asmi-stepper/Sputter_SOP.pdf <input type="checkbox"/> Clear Change: Choose File No file chosen			<input type="checkbox"/>
Choose File No file chosen			
Choose File No file chosen			

At the bottom of the table, there is a link: "+ Add another Tool documents".

Figure 42.168: Tools documents

42.61.4 User access page

There is no user access page to create tools. However, once created, several parameters can be updated in NEMO pages.

- Qualified users are managed on the users page, the training page, or the qualifications page.
- Most tool attributes are displayed on the tool control pages.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

- Reservation and usage policy are discussed in the reservations section.
- Dependency status is updated on the resources page.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

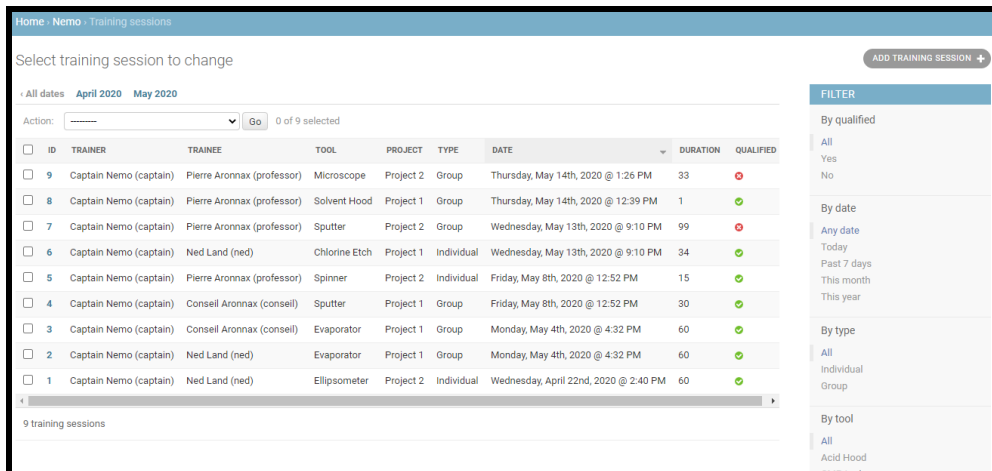

42.62 Training sessions

42.62.1 Usage

The training sessions table records the time and type of training provided. It is updated directly from the training page and under normal situations this table should not need to be directly modified. If a facility charges for training, this table contains the training to be billed and duration.

42.62.2 Summary Page

The summary page provides a listing of training sessions (Figure 42.169). Click the id field in the row of interest to edit.

42.63 Usage events

42.63.1 Usage

The usage events table records all tool usage based on log in and log out events on the tool control page. Under normal situations this table should not need to be directly modified. If a facility charges for tool usage, this table contains the usage events to be billed and duration.

42.63.2 Summary Page

The summary page provides a listing of usage events (Figure 42.171). Click the id field in the row of interest to edit.

The screenshot shows the 'Usage events' summary page in the NEMO system. The page header includes 'Home - NEMO - Usage events' and a navigation bar with 'ADD USAGE EVENT +'. Below the header, there is a section for selecting a usage event to change, with a dropdown menu for the year (2018, 2020) and a 'Go' button. The main content is a table of usage events with the following columns: ID, TOOL, USER, OPERATOR, PROJECT, START, and END. The table contains 10 rows of data, each with a checkbox in the ID column. A filter sidebar is located on the right side of the table, with sections for 'By start', 'By end', and 'By tool'. The 'By start' section includes options for 'Any date', 'Today', 'Past 7 days', 'This month', and 'This year'. The 'By end' section includes options for 'Any date', 'Today', 'Past 7 days', 'This month', 'This year', 'No date', and 'Has date'. The 'By tool' section includes options for 'All', 'Acid Hood', 'CMP tool', and 'Chlorine Etch'.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.65.4 User access page

User knowledge base items are discussed in the Knowledge base chapter [13](#).

42.66 User preferences

42.66.1 Usage

The user preferences table records the preferences for each user that are settable in NEMO. User preferences are automatically created and updated from the user preference page.

42.66.2 Summary Page

The summary page provides a listing of user preferences (Figure 42.177). Click the user field in the row of interest to edit.

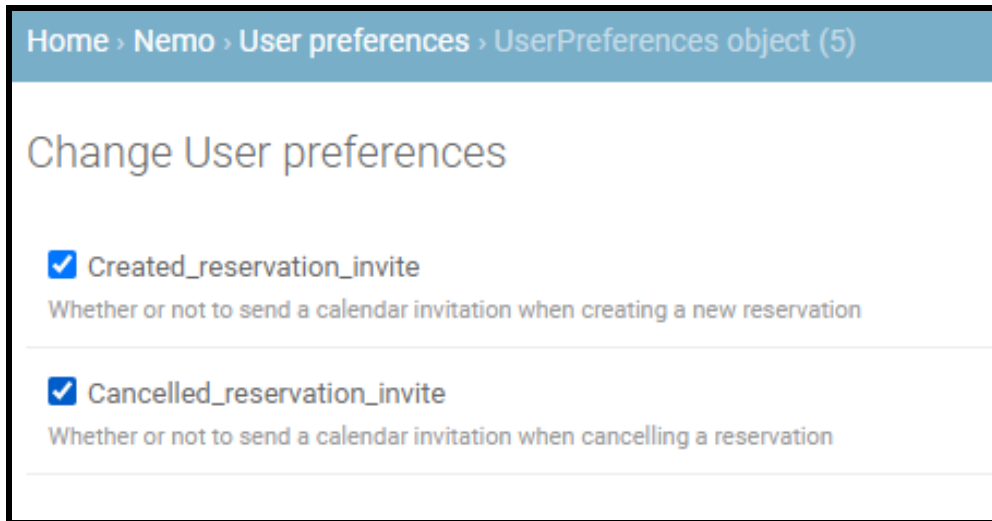

USER
<input type="checkbox"/> Conseil Aronnax (conseil)
<input type="checkbox"/> Pierre Aronnax (professor)
<input type="checkbox"/> jerry bowser (jerry)
<input type="checkbox"/> Captain Nemo (captain)
<input type="checkbox"/> Ned Land (ned)

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.66.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.178).

Home › Nemo › User preferences › UserPreferences object (5)

Change User preferences

Created_reservation_invite
Whether or not to send a calendar invitation when creating a new reservation

Cancelled_reservation_invite
Whether or not to send a calendar invitation when cancelling a reservation

Figure 42.178: *User preference add/edit page*

- Created_reservation_invite – checkbox indicates whether or not to send a calendar invitation when creating a new reservation.
- Cancelled_reservation_invite – checkbox indicated whether or not to send a calendar invitation when cancelling a reservation.

42.66.4 User access page

User preferences are automatically created and updated from the user preference page, see chapter 19.

42.67 User types

42.67.1 Usage

User types are optional but can be useful for binning users aiding in future analysis and trending. User types, if used, must be created in this table view and can be any text name. Any number can be defined. If no user types are defined, they are not displayed on the user page. User types are discussed in the users page, see chapter [38](#).

42.67.2 Summary Page

The summary page provides a listing of user types (Figure [42.179](#)). Click the name field in the row of interest to edit.

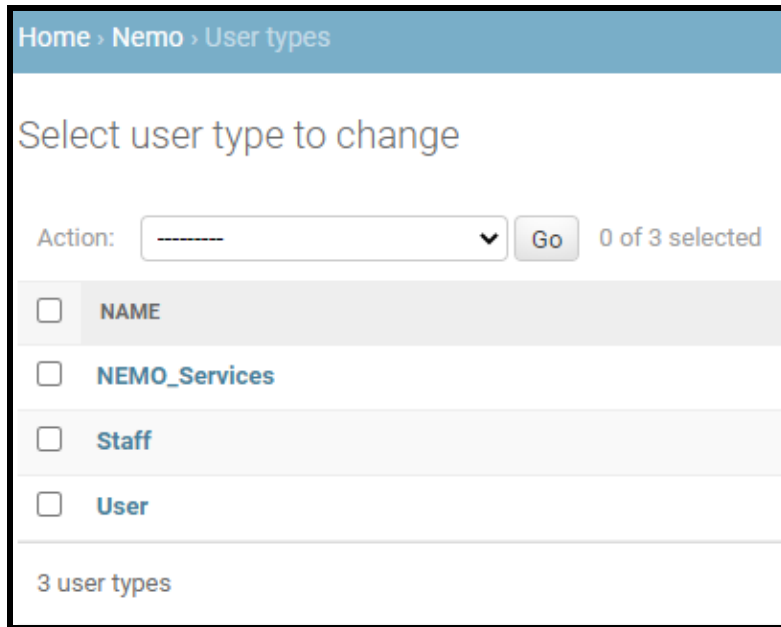

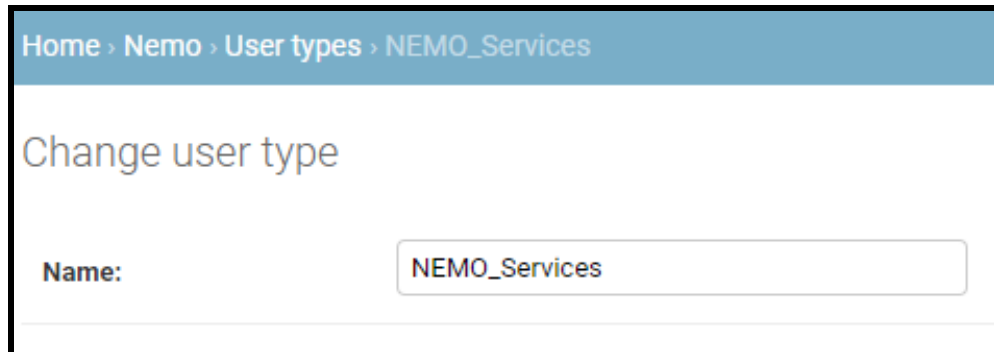

Figure 42.179: *User types summary page*

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.67.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 42.180).

Home > Nemo > User types > NEMO_Services

Change user type

Name:

Figure 42.180: *User types add/edit page*

- Name – the name can be up to 200 characters (required).

42.67.4 User access page

There is no user access page to create user types however, user types are discussed in the users page, see chapter 38.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.68 Users

42.68.1 Usage

The users table lists each user, their permissions, important dates, and qualifications. Users are created and maintained from the users page, see chapter 38. However, some attributes may be updated from other pages and some attributes may only be set directly from this page. If an attribute can be set from a page other than the users page, it will be noted in the field details below.

42.68.2 Summary Page

The summary page provides a listing of tools (Figure 42.181). Click the name field in the row of interest to edit.

42.68.3 Fields

The add/change page for this table lists the fields that can be edited.

Personal Information (Figure 42.182):

- First name – text field of the user’s first name. (required)
- Last name – text field of the user’s last name. (required)
- Username – text field of the user’s username. This is the name the user authenticates with. (required)
- Email address – text field of the users email address. NEMO uses emails to provide useful updates and information to users. (required)
- Badge number – the badge number associated with this user. This field must correctly correspond to a user in order for the entrance tablet and kiosk systems to work properly.
- Type – drop down list select user type from list. This is an informational user type for grouping users for future data analysis.
- Domain – If the identity service is being used to validate users against multiple domains, enter the active directory domain that the account resides on. Not needed for single domain implementations.
- Notes – free text area to enter any type of notes for this user.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Change user HISTORY

Captain Nemo (captain)

Personal information

First name: 

Last name:

Username:

Email address:

Badge number:
The badge number associated with this user. This number must correctly correspond to a user in order for the tablet-login system (in the lobby) to work properly.

Type:   

Domain:
The Active Directory domain that the account resides on

Notes:

Figure 42.182: *Users personal information*

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Permissions (Figure 42.183):

- Active – checkbox designates whether this user can log in. Unselect this instead of deleting accounts.
- Staff – checkbox designates technical staff users. Can only be changed from this page.
- User office – checkbox designates User office staff members. Can only be changed from this page.
- Accounting officer – checkbox designates Accounting officers. Can only be changed from this page.
- Service personnel – checkbox designates this user as service personnel. Service personnel can operate qualified tools without a reservation even when they are shutdown or during an outage and can access authorized areas without a reservation. Can also be changed from the regular user page.
- Technician – checkbox specifies how to bill staff time for this user. When checked, customers are billed at technician rates. Can only be changed from this page.
- Facility manager – checkbox designates the facility manager(s). When checked, users will receive task status updates and will be able to approve/deny access requests. Can only be changed from this page.
- Administrator – checkbox designates that this user has all permissions without explicitly assigning them. Can only be changed from this page.
- Facility rules tutorial required – checkbox when selected, the user is blocked from all reservation and tool usage capabilities.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Permissions	
<input checked="" type="checkbox"/> Active	Designates whether this user can log in. Unselect this instead of deleting accounts.
<input checked="" type="checkbox"/> Staff	Designates this user as technical staff. Technical staff can start remote projects, check maintenance, change configuration, train users etc.
<input type="checkbox"/> User office	Designates this user as part of the User Office. User Office staff can create and manage users and projects, charge supplies, check usage etc.
<input type="checkbox"/> Accounting officer	Designates this user as Accounting officer. Accounting officers can manage projects, view user details, and check usage/billing.
<input type="checkbox"/> Service personnel	Designates this user as service personnel. Service personnel can operate qualified tools without a reservation even when they are shutdown or during an outage and can access authorized areas without a reservation.
<input type="checkbox"/> Technician	Specifies how to bill staff time for this user. When checked, customers are billed at technician rates.
<input checked="" type="checkbox"/> Facility manager	Designates this user as facility manager. Facility managers receive updates on all reported problems in the facility and can also review access requests.
<input checked="" type="checkbox"/> Administrator	Designates that this user has all permissions without explicitly assigning them.
<input type="checkbox"/> Facility rules tutorial required	When selected, the user is blocked from all reservation and tool usage capabilities.

Figure 42.183: *Users permissions*

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Additional Permissions (Figure 42.184):

- Groups – groups can be used to list common user permissions into a single item to make assignment easier. Select from available groups and click the right arrow to add to chosen groups. Multiple groups can be selected at the same time using shift or control keys. Groups can be created from the detailed administration groups page. Normally, groups do not need to be assigned to users. Can only be changed from this page.
- User permissions – user permissions pertain to either detailed administration access or behind the scenes activity such as doors and kiosks. Select from available user permissions and click the right arrow to add to chosen user permissions. Multiple user permissions can be selected at the same time using shift or control keys. Normally, user permissions do not need to be assigned to users. Can only be changed from this page.
- Physical access levels – physical access levels determine what area access a user has and when. Select from available physical access levels and click the right arrow to add to chosen physical access levels. Multiple physical access levels can be selected at the same time using shift or control keys.

Chapter 42 Detailed administration – NEMO (admin or authorized users)

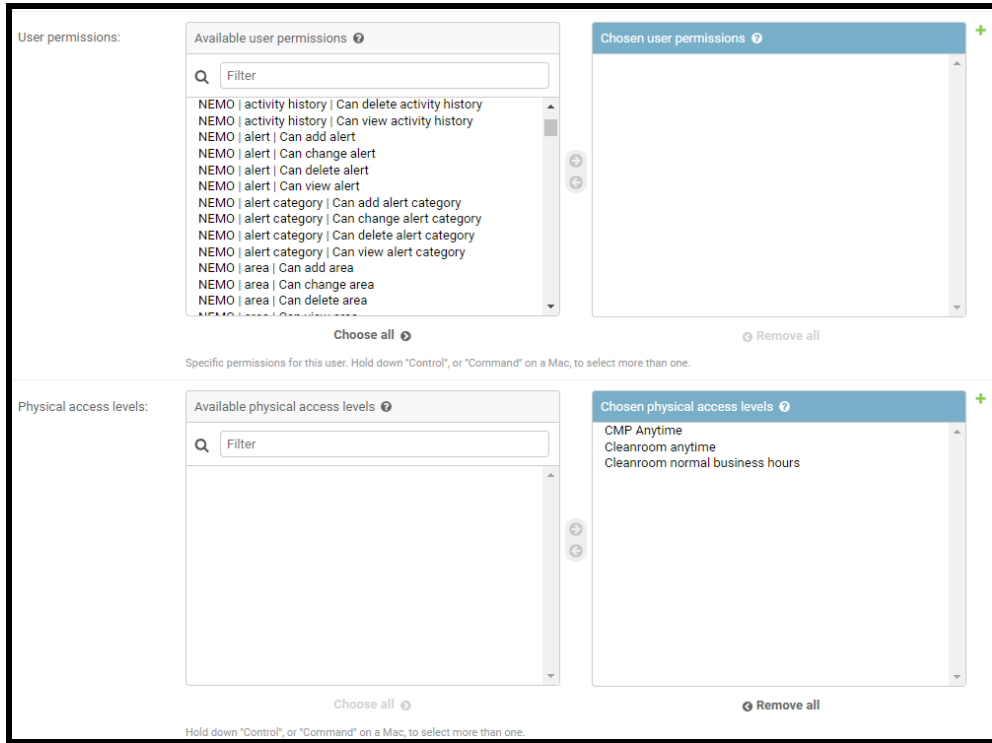

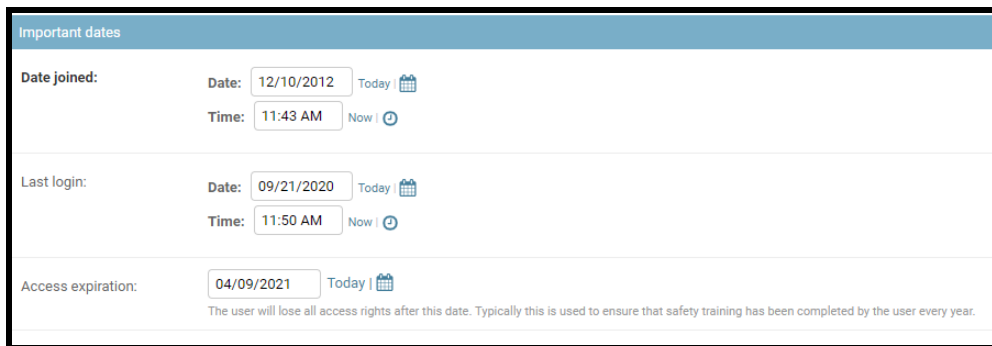

Figure 42.184: Users additional permissions

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Important Dates (Figure 42.185):

- Date joined – date/time the user record was created. This field is automatically set and should not be changed.
- Last login – date/time the user last authenticated into NEMO. This field is automatically set and should not be changed.
- Access expiration – date/time the user will lose all access rights. Typically, this is used to ensure that safety training has been completed by the user every year and that users don't have perpetual access. .

Important dates	
Date joined:	Date: 12/10/2012 Today  Time: 11:43 AM Now 
Last login:	Date: 09/21/2020 Today  Time: 11:50 AM Now 
Access expiration:	04/09/2021 Today  <small>The user will lose all access rights after this date. Typically this is used to ensure that safety training has been completed by the user every year.</small>

Figure 42.185: *Users important dates*

Chapter 42 Detailed administration – NEMO (admin or authorized users)

Facility Information (Figure 42.186 and Figure 42.187):

- Qualifications – select from available tool qualifications and click the right arrow to add to chosen tool qualifications. Multiple tool qualifications can be selected at the same time using shift or control keys.
- Backup owner on tools – select from available tools and click the right arrow to add the chosen tool. Multiple tools can be selected at the same time using shift or control keys.
- Superuser on tools – select from available tools and click the right arrow to add the chosen tool. Multiple tools can be selected at the same time using shift or control keys.
- Projects - select from available projects and click the right arrow to add to chosen projects. Multiple projects can be selected at the same time using shift or control keys.
- Managed projects - select from available projects and click the right arrow to add to chosen projects. Multiple projects can be selected at the same time using shift or control keys.

- Safety trainings – list of safety trainings completed by the user.

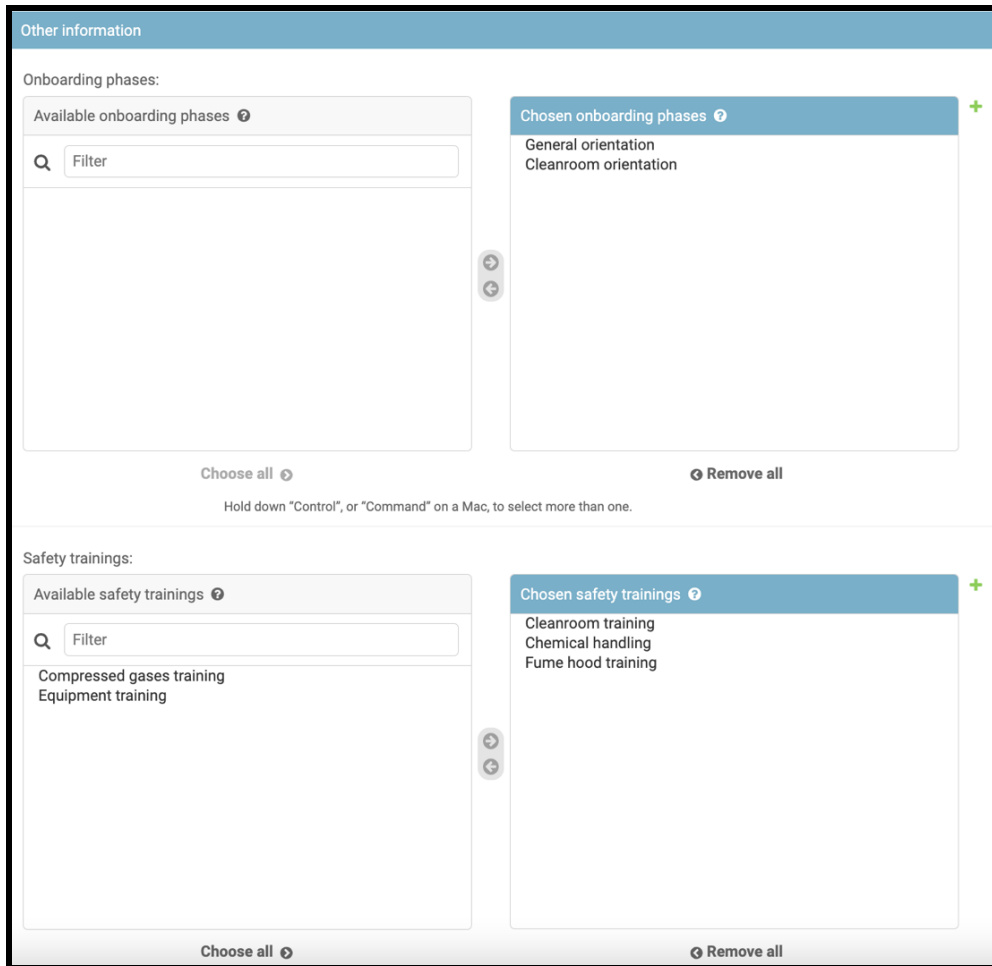

Figure 42.188: *Users other information*

Chapter 42 Detailed administration – NEMO (admin or authorized users)

42.68.4 User access page

Users are created and maintained from the users page (see chapter 38) or directly in this table view. The permissions that give elevated user status are only settable or updateable in this table view.

Once created, some parameters can be updated in NEMO pages other than the users page.

- Qualified users can also be managed on the training page, or the qualifications page.
- Projects can also be managed in the Accounts and projects section.

CHAPTER 43

Detailed administration – Sensors (admin only)

This is the section regarding admin pages for Sensors.

It is available by going to Administration → Detailed administration → Sensors, or directly at <site_address>/admin/sensors.

To enable sensors in your application, see the Sensor data → Setup page in section [18.1](#).

43.1 Sensor alert emails

43.1.1 Usage

The sensor alert emails page lists alerts for sensors. Those alerts trigger an email as well as an alert log when the trigger condition is met, or when no data could be read if that option is selected.

Chapter 43 Detailed administration – Sensors (admin only)

43.1.2 Summary page

The summary page provides a listing of sensor alert emails (Figure 43.1). Click the sensor field in the row of interest to edit.

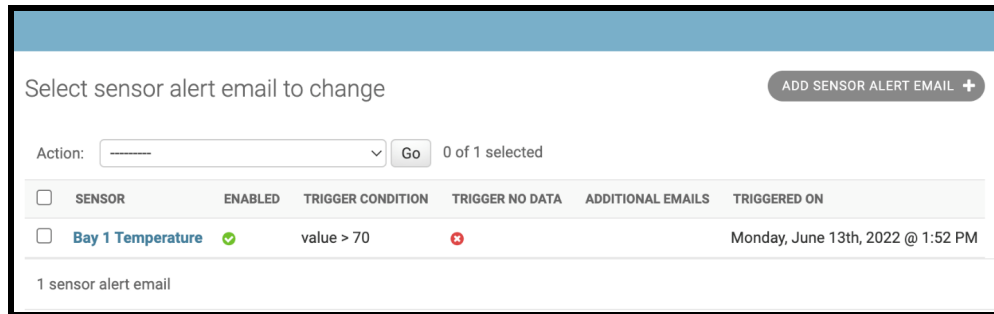

Figure 43.1: *Sensor alert emails summary page*

Chapter 43 Detailed administration – Sensors (admin only)

43.1.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 43.2).

Change sensor alert email

SensorAlertEmail object (1) HISTORY

Enabled

Sensor: Bay 1 Temperature ✎ +

Trigger no data
Check this box to trigger this alert when no data is available

Trigger condition: value > 70

The trigger condition for this alert. The sensor value is available as a variable named value. e.g. value == 42 or value > 42.

Additional emails:
Additional email address to contact when this alert is triggered. A comma-separated list can be used.

Triggered on: Monday, June 13th, 2022 @ 1:52 PM

Delete Save and add another Save and continue editing SAVE

Figure 43.2: Sensor alert email fields

- Enabled – uncheck to disable the alert.
- Sensor – the sensor this alert should apply to (required).
- Trigger no data – check the box to have this alert triggered when no data is read.
- Trigger condition – the condition that will trigger this alert. Mathematical functions and operators can be used. The sensor value is available as the variable “value”. For example: “abs(value) > 42”. The result will be evaluated as a python Boolean. See

Chapter 43 Detailed administration – Sensors (admin only)

<https://docs.python.org/3/library/stdtypes.html#truth-value-testing> for details on what is considered true/false in python.

- Additional emails – text field of additional email addresses to send the alert email to. A comma separated list can be used.
- Triggered on – read only field showing the last time the alert was triggered.

43.1.4 User access page

There is no user access page to create sensor alert emails. However, sensor alerts are discussed in the Sensor data → Alerts section [18.5](#).

43.2 Sensor alert logs

43.2.1 Usage

The sensor alert logs page is a read-only page displaying the history of all alert logs. It will display the alert details from the time the alert was triggered, even if the information has changed since.

Chapter 43 Detailed administration – Sensors (admin only)

43.2.2 Summary page

The summary page provides a listing of sensor alert logs (Figure 43.3). Click the id field in the row of interest to edit.

Select sensor alert log to view

< 2022 June 13

43.2.3 Fields

The view page for this table lists the read-only fields (Figure 43.4).

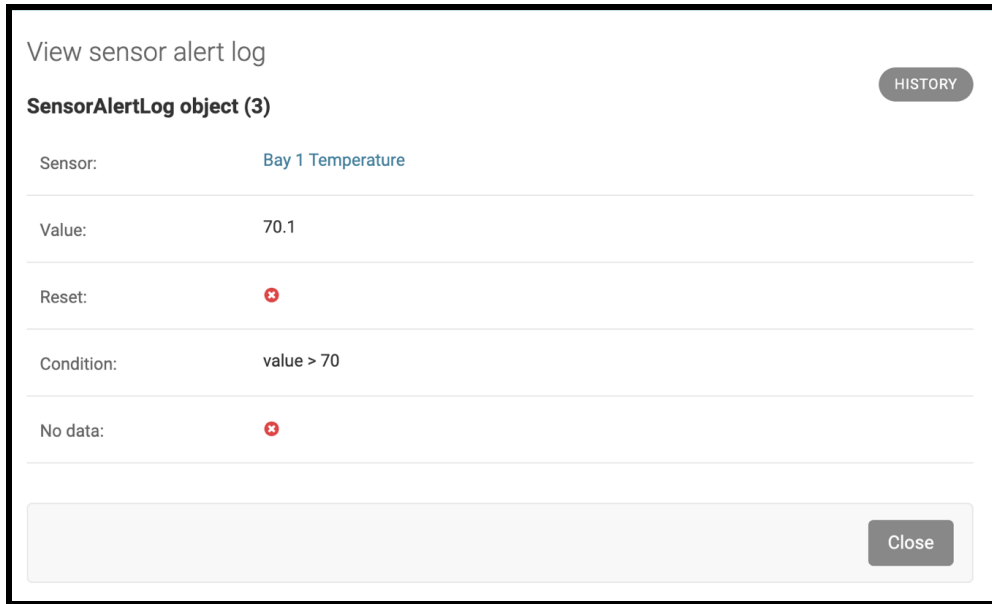

Figure 43.4: *Sensor alert log fields*

- Sensor – read-only sensor
- Value – read-only sensor value at the time of the alert
- Reset – read-only flag, whether the alert was set or reset
- Condition – read-only text of the trigger condition at the time of the alert
- No data – read-only flag, whether the alert trigger condition included triggering when no data is read

Chapter 43 Detailed administration – Sensors (admin only)

43.2.4 User access page

There is no user access page to create sensor alert logs. However, sensor alerts logs are discussed in the Sensor data → Alerts section [18.5](#).

43.3 Sensor card categories

43.3.1 Usage

Sensor card categories are used to link a sensor class in sensor.py to sensor cards so NEMO knows how to talk to the sensor. A sensor card category should be created for each sensor class in sensors.py that will be used to control sensors.

43.3.1.1 Summary page

The summary page provides a listing of sensor card categories (Figure [43.5](#)). Click the name field in the row of interest to edit.

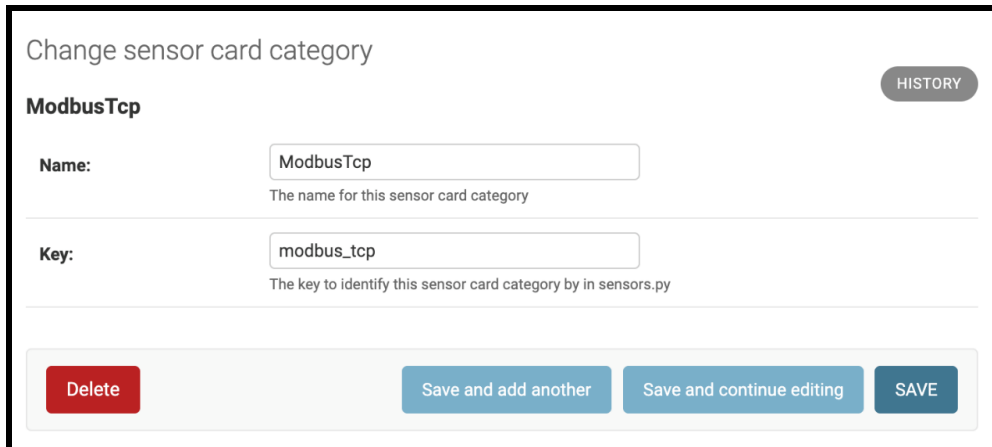

Figure 43.5: Sensor card categories summary page

Chapter 43 Detailed administration – Sensors (admin only)

43.3.2 Fields

The add/change page for this table lists the fields that can be edited (Figure 43.6).

The screenshot shows a web form titled "Change sensor card category" for the category "ModbusTcp". In the top right corner, there is a "HISTORY" button. The form contains two input fields: "Name:" with the value "ModbusTcp" and a subtext "The name for this sensor card category"; and "Key:" with the value "modbus_tcp" and a subtext "The key to identify this sensor card category by in sensors.py". At the bottom of the form, there are four buttons: "Delete" (red), "Save and add another" (blue), "Save and continue editing" (blue), and "SAVE" (blue).

Figure 43.6: *Sensor card category fields*

- Name – name can be up to 200 characters (required).
- Key – The key to identify this sensor card category in sensors.py (required).

The sensors.py file has a dictionary that links this key name to each sensor class in sensors.py. Users can create their own sensor class and access it in NEMO by updating the dictionary to include their custom class (Figure 43.7).

```
sensors: Dict[str, Sensor] = {"modbus_tcp": ModbusTcpSensor()}
```

Figure 43.7: *Sensor card categories example dictionary in sensors.py*

Chapter 43 Detailed administration – Sensors (admin only)

43.3.3 User access page

There is no user access page to create sensor card categories. Sensor card categories, if used, must be created in this table view and can be any text name. Sensor card categories are used in the sensor cards table to define how NEMO should communicate with the sensors.

43.4 Sensor cards

43.4.1 Usage

Sensor cards define the communication parameters with a sensor device. Regardless of whether single sensors or multi-sensor devices are used, each device will require definition as sensor card. Information such as IP address, port number and sensor category define how NEMO will communicate with the device.

43.4.2 Summary page

The summary page provides a listing of sensor cards (Figure 43.8). Click the name field in the row of interest to edit.

<input type="checkbox"/>	NAME	ENABLED	SERVER	PORT	CATEGORY
<input type="checkbox"/>	Temp/Humidity card	✓	cleanroomsensors.example.org	502	ModbusTcp
<input type="checkbox"/>	Gas cabinet card	✓	gascabinet.example.org	502	ModbusTcp

2 sensor cards

Figure 43.8: *Sensor cards summary page*

Chapter 43 Detailed administration – Sensors (admin only)

43.4.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 43.9).

Change sensor card

Temp/Humidity card: cleanroomsensors.example.org

NAME: Temp/Humidity card

SERVER: cleanroomsensors.example.org

PORT: 502

CATEGORY: ModbusTcp

Username:

Password:

Enabled

Delete Save and add another Save and continue editing SAVE

Figure 43.9: Sensor card fields

- Name – name can be up to 200 characters (required).
- Server – IP address or FQDN of interlock device (required).
- Port – port number to access device through (required). ModbusTcp default port is 502.
- Category – sensor card category selectable from drop down list (required). See Sensor card categories in section 43.3.

Chapter 43 Detailed administration – Sensors (admin only)

- Username – if a username and password is required to access the sensor device, enter the username.
- Password – if a username and password is required to access the sensor device, enter the password.
- Enabled – check box to set the status of the device, normally checked.

43.4.4 User access page

There is no user access page to create sensor cards. Sensor cards must be created in this table view. Sensor cards are used in the sensors table to define which sensor device to talk to.

Chapter 43 Detailed administration – Sensors (admin only)

43.5 Sensor categories

43.5.1 Usage

The sensor categories page lists categories for sensors. It provides a way to organize sensors with multiple level hierarchies.

43.5.2 Summary page

The summary page provides a listing of sensor categories (Figure 43.10). Click the name field in the row of interest to edit.

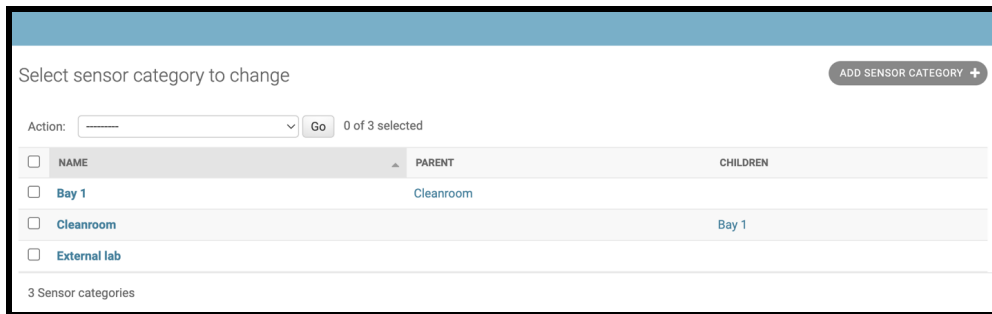

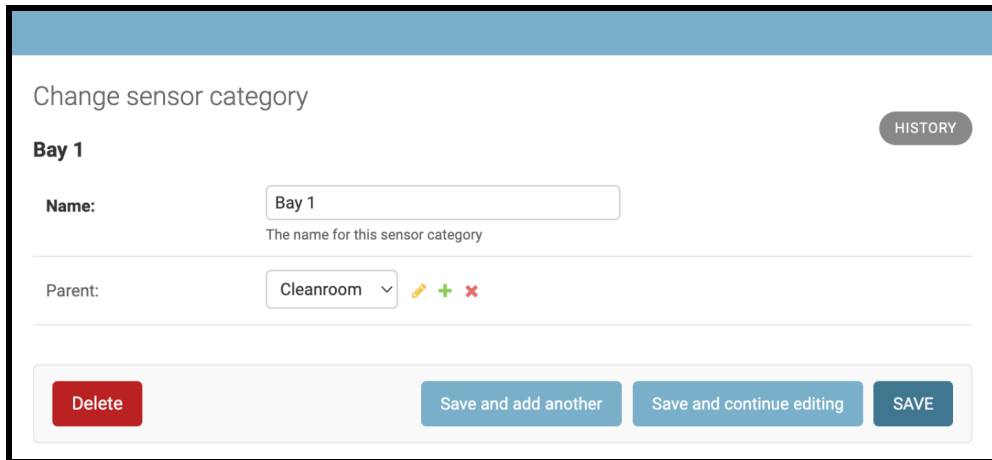

Figure 43.10: *Sensor categories summary page*

Chapter 43 Detailed administration – Sensors (admin only)

43.5.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 43.11).

The screenshot shows a web form titled "Change sensor category" for a category named "Bay 1". The form includes a "Name" field with the value "Bay 1" and a tooltip that reads "The name for this sensor category". Below this is a "Parent" dropdown menu currently set to "Cleanroom", with edit, add, and delete icons to its right. At the bottom of the form are four buttons: "Delete" (red), "Save and add another" (light blue), "Save and continue editing" (medium blue), and "SAVE" (dark blue). A "HISTORY" button is located in the top right corner of the form area.

Figure 43.11: *Sensor category fields*

- Name – text field of the sensor category name (required).
- Parent – drop down list of sensor categories to select as a parent category.

43.5.4 User access page

There is no user access page to create sensor categories. However, sensor categories are discussed in the Sensor data chapter 18.

Chapter 43 Detailed administration – Sensors (admin only)

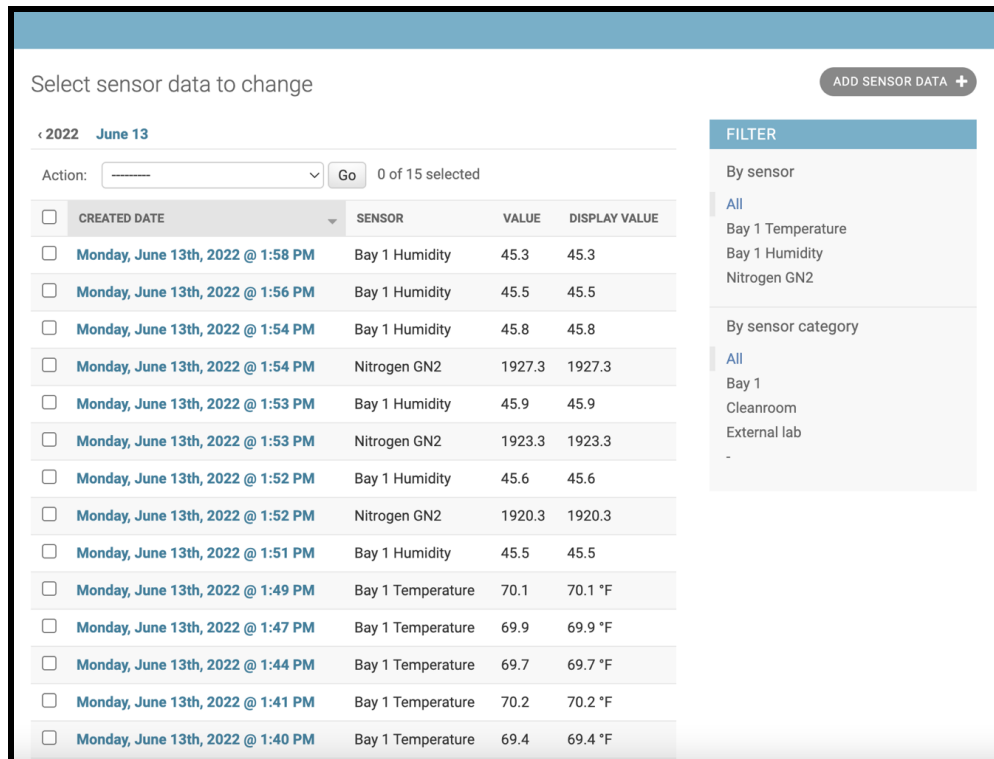

43.6 Sensor data

43.6.1 Usage

The sensor data page lists data points for sensors.

43.6.2 Summary page

The summary page provides a listing of sensor data (Figure 43.12). Click the created date field in the row of interest to edit.

Select sensor data to change ADD SENSOR DATA +

Chapter 43 Detailed administration – Sensors (admin only)

43.7.3 Fields

The add/change page for this table lists the fields that can be edited (Figure 43.15, Figure 43.16).

The screenshot shows a web form titled "Change sensor" for a sensor named "Bay 1 Temperature". The form includes a "HISTORY" button in the top right corner. The fields are as follows:

- Name:** A text input field containing "Bay 1 Temperature" with a small icon to its right.
- Visible:** A checked checkbox with the label "Visible". Below it is the text "Specifies whether this sensor is visible in the sensor dashboard".
- Sensor card:** A dropdown menu showing "Temp/Humidity card: cleanroomsensors.example.org" with edit and add icons.
- Interlock card:** A dropdown menu showing a blank space with edit and add icons.
- Sensor category:** A dropdown menu showing "Bay 1" with edit, add, and delete icons.
- Data label:** A text input field containing "Temperature" with the subtext "Label for graph and table data".
- Data prefix:** An empty text input field with the subtext "Prefix for sensor data values".
- Data suffix:** A text input field containing "*F" with the subtext "Suffix for sensor data values".

Figure 43.15: *Sensor fields*

- Name – text field of the sensor name (required).
- Visible – checkbox of whether this sensor should be visible in the sensor dashboard page.
- Sensor card – sensor card this sensor is connected too.
- Interlock card – interlock card this sensor is connected too. This allows for certain sensors to be connected to an interlock card, provided the

Chapter 43 Detailed administration – Sensors (admin only)

interlock card category key is the same as the one corresponding to the sensor class. For example, a ModbusTCP interlock card is compatible with the ModbusTCP sensor implementation. Certain manufacturers provide interlock boxes allowing for relays and sensor connection on the same device.

- Sensor category – the sensor category for this sensor.
- Data label – text field for the label to show on the Y axis of the chart data for this sensor.
- Data prefix – text field for the prefix to add to the value read. Only used when displaying the data.
- Data suffix – text field for the suffix to add to the value read. Only used when displaying the data.

Chapter 43 Detailed administration – Sensors (admin only)

The screenshot shows a web form for configuring a sensor. It contains the following fields and controls:

- Unit id:** An empty text input field.
- Read address:** A text input field containing the value "24".
- Number of values:** A text input field containing the value "1".
- Formula:** A large, empty text area for entering a formula. Below it is a small text note: "Enter a formula to compute for this sensor values. The list of registers read is available as variable **registers**. Specific functions can be used based on the sensor type. See documentation for details."
- Read frequency:** A text input field containing the value "5". Below it is a small text note: "Enter the read frequency in minutes. Every 2 hours = 120, etc. Max value is 1440 min (24hrs). Use 0 to disable sensor data read."
- Action buttons:** A row of four buttons at the bottom: "Delete" (red), "Save and add another" (blue), "Save and continue editing" (blue), and "SAVE" (blue).

Figure 43.16: *Sensor fields continued*

- Unit id – number field for the unit id of the sensor. Usually left empty.
- Read address – number field for the address to start reading data from (required for ModbusTCP sensors). Refer to your sensor manual to find this value.
- Number of values – number of values to read (required for ModbusTCP sensors). Refer to your sensor manual to find this value. If greater than 1, the formula field will be required.
- Formula – the formula to apply when reading the values. The values are available as a list “registers”. For example, “round(registers[0], 2)” to round the value to the nearest 2 decimal value. Some sensor ModbusTCP

Chapter 43 Detailed administration – Sensors (admin only)

devices split data into multiple registers, and they need to be decoded together. The following modbus-specific functions are available:

- decode_8bit_uint
- decode_16bit_uint
- decode_32bit_uint
- decode_64bit_uint
- decode_8bit_int
- decode_16bit_int
- decode_32bit_int
- decode_64bit_int
- decode_16bit_float
- decode_32bit_float
- decode_64bit_float
- decode_bits
- decode_string
- read_coils

For example, “decode_32bit_float(registers)” would decode a 32 bit float from a register list containing 2 values, while “read_coils(1)” will read the value for coil #1. Refer to your sensor manual for details.

43.7.4 User access page

There is no user access page to create sensors. However, sensors are discussed in the Sensor data chapter [18](#).

CHAPTER 44

Detailed administration – Contracts (admin only)

This is the section regarding admin pages for Service contracts, Procurements and Contractor agreements.

It is available by going to Administration → Detailed administration → Contracts, or directly at <site_address>/admin/contracts.

To enable contracts in your application, see the Contracts and procurements → Setup page in section [27.1](#).

44.1 Service contracts

44.1.1 Summary page

The summary page provides a listing of service contracts (Figure [44.1](#)). Click the name field in the row of interest to edit.

Chapter 44 Detailed administration – Contracts (admin only)

Home > Contracts > Service contracts

Select service contract to change

Action: Go 0 of 3 selected

<input type="checkbox"/>	NAME	CURRENT YEAR	SUBMITTED DATE	AWARD DATE	CONTRACT NUMBER	REQUISITION NUMBER	START	END	REMINDER DATE	COST

The date this contract was submitted

Award date: Today | 
The date this contract was awarded

Contract number:
The contract number

Requisition number:
The requisition number for this contract

Figure 44.2: *Service contract fields*

Chapter 44 Detailed administration – Contracts (admin only)

The screenshot displays a web form for managing service contracts. It includes several input fields and a notes section:

- Start:** A date picker set to 01/01/2022 with a calendar icon and a 'Today' button. Below it is the text 'The start date of this service contract'.
- End:** A date picker set to 12/31/2022 with a calendar icon and a 'Today' button. Below it is the text 'The end date of this service contract'.
- Reminder date:** A date picker set to 10/01/2022 with a calendar icon and a 'Today' button. Below it is the text 'The reminder date for this service contract'.
- Cost:** A text input field containing '123456.00'. Below it is the text 'The cost of this contract'.
- Notes:** A large text area containing the following text:
Period of performance 01/01/2022 to 12/31/2023
Info from the award document:
1. Item Number 0022: EBL #1 \$74,073.60
2. Item Number 0024: EBL #2 \$49,382.40
Total \$123,456
Instructions for contacting JEOL service:
All service visits are initiated with a call to the district service manager, Joel E'Beam. Joel's contact

Below the notes section is a section titled 'PROCUREMENT DOCUMENTS' which contains a table with the following structure:

DOCUMENT	URL	NAME	DELETE?
<input type="button" value="Choose File"/> No file chosen	<input type="text"/>	<input type="text"/>	<input type="button" value="X"/>

At the bottom of this section is a link: '+ Add another Procurement documents'

Figure 44.3: Service contract fields continued

- **Name** – the name of this service contract (required).
- **Current year** – the current year of this service contract (required).
- **Total years** – the total number of years of this service contract (required).
- Submitted date – the date this service contract was submitted.
- Award date – the date this service contract was awarded.
- Contract number – the contract number for this service contract.
- Requisition number – the requisition number for this service contract.
- Start – the start date of this service contract.
- End – the end date of this service contract.

Chapter 44 Detailed administration – Contracts (admin only)

- Reminder date – the date to remind facility managers that this contract’s renewal process needs to be started.
- Cost – the cost of this service contract.
- Notes – the notes for this service contract.
- Documents – the documents to add to this service contract.

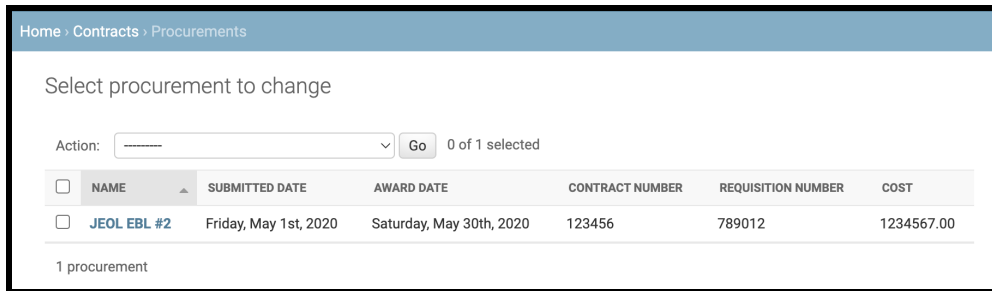

44.1.3 User access page

The user access page for Service contracts is the Contracts & Procurements page. When adding or editing service contracts, the user page redirects the user to this admin page. Service contracts are discussed in the Contracts & procurements → Service contracts section [27.2.2](#).

44.2 Procurements

44.2.1 Summary page

The summary page provides a listing of procurements (Figure 44.4). Click the name field in the row of interest to edit.

Figure 44.7: Contractor agreement fields

- **Name** – the name of this contractor (required).
- **Contract** – the contract (procurement or service contract or default) for this contractor agreement.
- **Start** – the start date of this contractor agreement.

Chapter 44 Detailed administration – Contracts (admin only)

- End – the end date of this contractor agreement.
- Reminder date – the date to remind facility managers that this contractor's renewal process needs to be started.
- Notes – the notes for this contractor agreement.
- Documents – the documents to add to this contractor agreement.

44.3.3 User access page

The user access page for Contractor agreements is the Contracts & Procurements page. When adding or editing contractor agreements, the user page redirects the user to this admin page. Contractor agreements are discussed in the Contracts & procurements → Contractor agreements section [27.2.4](#).

CHAPTER 45

API access

45.1 Usage

- The API base access page is accessible in the Administration menu under API. A list of available data tables will be displayed (Figure 45.1).
- Several tables are available through the API
 - account_types: “site-address/api/account_types/”,
 - accounts: “site-address/api/accounts/”,
 - area_access_records: “site-address/api/area_access_records/”,
 - areas: “site-address/api/areas/”,
 - auth_groups: “site-address/api/auth_groups/”,
 - auth_permissions: “site-address/api/auth_permissions/”,
 - billing: “site-address/api/billing/”,

Chapter 45 API access

* The billing information is discussed in a separate part later in this section.

- configurations: “site-address/api/configurations/”,
- consumable_categories: “site-address/api/consumable_categories/”,
- consumable_withdrawals: “site-address/api/consumable_withdrawals/”,
- consumables: “site-address/api/consumables/”,
- content_types: “site-address/api/content_types/”,
- interlock_card_categories: “site-address/api/interlock_card_categories/”,
- interlock_cards: “site-address/api/interlock_cards/”,
- interlocks: “site-address/api/interlocks/”,
- project_disciplines: “site-address/api/project_disciplines/”,
- projects: “site-address/api/projects/”,
- qualifications: “site-address/api/qualifications/”,
- reservation_configuration_options: “site-address/api/reservation_configuration_options/”,
- reservations: “site-address/api/reservations/”,
- resources: “site-address/api/resources/”,
- scheduled_outages: “site-address/api/scheduled_outages/”,
- staff_charges: “site-address/api/staff_charges/”,
- tasks: “site-address/api/tasks/”,
- tool_status: “site-address/api/tool_status/”,
- tools: “site-address/api/tools/”,
- training_sessions: “site-address/api/training_sessions/”,
- usage_events: “site-address/api/usage_events/”,
- users: “site-address/api/users/”

Chapter 45 API access

```
Api Root

  "users": "http://localhost:8000/api/users/"
}
```

Figure 45.1: API access root

Chapter 45 API access

- Directly enter the web address or click on the address link of any table to access the data (Figure 45.2). The example below was reached with the address “site-address/api/users/”

The screenshot shows a web browser interface for a Django REST framework API. The page title is "User List" and the URL is "/api/users/". The response is a JSON object with the following structure:

```
HTTP 200 OK
Allow: GET, HEAD, OPTIONS
Content-Type: application/json
Vary: Accept

{
  "count": 3,
  "next": null,
  "previous": null,
  "results": [
    {
      "id": 1,
      "first_name": "Captain",
      "last_name": "Nemo",
      "username": "captain",
      "email": "captain.nemo@nautilus.com",
      "date_joined": "2012-12-10T11:43:37-05:00",
      "badge_number": null,
      "is_active": true,
      "is_staff": true,
      "is_superuser": true,
      "is_technician": false,
      "is_service_personnel": false
    },
    {
      "id": 3,
      "first_name": "Ned",
```

Figure 45.2: API access example data list view

Chapter 45 API access

- To remove all formatting and convert the data to a json output stream, add the parameter “format=json” or select the drop down in the top right corner then select json from the list (Figure 45.3).

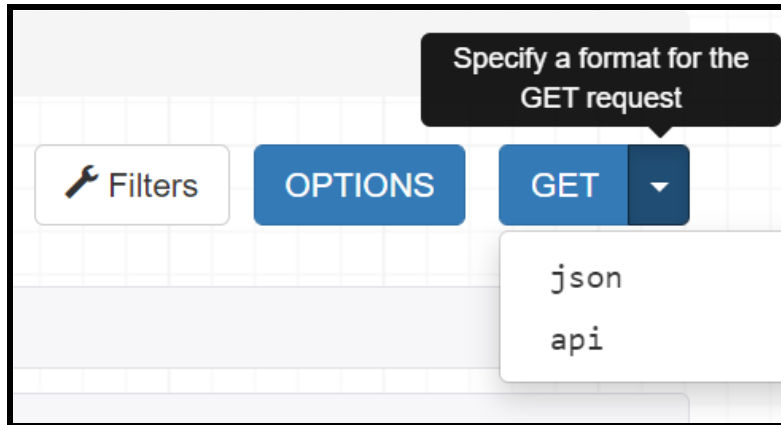

Figure 45.3: API access change to json view

- The page output will now be in json format which can be parsed in many external software packages for analysis or billing (Figure 45.4). The example below was reached with the address “site-address/api/users/?format=json”

```
{
  "count": 3,
  "next": null,
  "previous": null,
  "results": [
    {
      "id": 1,
      "first_name": "Captain",
      "last_name": "Nemo",
      "username": "captain",
      "email": "captain.nemo@nautilus.com",
      "date_joined": "2012-12-10T11:43:37-05:00",
      "badge_number": null,
      "is_active": true,
      "is_staff": true,
      "is_superuser": true,
      "is_technician": false,
      "is_service_personnel": false
    },
    {
      "id": 3,
      "first_name": "Ned",
      "last_name": "Land",
      "username": "ned",
      "email": "ned.land@nautilus.com",
      "date_joined": "2012-12-10T11:49:38-05:00",
      "badge_number": null,
      "is_active": true,
      "is_staff": false,
      "is_superuser": false,
      "is_technician": false,
      "is_service_personnel": false
    },
    {
      "id": 2,
      "first_name": "Pierre",
      "last_name": "Aronnax",
      "username": "professor",
      "email": "pierre.aronnax@nautilus.com",
      "date_joined": "2012-12-10T11:48:43-05:00",
      "badge_number": null,
      "is_active": true,
      "is_staff": false,
      "is_superuser": false,
      "is_technician": false,
      "is_service_personnel": false
    }
  ]
}
```

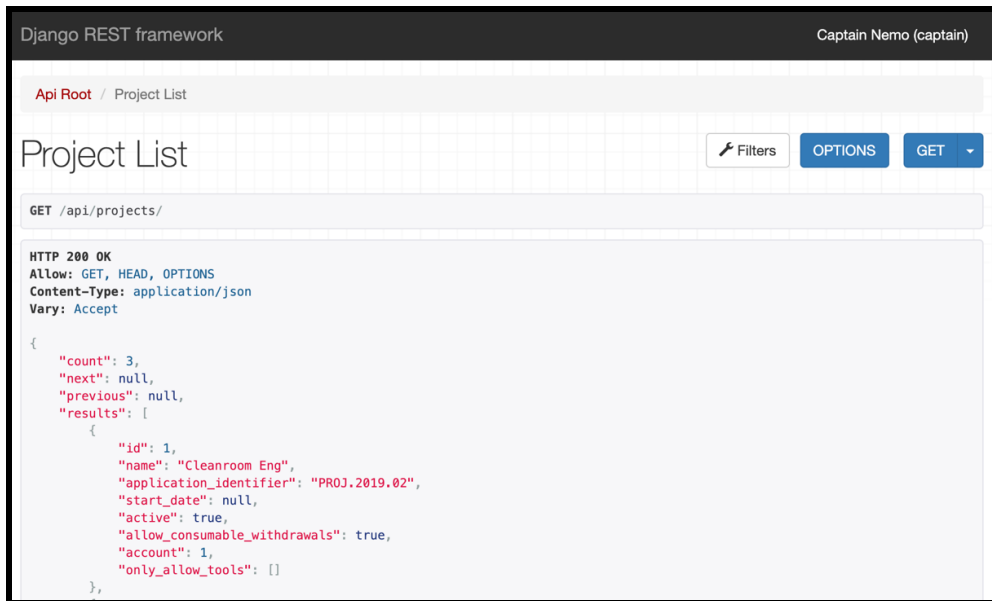

Figure 45.4: API access example data json view

Chapter 45 API access

45.2 Special parameters

The “expand” parameter can be used to request fully nested object in the response.

For example, this is the view without expand. “site-address/api/projects/” (Figure 45.5)

The screenshot shows the Django REST framework interface for the 'Project List' endpoint. The browser address bar shows 'GET /api/projects/'. The response status is 'HTTP 200 OK'. The response headers are: 'Allow: GET, HEAD, OPTIONS', 'Content-Type: application/json', and 'Vary: Accept'. The response body is a JSON object with the following structure:

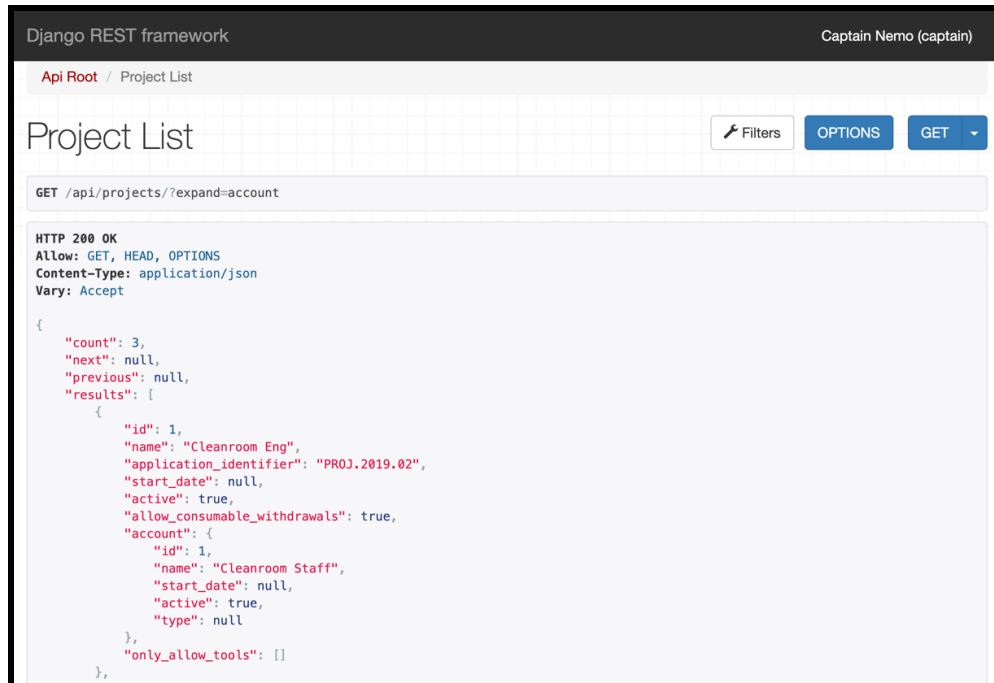

```
{
  "count": 3,
  "next": null,
  "previous": null,
  "results": [
    {
      "id": 1,
      "name": "Cleanroom Eng",
      "application_identifier": "PROJ.2019.02",
      "start_date": null,
      "active": true,
      "allow_consumable_withdrawals": true,
      "account": 1,
      "only_allow_tools": []
    }
  ]
}
```

Figure 45.5: API access example projects

Chapter 45 API access

And this is an example with expand.

“<http://localhost:8005/api/projects/?expand=account>” (Figure 45.6)

The screenshot shows the Django REST framework interface. At the top, it says "Django REST framework" and "Captain Nemo (captain)". Below that, there's a breadcrumb "Api Root / Project List". The main heading is "Project List". To the right of the heading are buttons for "Filters", "OPTIONS", and "GET". Below the heading, the URL "GET /api/projects/?expand=account" is displayed. The response is shown as follows:

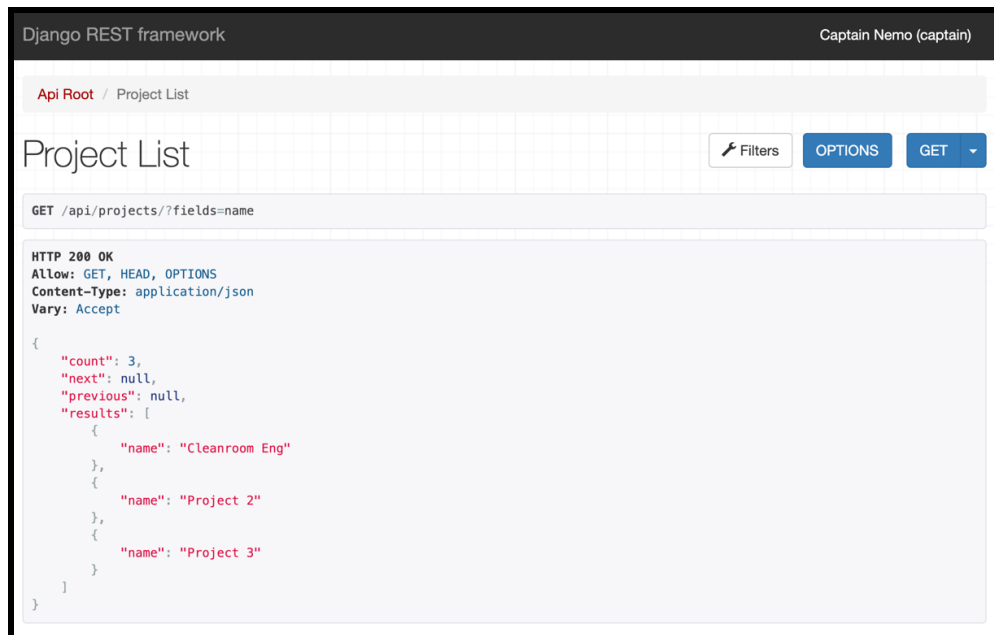

```
HTTP 200 OK
Allow: GET, HEAD, OPTIONS
Content-Type: application/json
Vary: Accept

{
  "count": 3,
  "next": null,
  "previous": null,
  "results": [
    {
      "id": 1,
      "name": "Cleanroom Eng",
      "application_identifier": "PROJ.2019.02",
      "start_date": null,
      "active": true,
      "allow_consumable_withdrawals": true,
      "account": {
        "id": 1,
        "name": "Cleanroom Staff",
        "start_date": null,
        "active": true,
        "type": null
      },
      "only_allow_tools": []
    }
  ]
}
```

Figure 45.6: API access example projects with expand

Chapter 45 API access

The parameter “fields” can be used to select specific fields to be retrieved. For example “site-address/api/projects/?fields=name” will only retrieve the name of the projects (Figure 45.7)

The screenshot shows the Django REST framework interface. At the top, it says "Django REST framework" and "Captain Nemo (captain)". Below that, the breadcrumb "Api Root / Project List" is visible. The main heading is "Project List". To the right of the heading are buttons for "Filters", "OPTIONS", and "GET". Below the heading, the request details are shown: "GET /api/projects/?fields=name". The response is displayed in a light gray box with the following content:

```
HTTP 200 OK
Allow: GET, HEAD, OPTIONS
Content-Type: application/json
Vary: Accept

{
  "count": 3,
  "next": null,
  "previous": null,
  "results": [
    {
      "name": "Cleanroom Eng"
    },
    {
      "name": "Project 2"
    },
    {
      "name": "Project 3"
    }
  ]
}
```

Figure 45.7: API access example projects with fields

Chapter 45 API access

Using the same syntax, “?omit=name” can be used to retrieve all fields except “name” (Figure 45.8)

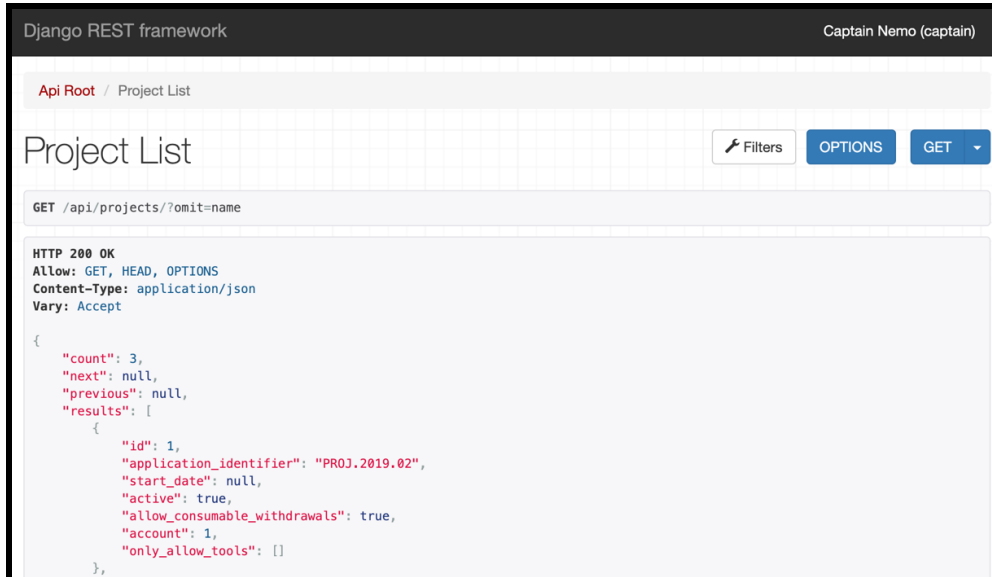

Figure 45.8: API access example projects with omit

45.3 Export formats

The API data can be exported in 2 different formats: JSON and XLSX. JSON export format is enabled out of the box, however the XLSX format is not. To enable XLSX format, the following setting must be used in the REST_FRAMEWORK section of the setting.py file: 'DEFAULT_RENDERER_CLASSES':

```
['rest_framework.renderers.JSONRenderer',
 'rest_framework.renderers.BrowsableAPIRenderer',
 'drf_renderer_xlsx.renderers.XLSXRenderer'],
```

Chapter 45 API access

45.4 Date/Time formats

The default date/time formats which are used to format date and times in the API can be set in the `REST_FRAMEWORK` section of the `settings.py` file, for example:

```
'DATETIME_FORMAT': '%m-%d-%Y %H:%M:%S',
```

```
'DATE_FORMAT': '%m-%d-%Y',
```

```
'TIME_FORMAT': '%H:%M:%S',
```

45.5 Access Errors

If an error is received, the user may not have permission to access the API interface (Figure 45.9). Users accessing the API must have either administrator status or have the “Can use billing API” permission.

Figure 45.9: API access permission error

Chapter 45 API access

The authentication class must be set for the method you plan to access the API, or you will receive an error (Figure 45.10). To use token authentication which is the easiest way for a program to retrieve data, the following setting must be used in the REST_FRAMEWORK section of the setting.py: 'DEFAULT_AUTHENTICATION_CLASSES': ('rest_framework.authentication.TokenAuthentication',). Then, a token must be created for the user that will access the API. When token authentication is enabled, tokens can be created in the detailed administration tokens table.

To allow web address access, add ('rest_framework.authentication.SessionAuthentication') to the authentication class tuple.

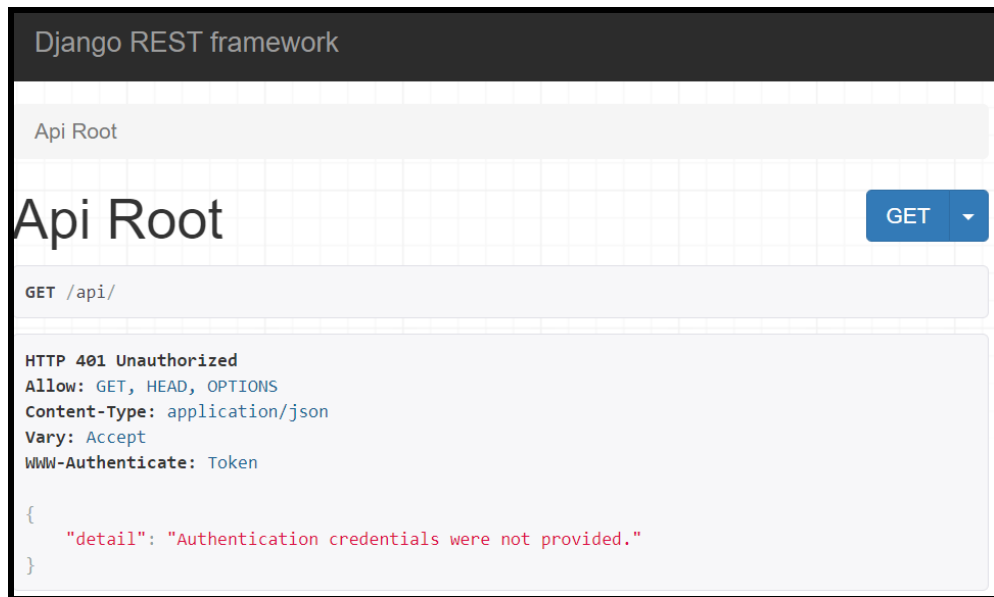

Figure 45.10: API access authentication error

45.6 Billing information

Billing information can be directly accessed in a date range through the billing API. The billing API requires a start date (start) and end date (end) to be passed as arguments.

Valid parameters are:

- **start** (required): date in format MM/DD/YYYY.
- **end** (required): date in format MM/DD/YYYY.
- **username**: username of a user to get billing for.
- **account_name**: name of the account to get billing for.
- **account_id**: id of the account to get billing for.
- **project_name**: name of the project to get billing for.
- **project_id**: id of the project to get billing for.
- NOTE: If valid start and end dates are not given, an error will be returned (Figure45.11).

Chapter 45 API access

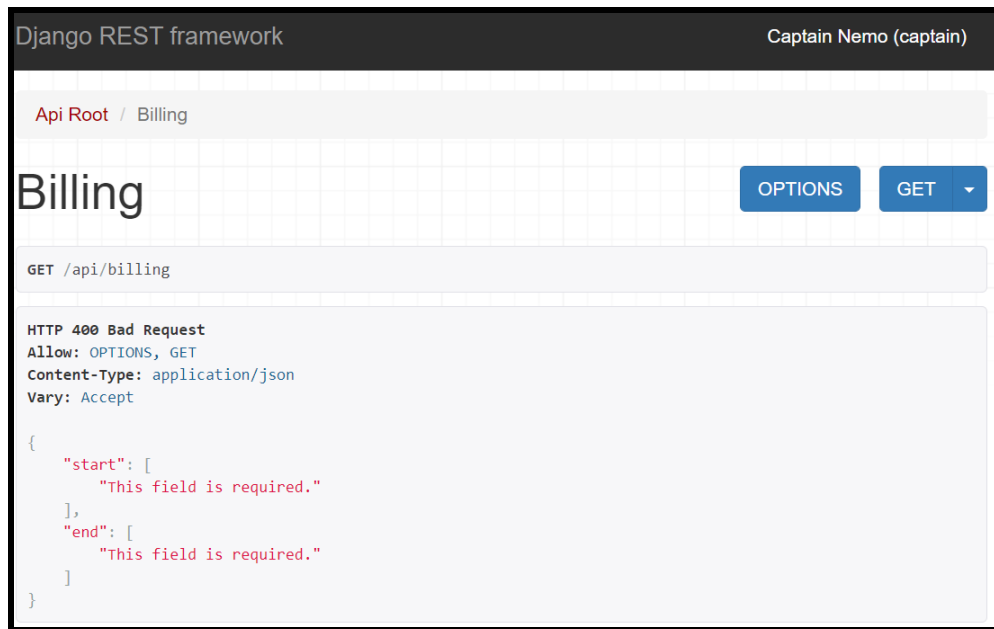

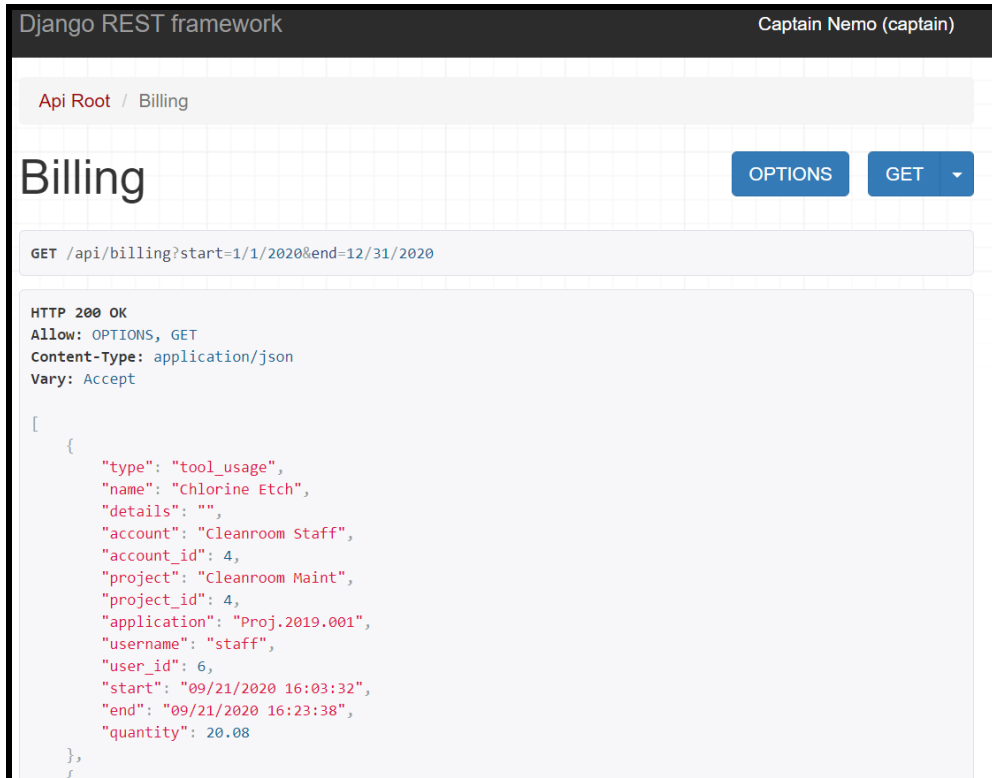

Figure 45.11: API access billing date range error

Chapter 45 API access

- The format for requesting billing information through the API is `site-address/api/billing?start=1/1/2020&end=12/31/2020`. This request will produce the output in Figure 45.12.

```
Django REST framework Captain Nemo (captain)
Api Root / Billing
Billing [OPTIONS] GET

CHAPTER 46

Kiosk

Kiosks provide a quick and convenient way for users to access tools and reservations. The kiosk can run on any device with web access but requires a card reader and NEMO user with permission to act as a kiosk.

46.1 Setup

To enable this feature, you need to have 'NEMO.apps.kiosk' in `INSTALLED_APPS` in your `settings.py`.

The use of a kiosk tablet requires a tablet or computer configured to interface with NEMO and send the appropriate messages.

Chapter 46 Kiosk

46.1.1 Kiosk user

A dedicated NEMO user should be setup for kiosk tablets. That user must have the following permissions which are set in the users table of the database:

- NEMO|user|Kiosk services

46.1.2 Card reader

The kiosk tablet uses a badge reader to identify the user. Usually, an identity card that users of the facility already have can be utilized, but there are also tokens that can be used. NEMO defaults to expecting the F2 character to start recording the badge number and another F2 character to end and submit the badge number similar to what is provided by a pcProx Plus card reader (Figure 46.1). NIST does not endorse this product but the information is provided as an example of the type of reader that can be used.

Figure 46.1: *Kiosk card reader example*

Chapter 46 Kiosk

If your card reader uses different characters, a custom badge reader configuration can be setup in the badge reader table.

Once the card reader is setup, it can be tested by opening notepad or other computer text editor software then scan a badge. A serial number should be seen (Figure 46.2).

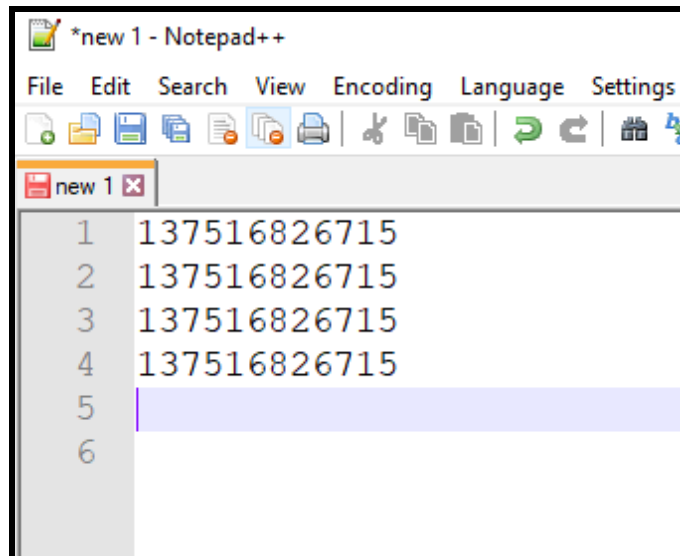

Figure 46.2: *Kiosk card reader test example*

Chapter 46 Kiosk

46.1.3 User setup

Now that the card reader is setup, each user needs to have their badge number entered into their user profile. This is easily accomplished by setting up a card reader on a computer that has access to NEMO by a staff member. Then follow these steps:

- Navigate to the Administration → Users page (Figure 46.3)

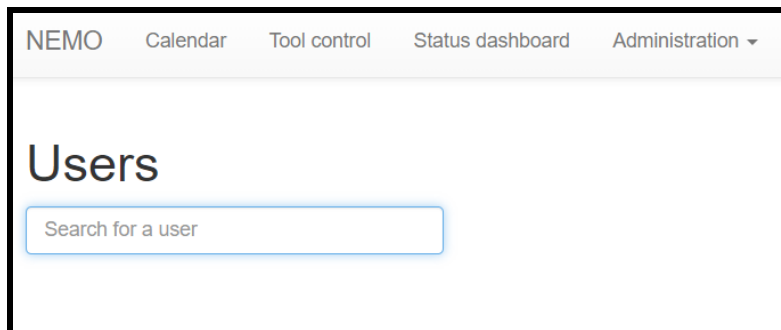

Figure 46.3: *Kiosk card reader users page*

- Enter the user name of interest and click their name when it appears or create a new user if needed (Figure 46.4).

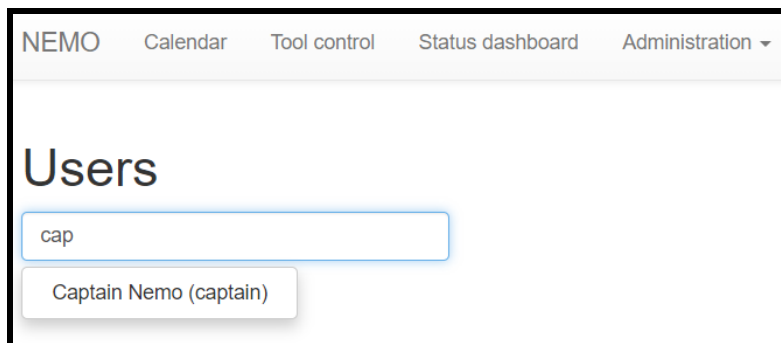

Figure 46.4: *Kiosk username*

Chapter 46 Kiosk

- Click in the badge number dialog box and ensure there are no characters already entered (Figure 46.5).

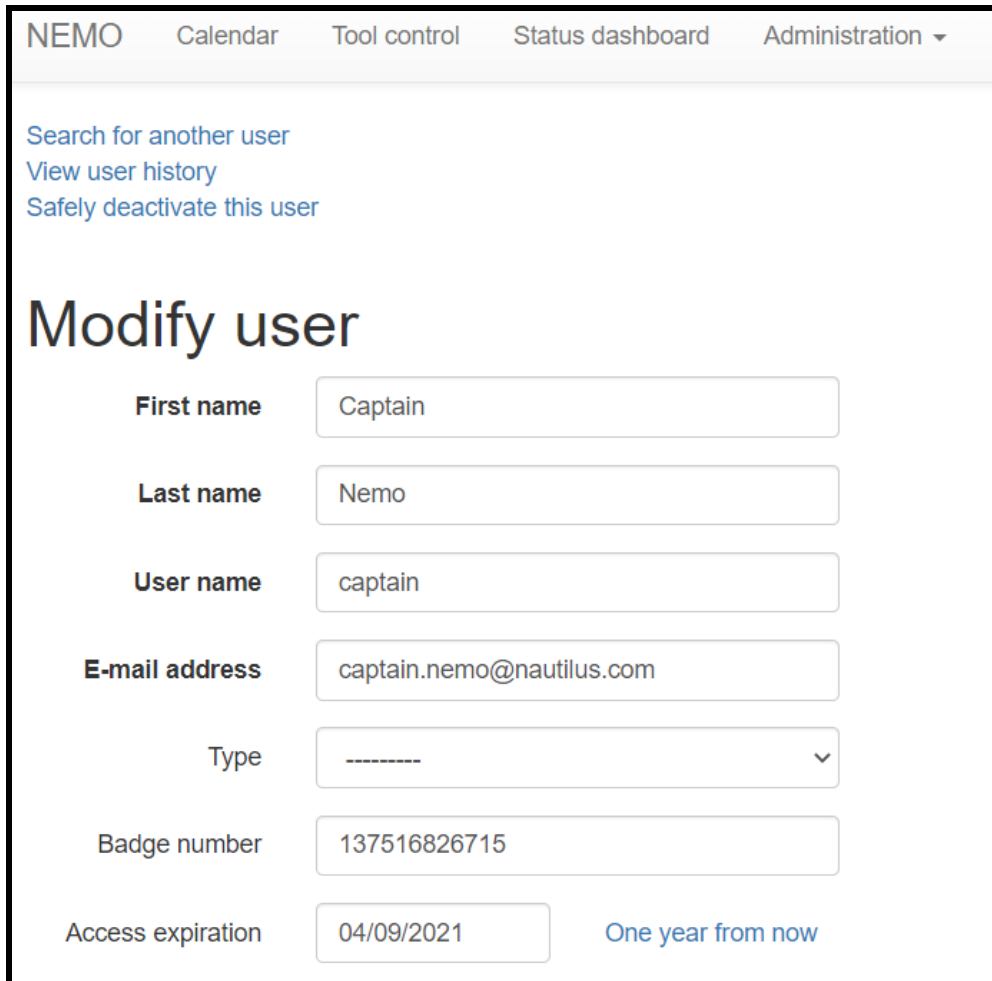

The screenshot shows the NEMO user management interface. At the top, there is a navigation bar with 'NEMO', 'Calendar', 'Tool control', 'Status dashboard', and 'Administration'. Below the navigation bar, there are three links: 'Search for another user', 'View user history', and 'Safely deactivate this user'. The main heading is 'Modify user'. The form contains the following fields:

- First name:** Captain
- Last name:** Nemo
- User name:** captain
- E-mail address:** captain.nemo@nautilus.com
- Type:** ----- (dropdown menu)
- Badge number:** (empty text box, highlighted with a blue border)
- Access expiration:** 04/09/2021 (with a link 'One year from now')

Figure 46.5: Kiosk update user

Chapter 46 Kiosk

- Then, scan the users badge. The badge number will fill in and the user dialog will close (Figure 46.6).

The screenshot shows the NEMO user management interface. At the top, there is a navigation bar with the following items: NEMO, Calendar, Tool control, Status dashboard, and Administration (with a dropdown arrow). Below the navigation bar, there are three links: "Search for another user", "View user history", and "Safely deactivate this user". The main heading is "Modify user". The form contains the following fields:

First name	<input type="text" value="Captain"/>
Last name	<input type="text" value="Nemo"/>
User name	<input type="text" value="captain"/>
E-mail address	<input type="text" value="captain.nemo@nautilus.com"/>
Type	<input type="text" value="-----"/> ▾
Badge number	<input type="text" value="137516826715"/>
Access expiration	<input type="text" value="04/09/2021"/> One year from now

Figure 46.6: Kiosk scan badge

Chapter 46 Kiosk

- An update successful message will appear at the top of the users page (Figure 46.7).

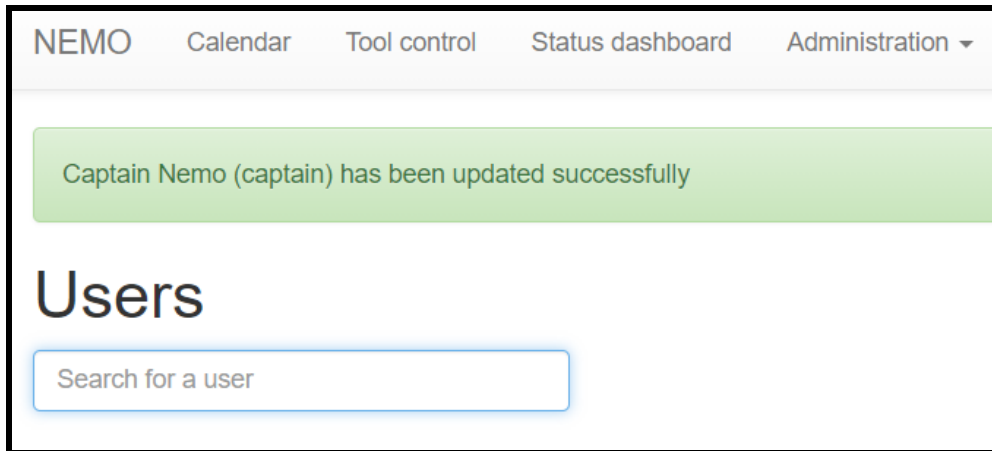

Figure 46.7: *Kiosk update success*

Once the kiosk tablet is confirmed to be operational, repeat the badge update for all users.

46.1.4 Web page

- Kiosk URL format – site-address/kiosk/

In addition, the current occupants of an area can be displayed on the idle tablet by including the occupancy parameter and providing the case sensitive area name.

- Kiosk URL format – site-address/kiosk/?occupancy=Cleanroom

Chapter 46 Kiosk

46.2 Usage

46.2.1 Access and main page

- When idle, the kiosk tablet will display the idle message (Figure 46.8). The idle message can be edited in the kiosk.html page in the kiosk/templates directory.

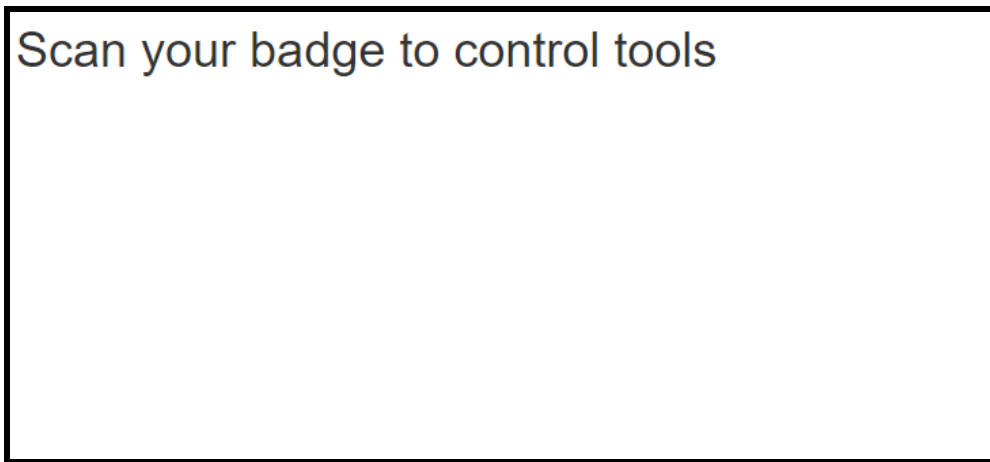

Figure 46.8: *Kiosk idle screen*

- If the usage parameter is present, e.g. site-address/kiosk/?usage, tool usage will be displayed (Figure 46.9).

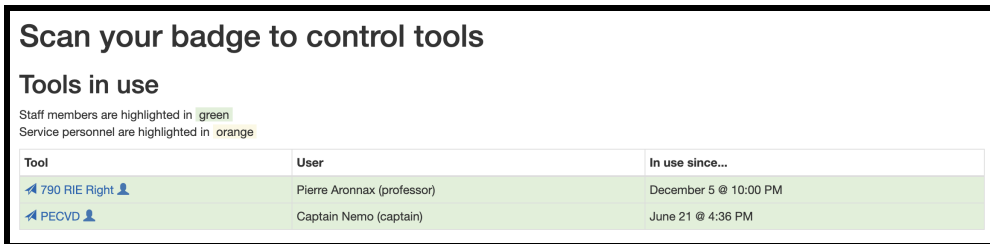

Figure 46.9: *Kiosk idle screen with tool usage*

Chapter 46 Kiosk

- If the occupancy parameter is set for the area, e.g. `site-address/kiosk/?occupancy=Cleanroom`, occupancy will be displayed (Figure 46.10).

Figure 46.12: Kiosk idle screen with combined views

Chapter 46 Kiosk

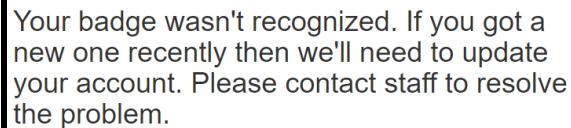

- Scan your badge at the card reader to begin. NOTE: after a badge scan if the user is prompted for additional information and does not respond the page will automatically return to the welcome screen. Wait times vary and are detailed with each prompt below.
 - Each time a badge is scanned, if the option is enabled in Customization → Application (section 40.1) the badge number is displayed on the screen greyed out (Figure 46.13). This is useful when determining why a user's badge isn't opening a door.

137516826715, sent

Figure 46.13: *Kiosk badge scan*

- If the badge isn't recognized, a message will be displayed, and the view will revert to the idle screen after 15 seconds (Figure 46.14).

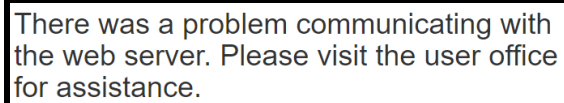

Your badge wasn't recognized. If you got a new one recently then we'll need to update your account. Please contact staff to resolve the problem.

Figure 46.14: *Kiosk badge error*

- If there is a problem with user permissions, a message will be displayed, and the view will revert to the idle screen after 15 seconds (Figure 46.15).

Chapter 46 Kiosk

There was a problem communicating with the web server. Please visit the user office for assistance.

Figure 46.15: *Kiosk permission error*

- Upon success, the kiosk main page will appear (Figure 46.16). The page will revert to the idle screen after 75 seconds. The time remaining appears in the bottom right side of the screen. Anytime user input occurs, the timer is reset to 75 seconds.

Chapter 46 Kiosk

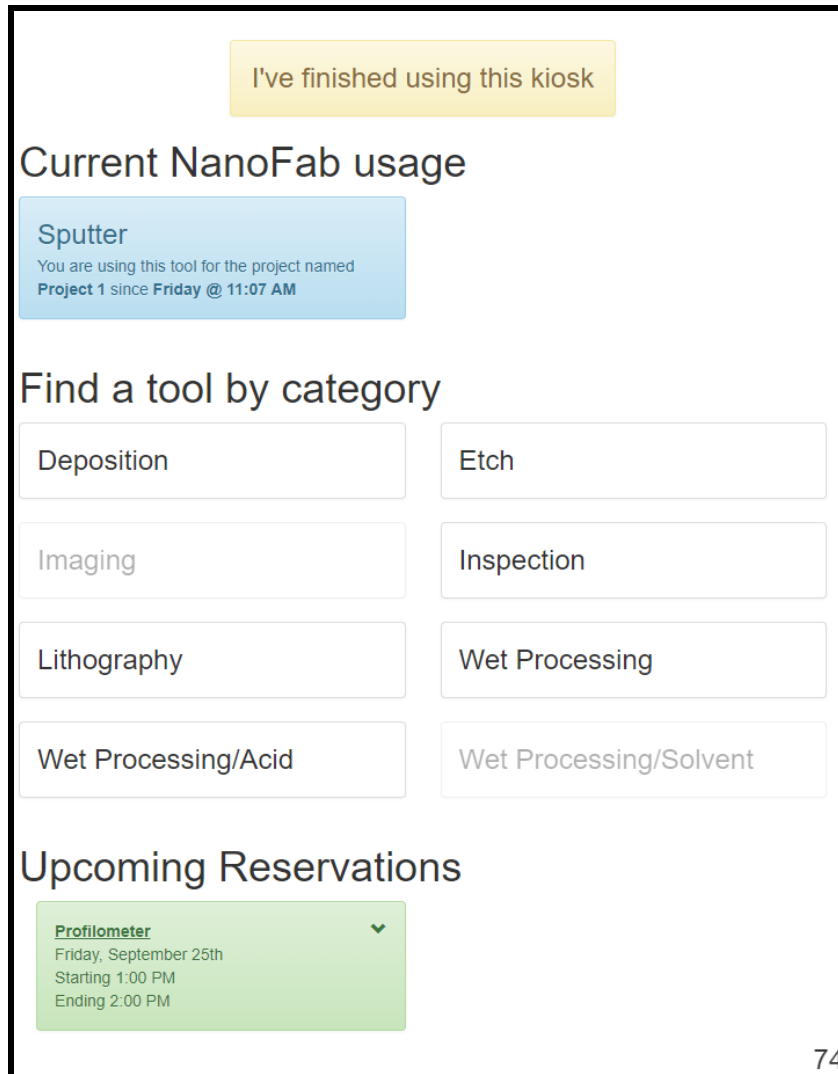

Figure 46.16: Kiosk main page

Chapter 46 Kiosk

- Click the I've finished using the kiosk button to end the kiosk session (Figure 46.17). If no activity is detected in 75 seconds, the view will revert to the idle screen.

Figure 46.17: *Kiosk finished button*

- Current usage is displayed at the top of the screen (Figure 46.18). Click the tool usage of interest to open that tool's detail page.

Figure 46.18: *Kiosk current usage*

Chapter 46 Kiosk

- Tool can be accessed by clicking the category (Figure 46.19). Categories that are in grey mean the user does not have any qualifications on tools in that category. Clicking a category will open the tool selection page for the tool category.

Figure 46.19: Kiosk find tool

- Upcoming reservations are displayed at the bottom of the screen (Figure 46.20). Click the reservation of interest to open that tool's detail page.

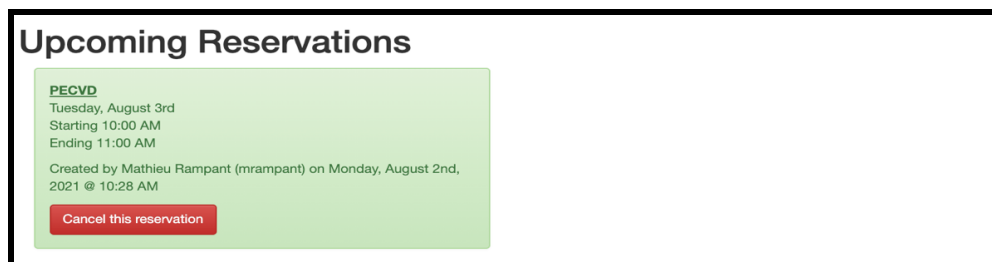

Figure 46.20: Kiosk reservations

Chapter 46 Kiosk

46.3 Tool selection

- Clicking a tool category on the main page will open the tool selection page for the selected category (Figure 46.21).
 - Icons are displayed next to each tool to provide status information and are described in the tool status icons section.
 - Click the tool button to open the tool detail page for the selected tool.
 - Click the 'Go back' button to return to the main page.
 - The page will revert to the idle screen after 60 seconds of no activity.

Figure 46.21: *Kiosk tool selection*

Chapter 46 Kiosk

46.4 Tool detail

- Tool usage features are the same as the mobile view tool control features and are detailed in the tool control section.
- Tool reservation features are the same as the mobile view reservation features and are detailed in the reservations section.
- The tool detail page provides the tool status and buttons to use the tool and to reserve the tool (Figure 1154).

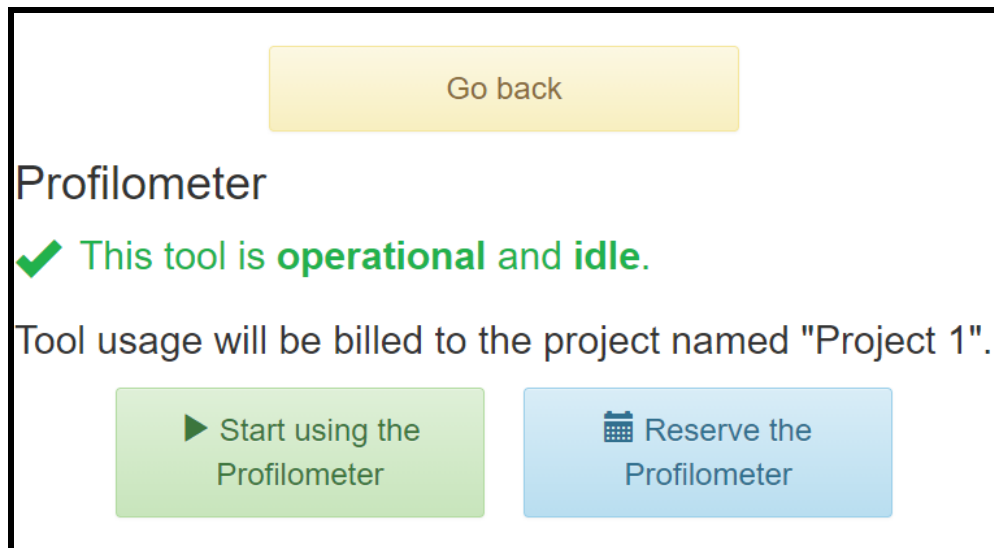

Figure 46.22: Kiosk tool detail idle tool

Chapter 46 Kiosk

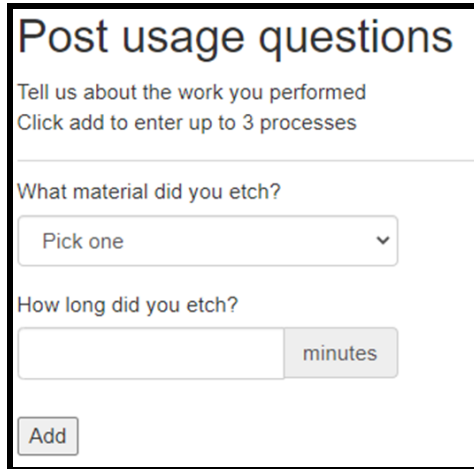

- If a tool is currently in use, usage information, a stop usage button, and a make reservation button are provided (Figure 1155).

Figure 46.23: *Kiosk tool detail tool in use*

Chapter 46 Kiosk

- If the tool has numeric input pre/post usage questions configured (Figure 46.24), clicking in the dialog box will open a keypad for the user to enter the response (Figure 46.25).

Chapter 46 Kiosk

- If the tool has delayed logout configured, clicking in the dialog box will open a keypad for the user to enter the delay time to prevent other users login (Figure 46.26).

Figure 46.26: Kiosk delayed logout dialog

- If a user clicks on a tool they are not qualified to use, information about how to get trained is provided (Figure 46.27).

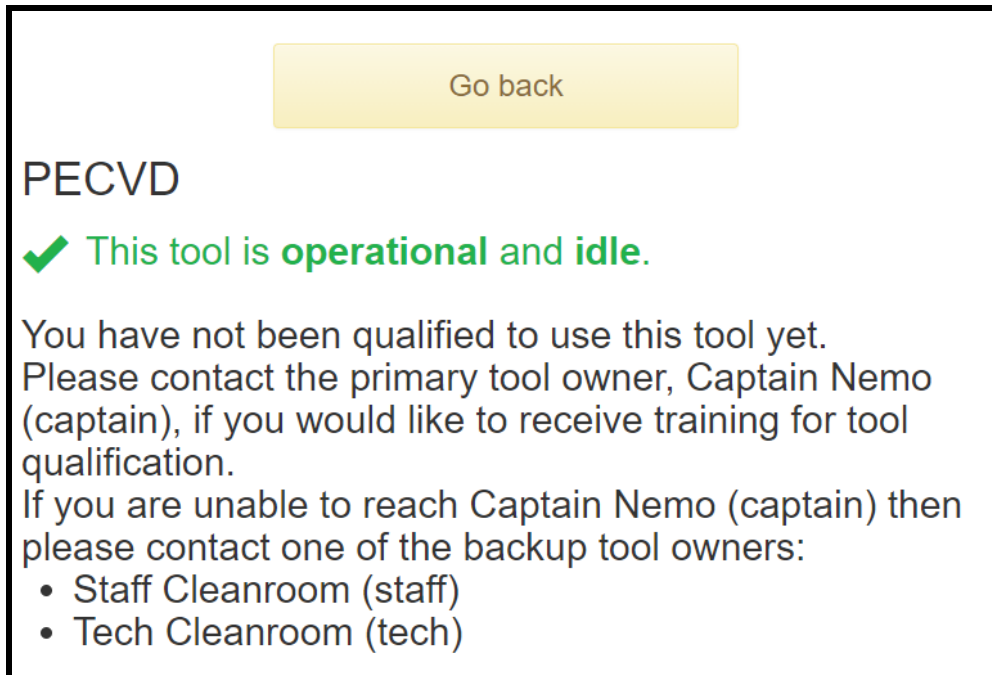

Figure 46.27: Kiosk tool detail not qualified for tool

CHAPTER 47

Entrance tablet

The entrance tablets are used to provide an interface for users to access labs and choose the appropriate project to bill lab time against. Entrance tablets are associated with door that have been defined in the doors table of the database. This method allows multiple entrance and exit tablets to be associated with one area but multiple doors and locks. Tablets or computers can be configured to allow users to sign into an area and open the door (entrance tablet) as well as sign them out when they leave (exit tablet).

47.1 Setup

To enable this feature, you need to have `NEMO.apps.area_access` in `INSTALLED_APPS` in your `settings.py`. The use of an entrance or exit tablet requires a door that is tied to an interlock that will unlock a door and an entrance tablet configured to interface with NEMO and send the appropriate messages.

Chapter 47 Entrance tablet

47.1.1 Door setup

Doors are setup in the doors table of the database. The doors table associates areas with interlocks.

Physical access levels must be established to provide users with a time schedule that they can access a door, see section 42.33. Users are given physical access level permission on the users page.

Areas are created in the areas table of the database and are used to group tools into common spaces, see section 42.8. When a tool is located in an area, the requires area access field in the tools table for the tool of interest should be updated to require the active area access. This will prevent users enabling or disabling the tool unless they are currently logged into the area.

Interlocks are created in the interlocks table, see section 42.27. An interlock must be associated with an interlock card which are created in the interlocks card table.

47.1.2 Entrance tablet user

A dedicated user should be setup for entrance tablets. That user must have the following permissions which are set in the users table of the database:

- NEMO|area access record|Can add area access record
- NEMO|area access record|Can change area access record

47.1.3 Card reader

The entrance tablet uses a badge reader to identify the user. Usually, an identity card that users of the facility already have can be utilized, but there are also tokens that can be used. NEMO defaults to expecting the F2 character to start recording the badge number and another F2 character to end and submit the badge number similar to what is provided by a pcProx Plus card

Chapter 47 Entrance tablet

reader (Figure 47.1). NIST does not endorse this product, but the information is provided as an example of the type of reader that can be used.

Figure 47.1: Entrance tablet card reader example

If your card reader uses different characters, a custom badge reader configuration can be setup in the badge reader table.

Once the card reader is setup, it can be tested by opening notepad or other computer text editor software then scan a badge. A serial number should be seen (Figure 47.2).

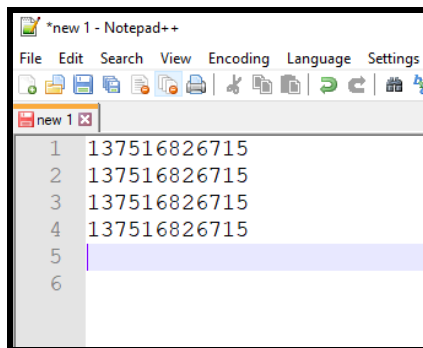

Figure 47.2: Entrance tablet card reader test example

Chapter 47 Entrance tablet

47.1.4 User setup

Now that the door and card reader are setup, each user needs to have their badge number entered into their user profile and be given permission to access the door. This is easily accomplished by setting up a card reader on a computer that has access to NEMO by a staff member. Then follow these steps:

- Navigate to the Administration → Users page (Figure 47.3).

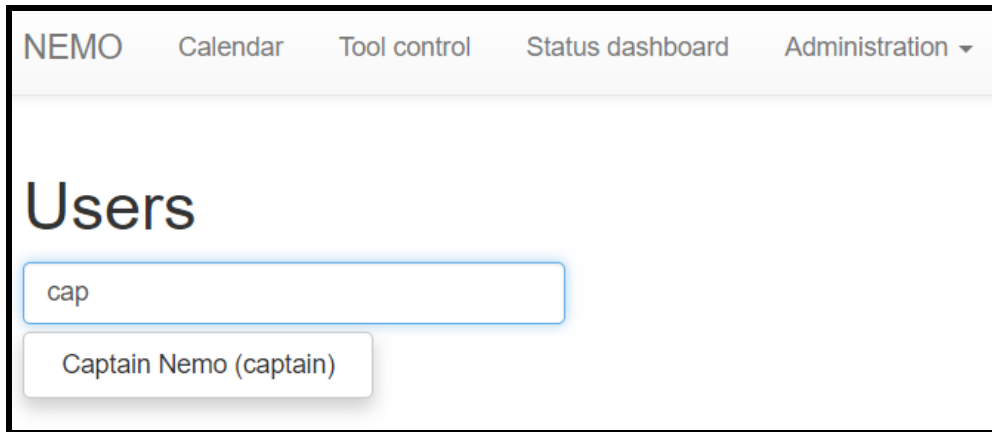

Figure 47.3: Entrance tablet card reader users page

Chapter 47 Entrance tablet

- Enter the user name of interest and click their name when it appears or create a new user if needed (Figure 47.4).

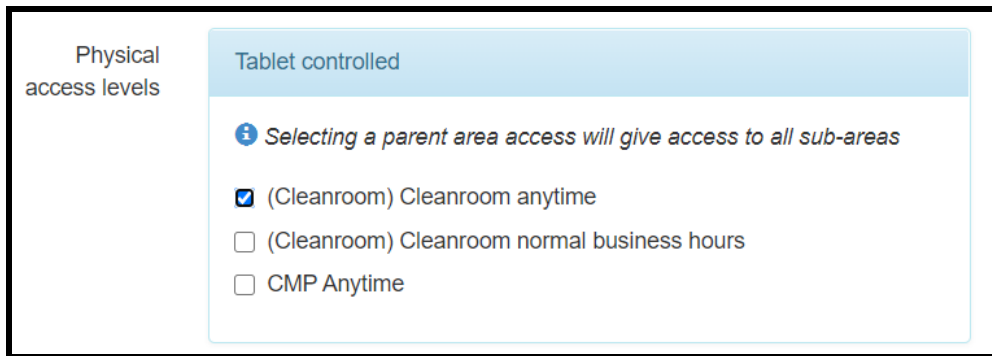

The screenshot shows a web interface for NEMO. At the top, there is a navigation bar with the following items: NEMO, Calendar, Tool control, Status dashboard, and Administration (with a dropdown arrow). Below the navigation bar, the main heading is "Users". Underneath the heading, there is a search input field containing the text "cap". Below the search field, a dropdown menu is open, displaying the search result "Captain Nemo (captain)".

Figure 47.4: Entrance tablet user name

Chapter 47 Entrance tablet

- Scroll down and update the physical access level for the user (Figure 47.5).
Note: staff and super users may already have access by default if the physical access level was set up to allow staff access. In that case, the checkboxes will be checked but greyed out.

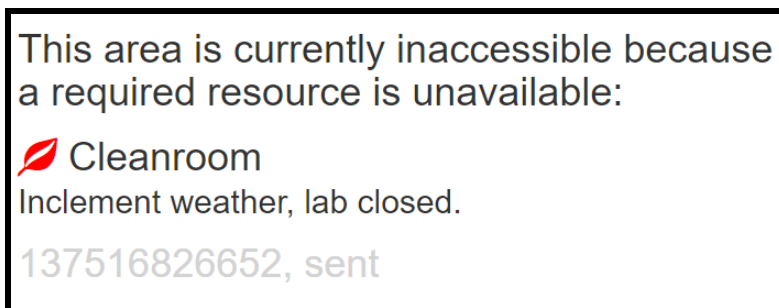

Figure 47.28: Entrance tablet resource error

Chapter 47 Entrance tablet

- Interlock command failed (Figure 47.29). The interlock command failed, you can choose to login anyway (if that option is checked), try again or cancel.

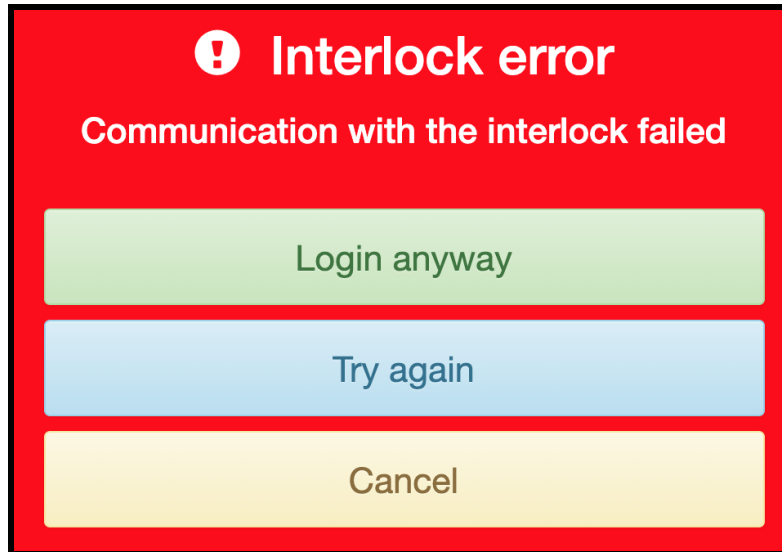

Figure 47.29: Entrance tablet interlock error

47.3.1 Exit Tablet

- When idle, the exit tablet will display the farewell message (Figure 47.30).

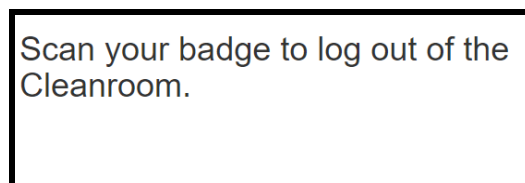

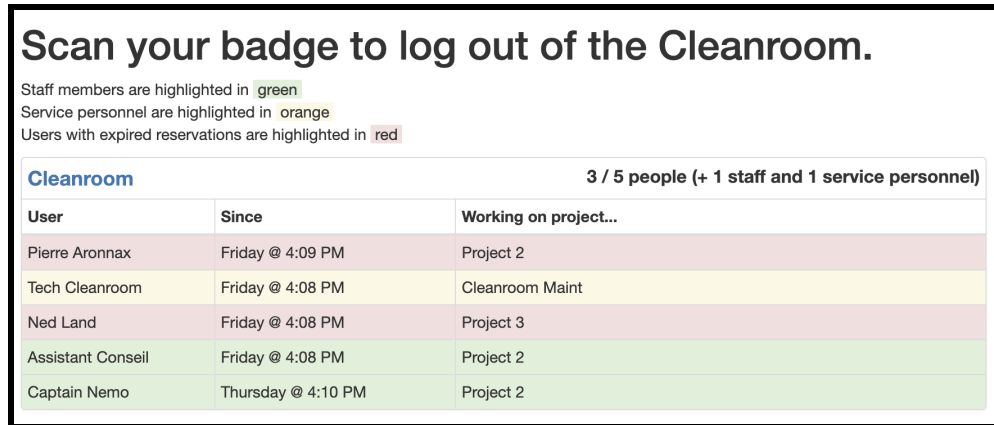

Figure 47.30: Exit tablet farewell screen

Chapter 47 Entrance tablet

- If the occupancy parameter is set for the area, site-address/farewell_screen/1/?occupancy=Cleanroom, occupancy will be displayed as well (Figure 47.32).

Scan your badge to log out of the Cleanroom.

Staff members are highlighted in green
Service personnel are highlighted in orange
Users with expired reservations are highlighted in red

Cleanroom 3 / 5 people (+ 1 staff and 1 service personnel)

User	Since	Working on project...
Pierre Aronnax	Friday @ 4:09 PM	Project 2
Tech Cleanroom	Friday @ 4:08 PM	Cleanroom Maint
Ned Land	Friday @ 4:08 PM	Project 3
Assistant Conseil	Friday @ 4:08 PM	Project 2
Captain Nemo	Thursday @ 4:10 PM	Project 2

Figure 47.31: Exit tablet farewell screen with area occupancy

- Scan your badge at the card reader to begin the log out process.
 - Each time a badge is scanned, the badge number is displayed on the screen greyed out (Figure 47.32). This is useful when determining why a user's badge isn't working properly.

137516826715, sent

Figure 47.32: Exit tablet badge scan

Chapter 47 Entrance tablet

- If the user is a staff member and was logged in on behalf of another user, they will be automatically logged out as well.
- If the user is still logged into a tool in the area, a warning is displayed on an orange background along with a list of tools the user is currently logged into. and the user is logged out of the area (Figure 47.33).

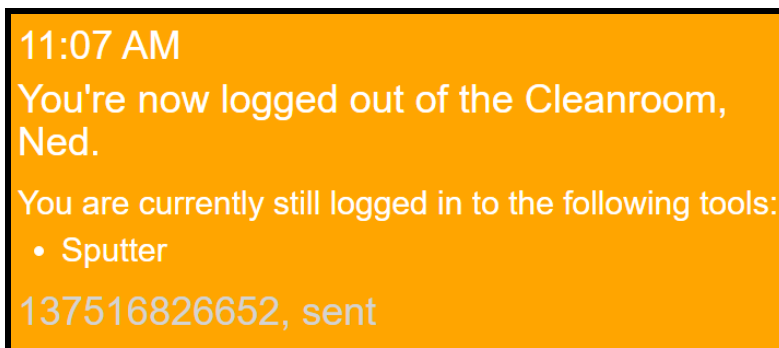

Figure 47.33: *Exit tablet logout warning*

- If the user is not logged into any tools in the area, a green background is displayed along with a success message and the user is logged out (Figure 47.34).

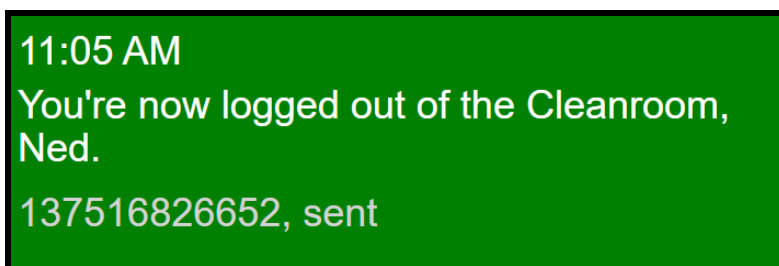

Figure 47.34: *Exit tablet logout*

Chapter 47 Entrance tablet

- If the door is linked to more than one area, upon logging out the user will be presented with the choice to log into another one of the linked areas (Figure 47.35).

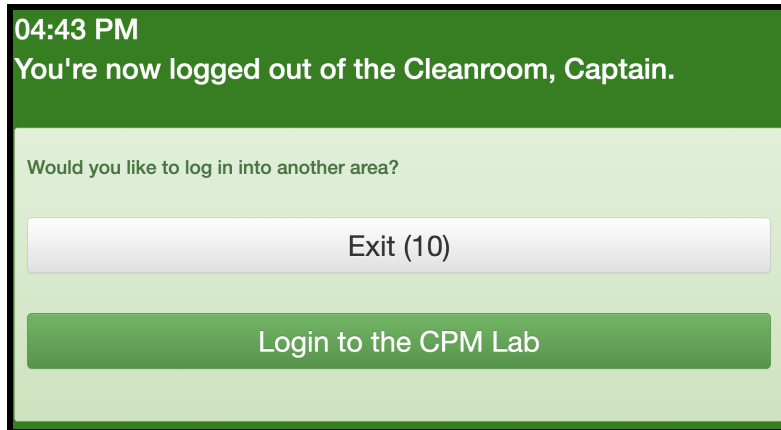

Figure 47.35: Exit tablet logout multiple areas

- If an error occurs a dialog will appear informing the user of the issue. Errors will be displayed for 15 seconds then the page will revert to the farewell screen.
 - * Badge not found (Figure 47.36). Badge numbers are recorded for users in the users page or the users table.

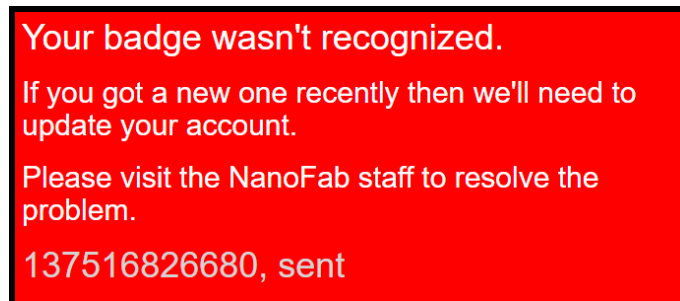

Figure 47.36: Entrance tablet badge error

CHAPTER 48

Configuring NEMO

48.1 Configuring NEMO Settings

NEMO settings are maintained in the settings.py file. Additional information about the settings is available on the NEMO GitHub wiki page at <https://github.com/usnistgov/NEMO/wiki/Settings>.

48.1.1 Authentication Backends

The AUTHENTICATION_BACKENDS key is used to select the between a decoupled “REMOTE_USER” method such as Kerberos from a reverse proxy and LDAP authentication from NEMO itself.

Chapter 48 Configuring NEMO

48.1.2 Templates

The context processors in the templates section of settings.py determines if the logout button is displayed or not. Uncomment the desired processor.

- 'NEMO.context_processors.hide_logout_button', will hide the logout button on the navigation bar.
- 'NEMO.context_processors.show_logout_button', will show the logout button on the navigation bar.

48.2 Identity service

The identity service can be used to connect to external resources such as billing systems or access control systems. The identity service requires the user to create an intermediary service to act as a go between for NEMO and the service.

48.3 NEMO Timed Services

A few features require periodically polling NEMO to trigger events which can be done in two ways, by web request or management command.

48.3.1 Web request

The user that connects must have the 'NEMO|user|Can trigger timed services' permission or the connection will be refused. Make a GET request to trigger the service.

- Email usage reminders – typically runs every hour,
site-address/email_usage_reminders/

Chapter 48 Configuring NEMO

- Reservation reminders – typically runs every 15 minutes,
site-address/email_reservation_reminders/
- Reservation ending reminders – typically runs every 15 minutes,
site-address/email_reservation_ending_reminders
- Scheduled outage reminders – runs every minute,
site-address/email_scheduled_outage_reminders
- Missed reservations – runs every minute,
site-address/cancel_unused_reservations/
- Out of time – runs every minute,
site-address/email_out_of_time_reservation_notification/
- Weekend access – runs every hour,
site-address/email_weekend_access_notification/
- Automatic alert creation for closures – typically runs every day,
site-address/create_closure_alerts/
- Tool qualification management – runs every day,
site-address/manage_tool_qualifications/
- Access expiration reminders – runs every day,
site-address/email_user_access_expiration_reminders/
- Recurring charges management – runs every day,
site-address/ manage_recurring_charges/
- Sensor data management – runs every minute,
site-address/manage_sensor_data/
- Email contract reminders – runs every day,
site-address/email_contract_reminders

Chapter 48 Configuring NEMO

- Area auto logout users – runs every minute,
site-address/auto_logout_users
- Check and update waitlist – runs every minute,
site-address/check_and_update_wait_list

48.3.2 Management command

Management commands can be run directly on the NEMO server and eliminate the authentication and HTTP overhead. Run the required service using “python manage.py service-name” or “django-admin service-name”.

- Email usage reminders – typically runs every hour,
send_email_usage_reminders
- Reservation reminders – typically runs every 15 minutes,
send_email_reservation_reminders
- Reservation ending reminders – typically runs every 15 minutes,
send_email_reservation_ending_reminders
- Scheduled outage reminders – runs every minute,
send_email_scheduled_outage_reminders
- Missed reservations – runs every minute,
cancel_unused_reservations
- Out of time – runs every minute,
send_email_out_of_time_reservation_notification
- Weekend access – runs every hour,
send_email_weekend_access_notification
- Automatic alert creation for closures – typically runs every day,
create_closure_alerts

Chapter 48 Configuring NEMO

- Tool qualification management – runs every day,
manage_tool_qualifications
- Access expiration reminders – runs every day,
send_email_user_access_expiration_reminders
- Recurring charges management – runs every day,
manage_recurring_charges
- Email contract reminders – runs every day,
send_email_contract_reminders
- Sensor data management – runs every minute,
manage_sensor_data
- Area auto logout users – runs every minute,
area_auto_logout_users
- Check and update waitlist – runs every minute,
check_and_update_wait_list

For example, to process missed reservations, run: “python manage.py cancel_unused_reservations” or “django-admin cancel_unused_reservations”

48.3.3 Systemd tasks

Examples of systemd tasks for each of the timed services is available in the [resources/systemd](#) folder. The scripts make use of the docker command and assume the container running nemo is named “nemo”. Feel free to adapt those to your specific needs.

Chapter 48 Configuring NEMO

48.4 Email logging

All emails sent by NEMO are logged for audit purposes and accessible in Detailed administration → Email logs. If you are a developer, make sure to use the `send_email` function available in `utilities.py` to benefit from this feature.

CHAPTER 49

NEMO Release notes

49.1 **Release 5.5.0**

Upgrade notes

- IMPORTANT ORACLE users only: due to a bug in the third party library auditlog, you need to follow instructions for 2 step migration highlighted here: <https://django-auditlog.readthedocs.io/en/latest/upgrade.html>
- 2 timed services need to be added, nemo_check_update_wait_list and nemo_email_usage_reminders for the new tool waitlist operation mode and the scheduled outages email reminders, respectively. Systemd services are available in the systemd folder
- 2 email templates need to be added for those features as well, in Customization -> File & email templates: wait_list_notification_email.html and scheduled_outage_reminder_email.html, available in the emails folder

Chapter 49 NEMO Release notes

New features

- Tools can now operate in 3 modes: regular/waitlist/hybrid (thanks JPL Microdevices Laboratory for the contribution!):
 - Regular mode is the normal/previous mode of operation and the default for all tools
 - Waitlist mode allows users to sign up on a list when someone is already using the tool, and to be notified when it's their turn. Tool reservations are not allowed in waitlist mode.
 - Hybrid mode is similar to waitlist mode except that reservations are still allowed and take precedence over the waitlist.
 - There are customization options to specify buffer times after which a spot is lost and to determine if the tool should be available if it's close to a reservation time.

Improvements

- Added settings in Customization -> Calendar to specify the time format used for the events (thanks @r-xyz for the contribution!)
- Reporting a problem and adding a comment for a tool is now available in the Kiosk (Thanks Stanford SNF for the contribution!)
- HTML is now allowed in alert contents
- In Detailed administration -> Configuration, added new column to show whether the linked tool is visible and added filter
- Added display order to documents throughout NEMO (Tool documents, User documents, Project documents, Contract documents, Safety item documents, Knowledge base documents).
- Added display order for Safety items in the same category and Knowledge base items

Chapter 49 NEMO Release notes

- Project usage will now show all usage by default when nothing is selected (selecting a user, project or application is not required anymore)
- Added scheduled outage reminders to be set on tool/area/resource outages (Thanks Polytechnique Montreal for the contribution!).
- Updated resource outage page to allow recurring outages.
- Added a “Mark as applied” button on adjustment requests to signal that the adjustment has been dealt with (Thanks Cornell NanoScale Facility for the contribution!).
- Added an “Adjust charge” button on adjustment requests to change the charge itself based on the approved dates (Thanks Cornell NanoScale Facility for the contribution!).

Bug fixes

- Fixed sensors not accepting 0 value
- Fixed dismissible alerts for users not showing the option to actually dismiss it
- Fixed validation error in transfer charges showing the exception page instead of in the form itself

Libraries

- django-auditlog 2.3.0 -> 3.0.0
- djangorestframework 3.14.0 -> 3.15.1
- Pillow 10.2.0 -> 10.3.0

Chapter 49 NEMO Release notes

49.2 Release 5.4.1

Bug fixes

- fixed icons not showing in sidebar

49.3 Release 5.4.0

This new version of NEMO does not contain any new functionality, but the codebase has been entirely reformatted using djlint. This means that from now, all code and contributions should be formatted using djlint. To make this automatic, configuration files and pre-commit hooks have been added (see below).

For developers

1. Run `pip install ./[“dev-tools”]` to install pre-commit, black and djlint
2. Install pre-commit hooks by running `pre-commit install`
3. Pull the latest version and run `pre-commit run --all-files` to double check (everything should pass)

Upgrade notes (Forks only)

1. Merge all changes up to NEMO 5.3.1
2. Run `pip install ./[“dev-tools”]` to install pre-commit, black and djlint
3. Install pre-commit hooks by running `pre-commit install`
4. Create a new branch in your fork git checkout `-b <branch_name>`
5. Run pre-commit hooks on the entire codebase `pre-commit run --all-files`
6. Merge NEMO 5.4.0
7. Resolve any potential conflicts by accepting your version over NEMO

Chapter 49 NEMO Release notes

49.4 Release 5.3.1

Bug fixes

- fixed calendar/tool control bug when using the search bar and it takes 2 searches to show the correct feed
- fixed capitalization in tool customization page
- fixed order of after tool logoff popups

49.5 Release 5.3.0

New features

- Added support for pre-usage questions (thanks Stanford SNF for the contribution!).
- Added support for multiple areas in area access tablet screen, i.e. a door can provide entry to more than one area (thanks UPenn Singh Center for the contribution!).
- Added new Formula type of Post usage question, allowing more flexibility when charging for consumables or for converting units based on other fields. Formula type questions are hidden from the user and evaluated after the user answers post usage questions. They can be nested and call another formula results, and they can also be used on a group question in which case the variable becomes a list of all the values (allowing to use `sum(gold_used)` for example, if the user is asked how much gold they used for each of their processes).
- Added User and Staff knowledge base pages, where facilities can list documents, links, and other information for users and staff to browse (for example procedures for staff, training for users etc.).

Chapter 49 NEMO Release notes

Improvements

- Made the email preview button in the broadcast email feature scroll to the preview section.
- Now showing access expiration date in users' page.
- Tool superusers can now see the list of qualified users in tool control and there is a new customization option to display that list to everyone. #201
- Added an option (Customization -> Tools) to allow everyone to see the list of qualified users in tool control
- Added options (Customization -> Calendar) to get a confirmation dialog before creating a reservation. It can be set globally and overridden individually by users in their preferences (thanks @abuckles-uci, @crprice and Alyssa Sheffler from UC Irvine for the contribution!).
- Improved menu layout with smaller sizes. The menu will collapse into the hamburger menu when the menu items break the layout (for long names for example).
- Added staff charge info on collapsed menu bar.
- Updated most related fields in detailed admin (user, project, etc.) to use data lists instead of basic drop-downs.
- Now displaying the user's main email address in their preferences page.
- Checking for duplicate emails in email broadcast feature so it's not sent twice to the same address.
- Added support for consumable_id in post usage questions to identify consumable uniquely (since consumable name is not unique).
- Create a new impersonate permission so it can be given to specific users without the need for them to be super admins.

Chapter 49 NEMO Release notes

- Added a label on the calendar (top left corner) to show which tool/area/selection the user is looking at. [#204](#)
- Added option to only show tool documents to qualified users (thanks Polytechnique Montreal for the contribution!).
- Added option to allow everyone to email users with an upcoming reservation (thanks Stanford SNF for the contribution!).
- 0 min training records are now allowed.
- Sensor chart time x-axis formats can now be customized in Customization -> Sensor data.
- Added support for read_coils in sensors' formula (thanks UPenn Singh Center for the contribution!).
- Adjustment notifications are now automatically deleted if an adjustment is deleted.
- Added date filtering by creation time for alerts in detailed admin.
- Added training customizations to limit training to just one type, and to allow trainers to set the training date.
- Projects not allowing consumable withdrawals will not be shown in the checkout page anymore.
- Self checkout of consumables can now be limited to only certain users (thanks Stanford SNF for the contribution!).
- Badge number will not be shown anymore when badging in and out of area and kiosk. Previous behavior can be restored in Customization -> Application

Chapter 49 NEMO Release notes

- Added an option to offer the user to logout of the area they are logged in when disengaging a tool (thanks UPenn Singh Center for the contribution!).
- Projects have a new option to not allow staff charges.
- Optimized performance and load time on all pages by refactoring the queries for notifications and customizations.
- Tests will now be published to PyPi as part of the NEMO package. This will allow other plugin developers to easily run NEMO's tests.
- Now limiting the number of workers for gunicorn to a maximum of 9 to avoid issues with resources, database connections and overall performance.

API

- Fixed error with Configuration & Resource API endpoints when it would break if filtering due to many to many relationship not being supported in filters
- Tool status endpoint now requires the can view tool permission
- Updated extra fields in API (mostly related fields like users in projects, permissions etc) to not be required and allow null

Bug fixes

- Fixed a bug when reloading the qualified user list in tool control on mobile devices
- Fixed issues with some models when users are given read only permissions in detailed admin
- Fixed a major bug removing the user office role when updating their profile information in Administration -> Users

Chapter 49 NEMO Release notes

- Fixed a Kiosk issue with links in tooltip that would display NEMO's main page within the kiosk page (thanks @r-xyz for the contribution!). [#202](#)
- Fixed unique constraint on interlock Card/Channel preventing users from creating interlocks for different unit_id/bank.
- Fixed potential CSRF vulnerability when deleting a buddy request.
- Fixed multi email field issue when using the API and failing validation with empty string as value.
- Fixed inactive users not being able to be used in the usage data history filter.

Libraries

- cryptography 41.0.7 -> 42.0.5
- Django 3.2.23 -> 3.2.25
- python-dateutil 2.8.2 -> 2.9.0
- pytz 2023.3 -> 2024.1

49.6 [Release 5.2.0](#)

New features

- Users logged in outside their allowed area access (for example users staying after hours in an area when they only have business hours access) will now be shown in red in the status dashboard and other pages showing occupancy like the Jumbotron (thanks Princeton Micro/NanoFabrication Center for the contribution!).

Chapter 49 NEMO Release notes

- Added customization setting in Customization -> Calendar to show configuration settings the user picked directly in the reservation feed, similar to the Configuration agenda feed (thanks UPenn Singh Center for the contribution!).
- Added customization setting in Customization -> Status dashboard to hide projects the user is working on in the area occupancy tab (thanks Cornell NanoScale Facility for the contribution!).
- Added new broadcast email option to send an email to all Principal investigators. It can be filtered to only be sent to PIs of active projects, and can also be filtered down to a subset of selected projects (thanks Cornell NanoScale Facility for the contribution!).

Improvements

- Updated jumbotron, kiosk and area access templates to use minified versions of js and css files
- Added customization setting in Customization -> Tools -> Tool control for showing task details by default in tool control (thanks @abuckles-uci for the contribution!). [#185](#)
- Updated configuration history to include slot number in item name when using multiple settings in the same configuration
- Added users to Permission and Group in Detailed administration
- Updated reservation flow on mobile and kiosk to have the user pick a date and time before showing configuration and reservation questions, to be consistent with the desktop calendar flow (thanks Stanford SNF for the contribution!).
- Added direct link to the tool control page on the tool information tooltip displayed in the status dashboard. [#191](#)

Chapter 49 NEMO Release notes

- Optimized access request queries to improve load time on the access requests page
- Added favicon link in all base templates
- In accounts and projects page, the search results will now have [INACTIVE] before the project or account name and inactive ones will be at the bottom of the list.

API

- Added project application iexact filter to allow case insensitive search for a project by its application identifier.
- Added users to authentication permissions and groups endpoints. This allows viewing and setting the list of users through the API.
- Added users and principal_investigators to projects endpoint. This allows viewing and setting them through the API.
- Reservation's question_data field can now be null (thanks @NickiShaw for the contribution!). [#194](#)
- Added InterlockCardCategories, InterlockCards and Interlocks endpoints.
- Added /tool_status/ endpoint to return useful current tool information (thanks Cornell NanoScale Facility for the contribution!):
 - id (integer)
 - name (string)
 - category (string)
 - in use (boolean)
 - visible (boolean)
 - operational (boolean)

Chapter 49 NEMO Release notes

- problematic (boolean)
- problem descriptions (string: list of problems)
- customer id (integer)
- customer name (string: first name last name)
- customer username (string)
- operator id (integer)
- operator name (string: first name last name)
- operator username (string)
- current usage id (integer)
- current usage start (datetime)
- outages (string: list of current outages)
- partial outages (string: list of current partial outages)
- required resources unavailable (string: list of unavailable resources the tool fully depends on)
- optional resources unavailable (string: list of unavailable resources the tool partially depends on)

Bug fixes

- Fixed bug when searching user preferences in Detailed administration
- Fixed empty string being recorded as a valid answer for required post usage questions
- Fixed tool documents order not being respected in tool control page (reverse order of date uploaded)
- Fixed error in training when entering a wrong tool name or group name would throw an exception

Chapter 49 NEMO Release notes

Libraries

- Django 3.2.22 -> 3.2.23
- django-filter 23.4 -> 23.5
- Pillow 10.1.0 -> 10.2.0

49.7 Release 5.1.0

Upgrade notes

- Be aware that due to the reservation/configuration model changes, depending on the number of reservations and configurations in your instance, the update to NEMO 5.1.0 can take up to 10-15 minutes.

New features

- Added long awaited color-coded configuration agenda feed in Calendar! Colors are set in Detailed administration -> Configuration -> Calendar colors (thanks UPenn Singh Center and Stanford SNF for the contribution!) [#165](#)
- Added transfer of charges from one project to another. The option needs to be enabled in Customization -> Projects and accounts (thanks Stanford SNF for the contribution!)
- Added new parameters to display tool usage and/or alerts in Kiosk main page (thanks @r-xyz for the contribution!) [#178](#)
- Added Customization options to rename main menu items: Calendar, Tool Control, Safety, Requests (Thanks @abuckles-uci for the contribution!) [#181](#)

Improvements

Chapter 49 NEMO Release notes

- Allowing to change outage dates when looking at outage details in the calendar. [#171](#)
- Consumable categories are now collapsible in supplies page. They can be set to either expanded or collapsed in Customization and are expanded by default (thanks Stanford SNF for the contribution!)
- Added customization to send tool problems and updates to superusers. [#173](#)
- Now allowing 0 as a valid integer in customization integer lists

API

- Added related object names as valid filters (i.e. tool and tool_id are both valid for filtering, not only tool_id)

Libraries

- cryptography 41.0.4 -> 41.0.7
- django-filter 23.3 -> 23.4
- Pillow 10.0.1 -> 10.1.0

49.8 **Release 5.0.0**

- This new version of NEMO does not contain any new functionality, but the codebase has been entirely reformatted using black. This means that from now on NEMO's code will be using spaces instead of tabs, and all code and contributions should be formatted using black with the option `-line-length=120`
- Both NEMO and Splash Pad containers are now running Python 3.11

Chapter 49 NEMO Release notes

Upgrade notes (Forks only)

If you have a fork of NEMO, the easiest way to update is the following:

1. Merge all changes up to NEMO 4.7.1
2. Create a new branch in your fork
3. In PyCharm, change tabs to spaces in Settings -> Editor -> Code Style -> Python -> uncheck “use tab character” and install and set up black in Settings -> Tools -> Black with the `--line-length=120` parameter
4. Run black on the entire *.py project files
5. Merge NEMO 5.0.0
6. Resolve any potential conflicts by accepting your version over NEMO

49.9 Release 4.7.1

Bug fixes

- Fixed calendar issue when looking at qualified tools only

49.10 Release 4.7.0

Upgrade notes

- For the area auto logout feature, a timed service action/systemd service needs to be enabled on the server. See `nemo_auto_logout.service` and `nemo_auto_logout.timer` files in the systemd resource folder
- If your are using Django Rest Framework’s pagination, change the `DEFAULT_PAGINATION_CLASS` to “`NEMO.rest_pagination.NEMOPageNumberPagination`” to be able to override page size on the fly using the `page_size` request parameter

Chapter 49 NEMO Release notes

New features

- Added the ability to set an auto-logout time for each area. A timed service task needs to be enabled for this feature to work (thanks Cornell NanoScale Facility for the contribution!).
- Added checkboxes in calendar view to allow viewing more than one tool/area at a time (thanks Stanford SNF for the contribution!)
- Configuration agenda's near future days can now be configured in Customization -> Tools (thanks Polytechnique Montreal for the contribution!)
- Added an option in Customization -> Tools to allow tool superusers to be exempt from reservation policy rules (thanks UPenn Singh Center for the contribution!)
- A topic has been added to the email subject in the broadcast email feature. This topic will be the tool, project or account selected to send an email about. The topic is not added when more than one tool/project/account is selected (thanks UPenn Singh Center for the contribution!)
- Consumables can be set to be checked out by regular users (True by default). This only affect instances where consumable self checkout is enabled (thanks Stanford SNF for the contribution!)
- Added support for banks for NCD/ProXR interlocks and support for relay 0 to turn on/off all relays (thanks Stanford SNF for the contribution!)
- Reviewers for adjustment requests and access requests can now be set on the relevant tool/area and defaults to all facility managers if left blank. This replaces the manager's preference fields to limit adjustment requests (thanks Stanford SNF for the contribution!)

Improvements

Chapter 49 NEMO Release notes

- In status dashboard, jumbotron and tool status, now displaying the date using Django's MONTH_DAY_FORMAT setting (default to "October 9th"). See [#159](#)
- Added the ability to attach pictures when using the broadcast email feature (thanks UPenn Singh Center for the contribution!)
- Added a resizing limit for attached images when reporting a tool problem (thanks UPenn Singh Center for the contribution!)
- Added a setting to send new tool problems to all qualified users (thanks USC Nanofab for the contribution!)
- For PIs in usage page, now showing user's own usage by default, instead of all managed projects (thanks Cornell NanoScale Facility for the contribution!)
- Showing project PIs in edit user page when available
- For temporary access requests, the user office will not be cc'd anymore
- Freed time notifications will now be sent when a reservation is missed or shortened
- Added service personnel checkbox on edit user page to give users the service personnel role
- Added notes for consumables, updated user interface to show both notes and quantity left (thanks Stanford SNF for the contribution!)
- Added label support for dynamic form (post usage questions, reservation questions) for radio buttons, checkboxes and dropdown types. This allows to show different values than the one being submitted
- Added actions to enable/disabled multiple interlock and sensor cards at the same time

Chapter 49 NEMO Release notes

API

- Added exact filters wherever iexact was used
- Added filters for validated and validated_by for all charge types
- Added readonly PIs field in Projects endpoint
- When using pagination and the new NEMOPageNumberPagination class, the page size can be changed on the fly by using the page_size request parameter
- Pagination is now automatically bypassed for any requests not rendered using the Browsable API (except if the page_size parameter is used explicitly in the request). Consequently, exporting in json, excel, etc. will return all results and be less confusing.

Bug fixes

- Fixed a bug in staff status not showing closures when the closure is on the last day of the period the user is looking at
- Fixed conditional expression in tool status wrongly showing usage data history tab to staff even when no post usage questions are set ([#164](#))
- Fixed API issue when data would not be rolled back when bulk saving users with integrity errors (non unique username for example)
- Fixed tab issue in requests not showing the correct default tab in some cases

Libraries

- cryptography 41.0.2 -> 41.0.4
- Pillow 10.0.0 -> 10.0.1 (vulnerability)
- Django 3.2.21 -> 3.2.22 (vulnerability)
- django-filter 23.2 -> 23.3

Chapter 49 NEMO Release notes

49.11 **Release 4.6.3**

Bug fixes

- Fixed non visible staff in staff status throwing error
- Fixed consumable withdrawal not being validated before saving them
- Fixed a bug when forcing another user out and the wrong user's reservation is shortened
- Fixed bug when managers would get notifications for adjustment requests but not see them in the list

Improvements

- Added user preferences setting for facility managers to limit areas to receive adjustment request for

49.12 **Release 4.6.2**

Improvements

- updated colors for status dashboard, jumbotron and occupancy

49.13 **Release 4.6.1**

Bug fixes

- Fixed staff status previous button not working
- Fixed customization name not allowing more than 50 characters
- Fixed case when no one could receive adjustment notifications if all managers have a restricted list of tools for adjustments (sending to all if that's the case)

Chapter 49 NEMO Release notes

- Fixed deprecated ANTI_ALIAS property from Pillow

Improvements

- Added Customization to not show areas in use in usage reminder notification email

49.14 Release 4.6.0

Upgrade notes

- If using the consumables/supplies self-checkout feature, a dashboard icon (landing page choice with url “/consumables/” in detailed administration) needs to be added for regular users to have a link to it (one is available in the icons folder)
- To enable the new contracts sub-plugin:
 - “NEMO.apps.contracts” needs to be added to “INSTALLED_APPS” in settings.py.
 - A timed service job needs to be created for contract reminders to be sent (an example is available in the systemd folder).

New features

- Added new contracts sub-plugin, where Service contracts, Procurements and Contractor agreements can be tracked:
 - Service contracts and contractor agreements have a reminder date and facility managers receive emails when they are due for renewal
 - Contractor agreements are linked to either Service contracts or Procurements
 - Service contracts and contractor agreements can be renewed (a new item is created with year +1)

Chapter 49 NEMO Release notes

- Each list can be exported in CSV format
- Added an option to let user self-checkout consumables and supplies in Customization -> Application (thanks Cornell NanoScale Facility for the contribution!)
- In Area access plugin, added an option to automatically log users out when they are trying to login to the same area again, so tablets can be used for both entrance and exit (thanks UPenn Singh Center for the contribution!)
- Added tool freed time notifications, allowing users to set a list of tools they want to be notified for, when time is freed up either from a cancellation or moving a reservation. Users can set the tool list in preferences, and set the minimum time and days in the future to trigger the notifications (thanks Princeton Micro/NanoFabrication Center for the contribution!)
- Added new setting in setting.py called “NEMO_EMAIL_SUBJECT_PREFIX” to add a prefix to all NEMO related emails (thanks UPenn Singh Center for the contribution!).

Improvements

- Updated colors and contrasts, added label and better support for screen readers and accessibility in NEMO (thanks to Cornell NanoScale Facility detailed report on accessibility).
- Added task resolution time to task update emails
- Added item id in billing api
- Added option to set default badge reader configuration and fixed a bunch of issues when only using send key and not using any recording key (thanks UPenn Singh Center for the contribution!)

Chapter 49 NEMO Release notes

- Added option to retry sensor data reading before triggering a no data alert
- Added alert logs in sensor categories, limited to the last 30 alerts
- Added flag on tools to prevent qualification from ever expiring (thanks Polytechnique Montreal for the contribution)
- Optimized status dashboard loading time and made first page load asynchronous.
- Added an option in preferences for facility managers to limit tools they are receiving/viewing adjustment requests for.
- Added an option in preferences for facility managers, technical staff and service personnel to either limit or add tools they want to view maintenance records for and view task notifications for. This is particularly useful with facilities with multiple managers handling separate sets of tools (thanks UPenn Singh Center for the contribution!)
- When technical staff have a reservation and are done working on a tool, they will now be offered the option to free up the remaining time on their reservation.
- Added customization setting to allow Technical staff, User office or Accounting staff to see the details of a staff absence (type of leave, notes) in the staff status tab of the status dashboard.
- Updated NEMO references in email templates to automatically use the site title customization (thanks @r-xyz for the contribution!).
- Reservation start and end date can now be changed manually in the reservation details page (only by the reservation user or staff). Thanks @jat255 for the suggestion.

Chapter 49 NEMO Release notes

Bug fixes

- Fixed badge number issue when importing users from API (wrongly rejecting duplicates)
- Fixed bug when trying to validate an ongoing staff charge
- Fixed API file import issues when redirecting (for example when redirecting http -> https)
- Fixed sensor reading not allowing to read at address 0
- Fixed trying to open the door when no interlocks are set
- Fixed unanswered post usage question email when forced off by staff to be sent by user office email (instead of site email). Thanks @r-xyz for the contribution!
- Fixed delayed splash_pad container removal (thanks @r-xyz for the contribution!).

Libraries

- Django 3.2.19 -> 3.2.20 (vulnerability)
- cryptography 40.0.1 -> 41.0.2
- django-auditlog 2.2.2 -> 2.3.0
- django-filter 23.1 -> 23.2
- drf-excel 2.3.0 -> 2.4.0
- Pillow 9.5.0 -> 10.0.0
- pymodbus 3.2.2 -> 3.3.2
- requests 2.28.2 -> 2.31.0 (vulnerability)

Chapter 49 NEMO Release notes

49.15 Release 4.5.5

Bug fixes

- Fixed trying to increment tool counter when forcing someone off a tool
- Fixed issue when trying to disable a tool and a interlock error happens (“disable anyway” was not working)
- Fixed issue when user office staff members are not able to force a user off a tool
- Fixed issue with post usage questions not showing as empty when they should be
- Fixed issue when using mocked request (in emails) and the full url method was not working
- Fixed issue with related fields not being read correctly when using CSV api import
- Fixed adjustment request breaking when the user is staff and has an ongoing staff charge
- Fixed already adjustment charge still showing in my usage and in drop-down when creating new adjustment request
- Fixed issue when deleting sensors in detailed admin and there is too much data and the system times out

Improvements

- Added customization to show an “edit charge” button in approved adjustment requests

Libraries

- Django 3.2.18 -> 3.2.19 (vulnerability)

Chapter 49 NEMO Release notes

49.16 [Release 4.5.4](#)

Bug fixes

- fixed Server Error due to display of reservation questions.

49.17 [Release 4.5.3](#)

Bug fixes

- fixed adjustment tab issue when access requests are not enabled simultaneously

49.18 [Release 4.5.2](#)

Bug fixes

- fixed interlock being lost on tool or door save
- added setting to disable Stanford interlock reply validation

49.19 [Release 4.5.1](#)

Bug fixes

- fixed a bug with PostgreSQL when migrating and creating the news about the new version of NEMO

49.20 [Release 4.5.0](#)

Upgrade Notes

Chapter 49 NEMO Release notes

- The new adjustment request feature needs to be enabled in Customization → User request and at least one user with the facility manager role needs to exist (for approval).
- A email template for the new adjustment request feature can be found in [the emails folder](#).

New features

- Added Tool qualification groups allowing to qualify a user on a group of tools at the same time. The feature is currently available in the Qualification and Training pages.
- Merged staff charges and remote work menu items. Both can now be found under Administration → Remote work.
- Big expansion of the REST API now allows creating new users, accounts, projects etc. Actions available in the REST API are Creation, Update, Partial Update and Deletion. Thanks MIT.nano for the contribution!
- Added adjustment requests:
 - If enabled in Customization, users can request adjustments from their usage page or from the global requests link.
 - The type of charges allowed is customizable, currently tool usage, area access and missed reservations are available.
 - Time limit for requesting adjustments is configurable and defaults to 2 weeks.
 - PIs can request adjustments for any eligible charges on their projects.
 - Adjustment requests can be exported in detailed administration and request page.
 - Adjustments can only be reviewed by facility managers.

Chapter 49 NEMO Release notes

- If an adjustment is accepted, the user will receive confirmation, and a separate email will be sent to the User Office including optional instructions.
- If an adjustment is rejected, the user will receive notification including optional feedback.
- NOTE: Adjustment requests do not actually change charges. They are simply meant to allow users to create requests directly in NEMO, and adjustments should be handled outside of NEMO in the facility's own billing system.

Chapter 49 NEMO Release notes

Improvements

- Now displaying the creator of an access request when editing/reviewing it.
- Added stack trace for errors thrown during plugin loading.
- Discipline is now only used for projects and was renamed “Project discipline”.
- Including utility packages (vim, less) in the docker container.
- Major update of the Stanford interlock implementation with error checks for returned values. Many thanks to Dave Botsch from Cornell NanoScale Facility for the suggestion and all the help debugging!
- Navigation bar will now collapse to the “hamburger” menu (similar to mobile experience) on medium sized screens.
- Improved the notification model to allow for multiple notifications of the same type.
- Now allowing html in request description field (buddy requests, access requests etc.).
- Added default value for post usage questions.
- Added customization to hide tool usage data history for regular users.
- Staff availability can now be hidden from staff status.
- The Application identifier display name for projects can now be customized (to PO#, Project Id, etc.).
- Natural keys have been added for easier import/export of projects (by name), users (by username), accounts (by name) and any category type model (by name).

Chapter 49 NEMO Release notes

- Added Customization to make location and phone number not required when creating tools. Tool usage data history tab can also be hidden from regular users.
- Moved all policy rules into its own class.
- Regular users can now be given detailed admin permissions and they will have access to the administration if applicable.
- In detailed administration, locking/unlocking interlocks will now display errors.
- Added access requests export button (both in detailed admin and regular page).
- Added new “checkbox” type post usage question.
- Added a way to customize how the current setting for configuration is displayed.
- Added remote work customizations, with options to automatically charge area access when working on remote project, to explicitly ask if work on behalf of a user should be considered remote, and to enable/disable remote charges validation.
- Added a customization option to allow PIs to add/remove existing users to their projects.
- Added a CSV parser for REST API as well as a file import option.

Bug fixes

- Fixed project discipline not showing in project detail admin form.
- Fixed [#135](#) and more (broken links telling the admin to add model instances in detailed admin but django admin app is not installed).

Chapter 49 NEMO Release notes

- Fixed [#134](#). Thanks [r-xyz](#) for the fix!
- Fixed User office staff not being able to see access requests.
- Fixed infinite loop in authentication middleware when user doesn't have an account in NEMO.
- Fixed recurring outage across midnight not being created correctly.
- Fixed issue when reading multiple sensors at once (connection not properly closed).

Libraries

- Django 3.2.16 → 3.2.18 (vulnerability)
- cryptography 39.0.0 → 40.0.1
- drf-excel 2.2.0 → 2.3.0
- drf-flex-fields 1.0.0 → 1.0.2
- pytz 2022.7.1 → 2023.3
- django-filter 22.1 → 23.1
- Pillow 9.4.0 → 9.5.0
- pymodbus 3.1.1 → 3.2.2

49.21 **Release 4.4.1**

Bug fixes

- fixed modbus issue with new version of pymodbus.

Chapter 49 NEMO Release notes

49.22 Release 4.4.0

Upgrade notes

Support for Python 3.7 has been dropped. Python 3.8 or newer is now required:

- If you are using the docker image, it will be automatically taken care of.
- If you are installing NEMO using pip, you will need to update your version of python, as well as your start/stop services to point to gunicorn from python 3.8.

New features

- Added Safety as a new main menu item. Safety issues and Safety data sheets have been moved under this new section to provide a main Safety “hub” in NEMO.
- Added Safety items:
- It is a customizable list of Safety bullet points, consisting of a name, a description and (optionally) a list of documents.
- Safety items can be grouped in Safety categories.
- PDF and Video documents (.mp4, .ogv, .webm, .3gp) can be opened directly in NEMO (popup).
- All other types of documents will take the users to the link/download the file.
- Users can search through Safety items name and descriptions.
- In Customization → Safety, the Safety menu item can be hidden, as well as the Safety suggestions and SDS. Safety categories can be organized as flat/collapsible items all in one page, or as separate side sub-menu items.

Chapter 49 NEMO Release notes

Improvements

- Added update of os packages when building NEMO docker images, to guarantee the latest security patches and updates are installed.
- Allowing user office members to force a user out of a tool.

Bug fixes

- Fixed an issue on Chrome (Windows only) and Safari when clicking the back button after a spinner was shown would keep that spinner on indefinitely.

Libraries

- gunicorn 19.9.0 → 20.1.0
- cryptography 38.0.4 → 39.0.0
- Pillow 9.3.0 → 9.4.0
- pymodbus 2.5.3 → 3.1.1
- pytz 2022.6 → 2022.7.1
- requests 2.28.1 → 2.28.2

49.23 **Release 4.3.2**

Bug fixes

- fixed training not being recorded when click the confirm button
- fixed non technical staff not having access to staff status view options and past/future calendar
- fixed user office needing access to areas when “allow_staff_access” is set on physical access levels
- fixed user office not recognized as staff in occupancy screens

Chapter 49 NEMO Release notes

49.24 [Release 4.3.1](#)

Bug fixes

- fixed csrf token issue on tool qualification customization.

49.25 [Release 4.3.0](#)

Upgrade notes

- New User Office and Accounting Officer roles have been added. They allow a greater level of granularity in NEMO. Consequently, Staff users won't be able to edit user information or see the billing information for other users by default. To give a user any of the new roles, go to Detailed Administration → Users select the user and check the User office or Accounting officer checkbox and uncheck the Staff box. More information can be found in the feature manual.
- A cron job for access expiration email reminders needs to be enabled for the feature to work. A systemd version for docker is available in the [systemd folder](#).
- A cron job for managing tool qualifications needs to be enabled for the feature to work. A systemd version for docker is available in the [systemd folder](#).
- A cron job for managing recurring charges needs to be enabled for the feature to work. A systemd version for docker is available in the [systemd folder](#).

New features

- Added recurring consumable charges, which allows charging users for the same consumable at a given frequency. For example, charging user for renting user bins every year.

Chapter 49 NEMO Release notes

- Recurring charges can be exported (including potential errors)
 - The quantity can be forced to a certain number in customization (for example when it should only and always be just one)
 - The recurring charges can be locked so non facility managers can only assign them to user and not change the frequency or linked consumable.
 - A consumable category can be set in customization to limit recurring charges to only consumables belonging to that category.
 - Validating customers (inactive, access expired, etc.) can be deactivated for recurring charges in customizations.
 - Users can set email reminders for their recurring charges in User preferences.
- Added Tool qualification expiration to remove tool qualification from users after a certain number of days. It needs to be enabled in Customization → User. An example of the email template can be found [here](#). There are 2 separate cases that can be customized:
 - Number of days since the user last used a tool. For example, remove tools from the user qualifications if they have not used it for 6 months.
 - Number of days without using a tool since the user was trained on that tool. For example, remove tools from the user qualifications if they haven't used it in the 2 weeks after being trained on it.
 - Added Access expiration reminder email to remind users a certain number of days before their access expires. It needs to be enabled in Customization → User. An example of the email template can be found [here](#).
 - Added an optional EMAIL_USE_DEFAULT_AND_REPLY_TO option in settings.py to use the default server email for all communication and setting the reply-to of the email to the actual sender. This option is helpful

Chapter 49 NEMO Release notes

when using an email server that doesn't allow spoofing (for example a unique Gmail address).

- Added an optional USERNAME_REGEX option in settings.py to validate usernames.
- Added an optional MAIN_URL option in settings.py. This is useful when running multiple instances of NEMO, so all email links are sent to the same URL.
- Added audit log library that can be customized to track any changes in NEMO. See [setup instructions on the wiki](#).
- Added a few contributions from Cornell NanoScale Facility:
 - Added Discipline, a new configurable category that can be set on projects and users (Chemistry, Electronics etc.).
 - Added Safety trainings, a new configurable list of trainings that can be checked/unchecked for each user.
 - Added Onboarding phases, a new configurable list of items that can be checked/unchecked for each user.
 - Added user and project document upload, which can be enabled in Customization → Application and Customization → Projects & accounts.

Improvements

- Added unit_id for interlocks using Modbus and added last reply time.
- Added tooltips with tool information in the status dashboard page.
- All email templates can now use global variables like site_title, facility_name etc.

Chapter 49 NEMO Release notes

- Updated autocomplete to be either synchronous or asynchronous, the latter considerably speeding load time of pages like “Users”.
- The user search bar is now available when viewing/modifying users to facilitate switching between them.
- Consumables can now be reusable which will prevent the quantity from ever decreasing when withdrawals are made.
- Added customization in Customization → User to hide inactive user in the users page and made the modify user page go back to previous pagination page upon success. Thanks USC Nanofab for the contributions!
- Added customization in Customization → Project & accounts to hide inactive accounts, inactive projects, and to collapse the project list by default. Thanks Polytechnique Montréal - LMF for the contributions!
- Added a way to change the calendar time format in Customization → Calendar.
- Updated buttons in the entire application to have a consistent color and icon for same functionality.
- Optimized Safety Data Sheets page and added sorting by Hazard.
- Users now have the option to opt out from some of the email notifications in User preferences.
- Added Safety Data Sheets CSV export.
- Made pagination number of results per page sticky when navigating away and back. Also added an “all” option.
- Broadcast email feature now allows selecting multiple tools/areas/projects/accounts.

Chapter 49 NEMO Release notes

Bug fixes

- Fixed delayed docker container removal when stopping NEMO. Thanks [r-xyz](#) for the contribution!

Libraries

- added django-audit-log 2.2.1
- added pytz 2022.6
- cryptography 37.0.4 → 38.0.4
- django 3.2.15 → 3.2.16 (vulnerability)
- django-auditlog 2.2.0 → 2.2.1
- django-mptt 0.13.4 → 0.14.0
- djangorestframework 3.13.1 → 3.14.0
- drf-excel 2.1.0 → 2.2.0
- Pillow 9.2.0 → 9.3.0

49.26 **Release 4.2.1**

Bug fixes

- allowed for longer file names in chemical documents (in case the chemical name is pretty long)
- fixed issue with rates table not being expanded/collapsed correctly
- fixed CSS for rates table title
- fixed fullcalendar flickering when events are reloaded

Chapter 49 NEMO Release notes

49.27 Release 4.2.0

New features

- Added Safety data sheets:
 - ChemicalHazard (flammable, toxic, etc.) and Chemical objects should be added in the Detailed administration.
 - Chemical document can be either uploaded to NEMO or set with a URL.
 - Common hazard icons are available [in the resources folder](#).
 - Keywords/synonyms can be set for a Chemical and search through in the Safety data sheet page.
 - There is no direct link in the navigation bar. A Landing page choice option needs to be added for this with url safety_data_sheets. An SDS icon is available for download [in the resources folder](#).
- Added a button in the calendar to only display qualified tools for non-staff users. This feature is disabled by default and needs to be activated in the Customization page. Thx [pdessauw](#) and NIST MML for the contribution!

Improvements

- Updated style of Rate table in Tool control. The table is collapsed by default and can be expanded by default by checking the box in Customization → Rates.
- Added LDAP “username_format” property to allow for custom formatting of the username.
- Checks during login are now case insensitive for username.
- Added Staff absence note which will only be visible to facility managers.

Chapter 49 NEMO Release notes

- Non-working days will not be shown as absence on the facility manager view of staff status.
- Updated display of comments in Tool control to keep new lines.

Bug fixes

- Fixed a bug preventing rates from being loaded at startup.
- Fixed a bug when running migrate of makemigrations before database is initialized.
- Fixed a bug when authentication fails and is not sending to the correct page due to not allowing POST.
- Fixed interlock configuration not accepting 0 as coil number.
- Fixed an issue where all tools would disappear when expanding/collapsing categories and switching from Calendar to Tool control.
- Fixed a ClosureTime warning on the staff status page.
- Fixed validation for reservation questions not being updated when adding/removing a group question.

Libraries

- Django 3.2.13 → 3.2.15 (vulnerability)
- drf-flex-fields 0.9.8 → 1.0.0
- cryptography 37.0.2 → 37.0.4
- django-filter 21.1 → 22.1
- requests 2.27.1 → 2.28.1
- Pillow 9.1.1 → 9.2.0

Chapter 49 NEMO Release notes

49.28 [Release 4.1.2](#)

- Updated Django 3.2.13 -> 3.2.14 (vulnerability fix).

49.29 [Release 4.1.1](#)

Bug fixes

- fixed an issue when accessing admin area access page that would try to load all access records ever created.

49.30 [Release 4.1.0](#)

Upgrade notes To enable the new sensor data plugin:

- Add 'NEMO.apps.sensors' to INSTALLED_APPS in your settings.py.
- Add a cron job to run every minute, either calling `docker exec -it nemo django-admin manage_sensor_data` or sending an http request to `/manage_sensor_data`.

Live demo! A live splash pad demo is now available at <https://nemo.nist.gov/demo>.

You can find the instructions on how to use it at <https://github.com/usnistgov/NEMO#online-demo>

New features

- Added Sensor data plugin for temperature, humidity, gases etc.:
 - Sensor cards can be created in a similar way to the interlock cards. Currently only Modbus TCP connection is available for sensors.
 - Sensors can be added to a sensor card as well as Sensor categories to organize all the sensors.

Chapter 49 NEMO Release notes

- Sensor data can be displayed as a graph with different date ranges and data can be exported in csv file for further processing.
- Sensor email alerts can be set with a trigger condition or when no data is read for a sensor.
- The sensor dashboard will display sensor or categories as red when an alert has been triggered.
- Split customization settings into tabs for better readability and refactored it in a way that plugins can now add their own.
- Added option to make training required flag for new users optional (in customizations page).
- Added alternate email in user preferences (gear icon on top right corner in NEMO) as well as flags to decide which NEMO emails should be sent to the alternate email address.

Improvements

- Added landing page option flag to hide item from staff (visible to facility managers and admin only).
- Added minified version of most Javascript libraries to improve page load time.
- Date pickers will now follow the format set for DATETIME_INPUT_FORMAT, DATE_INPUT_FORMAT and TIME_INPUT_FORMAT for better consistency throughout the application. Remove Bootstrap datepicker in favor of more versatile datetimestructurepicker.
- Added red border on required reservation and post usage questions, and on failed validation to better spot where the error is. Updated validation checks to happen on any input rather than only on required ones.

Chapter 49 NEMO Release notes

- Added new REST_FRAMEWORK API permission: 'NEMO.permissions.DjangoModelPermissions' that allows for more granular permissions. With this permission class, users need view permission on individual models (UsageEvent, Project, Account etc.) to be able to access the data in the REST API. The only exception is for accessing billing data, which requires the special use_billing_api permission to access since no models are directly associated with billing.

Bug fixes

- Fixed issue where staff status calendar was not respecting the closure staff_absent flag (always showing closure rather than only when flag is set).
- Fixed “Cancel outage” button not showing anymore.
- Users should be logged in to access any media files. Thanks [r-xyz](#) for reporting and fixing this!.
- Fixed a chicken-and-egg situation when migrating or creating migrations.

Libraries

- Django 3.2.12 → 3.2.13 (vulnerability)
- Moment 2.10.2 → 2.29.3
- cryptography 36.0.2 → 37.0.2
- Pillow 9.1.0 → 9.1.1 (vulnerability)

49.31 **Release 4.0.0**

Upgrade notes

Chapter 49 NEMO Release notes

- In settings.py:
 - Set `DEFAULT_AUTO_FIELD = 'django.db.models.AutoField'`
 - In `REST_FRAMEWORK → DEFAULT_RENDERER_CLASSES` replace `renderer` `'drf_renderer_xlsx.renderers.XLSXRenderer'` by `'drf_excel.renderers.XLSXRenderer'`
 - If using postgres database, replace database engine `django.db.backends.postgresql_psycopg2` by `django.db.backends.postgresql`
- Some web browsers will cache old CSS/Javascript from detailed administration. If you are having issues (blank screens) in the admin section, try `Ctrl + Shift + R` or `Ctrl + F5` to force a refresh or clear your browser's cache

Improvements

- Closure alert preview and validation were added to catch potential issues before the automatic alert is created.
- Closure on staff status calendar will now display the alert content if one is set.
- Added interlock card enabled field on interlock view in detailed administration.

Interlock Modbus support

- Support for Modbus over TCP was added to provide greater flexibility and support more interlock types.

Libraries

- Django 2.2 → 3.2.17

Chapter 49 NEMO Release notes

- drf_renderer_excel 0.4.5 → drf_excel 2.1.0
- cryptography 36.0.1 → 36.0.2
- Pillow 9.0.1 → 9.1.0
- drf-flex-fields 0.9.7 → 0.9.8
- Added pymodbus 2.5.3 as new dependency

49.32 Release 3.16.0

New features

- Added export of email addresses on broadcast email page. For use outside of NEMO.
- Added option to send broadcast email using the users default email client. This only works when the list of emails is less than 2000 characters total due to limitations of the MAILTO feature. Use the export function to get around it.

Improvements

- Tool configurations can now be enabled/disabled for more flexibility.
- Added day view option for staff status page which is also the new default view.
- Added settings in customizations to control whether users and or staff members can look at past/future staff availability and what view choices users can have (day/week/month) for more privacy control.
- Added separate Staff availability categories to allow more flexibility in ordering staff in the staff status page.

Chapter 49 NEMO Release notes

- Added user preference so users can choose their default staff status view.

Bug fixes

- Fixed a bug with tool usage counter throwing an error when being updated from post usage questions. Thanks [@cnf-clark](#) for reporting it!

Libraries

- Pillow 9.0.0 → Pillow 9.0.1

49.33 Release 3.15.0

Upgrade Notes

- For the new automatic alert creation for Closures and reminder emails on last occurrence to work, a daily cron job must be added, calling either docker exec -it nemo django-admin create_closure_alerts or by sending an http request to /create_closure_alerts.

New features

- Added Staff status, a new feature on the status dashboard displaying whether staff are in/out:
 - Leave type can be customized (sick leave, annual leave, parental leave etc.).
 - Staff working days and typical hours can be set, as well as staff categories (second shift, user office etc.).
 - Only facility managers can add/edit staff absences and see the details (sick leave, annual leave etc.).
 - Regular user and staff users only see in/out status.
 - Facility managers can also export the calendar.

Chapter 49 NEMO Release notes

- Customizations available: show/hide weekends, display staff status only to other staff members, start week on Sunday/Monday.
- Week/Month view.
- Renamed PhysicalAccessException to Closure and massively updated the feature:
 - A closure can now have multiple dates (to set Labor day for multiple years in advance for example).
 - A closure can triggered an automatic alert a certain number of days prior to the closure. (5 days before Labor day for example, informing users that buddy system will be in place etc.).
 - Staff can be marked as absent in the Staff status page during a closure (optional).
 - A reminder email can be sent on the last occurrence of a closure reminding facility managers to add more if needed. (In case you set Labor day 5 years in advance and then forget to add more dates).

Bug fixes

- Fixed a bug preventing XLSX export in API.
- Fixed a bug requiring the identity service to be set in settings for qualifications to work. Thanks [rmwhite85](#) for reporting this!
- Fixed reservation details on Mobile and Kiosk only displaying times which would make it very confusing when reservations span over multiple days. Thanks [nsieb](#) for bringing this up!
- Fixed reservations losing their reservation questions when moving/resizing them. Fixes [#104](#). Thanks [jat255](#) for reporting it!

4 Libraries

Chapter 49 NEMO Release notes

- Django 2.2.26 → 2.2.27 (vulnerability)
- drf-renderer-xlsx 0.4.4 → 0.4.5 (fixes broken XLSX with manytomany fields)

49.34 Release 3.14.1

Bug fixes

- Fixed a wrong template name used in usage event details in calendar.
- Fixed another bug in custom task status. Thanks [rmwhite85](#) once more!
- Fixed date format issues in user creation and abuse pages.

49.35 Release 3.14.0

Upgrade Notes

- NEMO now requires Python 3.7 since security support for 3.6 ended last month.
- The LAB_MANAGERS list in settings.py has been replaced by a permission on users called is_facility_manager. If you were using the LAB_MANAGERS setting, go to Detailed Administration → Users and set the facility managers there after updating NEMO. Also please note that you need at least one facility manager to enable the new Access request feature.
- The qualified checkbox is now enabled by default when recording training sessions. Make sure to double check before confirming.

Chapter 49 NEMO Release notes

- The access request weekend access feature (more on this below) requires a cron job to be set hourly, calling `docker exec -it nemo django-admin send_email_weekend_access_notification` or sending a request to `/email_weekend_access_notification`.

New Features

- Added temporary access. This allows admins to give users access for a limited time. For example, giving someone weekend cleanroom access for one weekend. It is available through in Detailed Administration only.
- Added user access requests:
 - Grouping Access Requests and Buddy Requests under one common “Requests” menu item.
 - Access requests (after-hours requests) need to be enabled by checking the “allow user request” box on a “Physical Access Level” in Detailed administration and by setting at least one Facility manager.
 - Added customizations for tab title, description message, minimum number of buddies, maximum number of requests to display, and weekend access emails and cutoff day and time (more on this below).
 - Once enabled, users can submit access requests by selecting a start and end time, an access level (if multiple are enabled) and a list of buddies. Facility managers (see below) are then notified and can approve/deny the request in NEMO. Upon approval, a corresponding temporary access will be created for all users in the request.
 - The request creator and buddies will receive a confirmation email, and buddies/facility managers will have a notification badge in NEMO on the requests tab indicating there is something new.
 - Facility managers can approve/deny a request and have the opportunity to update it before approving. This allows them to change the

Chapter 49 NEMO Release notes

dates, update the description etc. before approving. This is useful if for example the request can only be approved for one day due to lack of staff on the second day, etc.

- A “weekend access” customizable email can be sent to a list of emails set in customization on the cutoff day and time set. If the email template is set, the email will be sent the within an hour of the first approved request that includes weekend time with a weekend_access value of True. If no access requests that include weekend time are approved by the cutoff day and time, the same email will be sent with a weekend_access value of false. The latter will not be sent if the cutoff day and time is not set.
- Added the facility manager role in Detailed administration → Users to replace the LAB_MANAGERS settings. Facility managers receive all tasks related updates and approve/deny access requests.
- Added “Charge note”. This is a text area field that can be set and updated after creating a Staff Charge. It will be displayed in “My usage”, “Project billing” and “Remote work” pages as well as in the API.
- The project selection name can now be customized in the “Customization” page. It will use the Django templating engine, allowing the use of things like “ project.account.name - project.name ” which would display the account name followed by the project name. This is limited to project selection lists (in reservations, logging in an area, kiosk etc.).
- A standalone reservation view was added for linking from outside of NEMO, available at /event_details/reservation/<reservation_id>/. Thanks [jat255](#) for the contribution!
- Email templates to be used in customizations were added in the [resources folder](#). Feel free to adapt them to your needs.

Chapter 49 NEMO Release notes

Improvements

- Date and time formats have been made more consistent across NEMO and follow django's format from settings.py instead of being hardcoded in certain places. Make sure DATETIME_FORMAT, SHORT_DATETIME_FORMAT, DATE_FORMAT, SHORT_DATE_FORMAT and TIME_FORMAT are set to your liking in settings.py otherwise Django's default will be used.
- Added an EXPORT_DATE_FORMAT and EXPORT_TIME_FORMAT to settings.py to allow a custom format to be used in filenames when exporting (in API, My Usage, Tool Usage Data etc.). If not set, they will default to "m_d_Y" and "h_i_s" respectively.
- Supplies/consumables withdrawals are now allowed in group post usage questions.
- Project information can now be shown and exported in "Tool Usage Data History" through a checkbox (unchecked by default).
- The qualified checkbox when recording a training session is now checked by default.
- Fixed styling issues in the Email logs feature in the detailed administration, and also updated Customization to open the content preview in a separate tab.

Bug fixes

- Fixed a bug dating back to 2018 in custom task status using primary_tool_owner instead of primary_owner. Thanks [rmwhite85](#) for noticing!.
- Fixed a bug when exporting usage where it would use UTC dates in the CSV file.

Chapter 49 NEMO Release notes

- Fixed a bug when user having back-to-back reservations would have one of them marked as missed when they were in fact already logged in to the area (from the prior reservation).
- Updated the misleading message when selecting projects for reservation. It will now only mention missed reservation fees if the `missed_reservation_threshold` field is set on the tool/area and the message will mention what the threshold actually is.
- Fixed issue when billable items would not show up in API when crossing over the period. i.e. if a charge started before the end of the month and finished the next month, it would not show up. Changed the logic to show billables by end date only.

Libraries

- Updated Django to 2.2.26
- Updated django-filter to 21.1
- Updated djangorestframework to 3.13.1
- Updated django-mptt to 0.13.4
- Updated cryptography to 36.0.1
- Updated drf-flex-fields to 0.9.7
- Updated drf-renderer-xlsx to 0.4.4
- Updated python-dateutil to 2.8.2
- Updated ldap3 to 2.9.1
- Updated requests to 2.27.1
- Updated Pillow to 9.0.0

Chapter 49 NEMO Release notes

49.36 Release 3.13.2

Bug fix

- Fixed email broadcast error when sending to users having access to an area or when sending to all users.

49.37 Release 3.13.1

Bug fix

- Fixed issue with mobile reservations breaking when the user has only one project.

49.38 Release 3.13.0

New Features

- Added support for group questions in Reservation questions.
- Added option to send an email to all registered users.
- Rest API updates:
 - Added Excel export.
To enable it, it must be added to the DEFAULT_RENDERER_CLASSES of the REST_FRAMEWORK dictionary in settings.py, like the following:
`'DEFAULT_RENDERER_CLASSES':
['rest_framework.renderers.JSONRenderer',
'rest_framework.renderers.BrowsableAPIRenderer',
'drf_renderer_xlsx.renderers.XLSXRenderer']`
 - Added billing to the browsable API page.

Chapter 49 NEMO Release notes

- Added link to the API in the Administration menu. Only visible for admins.

Bug fix

- Fixed an issue where sorting tools by name in the detailed admin section would break.
- Fixed multi email field validation issue where rendering would break when there was a validation issue.
- Fixed multiple issues with reservation calendar invite in Outlook where the organizer cannot be the attendee. The organizer can now be set in settings.py using RESERVATION_ORGANIZER_EMAIL and RESERVATION_ORGANIZER for the email and the name of the organizer, respectively. see the settings page for details.
- Made Customizations page only accessible to admins.

Library updates

- Updated drf-flex-fields to 0.9.3
- Updated Pillow to 8.3.2

49.39 **Release 3.12.2**

Bug fix

- Fixed issue with badge number not working on area access pages (already logged in and choose project pages) and kiosk “Go back” button.

Chapter 49 NEMO Release notes

49.40 **Release 3.12.1**

Bug fix

- Fixed issue with badge number not working in area access if they start with 0 or have letter in it.

49.41 **Release 3.12.0**

New Features

- Added export of tool tasks and comments history to a text file. Located in Tool Control -> Details -> Task and comment history.
- When creating recurring scheduled outages, the number of days in advance can now be customized in the Customization page.

Improvements

- In post usage group questions, the “Add” button text can be customized using property group_add_button_name
- Changed display of upcoming reservation on Kiosk so they don't need to be expanded to cancel. Clicking on a reservation will go to the corresponding tool.

Bug fix

- Fixed a bug in new version of Chrome where extra scrollbars would appear and flicker on the calendar page.
- Fixed an issue with recording training sessions, where a staff member who is also a tool superuser would not be able to record training on tools he is not superuser for.

Chapter 49 NEMO Release notes

- Fixed issue when double clicking on task/comment creation/update would create multiple instances.

Vulnerabilities

- Updated drf-flex-fields to version 0.9.1

49.42 Release 3.11.0

New Features

- Added reservation questions that are asked when a user makes a reservation. They can be added in the detailed admin section. Reservation questions can be set for tools and/or areas and can also be limited to specific tools, specific areas and/or specific projects.
- Added Areas, Resources, Staff Charges and Training Sessions to Rest API.
- Added conditional nesting of related objects in Rest API as well as cherry picking of fields returned using [drf-flex-fields](#) (see link for details).
- Added a projects page for projects Principal Investigators who are not staff members. This allows them to see project information and users.

Improvements

- Added filtering by display and filtering by areas in Reservation admin page.
- Added filters to Rest API (for a complete list, see [NEMO/views/api.py](#)).
- Added a “pinned” field to news to have certain news stay at the top of the feed.

Chapter 49 NEMO Release notes

- Added optional start date for both projects and accounts. Added optional account type for accounts.
- Improved dynamic form (JSON formatted questions):
 - Added red asterisk when a field is required.
 - Added “title_html” attribute to display html in title.
 - Added “help” attribute (displaying help text for inputs).
 - Added “maxlength” attribute to textbox questions (max characters allowed in input).

Bug fix

- Fixed issues with reservation dates in ical invites not using UTC times.

49.43 Release 3.10.0

New Features

- Added “All tools”, “All areas” and “All tools & Areas” overview options in the calendar. Thanks [bpedersen2](#) for the contribution.
- Added tool superusers who are allowed to train users on tools. They can be added in the detailed admin section, either in the user section or the tool section.
- Added a way to restrict projects to only certain tools, regardless of the users qualifications. This can be done in Detailed Administration/Project. A project restricted to certain tools will:
 - allow reservations and usage of those tools only.
 - allow reservations and login on area that this tool requires.
 - allow staff charges on those tools and areas they require.

Chapter 49 NEMO Release notes

- allow training on those tools only.
- Added a checkbox on projects to allow consumable withdrawals or not. Consumable withdrawals set through post usage questions are always allowed.
- Added warning threshold and warning email addresses for Tool usage counter. Added corresponding email template in customizations.
- Added an area reservation ending reminder email 30 and 15 minutes before reservation ends and user is still logged in.

Improvements

- Changed user's badge number field to string (rather than integer) to get around integer max number but also to provide better flexibility with card readers.
- Added option to clear the list of consumable withdrawals.
- Added tools the user is a backup owner on, in detailed administration user page.
- Improved calendar support for making and cancellation reservations. Thanks [bpedersen2](#) for the suggestion.
- Moved the set PI on project feature to Detailed Administration only.
- Now sending task updated email when a task is cancelled.

Bug fix

- Fixed issue where writing in a post usage question of type textarea would not update the "stop using tool" button.
- Fixed layout issues on pagination pages on mobile devices.

Chapter 49 NEMO Release notes

- Fixed an issue when multiple coincident reservations could be created at the same time.
- Fixed NEMO `install_systemd_service` command.

49.44 **Release 3.9.2**

Bug fix

- Fixed badge number max digits issue by making it a char field instead of integer. It should also provide more flexibility with badge readers.

Security vulnerability

- Fixed badge number max digits issue by making it a char field instead of integer. It should also provide more flexibility with badge readers.

49.45 **Release 3.9.1**

Bug fix

- Fixed a bug after updating LDAP library. TLS is not needed anymore since the LDAP connection security is set on the server connection through `use_ssl` (and it actually raises an error if set on an already secure server connection).

49.46 **Release 3.9.0**

New Features

- Added the ability to set Principal Investigators on projects. PIs are able to see all activities for the projects they manage in the “My usage” page,

Chapter 49 NEMO Release notes

- Added exporting of data in CSV format from “My usage” page,
- When forcing a user out of a tool, if there are any required unanswered post usage questions, the required questions will be sent in an email to the user, lab managers, tool owner and backup owner, and to the staff member who forced the user off. Blank answers are set in the usage history record until edited in detailed admin,
- Added float post usage question (with optional precision property) and textarea (with optional rows property).
- Added tool documents. (thanks to [4D Labs](#) for the contribution).

Improvements

- Added options for last 10, 25, 50 and 100 records and filtering by users in tool usage data history.
- Added filtering by tool in Tool usage counter admin page.
- Improved the import of plugin URLs to be more consistent.

Bug fixes

- Fixed an issue where areas that don't require a reservation would not show up when using staff charges.
- Updated to latest versions for all dependencies.

49.47 [Release 3.8.0](#)

New Features

- Added list views for Accounts and Projects and Users pages (thanks to [4D Labs](#) for the contribution).

Chapter 49 NEMO Release notes

- Supplies/Consumables withdrawal can now be done in bulk. A flat list is displayed, and users can add supplies to their cart, and checkout all the items at once,
- Added a way to bypass interlock errors on both desktop and kiosk. If there is an error with an interlock command, the user will now be able to:
 - enable anyway (so that time tracking can still take place - when staff can override interlocks manually)
 - try again
 - cancel

The “enable anyway” option can be turned on or off in customizations, and the error messages for both tool and door interlock failures can be customized as well.

Improvements

- Billing pages (billing and project billing) will now redirect to usage/project usage if billing service is not defined or not available.
- Added notification message when post usage questions are linked to consumables/supplies withdrawals so that the user is aware that they are being billed for those,
- Added 11:59pm time option for access level exception (end of the day).
- Updated resources page so resizing would not mess with the layout.
- Made required tool fields bold and capitalized in detailed admin for consistency.

Bug Fix

- Fixed issue with upcoming reservation showing when delayed logoff is in effect (#60).

Chapter 49 NEMO Release notes

- Fixed an error when creating a user would fail if identity service was not defined.
- Fixed an error when adding access level exception with blank start or end time would break (added validation).
- Added locking mechanism to enable/disable tools and area login to prevent race condition (enabling the same tool at the same time - through js or “double click”).

Security

- Updated dependency version of cryptography library (due to vulnerability in previous version).

49.48 **Release 3.7.0**

New Features

- When a tool requires an area access, area access time will be charged when staff use tool for a remote project (so staff time, tool time and area time are all started at the same time).
- Staff charge for area access will stop when staff users log out of any area.
- Added virtual keyboard for Kiosk text post usage questions.
- Added keypad for delayed logoff on Kiosk.
- Kiosk timeout will now reset on user input.
- Added a way to contact other users from reservation details and to contact the current user of a tool on tool control page.

Chapter 49 NEMO Release notes

- Added the Buddy Board, a simple message board for buddy requests:
 - At least one area need to be set to “allow buddy system” in detailed administration for this feature to be active.
 - Users will be notified of new buddy requests with notification badge number on menu item (can be turned off in user preferences).
 - Users will be notified by notification badge number and via email when somebody also replies on a request they replied to (can be turned off in user preferences).
 - A disclaimer can be set in customizations. Use it to specify special instructions or rules for buddy system.
 - Buddy requests expire at the end of the day on their end date.
 - Only users who have completed training, have an active project and have access to the area can reply.
 - A news story will now be published when a new NEMO release is installed (with links to the release notes and the feature manual). This feature can be disabled by setting `NEW_VERSION_NEWS = False` in `settings.py`
 - All emails sent by NEMO will now be logged for audit purposes and accessible in the detailed administration. If you are a developer, make sure to use the `send_email` function available in `utilities.py` to benefit from this feature.

Improvements

- News stories can now include HTML tags (link etc.).
- Added validation for physical access exceptions in detailed admin (end date must be later than start date).

Bug Fix

Chapter 49 NEMO Release notes

- Fixed a bug where project usage page was only showing results for the current logged in user.
- Fixed a bug on Kiosk when the keypad would stay open on Kiosk timeout.

49.49 Release 3.6.0

New Features

- Added “dropdown” type for tool post usage questions.
- Added “group” type post usage question. This allows to create groups of questions that can be repeated. For example, when a user uses multiple processes on a tool, and we want to collect information about each one. More details can be found on the feature manual.
- Added “Usage Data History” tab in tool control, which displays the history of answers to post usage questions. The data can also be exported to CSV.
- Added Tool usage counters:
 - They are counters linked to a “number” type post usage question and keep a running total of some user inputs.
 - They can be added in the detailed administration and NEMO will check that the post usage question exists in the corresponding tool (with the correct type).
 - Counters are displayed in the tool summary page.
 - Counters can be reset by staff members. A comment will be added to the tool and an email will be sent to LAB_MANAGERS if that setting is enabled.

Chapter 49 NEMO Release notes

- For example, you can use it to keep track of total etch time for maintenance purposes etc.
- Added a new setting in customization to display current time indicator in the calendar.
- Added Physical Access Exceptions which allows to set specific exceptions when access levels will be denied. This can be used for holiday closures, understaffed times etc.

Improvements

- Area reservations can now be extended even while user is logged in the area (but not moved or cancelled).
- Updated calendar area login/logout buttons to be shown only when relevant (instead of being grayed out if a tool is selected for instance).
- Updated billing/usage search to use Bootstrap date picker instead of pickadate.
- Updated validation on post usage questions to check that consumable exists with the correct name, and that required attributes are provided.
- Added management commands to run timed services. (you can now use `manage.py` or `django-admin` to run timed services actions).
- Added keypad for answering post usage questions of type number (only on Kiosk).

Bug Fixes

- Fixed an error when using the search feature in physical access log (in Detailed Administration).
- Fixed excessive load time when selecting a reservation in Detailed Administration.

Chapter 49 NEMO Release notes

- Fixed [#43](#) unique constraint violation in Postgres, thanks to [bpedersen2](#).

Security

- Updated dependency version of cryptography library (due to vulnerability in previous version).

49.50 Release 3.5.0

New Features

- Added a way to link contact information to an actual user (through Detailed Administration\Contact Information). When both are linked, in Tool Control details page, the contact information will be displayed (instead of simply the email) of the tool owner or backup owner.

Improvements

- Area reservation policies: user cannot cancel area reservation while logged in that area during that reservation. Also, users won't be able to cancel or move an area reservation when they have tools reservations that require that area reservation.
- Added post usage question validation and better error message for required attributes.
- Consumables can now only be withdrawn if the post usage question is of type "number".

Bug Fixes

- Fixed a bug preventing tool synchronization feature to work.
- Fixed a bug in tool admin page, when missing required attributes of post usage questions would completely break the page.

Chapter 49 NEMO Release notes

- Fixed a bug where selecting Facility Usage in calendar view would display ALL tool usage even when selecting a particular area.
- Fixed a bug when a tool needed to be shutdown and the wrong email was sent to users.

49.51 **Release 3.4.0**

New Features

- Added the ability to create more badge reader configuration in detailed administration. When using the Kiosk or Area Access, add `?reader_id=<reader_id>` to the URL to select a badge reader configuration.

Improvements

- Added ability to search by user in project billing.
- Added user information on Usage Events in usage page.
- Hiding project billing if billing service isn't defined.

Bug Fix

- Fixed an error when not all areas would show up on the email broadcast page.
- Fixed out of time email being sent when customer has back to back reservations.

49.52 **Release 3.3.0**

New Features

Chapter 49 NEMO Release notes

- Added service personnel to NEMO: service personnel can access **authorized** areas without having a reservation and use **qualified** tools even when shutdown or during outages.
- Added checkbox to count service personnel in area capacity or not.
- Added supply reminder email: a reorder email will be sent when supplies fall below the defined threshold.

Improvements

- Improved the staff charges page to show more details: customer being charged staff time, area access and tool usage on behalf of that user.
- Improved resources page to be easier to navigate. Added a resource details page where the user can schedule an outage and modify the resource availability.

Security

- Updated Pillow library to latest stable version.

Bug fix

- Reservations were not marked as missed if the email template wasn't defined. Fix it so that reservations would be marked as missed regardless.

49.53 **Release 3.2.7**

Bug Fix

- Fixed a broken link when selecting tool on mobile.

Chapter 49 NEMO Release notes

49.54 **Release 3.2.6**

Bug Fix

- Fixed an issue in the kiosk where upcoming reservations would include area reservations and trying to display tool_id would fail.

49.55 **Release 3.2.5**

Bug Fix

- Fixed an issue with platform specific formatting (was causing issues on Windows).
- Fixed an issue when enabling a tool would not work if the user id contained a specific number.

49.56 **Release 3.2.4**

Bug Fix

- Fixed an issue with overlapping reservations not being counted correctly towards capacity.

49.57 **Release 3.2.3**

Bug Fix

- Fixed a small UI issue where calendar/tool control would not show up correctly when impersonating.
- Fixed an issue where Jumbotron would try to show tool usage info when no tools are set up.

Chapter 49 NEMO Release notes

49.58 [Release 3.2.2](#)

Bug Fix

- Fixed an issue with impersonating (couldn't go back in some conditions).

49.59 [Release 3.2.1](#)

Bug Fix

- Fixed an issue when `rest_framework` isn't installed.

49.60 [Release 3.2.0](#)

New Features

- (**Administrators only**) Added the ability to impersonate other users. Located in the administration dropdown menu. You'll need to add 'NEMO.middleware.ImpersonateMiddleware', to `settings.py` for this to work.
- Default user reservation preferences can be overridden in `settings.py` with `USER_RESERVATION_PREFERENCES_DEFAULT = True`.

Bug Fix

- Fixed a bug where access usage was not showing when clicking on areas in sidebar.

Improvements

- Removed hard coded URLs which cause issues when deploying using subpath.

Chapter 49 NEMO Release notes

- Added success message when saving user preferences.
- Fixed authentication issues when using multiple authentication backends (especially when mixing pre-auth backends and backends using login page).

49.61 **Release 3.1.2**

Bug Fix

- Fixed an issue when staff cancels another user's reservation and the email is not sent to the additional reservation emails set on the area.

49.62 **Release 3.1.1**

Re-releasing 3.1.0 as 3.1.1 to fix docker tag issue.

49.63 **Release 3.1.0**

New Features

- A reservation email (or a list) can now be set on areas. Any reservation created or cancelled will be sent to that email with an .ics calendar invite attached (in addition to the user).
- An abuse email (or a list) can now be set on areas. When a non-staff user overstays (reservation expired but still logged in the area) an email will be sent to that email (in addition to the user).

Improvements

- Now using foldable trees in views where areas can be selected (self login, area access login, and physical access in user form)..

Chapter 49 NEMO Release notes

- Added email previews and link to download current content in customizations.

Note For the abuse and reservation emails, NEMO will send the emails “all the way up the tree”. So if you have a setup where Campus contains Buildings which contains Offices, then when a reservation is created in an office, the email will be sent to the email for the Office, and the email for the Building (if set) and the email for the Campus (again, if set) etc. same goes for overstays.

49.64 **Release 3.0.1**

Bug Fix

- Fixed a bug when counting occupancy.

49.65 **Release 3.0.0**

NEMO 3.0.0 is here with area reservations!

Before Updating

- Add mptt to INSTALLED_APPS in settings.py.
- Add timed services call to url /email_out_of_time_reservation_notification every minute.
- If you plan on using area reservations, update reservation email templates to check whether the reservation item is a tool or an area. reservation.tool, reservation.area or reservation.reservation_item and reservation.reservation_item_type can be used for that. (emails to update area: reservation_reminder_email, reservation_warning_email, missed_reservation_email, cancellation_email, reservation_created_user_email, reservation_cancelled_user_email).

Chapter 49 NEMO Release notes

- If you plan on using area reservations, update `unauthorized_tool_access_email` to use the new type variable. It can be either 'reservation' when a user tries to use a tool without a reservation or 'access' when a user tries to use a tool without being logged in to the required area.

New Area Features

- Added the ability to make reservations for Areas that have `requires_reservation` set to True.
- Added icon on tools in the sidebar when they require access to an area that requires a reservation.
- Tools cannot be reserved until a reservation is made on the required area (area reservation needs to exist at the start time of the tool reservation).
- Added Area capacity and policy rules for area reservations. Area capacity is checked when making reservation and logging in, parent area capacity is also checked. (Capacity can be set on buildings or campuses that have other areas in them as well).
- Warning will be shown to user when making a reservation if `reservation_warning` is set on an area.
- Added categories to area.
- Added `count_staff_in_occupancy` flag on areas. If unchecked, staff users will not count.
- Added customization setting to display all areas or only areas the user has access to.
- Access levels can now be set directly when creating the access level.
- Access level can be given on parent areas (i.e. Buildings).

Chapter 49 NEMO Release notes

- Outages can be scheduled on Areas as well. Can also be set on parent area through the detailed administration.
- Added tooltip showing all users logged in an area.
- Added ability to log in and out of areas directly from the calendar view (enable with setting in customization).
- Logged in users without a reservation will be shown in red on status dashboard.
- Area reservation are shortened when user logs out.
- Added ability to email users authorized to access an area or parent area (building).
- Displaying scheduled outages and unavailable resources for areas in sidebar.
- Added mobile calendar area reservations.
- Added email to be sent when users are out of time (logged in area but reservation expired). A grace period can be set in area.

49.66 **Release 2.3.4**

Bug fix

- Fixed a bug preventing disabling tools from kiosk.

49.67 **Release 2.3.3**

Security vulnerability

- Updated django version.

Chapter 49 NEMO Release notes

49.68 [Release 2.3.2](#)

Bug Fix

- Fixed a bug with reservation warning.

49.69 [Release 2.3.1](#)

Bug Fix

- Fixed a bug with facility usage events not showing in calendar.

49.70 [Release 2.3.0](#)

Before Updating

- Replace 'NEMO.context_processors.device' with 'NEMO.context_processors.base_context' in context_processors in settings.py.
- Rename media file nanofab_rules_tutorial.html to facility_rules_tutorial.html and update form in file to post to facility_rules URL.
- Rename media file nanofab_rules_tutorial_email.html to facility_rules_tutorial_email.html.

New Features

- Added a reservation warning (number) field to Area. A “Busy time” warning will be displayed when reserving a tool in that Area when there already are a greater number of users with reservations for that same area. (This can be used separately from the area capacity).
- Added a Boolean field in area to decide if staff should count towards max capacity. Updated pages to show a separate staff count if unchecked.

Chapter 49 NEMO Release notes

- Post usage questions now support number type and min, max and pattern attribute.
- Post usage questions preview has been added as well.
- Consumable withdrawal now subtracts from quantity.
- In email page, subject and content are now required and the preview can now be updated before sending.
- Added area access record in remote work for staff charges.
- Self login button will now be shown all the time when enabled from customization. Errors will be displayed when user cannot login (rather than hiding the button).
- User type isn't required anymore. Confirmation of user creation/update has been added and another safely deactivate user link was added next to the active checkbox.
- The facility name can now be configured from the customization page. Thanks [dsbarth](#) for the original code!
- The site name can also be configured from the customization page.
- The calendar view can now be configured from the customization page (default view, first day of the week, start of the day, column date format for day, week, and month views). Thanks [sbonaime](#) for the suggestions and help!

Improvements

- Added a spinner in tool control page when waiting after clicking on tools.
- Past outages aren't shown on scheduled outage page anymore.
- Added staff charges to billing api. Added detailed information for items.

Chapter 49 NEMO Release notes

- Made identity service optional in settings.py.
- Made no_header feature sticky (per session): use parameter no_header=True in page URL to use NEMO without header bar, use no_header=False to turn it off.

Bug fixes

- Added consumable withdrawal on Kiosk after answering post usage questions.

49.71 [Release 2.2.3](#)

Bug Fix

- Fixes [#32](#) (mix up between access levels and areas in area access record page).

49.72 [Release 2.2.2](#)

Bug Fix

- Fixes [#33](#).

49.73 [Release 2.2.1](#)

Bug Fix

- Fixes [#32](#)

Chapter 49 NEMO Release notes

49.74 Release 2.2.0

Improvements

- Improved LDAP settings to allow users to specify port, bind credentials, dn search and more.
- Improved interlock implementation interface, allowing to validate both interlock card and interlock objects.
- Updated tool autocomplete results to have better spacing.
- Updated Jumbotron to not display areas when none are defined.

New Features

- Users can now change the project on an upcoming reservation.
- Added comments that only staff can see (and create).
- Added ProXR interlock implementation (contribution by [4Lowe](#) at the Minnesota Nano Center).
- Added rates to customizations. Labs can now upload a json file containing rates for tools.
- Added authorization failed to customizations. Labs can personalize the error message shown when login failed.
- Added jumbotron watermark to customizations.
- Made tasks and comments searchable.
- Added notification icon and statement when scheduled non required resource is not available.
- Added tool config history tab (in tool control).

Chapter 49 NEMO Release notes

- Added max capacity for areas.

Bug fixes

- Fixed an issue where staff needed to select a project when making reservations on desktop site (didn't need to in mobile). Now it doesn't ask for project either way (staff are not charged for missed reservations, so no projects needed).
- Fixed a few typos here and there.

49.75 Release 2.1.1

Bug Fix#24

- Fixed error when image was being resized and removed then saved again (when no changes were made on the file).

49.76 Release 2.1.0

New Features

- Added Tool image, serial and description. Thanks [sbonaime](#) for the contribution.
- In Kiosk, categories and tools that a user is not qualified to use will be grayed out.
- Added checkbox in Physical Access Level to grant access to staff without have to do it explicitly.
- Added categories to alerts, and updated alerts to keep them after they are deleted or expired.

Chapter 49 NEMO Release notes

- Only showing visible tools on resource pages.

Improvements

- Updated Ldap authentication to provide better logging and not require certificate.
- Updated NEMO's configuration to work without django admin installed.
- Added version number to Jumbotron, Kiosk and Area Access pages.
- LAB_MANAGERS will now receive an email when a task is created (not just updated).
- Added training sessions to billing API.
- Updated plugin feature so that URLs are automatically added when plugin name starts with 'NEMO'.
- Added name to interlock cards.

Bug Fix

- Fixed user history when history item had been deleted.

49.77 **Release 2.0.1**

Bug Fix

- Fixed wrong migration filename.

49.78 **Release 2.0.0**

NEMO 2.0 is here!

Chapter 49 NEMO Release notes

This major release is focused solely on internal improvements and library updates. no changes have been to features or user interface.

Plugin Development

- A big effort has been made to facilitate plugin development in NEMO. See the [Plugin Development](#) wiki page for detailed instructions and examples.

Improvements

- Updated to Django 2.2 (LTS version with extended support until April 2022), requests 2.22, django rest framework 3.11, and to latest version of all the other libraries (cryptography, django-filter, ldap, pillow and dateutil).
- Added JSON validation for post usage questions. Thanks [sbonaime](#) for the contribution!

Before Updating The Kiosk and Area Access features of NEMO have been moved into internal plugins. If you were using them, you'll need to add them to INSTALLED_APPS of your settings.py file:

- 'NEMO.apps.kiosk',
- 'NEMO.apps.area_access',
